THE JEWELERS' CIRCULAR

WITH WHICH ARE CONSOLIDATED

THE HOROLOGICAL REVIEW,
THE JEWELERS' WEEKLY.
THE JEWELERS REVIEW

Copyright 1910 by
The Jewelers' Circular
Publishing Company.

11 John St., Corner Broadway, New York.

Entered as second-class matter at the New York, N. Y., Post Office.

42nd Year. WEDNESDAY, FEBRUARY 2, 1910 Vol. LX., No. 1.

An Old Crown of Abyssinia.

ALVIN SILVER

The Flanders Pattern

STERLING SILVER 925/1000 FINE

This is a comparatively new pattern, it has been on the market only a short time, but has become one of our most popular patterns, it is suitable for all occasions, always appropriate and in good taste. Sufficiently ornate to relieve the severity of plainness and a pattern one does not tire of. It is of generous weight but moderate in price, it is made in the full line of fancy pieces, ounce goods and cutlery with either French Gray or Bright Finish.

Write us for prices and further particulars.

ALVIN MFG. CO.

No other Watch Case that we, or anybody else, ever made has reached the popularity that FAHYS PERMANENT CASE has attained.

Our 12-Size Thin Model is most appropriate for Evening Dress.

JOSEPH FAHYS & CO.

BOSTON NEW YORK CHICAGO SAN FRANCISCO

A BRIGHT PROSPECT

A bright prospect is before the retail jeweler who buys his diamonds of us, because then he has his diamonds at the lowest possible prices. He is also sure the stones are exactly as represented.

Consequently no competitor can sell equal goods for less, so his chances of selling are greatly increased.

"What Ye Sow Shall Ye Also Reap"

is a truism spoken over 1900 years ago. We haven't been in business quite that long, but 35 years of them have been agriculturally employed in making "The Desert Blossom as the Rose," and during this period of **Sowing Activity** we have never changed the Seed.

The Sower enables you to draw your moral conclusions, but your commercial instincts are served best in explaining that sowing seeds of **Money's Worth, Top-Notch Prices, Accurate Valuations** and **Quickest Returns** in the field of Old Gold, Silver, etc., brings yearly its harvest from the furrows of **Wide-Awake Jewelers.** Such a policy reverses the ordinary methods adopted in the buying up of Old Gold, Silver, Filled Cases, Plated Jewelry, etc. These are the seeds we have been sowing for 35 years, and what we reap is a harvest of friends and their friends' friends.

We return shipment in same condition as received, at our expense, if our offer is not satisfactory.

The Sensation of the Age

WE DO NOT IMITATE—WE ORIGINATE

Here's a System Which NEVER Fails to Bring Large Returns

A Catalog compiled by us will prove an invaluable asset in your business.

We are the sole originators of our exclusive Catalog plan for the Retail Jeweler.

We employ only the highest priced men who know how to build a Catalog or illustrated Circular that will sell goods.

We are not new at it—this is our twenty-fifth year.

STORE OF CADY & OLMSTEAD JEWELRY CO., KANSAS CITY, MO.

KANSAS CITY, Mo., Jan. 17, 1910.

(Copy of original letter.)

The Arnstine Bros. Company, Cleveland, Ohio:

Gentlemen—In reply to your letter of December 31, asking our opinion of the Catalog issued by you, take pleasure in saying that this is the "Sixth Annual Catalog" gotten up by you, and we believe an improvement over all others. Our mail order business is improving each year and we attribute much of this increase to your valued catalog. The goods are nicely illustrated, printing good and the cover beautiful. It is a business getter.

Yours truly, CADY & OLMSTEAD JEWELRY CO.,
Per E. A. Hosier, Treasurer.

The above is only one of many letters we are receiving every day.

It is the best evidence we can furnish that your business will be benefited by adopting our system.

We are rendering this service to others—why not let us help you in your struggle for supremacy?

Samples furnished upon request

We deal only with the legitimate jeweler and as a rule sell only one in a city.

15, 17, 19 MAIDEN LANE, NEW YORK

LONDON—PARIS

BLACK OPALS

We desire to inform our patrons that we can cut these beautiful gems to order in all the various sizes and shapes, and as we have a very large amount of this material on hand we are enabled to fill all orders promptly, no matter how large they may be.

GARNETS—AMETHYSTS—TOPAZ

Will rank among the stones most in demand for the coming year. We have supplied ourselves with an unlimited quantity of the same, in all sizes and shapes.

HIMALAYA PRODUCTS

We wish particularly to draw attention to our TOURMALINE, TURQUOISE, TURQUOISE MATRIX, CHRYSOPRASE. The shipments lately received from our mines have proven to be far beyond even our own expectations, and we are able to place same on the market at a very low figure. They will certainly bear the closest inspection as to quality and color, as they are indeed way above the average, and we will cut same in all sizes and shapes.

The Japanese Cultured Pearl

The Japanese Cultured Pearl

Of the many wonders of the Orient, there is none more fascinating than the Japanese Cultured Pearls.

Imagine the Pearl-Oyster bearing its precious product at the command of man; yielding a gem, which in the beauty of color, in the charm of its soft, tender irridescent luster; harmony of shape and form, rivals with the finest specimens of the Oriental pearl.

It is the marvelous ingenuity of the Japanese that mastered the art of harnessing the Oriental Pearl Bearing Oyster, thus making the supply of this most admired of all gems not a matter of mere chance, but of the preconceived action of the pearl cultivator.

In other words, we make the Pearl-Oyster work for us, producing this exquisite gem in a manner that renders the possession of the finest specimens a possibility, not only for the wealthy, but also for the pearl lover of even the most modest means.

Hence — its unequaled popularity.

Hence — its unqualified demand.

We manufacture badges for all occasions

We manufacture badges for all occasions. These goods afford you, Mr Retail Jeweler, an excellent opportunity to increase your sales with but little effort. The work is done largely after the regular business hours, when your time is not as valuable. This year there will be an unusual number of Conventions and Conclaves. Why not secure the local order for exchange badges or other souvenirs?

In working up this class of business we can help you. Write us the details as to the quantity and quality of badges wanted, and for what occasion they are intended, and we will send you sketches and samples, and give you the benefit of our experience in the field.

SIMMONS CHAINS

—Vest and Lorgnette

The trade at large is pretty fully informed regarding Simmons Chains—their quality and dependableness, their salableness and satisfactory wear.

There is one point, however, which should be emphasized strongly — the immense variety of styles and designs.

Simmons Chains are made in every sort of link and pattern needed to satisfy all tastes and requirements—an obvious advantage, enabling the jeweler to select from a *single line* an assortment of patterns certain to suit all classes of chain buyers.

Another point to remember in connection with Simmons Chains, is, they are carried by leading jobbers throughout the country and thus may be readily and quickly obtained by jewelers everywhere.

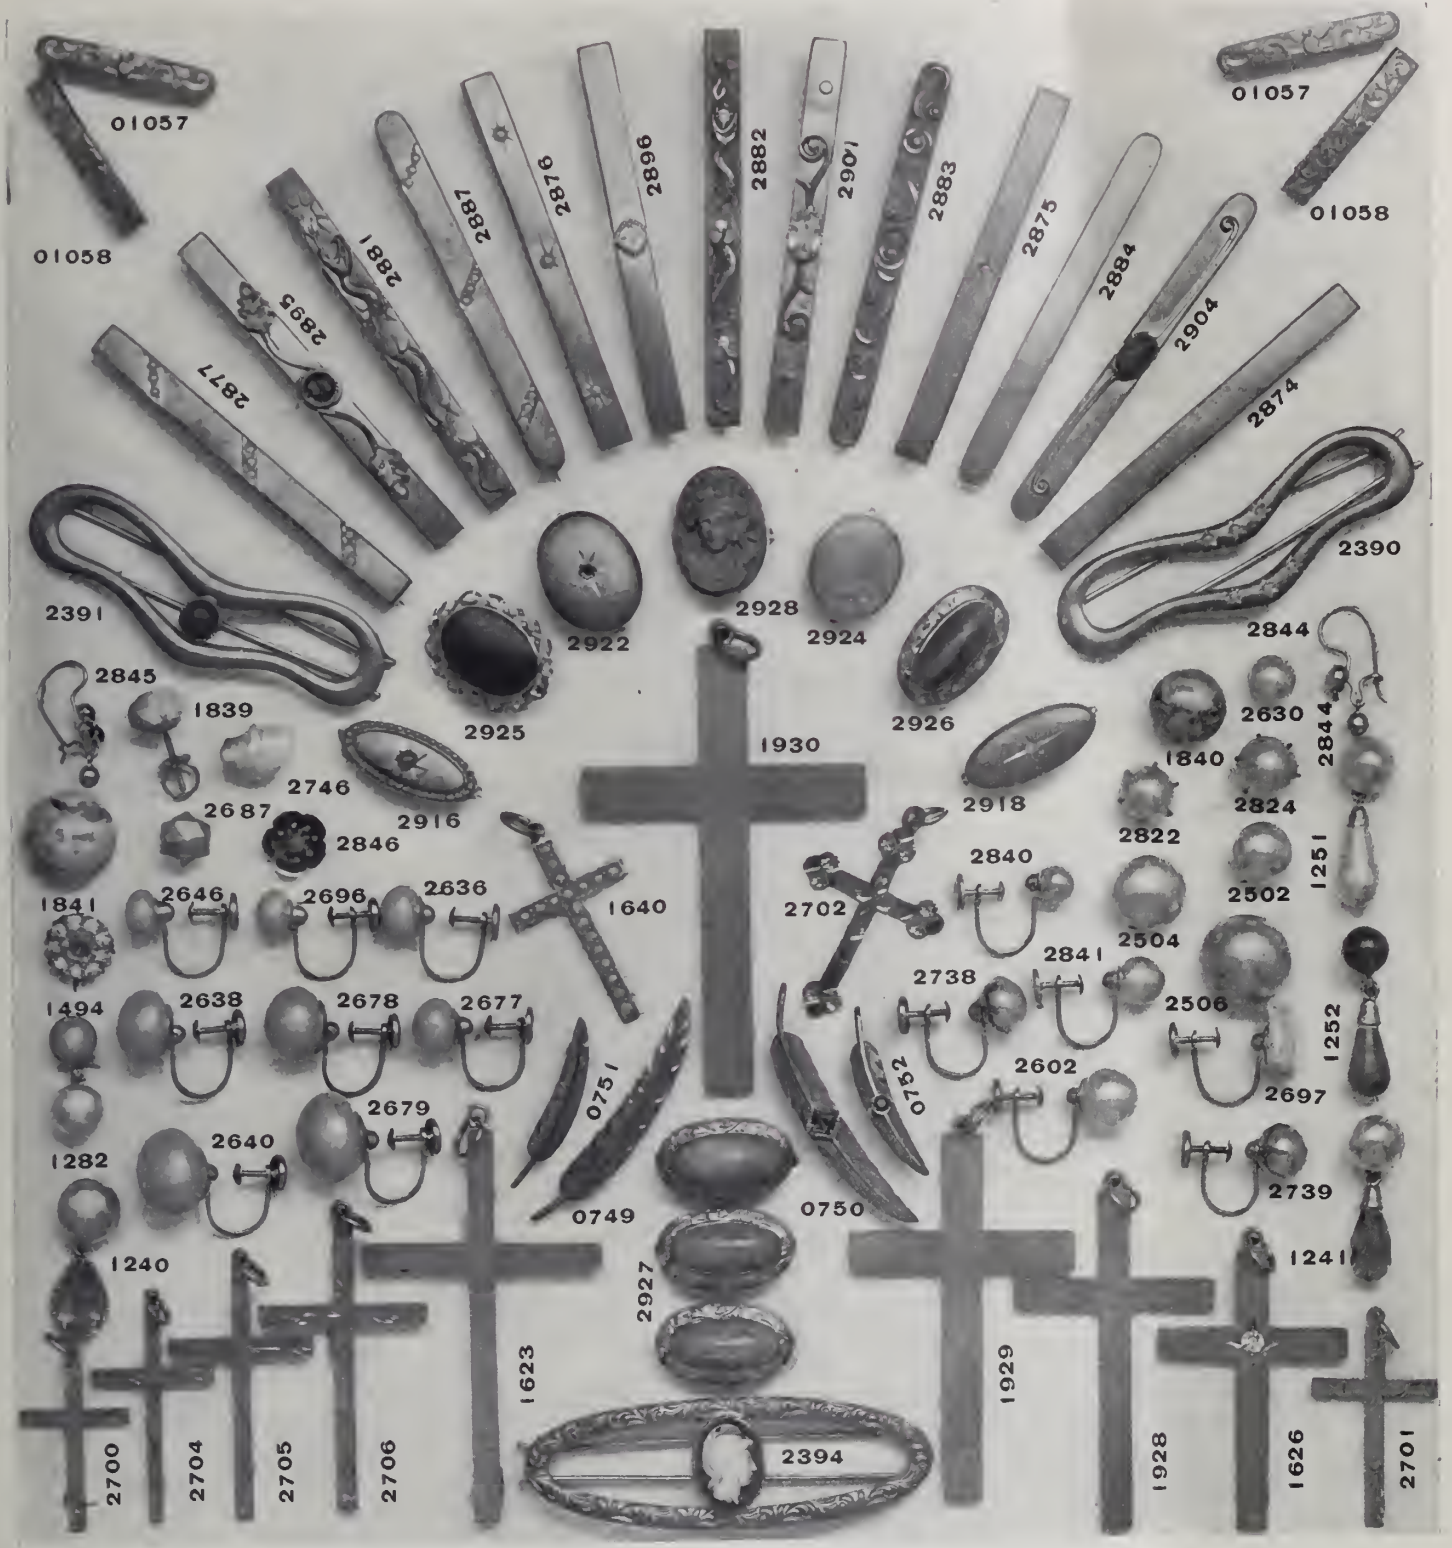
1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two million have mesh bags. **We** must supply the other forty-eight million with machine-made mesh bags.

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than used on hand-made bags, and machines harden it still more in working, making wire **stiff and strong,** no **rough joints to catch,** and wear the dress. Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** other **so-called solderless** frames have joints or some parts soldered.



We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

Manning-Bowman Coffee Percolator

PERFECTED "NEW CONSTRUCTION"

Starting with *cold water,* through its automatic circulating process, you will have perfect coffee, near the boiling point, in a few minutes. It also works equally well when starting with hot water. By this method the coffee is never boiled, but is distilled, which is *the secret* of making delicious coffee. The GLASS COVER is so constructed that it *will not break* while in use. This important feature is not possessed by percolators of any other make.

COFFEE GOODNESS IS IN THE MAKING

The choicest blends of coffee can be spoiled in the making and any coffee can be made a clear healthful beverage if prepared in the

MANNING-BOWMAN PERCOLATOR

No. 8293. SECTIONAL VIEW

WHAT WE CLAIM

Simplest in construction. Easiest to care for.

No complicated parts to clog or get out of order. Has no valves to foul and the pocket underneath the percolating tube is made large so that it can be easily cleaned.

The MANNING-BOWMAN Process not excelled by any known method for preparing coffee of the most delicious flavor.

TO ATTACH

Simply pass the knot through the larger portion of the slot, as shown in cut above,

then draw to the smaller hole, as shown in the cut.

Dennison's Watch Repair Tag

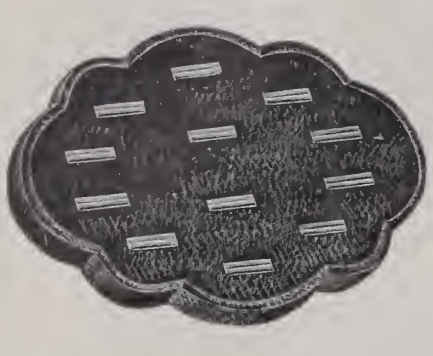
with patent slot, as illustrated, and printed with dealer's name. $2.00 per M.

The latest and most improved method of marking repair jobs.

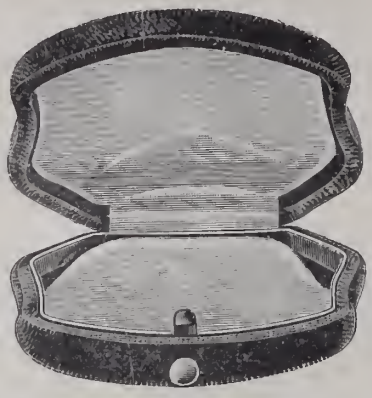
Dennison's Watch Repair Tag

printed with dealer's name and with patent slot, as illustrated. $2.00 per M.

A time-saver, an easy dentifier and a neat advertisement.



Note our new patent slot—big enough for the knotted string to slip through —and the smaller hole above — ***not*** big enough for the knot to escape. In these lie the secret of the newest, most complete and uniformly approved tag for marking watches to be repaired. On ordinary Repair Tags the string is too long (the tag becomes entangled with other tags on the board), the process of attaching is slow, and the tag is often cracked in the operation. Dennison's Tag is easily attached, the knot cannot pull through the hole and the tag hangs just as you want it. Also, the stock is strong and of good color, the printing perfect and string the best Sea Island.



In 1844 the needs of the Jeweler suggested the founding of the Dennison business. Every year since then it has been the Dennison thought to perfect systems whereby the Jeweler would be benefited.

We Divide the Profits of Our New Selling Plan With You

Our new method of selling you direct by mail effects great economy—greater than you can appreciate unless you have had to pay the weekly expense accounts of a large corps of salesmen who add heavy railroad fares, hotel bills and extras to the price you must pay for the goods they sell. We have eliminated all these dead expenses by our new plan.

We are not making this radical departure to increase our profit on individual orders, but to make it possible for you to do a larger and more profitable business, which will ultimately benefit us as well as yourself. In short, our new Spring catalog shows "Woodside Standard" deposit and Sterling Silver at prices ranging from 15% to 20% less than the same quality of material and workmanship has heretofore commanded.

An Innovation in Listing Silverware

200

is incorporated in this catalog, making it the most comprehensive booklet ever put in the hands of jewelers. We have placed the selection of goods from a catalog upon a substantial business basis. We state the exact weight of every individual piece of sterling silver catalogued, and the excellent illustrations show with photographic veracity the individuality of our designs and their artistic development by our expert artisans. This is our method of convincing you that our prices will stand the closest scrutiny and comparison.

The articles illustrated in this advertisement will give you some idea of the meaning of Woodside quality, the work of our designers and the comprehensiveness of our line. The sandwich trays and Nos. 3468 and 3469 are sterling. The balance of the designs shown are deposit ware. Write us to-day for particulars regarding this new and economical way of selling silverware and we will send you also a copy of the Spring catalog. It will prove the most practical piece of business literature you have ever received.

New Sterling Pattern

"John Winthrop"

Our new flatware pattern, will be welcomed by all who appreciate the value of simplicity and dignity in Sterling Silver.

The illustrations suggest the grace and symmetry that mark the design and that are essential to a pattern of this kind.

We make a full line in substantial weights and are confident that it will prove very popular. The finish is bright.

STERLING 925/1000 FINE

"John Winthrop"

The character of this colonial pattern assures its place in the household for more than one generation, just as the substantial qualities of John Winthrop, Governor of Massachusetts Bay Colony, were inherited by his son, John Winthrop, Governor of Connecticut.

The dealer will do well to emphasize the permanent value of the pattern.

WALLINGFORD, CONN., U.S.A.

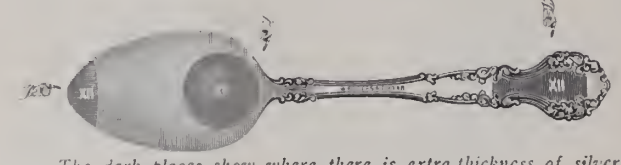
NEW YORK · CHICAGO · SAN FRANCISCO · TORONTO

This Old Reliable Brand is now made only in Two Grades of Plate: Sectional Plate (X12) and Triple Plate. The Sectional Plate selling at the former price of Standard or Extra Plate

THIS ILLUSTRATION SHOWS THE POINTS (X12) MOST EXPOSED TO WEAR AND WHERE EXTRA QUANTITY OF SILVER IS DEPOSITED BY THE PATENT PROCESS.

★ ROGERS & BRO. A1, XII

The trade will be interested to learn that since January 1st, 1910, we have had only two grades of plate on regular pieces:— Tea, Table, Dessert and Soup Spoons, Medium and Dessert Forks.



XII-(SECTIONAL)
AND
TRIPLE

The list prices of Sectional Plate goods are now the same as the former A1 (Extra Plate), and each article is stamped

★ ROGERS & BRO. A1, XII

To all Sectional Plate goods is added an **Extra Heavy Thickness of Silver** on points most exposed to wear: Backs of Handles, Tips and Backs of Bowls and Tines as shown in illustration.

"XII" (Sectional Plate)

"XII" (Sectional Plate)

The dark places show where there is extra thickness of silver.

This SECTIONAL PLATE process was patented by us in the year 1867 and has been in continuous use at our factory since that time.

An experience of sixty years assures the trade of the *durability of our goods.* Every article bearing our trade-mark is *absolutely guaranteed.* With ordinary care they will last a *lifetime.*

STAR (★) BRAND

goods are sold by all leading jobbers and by us direct.

THE LINE THAT LEADS IN SILVER SALES

Business sense suggests, as the ideal stock for the present season and situation, moderately priced goods of standard make—such wares as suit the fancy and pocket of the greatest number of customers.

THE TRADE IDEAL IN QUICK-SELLING SILVERWARE
IS THE WELL KNOWN POOLE ELECTRO-PLATED WARE

which is recognized as the mainstay of the silverware department. The secret of slow sales in silverware is unwise selection. If you are dissatisfied or wish to increase your sales, secure at once a suitable selection from the POOLE LINE.

The new 1910 line comprises an endless array of artistic designs both in salable articles of every-day use and in ornamental pieces.

Bodkin-Clutch
Studs and Vest Buttons

HOLDS LIKE AN ANCHOR

KREMENTZ & CO. beg to announce that the **Krementz Bodkin-Clutch Stud** and **Vest Button** line is very complete in every detail.

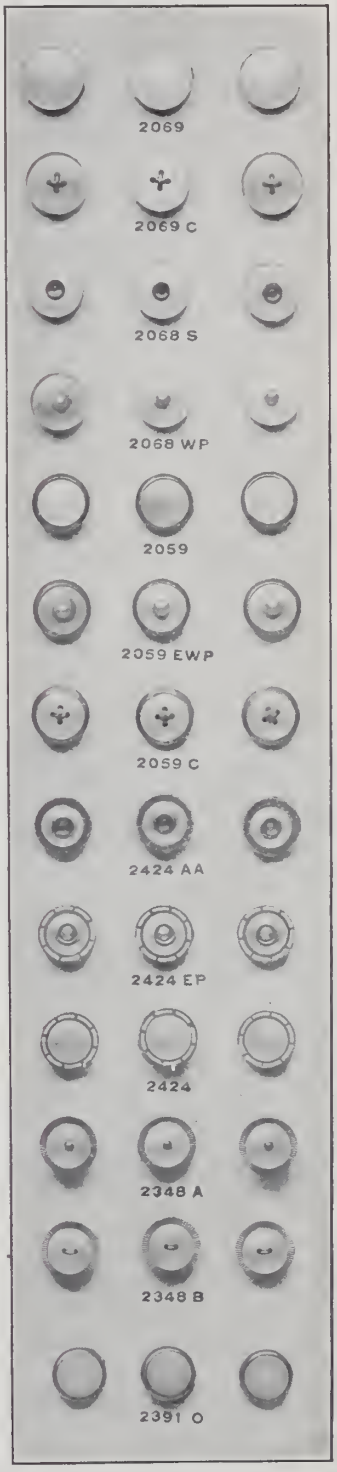
Variety of patterns—completeness of stock.

The success which our customers have had with **Krementz Bodkin-Clutch Studs** and **Vest Buttons** induces us to recommend them to all jewelers who have sale for this class of goods.

Read the **Krementz Guarantee,** which in itself indicates the solid construction, great strength, durability, easy operation and quality of the goods.

GUARANTEE

If for any cause whatever a **Krementz Bodkin-Clutch Stud** or **Vest Button** should be damaged, either in the hands of the dealer or wearer, a new one will be given in exchange without charge.



Krementz Bodkin-Clutch Studs and **Vest Buttons** have

NO { Solder / Springs / Tubing.

Prices are the very lowest on the market. You can sell a **Krementz Bodkin-Clutch Stud** or **Vest Button** at the price which a similar set obtained elsewhere would cost you.

Note:

Should any of your customers have a set of vest buttons or studs with any old-style fasteners which have for any reason proved unsatisfactory, we will gladly change them (where practicable to do so) to Krementz Bodkin-Clutch Holders, making only a nominal charge for same.

STRIKING PARISIAN IDEAS

MEDALLION NECK PENDANTS

CARTIER is well known to be one of the foremost jewelry creators on the famous Rue de la Paix. This house is the first to embody his conceptions in artificial jewelry. The newest conceit is Cartier Medallion Neck Pendants. Medallions include characteristic bar and web effects. In some a black velvet background emphasizes decoration, carrying out the idea of velvet and diamonds. Cartier beaded settings and platinum mountings approximated. Braided Pearl Bands add further brightness. Worthy of any jeweler's show case. Can be retailed at from $6.00 to $18.00 each.

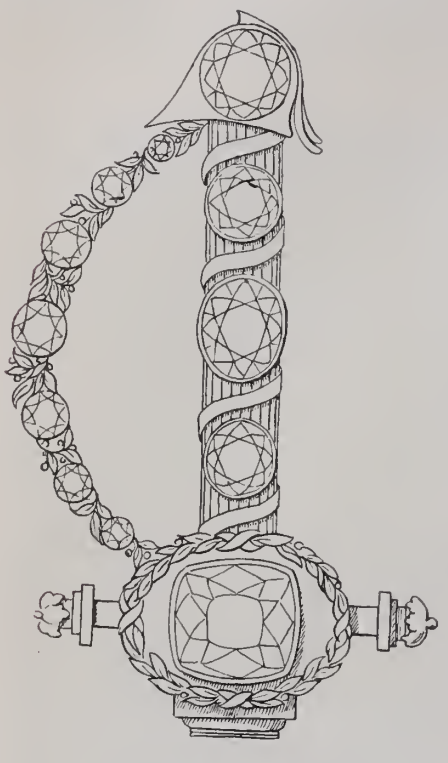
Gold and Silversmith Work at the Louvre Museum.

By CHARLES A. BRASSLER.

THE Louvre Museum is without a doubt one of the richest and most complete of the world. Art is represented there in all its phases, from remote antiquity down to the present time.

Its magnificent collections of the products of the gold and silversmith—jewelry, enamels, gems, cameos, etc.—appeal especially to the jewelry trade and are replete with valuable suggestions to the precious metal worker. The richness of the Louvre in these objects is to no small degree due to the munificence of Baron Adolphe de Rothschild, who, in 1900, bequeathed all his splendid collections of works of art in gold and silver, enamels, ivory, jewelry, etc., to the Louvre Museum, specifying merely that they should be kept apart from the others. It was another stroke of good fortune for the Museum when Baron Edmond de Rothschild presented to it the famous Boscoreale treasure, consisting of beautifully decorated antique silver vessels and utensils from Pompeii.



THE APOLLO GALLERY, OR GOLD AND SILVER ROOM OF THE LOUVRE MUSEUM.

The Building.

As the Louvre is considered one of the most beautiful palaces in Europe, equally remarkable for the harmony of its lines and the refinement and richness of its decorations, a few words regarding it may be in place before entering upon a closer consideration of those objects which are of special interest to the readers of this paper. The Louvre, which is the most important building in Paris to-day, like all the articles it contains, has quite a history. Even

before Francis I., began rebuilding it as a Renaissance palace, in 1541, it had always been known as a royal habitation. The original building had stood in a forest infested by wolves (hence its name, from

GOLD SWORD OF NAPOLEON.

Louverie). When Francis died his son Henry II. continued the work, appointing Pierre Lescot, chief architect in 1546. The handsome sculptures are by Jean Goujon and the founders are commemorated by the "H's" and "D's" of Henry II. and his mistress, Diane de Poitiers and the "K's" of

SHRINE OF ST. POTENTIENUS, MADE AT TRIER—XII. CENTURY.

Catharine de Medici (or Charles IX.). Catharine de Medici had considerable work done on it, building the Long Gallery along the quay, it being her idea to connect the palace of the Louvre with that of the Tuileries. She also constructed the projecting wing over which the gorgeous *Galerie d'Apollon* was afterwards added, of which we present a photograph on page 65, as it contains the bulk of the precious objects that form the subject of this article. Henry IV. next added his share to the edifice by completing the junction with the Palace of the Tuileries, later destroyed by the Commune and rebuilt by Napoleon III.

ROCK CRYSTAL VASES FROM COLLECTION OF THE CROWN OF FRANCE—XII. CENTURY.

Louis XIII. added the right wing of the *Pavillon de l'Horloge,* the interlaced initials of the King and Anne of Austria marking their part. Louis XIV. made some additions, and so on until the reign of Napoleon III., and the grand pile now stands as a gradual growth of centuries grafted on to the humble nucleus. Of all that transpired in this unique building we will not speak here, as it would lead too far, but will not omit to mention that many of the famous old French goldsmiths had their residence and workshops in the Louvre, a portion of which was reserved for artists as far back as the 16th century.

The Apollo Gallery and the Crown Jewels

Ascending the staircase in the Louvre, to the left of the main entrance, we come into the Apollo Rotunda and thence into the *Galerie d'Apollon,* or Apollo Gallery, which leads no further. This is perhaps the most sumptuous room in the Louvre, with its elaborate ceilings, its tapestries in panels and magnificent furniture. Its walls, decorated by Lebrun, are in keeping with its valuable contents. The cases hold masterpieces of old gold and silver work, enamel, crystals and historical relics, but the center case draws every gaze to itself, for here are kept what remain to France of her crown jewels.

Here is the "Petit Mazarin," found on a battleship by a Swiss soldier, who sold it to a priest for a florin, and other remarkable stones; but they are all overshadowed by one of the most beautiful diamonds in the world, the fiery "Regent." This was found in India, in the Parteal mines, in 1701, by a slave, was stolen and came into the hands of a dealer who sold it to Pitt, the governor of Madras, a relative of the statesman Pitt, for £2,000. Pitt had the stone cut, the work taking two years and costing £5,000. The rough stone weighed 410 carats, the cut one 136. The Duke of Orleans, then Regent of France, obtained the stone, through the agency of laws, for 3,125,000 francs.

In the year 1791, after the fall of Louis XVI., the "sovereign people" demanded the exhibition of the crown jewels. Everyone must be allowed to touch the "Regent," the marvel of the collection. The people's will was law, and the jewels were exhibited, carefully guarded; but in the night of Sept. 16, 1792, the greater part of them, including the Regent, were stolen. The "Regent" was found a few days later in a garden in the Champs Elysee, with a part of the others. The jewels were scattered over Europe, but later some of them were brought back by the efforts of Napoleon. Some remained lost, among them the famous blue diamond, weighing 67 carats. When the French Republic had the greater part of the crown jewels sold at auction in 1887 the "Regent"

was kept back as an object of scientific interest, and because the price would not have been commensurate with its value, which is supposed to be 12,000,000 francs.

Among the precious crown jewels is also a large ruby in the shape of a dragon, known as the *Côte de Bretagne* (Coast of Brittany, probably on account of its form, and at one time owned by Anne of Austria. There are also to be found there the coronation sword of Charles X., the elephant of Denmark, the mirror and candlesticks presented to Marie de Medici by the Venetian Republic, a chatelaine of Catharine of Medici, a sword encrusted with diamonds

RELIQUARY CASKET CONTAINING THE ARM OF CHARLEMAGNE—XII. CENTURY.

COVER OF A GOSPEL—XI. CENTURY.

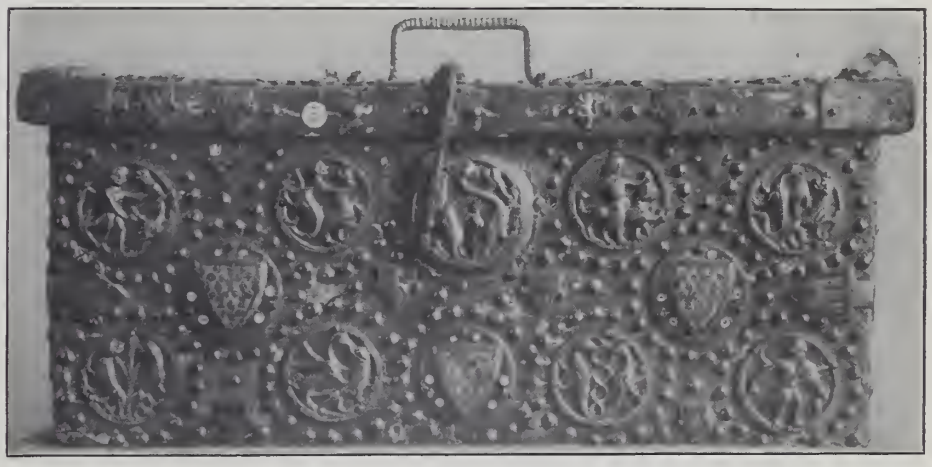
made for Napoleon I. and the watch given by the Dey of Algiers to Louis XIV. Then there are various crowns, one wrongly styled that of Charlemagne, ornamented with antique cameos; the crown of Napoleon I. and that of Louis XV. The central case, containing all these treasures, is surrounded by a rail (as can be seen in our photograph of the Apollo Gallery), inside which a gendarme keeps guard. At night the case for greater security descends into the base.

Some time ago it was reported in the newspapers that the crown of Louis XV., "so carefully guarded by a special watchman in the Louvre," had been discovered to contain imitation stones. As a matter of fact, the gendarme is there to guard the "Regent," the "Petit Mazarin" and other stones, not the crown, which is well known to be made of counterfeit diamonds, for even the official catalogue describes it as *"La couronne de Louis XV. en pierres fousses."* During the Revolution paste was substituted for the real stones.

TWO FORMER COMPANIONS OF THE "REGENT."

The "Regent," by the way, once had two splendid companions, viz., the "Tavernier" and the "Sancy." The former was brought by the French world-traveler Tavernier to France from India and sold for a fabulous sum to Louis XIV. The history of the "Sancy" is too well known to require repetition here. Suffice it to say that after many vicissitudes it also landed in the French crown treasure under Louis XIV. During the first French revolution the Republican leaders in power confiscated the crown jewels and ordered them to be placed in safe custody. But very strangely on the way to the safe place the three most valuable pieces, the "Regent," the "Tavernier" and the "Sancy," disappeared.

The first named, according to one account, was put in pawn with a Berlin merchant named Treskow, who kept it conscientiously. Napoleon later redeemed this magnificent stone and had it mounted on the guard of the sword of state, or gala sword, when he was First Consul. (See page 66.) In 1811 it was taken out again.



The "Tavernier," being the only blue diamond in Europe, was hard to dispose of, and those who had gotten hold of it broke

EGYPTIAN VASE IN PORPHYRY.

it up into smaller ones, one piece becoming known later on as the Hope diamond, which was not long ago in the possession of the New York gem importing firm, Joseph Frankel's Sons, who had it for several years and then sold it to a Paris dealer. The gem finally reached the ex-Sultan of Turkey, who is said to have owned it at the time of his removal. The next reported owner of the Hope diamond, Selim Habib, was reported drowned in the wreck of the *Seyne* at Singapore and the stone was erroneously reported to have gone down with him to the bottom of the sea, but now it has again turned up in the safe of another Paris jeweler. The "Sancy," after an eventful career, found its way back to its native land, India, it is claimed.

Not long ago the French Government

CASKET OF ST. LOUIS—XIII. CENTURY.

tried to ascertain which of the rooms of the Louvre Museum was visited most and which of the objects on view there possessed the greatest attraction for the visitors. The investigations showed that the distinction belonged to the Apollo Gallery and its glass case with the remnants of the French crown jewels, more especially the "Regent." The number of curious who congregate there is by far larger than that of the understanding ones who spend their time contemplating the other treasures, even the marvelous paintings. This goes to show that even in a republic where there are supposed to be no "crown" jewels these remains of royalty still have quite a fascination for the multitudes, and perhaps this penchant is excusable, for the "Regent" had for a long period become identified with the fortunes of France and passed through many vicissitudes before it finally glittered in the imperial diadem, when Napoleon III. was yet ignorant of the fact that he would be the last monarch of France.

RELIQUARY OF ST. FRANCOIS D'ASSISE AND TWO CROZIERS—XIII. CENTURY.

RELIQUARY OF ST. HENRI—XIII. CENTURY.

To the collections of the "crown" of France belong also the two splendid gold-mounted rock crystal vases from the 16th century, shown in our illustration on page 66.

Now, as regards the other cases and their valuable contents, we perceive on the first table in our photograph a magnificent reliquary known as the shrine of St. Potentienus, made at Treves (Trier), Germany, in the 12th century. Of this piece, which is described in another place, we present a separate illustration on page 66.

BYZANTINE PRECIOUS METAL WORK.

At all periods, even in the most barbaric ages, articles of goldsmith work have been in demand, as much for the satisfaction they gave as on account of their intrinsic value. Excavations made in the earth in France have brought to light a very large number of articles of this description, but those of the benighted period of the Middle Ages do not possess much more than a purely archæological interest, and we may search all over Europe for a center of production more worthy of mention than Byzantium.

The Louvre Museum contains a very beautiful Byzantine piece of the 11th century. It is a silver plaque, repoussé and gilt, representing the holy women at the tomb of Christ, and which has served as the cover of a gospel. This is preserved in the glass case at the bottom, on the left, and marked D 709.

Charlemagne, who during the Middle Ages was the most powerful patron of letters and arts, caused goldsmiths to come from Byzantium, so as to obtain from them the objects that he presented to the abbeys of his empire and which revealed the impression of a declining style. The aforementioned reliquary of St. Potentienus (first central glass case in the Apollo Gallery) is dated in the 12th century, and was apparently made by the artists established in the valley of the Rhine, and perhaps by the very descendants of those whom Charlemagne had induced to come to Aix-la-Chapelle. This reliquary is in the form of a building and contains many important statuettes in goldsmith work. Of the same period, and probably from the same source, is the arcaded enameled casket, known as the reliquary of the arm of Charlemagne,

THE SO-CALLED SCEPTER OF CHARLEMAGNE AND A HAND OF JUSTICE—XIII. CENTURY.

in the second central glass case, and marked D 712, which was presented to Napoleon I. by the canons of the basilica of Aix-la-Chapelle (in 1815 the royal bones were returned to Aix-la-Chapelle).

The museum has received from the abbey of St. Denis four pieces of goldsmith work, mounted about 1140 by Lothringen (Lorraine) artists, summoned by Suger when he was abbot of this famous monastery. Three

of these vases are shown in the case at the end of the gallery, the fourth in the Oriental hall of the Middle Ages, first story.

The first, in rock crystal, is of the form of a bottle, with a rounded belly, surmounted by a neck. It had been given to King Louis VIII. by his wife, who received it from her father, to whom an emir of Spain had presented it.

The second, mounted in the form of an eagle, is an antique Egyptian vase in red porphyry. This is one of the most remarkable specimens of goldsmith work of all times. It is shown on page 67.

The third is a vase of sardonyx, mounted as a jug and having an S-shaped handle.

The fourth is in rock crystal, of Arabic workmanship, and was given to Suger by a count of Champagne, who brought it from Sicily. There is also an interesting cover of a gospel from St. Denis dating back to the 11th century (page 67).

A cross with double cross bar, coming

MADONNA, SILVER GILT, GIVEN TO THE ABBEY OF ST. DENIS BY JEANNE D'EVREUX—XIV. CENTURY.

from the chapel of the hospital at Laon, dates from the end of the 12th century (second central glass case).

With the 13th century religious goldsmith work was enriched with Limoges enamel, and one of the most beautiful examples of this period is a ciborium with the signature of the master goldsmith Alpais. It is formed of two hemispherical cups of copper, each decorated with enamel work of the greatest beauty.

Many crosses in Limoges enamel, assuming the form of coiled adders, are of the same period (second glass case); also the casket known as that of St. Louis (shown on page 67), which came from the abbey of

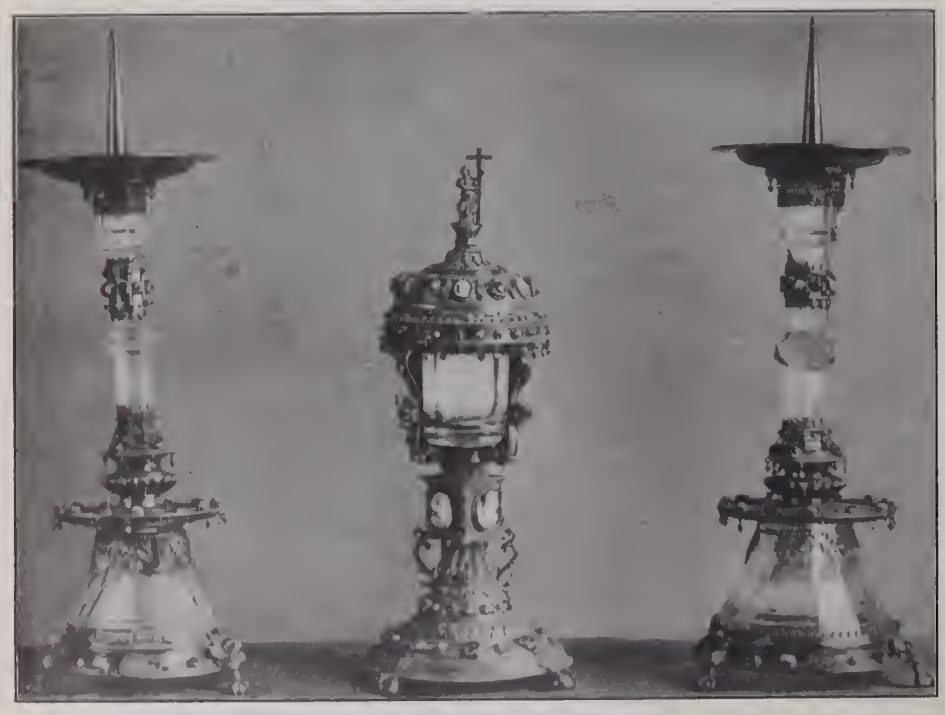
THE SO-CALLED SWORD AND STIRRUP OF CHARLEMAGNE—XII. CENTURY.

Lys, near Melun, founded by Blanche of Castile.

THE UNIQUE CASKET OF ST. LOUIS.

The so-called casket of St. Louis of France (1226-1270), French work of the middle of the 13th century, with Limousine panels of gilded copper and champlevé enamel, is one of the interesting objects in the gallery of the Louvre. The casket, which once contained the penitential robes of St. Louis, was, simultaneously with the reliquary of King Philip the Beautiful (1285-1314), presented to the abbey of Notre Dame-du-Lys, near Melun. During the great revolution the casket only escaped the government commissary, who came to collect all valuable church paraphernalia, through the ingenuity of the nun Pelagia. The casket is made of birchwood, covered with parchment, which is in turn covered with tinfoil. On the lid mountings rock crystals are set. The hinges of the lid run into the teeth of fantastic monsters. Across the lid a dragon with black, blue, white and red enameled wings is moving. He holds in his jaws the plug of the lock. By means of a folding handle the casket can be carried. The lid, the front side and the two small ends are studded with 51 enameled shields, of which 45 are still present. Seven of them display the arms of France and Castille; the others are the arms of the greater vassals who went with Louis IX. to the crusades (sixth crusade, 1248-1254). The duchies of Burgundy, Guienne and Normandy and the counts of Champagne, Toulouse and Flanders are represented. Significant is the coat-of-arms of Champagne-Navarre. This was first borne by Theobald IV., Count of Champagne, when, by the death of his uncle on the mother's side, in 1234, he became King of Navarre. He died in 1253. This fixes the date of the origin of the casket as subsequent to 1234. The decorative disks of the casket, which show human figures and animal shapes, each consist of two plates of copper, of which one serves chiefly as the background; the other reproduces the figures in openwork, repoussé and chased work. Only the eyes are of blue enamel. The figure medallions represent, on the lid: 1, Dragon in combat with a lion; 2, two dragons,

CHALICE, ENAMELED GOLD—XIV. CENTURY.



standing back to back; 3, an eagle and a lion in the same position, the heads intertwined and biting a fir cone; 5, fight between a lion and a dragon; 6, huntsman, with the hide of a stag; 7, fight between a

man and a lion; 8, two hounds pursuing a stag. On the narrow end: 1, The blossom of a daisy; 2, two eagles, back to back, the heads turned to one another, biting a fir cone; 3, a winged and a wingless dragon; 4, griffin with dragon's head; 5, crowned lion; 6, winged dragon; 7, sunflower; 8, double-headed eagle. On the front side:

SERPENTINE PATEN, CARLOVINGIAN EPOCH, AND TWO LITTLE VASES—XVI. CENTURY.

1, Man cutting off a dragon's head; 2, two dragons back to back, the heads turned towards each other (the lock plate the same); 3, David astride a lion, striking a dagger into its head; 4, dragon and panther; 5, two leopards in the same posture as No. 2 of the small side; 6, panther in combat with dragon; 7, two dragons with intertwined tails; 8, man playing the violin. The 11 medallions on the rear side have a blue enameled background and represent: 1, Man mounting a lion; 2, same as No. 1 on the front; 3, fiddling man and girl with castanettes, dancing; 4, warrior, with shield and sword, fighting a lion; 5, loving couple; 6, enthroned king and a petitioner; 7, crowned knight on horseback, a falcon on his wrist; 8, ibis swallowing a fish; 9, hunts-

CANDLESTICKS AND CIBORIUM—ITALIAN.

man with hounds; 10, two knights in combat; 11, same as No. 8 on the lid.

The closely allied casket in the cathedral treasure at Aix-la-Chapelle has often been described. The in many instances worldly and in some cases even erotic subjects of the decorations of these caskets show that many of them were devoted at first to profane purposes, and were only afterwards used as reliquaries. As this latter utilization of the casket of St. Louis occurred at a very early period, we do not hesitate to style this work of art a reliquary casket.

Fine specimens of other old enamel work are to be found at the Louvre. We present a picture of an interesting reliquary, known as that of St. Francois d'Assise, in Limoges enamel, dating from the 13th century. On the same photo appear two interesting old croziers, each mounted on a stand. The reliquary of St. Henri, also from the 13th century, is also shown on page 68.

The scepter known as that of Charlemagne, D 943, never belonged to the great emperor. It was ordered by Charles V., who presented it, in 1380, to the votaries of St. Denis (seventh flat case, between the windows, towards the middle of the gallery). The sword shown on page 69, and of which there is nothing ancient but the pommel, the guillons and the entrance to the sheath, is also erroneously called the sword of Charlemagne. It dates from the 12th century. The sword and the scepter were carried by the kings of France at all coronation ceremonies until the time of Charles X.

FINE STATUE OF THE VIRGIN.

One of the most beautiful specimens of goldsmith work of the 14th century preserved at the Louvre is a statuette of the Virgin, holding the infant Jesus in her arms

RELIQUARY, FRENCH AND FLEMISH ART—XV. CENTURY.

illustrated on page 69. It was given, in 1334, to the abbey of St. Denis by Queen Jeanne d'Evreux, widow of King Charles the Fair. This statuette, although of small dimensions, recalls the great sculptured monuments of the period, and is evidence of the degree of perfection to which this art had attained. As to the date of origin, the inscription on the upper edge of the base gives definite information; it reads, *"Ceste ymage donna ceans Madame la royne Jehanne d'Evreux, royne de France et de Navarre, compaigne du roy Charles le vingthuitieme Jour d'Avril, l'an* MCCCXXXIX." The statuette, probably of Parisian workmanship, must therefore have been produced some time before it

was given by the Queen Jeanne d'Evreux to St. Denis. In the corners of the base, above, are the arms of the donor. Silver buttresses, supporting moulded figures of the prophets, form on the base 14 panels in which pictures representing New Testament subjects appear. The statuette itself, in spite of slight peculiarities, shows the predominant features of 13th century style, and is considerably superior to the average contemporary ivory carvings representative of the same subject.

As an example of Spanish art of the 14th century we show a pretty chalice of enameled gold on page 69.

A QUAINT PATEN.

The paten in goldsmith work which appears on the opposite page, an example of Carlovingian work of the ninth century A. D., is one of the choice articles preserved in the museum of the Louvre. The bottom of the dish is of serpentine, ornamented with eight inlaid golden fish, of which two have been broken out. The rim consists of a ground of small blossoms, branches and garnet hearts in gold settings. Between these are large set pearls and costly sapphires, emeralds, amethysts and opals. The whole is enclosed with a border of half-cylindrical garnets, of which the majority are missing. The paten bears the inscription, *"Hoc vas Christi tibimente dedicarit Tertius in Francos reginunic Karlus"* (The Third Charles, ruling in France, dedicated this mentally to Thee, Christ). The inscription may refer to Charles the Simple, 898-929, Charles the Fat, died 888, and Charles the Bold, died 877. The latter is considered by Molinier the most probable. According to the ancient inventory the paten belongs, together with an antique Sardonyx cup, on a golden foot. Both pieces were originally in the abbey

PAX OF SILVER—XV. CENTURY.

of St. Louis. The cup had the name of the goblet of Ptolemy. During the French Revolution the cup was placed in the Cabinet of Medals, the paten, erroneously, in the Museum of Arts. Subsequently the cup was stolen and only recovered later without the setting.

Consisting of the same material (serpentine) as the paten are two little vases from the 16th century, with gold mountings, shown alongside of the paten. They came from the treasure of the abbey of St. Denis, now divided between the Louvre, the Cluny and the National Library.

From the 15th century dates a reliquary which is notable for presenting, in four tiers of architecture, the platforms supporting the group of the Trinity, of male and female saints. This little monument, of French or Flemish origin, is placed in the second glass case, in the center. It came from the treasure of the Order of the Holy Ghost. Forming part of the same treasure

BRACKLER (SHIELD) AND CASQUE OR HELMET OF CHARLES IX.—XVI. CENTURY.

are a fine Italian ciborium and two candlesticks; a portable holy water basin, with its aspersorium, probably of Italian workmanship, of the 16th century; a ewer of the same period, and a magnificent "kiss of peace," or pax, in silver, ornamented with enamel, contributed to the treasure of France by Catherine de Medicis. These various objects are located in the second central glass case V, also in the case at the end on the right side, with other objects that formed part of the same treasure. The arm reliquary that contains a bone of St. Louis of Toulouse, exhibited in the second central glass case, is of the 15th century.

With the advent of the 16th century Italian influence made itself plainly evident. The articles of goldsmith work lose a little of their severity, profane objects are introduced in their ornamentation, the

REPOUSSE SILVER BASIN BY WENZEL JAMNITZER.

taste for gems, for crystals and for precious stones develops, as is shown by the flat cases of jewels near the windows. The variety of articles multiplies; ewers, cups, vases of rock crystal, enameled nautilus cups (fourth central case) and pieces of armor became enriched at this stage, with their chased reliefs and their enamel colorings, so that it is not to be supposed that they were ever made use of. (See cut on page 71, of the gold enameled buckler and helmet of Charles IX., displayed in the first wall case to the right). Most exquisite is the gold casket of Anne of Austria, of gold, chased in arabesques and branches cut in openwork on a background of blue silk. This casket is said to have been given to the queen by Mazarin (case at the end, to the right). An excellent picture of it appeared recently on the front page of THE JEWELERS' CIRCULAR-WEEKLY, including the lid on which the wonderful arabesques and foliage designs are repeated.

DAGGER OF THE KNIGHTS OF MALTA, AND VARIOUS PENDANTS—GERMAN ART—XVI. CENTURY.

PLATE—GERMAN RENAISSANCE.

WENZEL JAMNITZER REPRESENTED.

We have already described by pen and picture, in former issues, the magnificent "Mother Earth" epergne by the famous Wenzel Jamnitzer, known as the German Cellini, which is said to have gone to the Louvre through the Rothschilds, but this museum contains another interesting piece by the same artist, of which we present an illustration. It is a magnificent basin in repoussé silver, showing decorations from the lower animal world, as snakes, frogs, crabs, etc. The rim is beautifully embellished with coats-of-arms and other handsome designs. (See page 71.) A ewer belongs with this basin, but it seems to be conspicuous by its absence.

A handsomely designed Renaissance plate which is likely to give hints to workmen in more respects than one is illustrated on this page. A prominent Paris jeweler sells replicas of this plate.

TAZZAS OF WHICH THE GERMANIC MUSEUM AT HARVARD HAS REPLICAS.

We must not omit to mention two fine silver-gilt tazzas of German make, dating from the 16th century. These were considered such excellent specimens of German art that the German Emperor included them in his gift of replicas of choice silver work to the Germanic Museum at Harvard. One bears in the dish a relief showing the smithy of Vulcan. A naked Bacchus with grapes and other fruits in his hands and in the posture of David of Michel Angelo, forms the shaft of the tazza, while upon the foot appear three small reliefs with allegorical representations.

The second tazza, repoussé and cast, has on the inside a relief showing Minerva and the Arts. On the outside are four smaller reliefs in a rich framework of grotesques and puttos, the high stem and round foot being similarly treated.

JEWELRY AT THE LOUVRE.

There does not seem to be any superabundance of jewelry at the Louvre. The *Salle des Bijoux. Anciens,* where the fictitious gold tiara of Saitapharnes was kept, contains some fine antique jewels, such as a gold Etruscan necklace with the horned head of Bacchus, a Graeco-Etruscan diadem and the treasure discovered at Notre Dame d'Alençon, near Brissac, in 1836.

In the Apollo Gallery are displayed some

SILVER BASIN—BAPTISMAL FONT OF ST. LOUIS—XIII. CENTURY.

fine pendants of German workmanship from the 16th century. As can be seen from our cut, they are handsome products of the goldsmith's art, in which the baroque pearl has been put to felicitous use as the body of a merman and of an eagle and a dragon. Another of these pendants is in the form of a ship, while one shows an eagle with

BARBERINI VASE, 1236-1260—EXECUTED FOR THE SULTAN OF ALEPPO.

outspread, gem-studded wings, the body consisting of a large precious stone with facets. On the same photograph is shown a beautiful dagger of the Knights of Malta.

Regarding jewelry of more recent date, there is preserved at the Louvre a pearl necklace belonging to the Thiers family. According to a recent newspaper note, however, "the pearls, which were once worth $1,250,000 (?), are dying, and in a few years they will not be worth any more than so many glass beads."

A few pieces of religious jewelry are included in the Rothschild donation, of which we shall speak later in this article.

ARABIAN ART.

In the Hispano-Moresque room we find a couple of interesting objects—one in copper damaskeened with fine silver designs, viz., the so-called Barberini vase, originally executed in the 13th century for the Sultan Abdul Mozhaffer Yusuf of Aleppo, whose name it bears, and another example of Arabian art of the same period known as the baptismal font of St. Louis. It was also used at the baptism of Philip Augustus and the Comte de Paris. This silver basin is covered all over with handsome chasings.

INTERESTING OBJECTS IN THE OTHER ROOMS.

The 18th century is represented by objects of an entirely different character from the preceding periods—by vases, cups, little caskets, jewels, etc., which may be seen in the last central case of the Apollo Gallery, as well as in the hall devoted to furniture. Here we also find a number of other objects that interest us. There are two fine clocks in the style of Louis XVI., one in marble with three dials and bronze decorations, surmounted by a group of cherubs, the other a tall clock by Martin Carlin, mounted on a so-called sheath pedestal.

Of special interest to this country is a gorgeous bronze candelabra commemorating the independence of the United States. The cut on page 74 shows the details plainly.

A splendid Sèvres vase with ornamentations in bronze (page 74) also attracts notice.

A fine collection of pewters is preserved in the Hall of Bronzes, first story, including the temperance basin of Briot (16th century), which Palissy reproduced in ceramic ware, one of the finest articles that was ever fashioned in pewter. As this basin has been illustrated in THE JEWELERS' CIRCULAR-

CLOCK MOUNTED ON A SHEATH PEDESTAL—LOUIS XVI.

WEEKLY before, we present a photo of another creation by Briot, viz., the "Mars" basin. (See page 74.)

THE BOSCOREALE SILVER TREASURE.

This article would indeed be incomplete without some reference to the magnificent collection of Pompeiian silver vessels which the Louvre Museum can boast, and which is known as the Boscoreale treasure. An illustrated article on it appeared in THE

MARBLE CLOCK, WITH CHERUBS AND ORNAMENTATIONS IN BRONZE—LOUIS XVI.

Jewelers' Circular-Weekly of a few years ago. These wonderful antique silver vessels were found in 1894 near the Italian village of Boscoreale, in the vicinity of the old Pompeii, which was overwhelmed in August of the year 79 A. C. by the memorable eruption of Vesuvius. For the sum of 400,000 francs they passed into the possession of Baron Edmond de Rothschild, who presented them to the Louvre. Boscoreale, or rather the village of Pisanelli, has acquired quite some fame through the discovery of the silver treasure. Together with the find an interesting discovery was made. The silver vessels were found in the shaft of a well, quite near the surface of the ground Not far away from it the discoverers came across a bent human body, the impression of which, as was the case in various instances at Pompeii, had been perfectly preserved in the surrounding layer of ashes and lava that formed a solid mass. Very probably the owner of the treasure, upon the approach of the disaster, had hastened to the well either to conceal the silver or

CANDELABRUM COMMEMORATING THE INDEPENDENCE OF THE UNITED STATES—LOUIS XVI.

take it out, and had thus lost his chance to save himself from the descending shower of ashes and stones.

We present on the next page two illustrations of interesting specimens from this collection that were not shown in the former article, viz., a phiale with the head of an old man in high relief, and a fine round hand mirror with Leda and the amorous swan. Other conspicuous pieces are a fine cantharus embossed with animals pursuing

SEVRES VASE, WITH ORNAMENTATIONS IN BRONZE.

each other, two remarkably beautiful salt cellars, a drinking vessel decorated with storks, a large patera-casserole in an odd-grooved design with very ornate ladies, etc.

These charming objects enable us to take note of the skill with which the old Greeks and Romans worked the precious metals.

The Wonderful Rothschild Collection.

Owing to the fact that it is preserved in a separate place, we have reserved to the last the consideration of the wonderful Rothschild collection of ecclesiastical objects. As this donation includes objects of the greatest interest, we feel justified in treating this subject at some length.

When it was announced a few years ago that the gift of a collection of religious objects had been made by Baron Adolphe de Rothschild to two French national museums, the *Musée du Louvre* and the *Musée de Cluny,* the generous act surprised nobody. It had long been known in the world of art that this discriminating collector was actuated by the most kindly sentiments towards the large scientific establishments, and that he would continue in a brilliant manner the tradition which several members of his family had so clearly established.

So firmly had this view of the subject become established that this gift, although very considerable in itself, did not perhaps excite among connoisseurs the enthusiasm which a liberal public benefaction never fails to produce. In addition to that it was known beforehand, at least vaguely, that the Louvre Museum was to be greatly enriched, and hence the collection had by no means the attraction of novelty.

And yet for long years the number of those who could gain admittance to the Rothschild gallery where these inestimable productions were kept was very small, and very few were those who had been able to examine them intimately and perceive their great artistic value and especial rarity.

MARS BASIN IN PEWTER, BY BRIOT—XVI. CENTURY.

They were known by reputation only, and it is thus they are still known to-day. Their reappearance and definitive instalment in the great national museum was an event and a revelation. The donation enriched the Louvre by more objects than any public establishment, by reason of their rarity and intrinsic value, could think of acquiring to-day, and, what is more, it brought out of seclusion works of art of an inestimable value, such as the triptych or altar screen of the 13th century, which came from the abbey of Floreffe, or sculptures such as the Virgin of Agostino de Duccio.

If in the totality of this collection objects of curiosity are largely represented, the noblest art also finds a large place there. Thanks to these choice specimens certain departments of the museum of the Louvre such as goldsmiths' religious work, hitherto not too strongly represented, compare favorably with any other museum in Europe. The donor, while expressing a wish that these objects might be assembled in a single gallery, realized also the difficulties which might beset the accomplishment of his desire. By a special clause he placed at the disposal of the direction the means required for a suitable display of such treasures. Thanks to this munificence, an example well worthy of imitation, it has been possible to devote a special room to this collection of Adolphe de Rothschild.

This new gallery with its fine architecture, its Venetian ceiling, its Flemish tapestry, its lambrequins and its Italian floor must be in itself a source of instruction for the public. It has also been possible to draw up a brief catalogue and to publish an album in which the finest pieces are reproduced.

The Louvre and the world of art owe to the memory of the donor the homage of their profound gratitude. They also owe thanks to the surviving widow, who, with untiring solicitude and watchfulness, has carried into execution the last wishes of her husband. Madame de Rothschild has done more than that. She has herself added to this magnificent benefaction two pieces unusual in their character from her own collection. She thought in this manner to convey her thanks to those who, by virtue of their official duties, were associated together in the accomplishment of the last wishes of the donor. She could not have selected a more delicate or graceful manner.

ROUND SILVER HAND MIRROR IN THE BOSCOREALE TREASURE.

PHIALE, WITH HEAD IN HIGH RELIEF.

One of the foremost members of the collection is a reliquary triptych in silver-gilt, an example of Flemish art of the 13th century, of which we furnish an illustration on page 76. This conspicuous piece deserves the detailed description which follows:

The central part is in the form of a façade of Gothic architecture consisting of a trilobate arcature supported by two groups of fine, small, annulated columns, ornamented on the sloping with crockets and flanked by two pinnacles of four panes and terminated by bell towers. The summit is decorated with a fleuron in architectural shape, surrounded by six small towers with pointed roofs, forming an enclosure about a middle tower. On the base of this monument, ornamented with mouldings on which is oak foliage alternating with precious stones, and where are set plates of silver inlaid with black enamel, is the following inscription picked out on an inlaid ground: *"Quam scio: quod tinxit. Christi: cruor: ac. Benedixit."* The archivolt of the arcature covering the central part bears frontlets of inlaid silver, decorated with figures of dragons with women's heads, or dragons terminating in foliage alternating with parts of foliage, sculptured in openwork, decorated with precious stones. On the inside of the archivolt is maple foliage alternating with an inlaid inscription: *"Hec + : crux Q(ue) voluxit nobis: bis: sanguine fluxit."* The trilobate part of the archivolt is decorated with foliage rising from an inlaid ground.

The ground of the monument is decorated in parts, a sort of tracery, each mesh of which shows the figure of a cross; the sprigs are cut off like foliage. Under this arcature are two figures of angels front to

front, in high relief, clad in long tunics and mantles, with long curled hair, confined with a fillet holding up a rectangular base ornamented with dragon figures on an inlaid ground. On this base is superimposed a reliquary cross with branches in fleur-de-lis, decorated on the two faces with

TRIPTYCH RELIQUARY FROM THE ABBEY OF FLOREFFE—XIII CENTURY.

stones set in bezels provided with claws, with cabchons of garnet, sapphire or topaz symmetrically arranged on the extremities of the branches or on the shaft of the cross.

One of the sides of the cross served as a receptacle for a relic of the true cross. The other side, the central part of which is ornamented with a large pale sapphire cabochon, shows a decoration composed of maple leaves or oak in openwork and four medallions containing, respectively, two heads of men and two of women with hair done up in the style of the 13th century. The face of this reliquary cross is covered with a series of ornaments in openwork representing quarter foils. Flanking this central part and on the lower part of the pinnacles, to right and left, are carved out on an inlaid ground two figures of prophets. On the summits of the pinnacles are seen, represented in the same manner, figures of the church and of the synagogue, figures of the wise and of the foolish virgins.

Each of the wings which fold in on this reliquary is composed of two parts, mounted on hinges, intended to close the sides as well as the front of the triptych. These wings reproduce by their general contour the form of the central part. We see here two rows of small figures coming out of a chased background and decorated with a checkered ornament; they are sheltered under niches of Gothic architecture. On the left the crucifixion is represented, Christ on the cross accompanied by the Virgin and St. John the Evangelist; then Christ at the column accosted by a holy woman bearing a vase of perfume and a person holding a nail of the passion. On the upper part of this wing is seen an angel holding in one hand the lance which pierced the side of Christ and in the other one of the nails which held him on the cross. On the wing on the right is shown the descent from the cross, the dead Christ upheld by Joseph of Arimathea, while to right and left are seen St. John and the Virgin, wringing their hands. Then an angel with wings extended, seated on the tomb of Christ, accompanied by a holy woman and a figure of the Virgin, which dates from the 16th century only, and which was originally destined to make a part of the representation of the Annunciation. On the upper part of this wing, and to the right, is seen the figure of an angel holding in his left hand a reed and a sponge and in his right a closed book.

On the exterior of the wings, under the trilobate arcatures, surmounted by pointed gables furnished with crockets on their slopings, terminated by large fleurons in form of fleur-de-lis, are represented the Virgin and the angel Gabriel holding an amulet on which is inscribed the beginning of the angelic salutation. These two figures form the representation of the Annunciation. Behind these figures, cut and chiseled on the ground, are branches of foliage, rising out of a ground of intertwining bands. On the flanks, under trilobate arcatures, also surmounted with gables, are represented the holy Apostles and St. Paul. Finally, on the reverse of the monument is represented, on a checkered ground, Christ on the cross between the Virgin and St. John. This scene is protected by a trilobate arcature supported by two annulated columns. The monument in its entirety rests upon two crouching lions.

Its height is 32 inches, its width when spread 36 inches, and depth 3½ inches.

A highly interesting example from the collection is a receptacle for holy water (shown on this page) mounted in gold, and a product of French art of the 17th century. The basin is of red Egyptian porphyry. It is set in bezels at its base and rim with two large silver bands in filigree work, between which pass vertically four bands decorated in like manner and sown at intervals with pearls and precious stones. The semi-circular handle, mounted on hooks which take hold of two rings soldered to the edge of the vase, is decorated with two basilisks in repoussé work and chased, set off with precious stones. A polished, uncut amethyst on the top of the handle separates the

HOLY WATER BASIN—XVII. CENTURY. ASPERSORIUM SPRINKLER—XV. CENTURY.

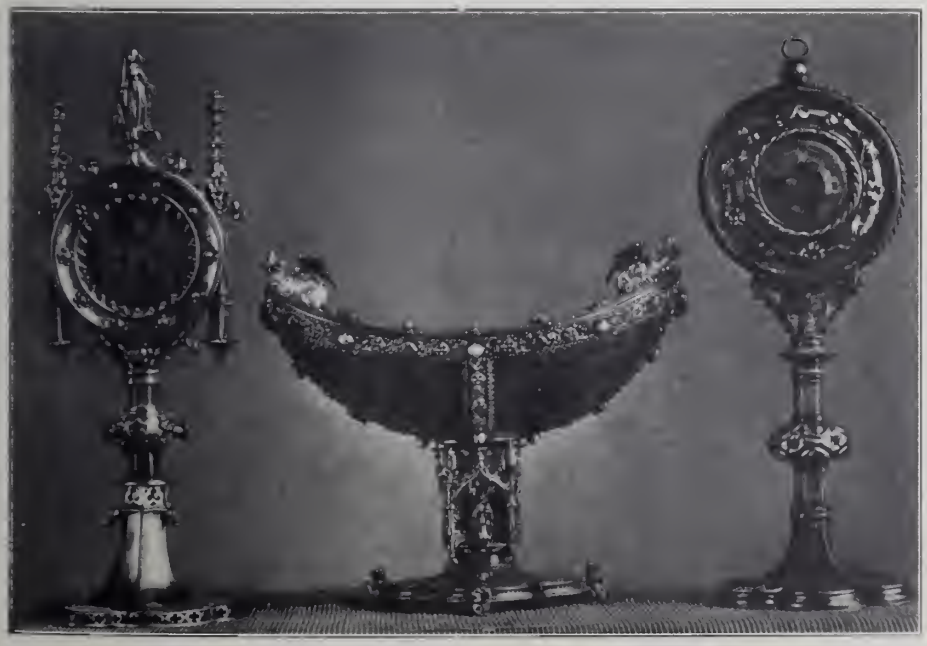
basilisks. Beneath the point of origin of the handle are attached two armorial escutcheons.

Belonging to the above is the holy water sprinkler shown in the same illustration. It is of silver set in gold with enamel and rock crystal. It is an example of Italian art of the close of the 15th century. The stem is composed of a series of cylindrical friezes in silver filigree on which foliage is symmetrically arranged about a medallion in painted enamel, used as a center of the composition. These friezes to the number of four of different lengths are separated by a node with six faces in rock crystal, and two bands painted in enamel with translucent colors on silver. One of these bands shows representations of animals amid the foliage, the other four busts of saints shown in profile in circular medallions surrounded with a round moulding. The knob provided with a ring for hanging is decorated with large clusters of foliage in repoussé work.

The handle is of rock crystal cut in eight facets; the sprinkler proper, in the form of a flattened ball, is covered on its upper part with translucent enamel of a blue tint, decorated with slender boughs of foliage in gold. Four spiral scrolls or volutes, cut out in openwork and ornamented with flowers, complete the decoration.

Among the many interesting objects of which we show a reproduction is a "navette" (below), a cymbiform vessel mounted in gold and enamel, for incense. It measures eight inches in length and 7¼ inches in height. It rests on a foot elongated in form and four-lobed, bordered with mouldings, ornamented with filigree work, itself supported by four lions standing erect, upholding four coats-of-arms quartered. Around the cylindrical stem in lapis lazuli is a miniature edifice composed of four niches in Gothic style, separated by pinnacles, on the profile of which gargoyles stand out. Under these niches are placed small figures in gold enamel, representing St. Barbara, St. George, the Virgin, bearing the child Jesus, and near by a kneeling infant, a holy bishop with crozier and mitre. The vessel itself is bordered with large bands of gold enameled with red and green, on which, in relief, are clusters of foliage and small flowers. Four bands ornamenting the extremities of the flanking parts of the vessel attach them to the base. They are decorated in the same manner and have at intervals bezels containing pearls, uncut rubies and emeralds. The cover, divided into two parts and provided with hinges in the middle, has a similar decoration, and is furnished at its extremities with dragons in gold enamel in high relief, which are the handles of the cover. This mounting is also strewn with rubies and pearls symmetrically arranged. On the inside of the vessel bands of gilded silver divide the interior into parts; these bands are decorated with foliage and carved interlaced work.

Another conspicuous object of the collection is a book cover in gold-plated silver,



BOOK COVER—ITALIAN—XV. CENTURY.

ornamented with enamel. It is a specimen of Italian art of the 15th and 16th centuries. As our illustration on this page shows, it is rectangular in form, placed lengthwise, and is composed of a large band ornamented alternately with rosettes in openwork and open filigree work of extreme fineness. In the corners are four circular medallions, set in bezels, executed in translucent enamel on silver, representing the four fathers of the Church. These personages are shown in half length. All this part of the work belongs to the art of the north of Italy of the end of the 15th century.

In the central part is seen a low relief in gold repoussé, covered with translucent enamel, representing the Lying in the Tomb. This relief, done after a design by Valerio Bello, a work of the 16th century, is placed on a ground of lapis lazuli. The length of this beautiful cover is 7½ inches, height six inches.

Very beautiful is a reliquary in gilded and enameled silver, shown among the illustrations on page 78. It is a work of Spanish art of the 15th century, 32 inches in height. The foot, oblong in shape, is cut in eight lobes described alternately in semi-circles and in curves and reverse curves. In the center of the foot a hexagonal stem rises, ornamented at its base with buttresses enclosing windows in the Gothic style, ornamented with plaques covered with translucent enamel. Halfway up the stem a corbel assuming the form of a fortified place displays volutes terminating in capitals supporting two large figures of angels, with wings unfolded, carrying torches. These

MONSTRANCES—XV. AND XVI. CENTURIES. NAVETTE—XV. CENTURY.

statuettes flank the reliquary proper, which consists of a Gothic construction, ornamented on its six faces with six pointed gables sheltering Gothic windows, on the ground of which are fixed silver plaques covered with translucent enamel. Buttresses separate each of these gables and make a projection from the structure. Three spires, one in the middle, built on a rectangular plan, the two side ones on a triangular plan, each ornamented with Gothic windows surmounted with gables, accompanied with bell turrets and gargoyles, form the crown of the edifice. The central one is capped by a fleuron with two stories well opened out. On the base and on the main part of the reliquary is struck twice the stamp Barch (Barcelona).

A unique and attractive specimen of Ger-

RELIQUARY—SPANISH—XV. CENTURY.

man art of the 15th century is a locket containing an Agnus Dei in silver repoussé work, gilt and enameled. It is in the form of a circular medallion, composed of two separate parts very convex, made to close the one on the other and thus to form a box which is intended to contain an Agnus Dei in wax. (See page 79.)

One of the foremost pieces of the whole collection, as shown in the illustration on this page, is the bishop's crozier in rock crystal. It is a specimen of Spanish art of the 16th century. The node is of greater width than thickness, and carved on the edges and attached by means of gilded silver volutes and a silver ring inlaid with niello to a fluted stem, whence springs a volute, also in rock crystal, representing a twisted rope, the extremity of which opens in such a way as to form a terrace cut with six sides. On the upper part of the crook or volute which the silver foliage borders, and which the rings inlaid with niello or pearls unite the several parts of, is a figure in gilded silver of the Eternal Father crowned with a tiara, holding in one hand

NECKLACE OF ENAMELED GOLD AND PENDANT —XVI. CENTURY.

the globe of the earth and bestowing His blessing. He is accompanied by two figures of angels blowing trumpets. A third angel, holding in his hands a pennant on which is inscribed *"Gloria in excelsis Deo,"* stands out from the lower part of this group, and announces the birth of Christ to two shepherds shown on the platform terminus of

NECK PENDANT, ENAMELED GOLD.

the volute. This volute is itself upheld by a piece of rock crystal bent under, mounted with gilded silver, and on which a bust of a man terminates at its upper part.

The stick intended to complete this crozier is composed of eight cylindrical pieces in silver ornamented with flutings and with rings inlaid with niello. The length of the crozier is 18 inches, and that of the stick five feet.

We illustrate on page 79 an attachment clasp or brooch for an ecclesiastical robe (cope) in silver, gilt and enameled, a product of Flemish art of the beginning of the 16th century. This morse takes the form of a trilobate medallion accompanied by three fleurons surrounded with a wide rim of twisted metal, upon which are fixed bezels containing fine pearls or uncut stones.

EPISCOPAL CROZIER—SPANISH—XVI. CENTURY.

Within this rim, itself furnished with an edging and on an engine-turned ground covered with translucent blue enamel. St. Bavon, the patron of the city of Ghent, is represented seated on a high-backed chair, and clad in a large cloak, wearing long hair and beard and a hat on his head. In his left hand he carries a fleury scepter, in his right a large sword. To the right and left of him are two angels kneeling and holding before them two escutcheons of arms done in enamel. This morse, which measures 6½ inches in diameter, is from the old Oughena collection.

A magnificent piece of jewelry is partly shown in another illustration above, viz., a necklace, 19 inches long, in enameled gold—a fine specimen of German art of the second half of the 16th century. It is composed of 11 medallions in oval form, attached by 10 clasps in openwork and ornamented with rubies and fine pearls. Each

of the medallions, bordered with foliage and done in openwork and enameled, ornamented with rubies and diamonds with flat surfaces, contains a *bas-relief* in gold, executed in openwork and enameled. All the subjects thus represented are taken from the narrative of the Passion. There may be seen the Eucharist, Christ washing the feet of the Apostles, Christ on the Mount of Olives, the kiss of Judas, Christ before Pilate, Pilate washing his hands, Christ at the Praetorium, the scourging, the bearing the cross, the putting on the cross, Christ crucified between two thieves.

From the central medallion there is suspended by means of a clasp shaped like the others a large heart-shaped medallion of lapis lazuli surrounded with ornaments of chased gold in openwork and enameled. On the face of this medallion, beneath an imperial crown, accompanied by two angels, is seen Christ on the cross, together with the instruments of the Passion. The border consists of foliage and flowerets alternating with *briquets;* rubies in flat form and small diamonds are set on the crown and the border. From the bottom of the medallion is suspended an irregular-shaped pearl.

Another beautiful piece of work of this class is a neck pendant in enameled gold. It is a specimen of German art of the end of the 16th century, from Augsburg, and measures 5¼ by 2 inches. On a bracket, done in openwork and ornamented with volutes accompanying a flower whose petals are set off with diamonds and rubies set flat, is a semi-circular terrace supporting a group of two small figures in enameled gold, representing the Annunciation. This terrace, as well as the praying desk placed before the Virgin, is paved with diamonds and rubies. Two columns and subjects of architecture which accompany and surmount it, sheltering it like an arcade, are treated in the same manner. Above the Virgin and the angel the Holy Spirit circles about; two small angels in high relief blowing a trumpet are shown in the upper part of this piece of jewelry. Small pearls are suspended from its lower part; other strung pearls surmount it. A triple hanging chain of gold, ornamented with pearls, ending in an enameled gold ring, decorated with a diamond set flat, holds this suspended.

Among the minor articles of jewelry in this superb collection may be mentioned an episcopal ring in enameled gold, shown with the cut of the morse on this page. It is a specimen of German art of the 16th century. The bezel, in which a flat emerald is set, slightly convex, is in the form of a truncated pyramid with four sides, ornamented on its corners and faces with bouquets of flowers and fruits or enameled volutes rising in a protuberance on a field of black enamel, where golden arabesques are entwined. This bezel, the reverse side of which is divided into four triangular compartments where golden foliage rises from a ground of blue or black enamel, is set on a ring in rectangular sections, decorated on its sides with volutes accompanied with flowers and fruits in relief. The ring is enameled.

Among the choice objects belonging to the collection are two book clasps in enameled gold, works of German art of the 16th century. One of these is shown above the ring before mentioned. Each of these clasps is composed of a part of greater width than thickness, mounted with a hinge on a rear part in openwork which could be put on the flat part of the binding, and another rear part provided with a raised end to form a holder. On the flat part, bordered to the right and left with a torus of filigree work of fine pearls and golden pearls, are attached plates representing St. John the Evangelist and St. John the Elder, standing, the figures covered with translucent enamel. Flowerets executed in the same way accompany the figures of these saints.

GOLD CRUCIFIX—XIV CENTURY. RELIQUARY OF NURNBERG. RELIQUARY—XIV CENTURY.

MORSE OR COPE CLASP. BOOK CLASP. AGNUS DEI. BISHOP'S RING.

The Amber Industry.

IN Dantzig, large stretches of the land upon which amber is found have been laid bare, and a revival of the industry may be expected, especially as amber is gaining in popularity, most noticeably in England.

That amber has been little used for some time past is due, perhaps, not so much to the influence of fashion as to the fact that the pieces obtainable were too small for the taste of the English, who like it for large articles, such as the heads of canes and umbrellas. It has not been possible to supply these in the desired size and clear color, but the discoveries at Dantzig will probably change conditions.

Daniel Silver, Lawrence, Mass., has had plans made for remodeling and refitting his store.

American Watches, Silverware and Jewelry in the British Market.

A Frank Criticism by a Noted Authority of Our Methods of Extending Trade and a Few Words on the Merits and Defects of Our Products from the Standpoint of the British Jeweler.

IN the year 1875 the following introductory paragraph appeared in the *Watchmaker, Jeweler and Silversmith* of London: "The New Invasion is upon us; of that there can be no mistake. We believe, therefore, that, in the face of such a self-evident truth, we cannot do a better service to the watch trade all over the empire of Great Britain than rouse attention to the fact. It is no use in scolding at the invading tide—it is here; the resistless wave is silently rising all over England, and we have counseled ourselves to be borne peacefully upon its surface, rather than risk forcible removal and submersion. Having now sounded the tocsin, we will endeavor to give such facts and details of this invasion as we have been able to ascertain.

"At the western end of the Viaduct, on the south side of Holborn Circus, facing the Prince Consort's equestrian statue, the rambler in the metropolis will find before him one of those newly built palaces—monuments of commerce in elaborate stonework—which are the glory of trade and the pride of the modern Londoner. Upon its dark, enameled, facial band, deeply indented in letters of gold, are the ominous words AMERICAN WATCH COMPANY.*"

To-day the invaders, continually reinforced, have settled down peacefully and quietly in the Old Country, but they have rarely learned the ways of the people among whom they sojourn. The few who realized the possibilities and profited by their intuition and foresight have done well, while others, who have brought with them the ways and mannerisms of the States, have found a dead man's land in which to fritter away their energies.

I have had many chats with American friends and they seem to all agree that American merchants will not take the proper steps to conquer a market, while the drummer is too cocksure of his knowledge of men and things. We may take that knowledge for granted, so far as his own land and people are concerned, but the temperaments of the various nations differ, and the methods which may be well in Connecticut or New York will not necessarily suit the Irish province of Connaught, the great Scotch mercantile city of Glasgow, or the City of London. This fact has been brought home to every shrewd American who has tried to do business in Great Britain with the aid of American travelers, and as a consequence it is generally the case that British travelers represent American jewelry and watchmaking houses in Britain.

There are, of course, exceptions, and the exceptions are the smart, adaptable men who are the salt of the commercial world. Personality plays a great part in the British jewelry trade, and the average shopkeeper is very conservative. He will not readily take up with new travelers, and is very chary of opening new accounts—unless he is on the down grade. That being the case, it may be well understood that the lot of any newcomer is not a happy or easy one, particularly when the newcomer has the drawback of a mannerism which is so totally foreign to the people, and particularly the trade of which I am writing.

"Good wine needs no bush" is an old English saying, but one fault of the American traveler is his insistence upon a lengthy talk with his auditor. Now, if the articles he has to offer are really salable his main business will be obtaining the necessary audience, and, having obtained it, to shortly and clearly explain his wares, their quality and advantages. The business man appreciates the prompt, clearly spoken commercial traveler; to-day the storekeeper has much to do without listening to a long diatribe upon the obvious merits of an article and, too often, the demerits of rival manufacturers, so that even with a really good article the American traveler has often been a failure in Great Britain.

But he and his British contemporaries have also been failures when the productions they carried were totally unfitted for the market. And here the criticism I must make is true in very many instances of British manufacturers, for they will not realize that it is the main business of a manufacturer to cater for the peculiar demands of the countries to which he would export his goods. I do not say that he should deliberately manufacture imitations of all that he finds selling, or that he should invariably base all his designs upon the current style, for it should be the business of every progressive manufacturer to anticipate new fashions and encourage new departures in style.

Now I understand that every manufacturer in the United States is anxious to do an export business, but nearly every one expects to do business with exactly the same kind of productions as satisfy the jewelers and people of the United States, and if his agent fails and explains the real reason then, as an American friend of mine here says, "they simply rise up in their indignation and 'holler' murder!" This may be due to the reason given by this same friend, who with an extensive knowledge of Great Britain, Europe and the United States, says "my countrymen are not as successful as they might be in seeking export markets because their successes at home, where they are protected by a very high tariff wall, have made them too conceited for words. They feel, or at least the majority do, that they are miles and miles ahead of the manufacturers of other countries in labor-saving machinery, as well as in the patterns they produce, and the finish of all they turn out!"

This homely criticism is none too strong, and could be substantiated by many striking instances. One will suffice. Take gold-filled goods. I would willingly grant that no country can surpass the productions of the United States quality for quality and finish for finish, but in Great Britain the German manufacturer is an easy first, because he offers the style of jewelry which is in demand. Quality, finish and sound value intrinsically will not sell an article of jewelry; it must satisfy the aesthetic tastes, the peculiar ideas or the immediate wants of the people to whom it is offered. It is no use offering crosses to Mohammedans, or a bearskin coat to the denizens of the Congo.

To again quote the opinion of an American in London: "The very high tariff wall enables American manufacturers to make profits they could not make in any other country under the sun, so that when they have to compete with Germany or England they are not satisfied to make the small margin of profit that the people in the countries named are content with." He gives as an instance the manufacturers of Providence, Attleboro and Newark, who, with the largest factories in the world making 10-karat solid gold brooches, find it absolutely hopeless to compete with the solid gold nine-karat brooches made in Birmingham, not only in cheap lines but also in the very expensive. "They claim," he says, "that this is because of the lower wages paid in Birmingham," and further, "that, to a certain extent, this may be so, but the *real reason* is not that they cannot produce a brooch at the same price, but, rather, that they are not satisfied with the small profit the average Birmingham manufacturer is content to take, and because the bulk of them can sell all they produce in the United States."

It has frequently been argued in Britain that the American manufacturer, because of his high tariff, "dumps" his superfluous goods abroad, even although he makes only a mere fraction of profit. My friend's statement, and my knowledge of certain lines, certainly go to show that the reverse is often the case. Whether the question of wages—money or real—enters into the question of competition, I frankly admit I cannot definitely say, but I do know that Birmingham can produce certain chains and lockets better and cheaper than the German jewelers of Pforzheim, whose wages are lower than those current in Birmingham for the same work, while British silversmiths and diamond mounters can readily find a market in Germany for well-made silverware and jewelry of good design and finish, despite tariffs and the lower wages paid to the German workmen. There are economic points, which one need not enter into now, which would possibly explain the reason, but suffice to say that, while Germany and Britain compete there

*Now the Waltham Watch Co. and removed to larger premises in High Holborn.

is a mutual understanding as to one another's wants in many directions: American producers, except in the case of watch manufacturers—and there are exceptions even here—will not even try to understand the European export markets.

There are many lines in which the American manufacturer is very out of date—viewed from the British and European standpoints. I am not blaming him if he is satisfying the taste of some of his countrymen and women. I have seen bracelets for middle-class clients which would not even be worn by the English factory girl, and her taste in jewelry is considered coarse enough; American finger rings placed on the British market which coster women would disdain; fob chains which Englishmen would only think of as stage properties, and only usable in a pantomime; brooches which remind one of the heavy and grotesque mid-Victorian jewelry which our grandmothers used and which might have suited the crinoline skirts and the great "bishop sleeves," but are really in very bad taste in these days of close-fitting garments. Band bracelets of abnormal width set with stones, or coarsely chased all over, appear to be quite fashionable in the United States, and some American jewelers have actually tried to sell them in Britain! They are hopelessly unfashionable, and British-made goods of this style found an ignominious end in the melting pot at least 20 years ago. Even where the American diamond mounter is, comparatively, "up to date," he is generally 20 years behind Britain, and a quarter of a century, at least, behind the best Parisian styles. For proof of this I have only to look at the last advertisements in the Anniversary Number of THE JEWELERS' CIRCULAR-WEEKLY.

And yet, some American firms produce excellent examples of the jeweler's art. Their commercial value in Great Britain would be considerable. It is lightness, strength, and good finish which the middle-class purchasers require, while the working classes demand a strong, neat but very effective object.

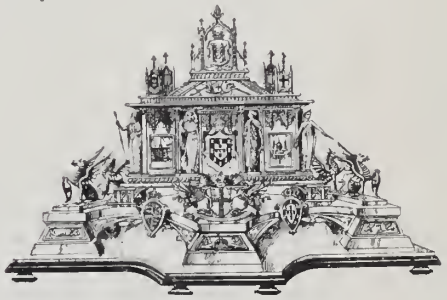
The days of class dress have gone; no longer does the country laborer wear his linen smock; he will have his "Sunday suit" and look, as near as he possibly can, "like a gentleman"; while the servant girl, discarding her cap and apron, will walk out on Sunday, to all appearances, as elegantly dressed as her mistress, and—even when her jewelry is imitation—in as good taste as the real articles which are the pleasant possessions of her employer. This is a fact which the American manufacturer has not yet realized. Democracy is dress and personal decoration is a real and living entity in Great Britain, and the man who would be successful in business must realize that.

Without doubt the most successful business has been done in Britain with American watches. I need hardly specify those which have been placed and have gained a firm hold on the market. The "Waltham" and the "Keystone-Elgin" have, by the astute and businesslike qualities of those responsible for their sales, made a position which will not be very readily taken from them. Then, in another direction, the Standard Optical Co., thanks to the smartness of their British representatives, Messrs. Reed Williams, Ltd., has secured a footing in a very short time, to the surprise of the optical trade. But these successes are due to the fact that the responsible business man understood the country, the people and their requirements; he had no preconceived notions of what was best for the clients he wished to secure. He simply offered to act as a servant, to supply such productions as he knew he could recommend as genuinely serviceable, and to watch the requirements of his newly found customers. It is in this spirit that the key to the markets of the world is to be found.

I have pointed out that American-made jewelry is too often antiquated and heavy, and hence cannot find a sale, that American optical goods go well when properly introduced, and that watches also have found a good market. It remains now to write of silverware. Undoubtedly some of the most artistic domestic silverware is made in the United States of America. The immense variety of really well designed and strongly wrought spoons and forks surprises the Britisher who looks merely at the advertising pages of the JEWELERS' CIRCULAR-WEEKLY, but those of us who have the greater knowledge of the range of ideas as exemplified in American table ware, cannot but praise the energy and taste displayed. Such productions should find a very good sale here or in any Continental country but—the fact is that the prices asked are too high! Is it for the same reason that locket-makers cannot compete? Does the American manufacturer of spoons and forks want too great a profit? It is somewhat hard to say. The cost of designs and dies must be immense. In Great Britain the maker of artistic spoon ware has to compete with the prejudices of the public, strongly backed up by the shopkeeper, who will only stock, as the most ornate line, "Kings" or "Queens" pattern spoons and forks—a style which has done service for a century! Also the plain, well-proportioned "rat tail," or the ungainly looking "fiddle" pattern.

America should be proud of her spoon-makers, and those members of the public who pride themselves on their good taste would, I think, become customers if the opportunity was placed before them. With the larger objects of domestic silverware the experience of American manufacturers has also been very satisfactory. I have seen some delightful specimens of the American silversmith's art shown by one of the largest American silversmiths; in make and decoration they are splendid, but plainer objects are mostly demanded, while the cost of fine chasing is discounted by the shopkeeper.

Above all, however, is the hall-marking question. This is the great drawback. All foreign made goods must go to one or other of the assay offices, an assay made from scrapings of the object, and then marked with a special stamp showing that the article was made abroad, but had been officially assayed and marked in a certain office. This is a troublesome matter, for when the object is finished and has to afterward go through the workmen's hands at "the Hall," it means that it is soiled by handling, more or less injured by the scraping and punch marks, and consequently needs repairing, and, after all, bears a mark which proclaims its foreign origin, and—because of the conservative nature of the British and Colonial, and even many Continental silver buyers—will not sell. They all want the British *lion!* As one consequence of this the company to which I referred has started to actually manufacture silverware in Birmingham, in order to produce objects which will answer the requirements of the assay offices, and so permit of their being marked with the British mark.



These few reflections upon the sale of American made jewelry, silverware, horological and optical productions in Great Britain may surprise some, may seem, in part, too critical for others, but if they merely make my readers think—then the editor's request that I should deal with a difficult subject will have served its purpose.

ST. GEORGE.

Gold Casket Recently Presented at London to the King of Portugal.

THE jeweled casket illustrated herewith, the gift of the Corporation of London, was specially designed by the Goldsmiths' and Silversmiths' Co., Ltd., London.

The casket is oblong in shape and in the Hispano Gothic style. In the spaces between the open columns are eight gold statuettes representing Art, Science, Commerce, Literature, Authority, Honor, Prosperity and Welcome, shown against a

CASKET PRESENTED TO KING OF PORTUGAL.

sapphire-blue background suggesting a Portuguese sky. In the interspaces are four views of the chief features of the city of London—St. Paul's Cathedral, the Guildhall, the Mansion House, and the Tower Bridge—beautifully executed in enamel.

Surmounting the body of the casket is a magnificent canopy adorned with sapphires and diamonds on the obverse, and bearing in the center the crown and shield of the King of Portugal, with the letter "M" in large diamonds.

The lid itself is decorated with city emblems. The whole casket is supported on silver-gilt base with Gothic feet. On all four corners of the base are dragons, while over the open arches are shields surmounted with the crowns of England and Portugal, with the respective arms of the two countries displayed beneath.

The arms of the City of London occupy the front of the base, the Cross of St. George on the shield of the coat of arms is set entirely in rubies.

The shield in the center space above bears an inscription recording the occasion of the gift to King Manuel.

The Call For the Gold and Silversmith

By CLEMENT W. COUMBE

(Iliad, XVIII.) "But Thetis of the silver feet came into the house of Hephaistos, imperishable, starlike, far seen among the dwellings of immortals, a house of bronze wrought by the crook-footed god himself. Him found she sweating in toil and busy about his bellows, for he was forging tripods twenty in all to stand around the wall of his stablished hall, and beneath the base of each he had set golden wheels, that of their own motion they might enter the assembly of the gods and again return unto his house, a marvel to look upon. Thus much were they finished that not yet their ears of cunning work set thereon; these was he making ready, and welding chains. While hereat he was laboring with wise intent, then drew nigh unto him Thetis, goddess of the silver feet. And Charis went forward and beheld her, fair Charis of the shining chaplet whom the renowned lame god had wedded. And she clasped her hand in hers and spake and called her by her name: 'Wherefore, long-robed Thetis, comest thou to our home, honored that thou art and dear? No frequent comer art thou hitherto. But come onward with me that I may set guest-cheer before thee.'

"Thus spake the bright goddess and led her on. Then set she her on a silver-studded throne, goodly, of cunning work, and a foot-stool was beneath her feet; and she called to Hephaistos, the famed artificer. . . . And the renowned lame god made answer to her: 'Verily a dread and honored goddess in my sight is she that is within, seeing that she delivered me when pain came upon me from my great fall through the ill-will of my shameless mother who would fain have hid me away, for that I was lame. Then had I, suffered anguish of heart had not Eurynome and Thetis taken me into their bosom. . . . Nine years with them I wrought much cunning work of bronze, brooches and spiral arm-bands and cups and necklaces, in the hollow cave.' . . . He said, and from the anvil rose limping, a huge bulk, but under his slender legs moved nimbly. The bellows he set away from the fire, and gathered all his gear wherewith he worked into a silver chest; and with a sponge he wiped his face and hands and sturdy neck and shaggy breast, and did on his doublet, and took a stout staff and went forth limping: but there were handmaidens of gold that moved to help their lord, the semblances of living maids. In them is understanding at their hearts, in them are voice and strength, and they have skill of the immortal gods."

PREFACE.

EVERY sermon opens with a text, and this is either a homily for the smitheries of the precious metals or a wasted breath. This Hephaistos text is rather long, but it brings the metal-working readers where the writer wants them. Right back to their heathen god and patron, first and foremost in the art, Vulcan, whom most if not all goldsmiths have forsaken, probably forgotten. The marvelous repoussé work on that Achilles shield that Hephaistos wrought and presented to "silver-footed" Thetis that the goddess might re-equip Achilles after Patroclus had lost him his offensive and defensive resources should be vivid in the memory of all metal workers. And having brought you to a Homeric presentation of the god of craftsmen, goldsmith of deftest hands, though mis-shapen of his nether limbs, we are once again on Hellenic soil, the womb of high creative art. Most clearly to see the goldsmith of the present day it is necessary to see him in the mirror of the past and then draw comparisons—conclusions will quickly follow.

You will notice that the limping god put life and activity into his metallic creations; when he was through with them they started in to work themselves. And that is the part of the text to be borne in mind all through this sermon. We have lost this, the most interesting and powerful factor in the goldsmithing art.

THE GOLDSMITH OF THE PAST.

The Egyptian priest encouraged the designer and the craftsman. The multiplication of amulets and other trinkets, decorated (better call it *enlivened*) with symbolic significance, increased the radius and intensified the activity of that religious reverence which the priest desired. Hence the esteem and high social position given the artist-artisan. The same priestly patronage and protection was given the artist-artisans of ancient Greece and Rome. And if we search through a collection of ancient gold and silver smithing examples, or their work in the plastic bronze, a peculiar fact soon dawns on us. Those rings, those brooches, represent more than mere ornamental utilities; that *crater* or *cantharus* from which they doled and drank the enthusing beverage represented more than drinking utensils. Their ideality of form and, above all, the devices used in their ornamentation or adornment bespeak a higher and deeper purport than their bare utility.

Whether the ornament was the lotus, the anthemion, the guilloche, intreccio, or the familiar egg and dart, these were all frames of beauty in which to enshrine a theme—a story or allegory, something educational, cultural. They recall in their usage the presence of the gods, and the *calix* and *ciborium,* through the mythological depictments hammered or moulded so graphically on their surfaces, bring reverence to the owner and user alike and respect and praise for the artisan creator. Both Greeks and Romans cherished the refining influences of their metallic wares. Those heathen artisans were placing souls and speaking tongues in their metallic creations. The people were wearing and drinking from articles that appealed to their superstitions (you will call it, no doubt), that pulled them into the presence of their gods. The Hephaistos magic was in their creations!

JEWELER VERSUS GOLDSMITH.

To paraphrase the noted announcement of a monarch's decease, "The goldsmith is dead—long live the jeweler." With the passing of the Renaissance period the art of the goldsmith, with his creation of marvels in the precious metals heightened by his palette of enamels, faded quietly out of public esteem. With the advent of the diamond and the lapidary's faceted bewitchments the goldsmith became a maker of gem frames. His craft is to build a structure (unobtrusive generally) that shall safely hold the glittering precious stone. Ornament he may put into his gem housings, if he can do so without detracting the attention from the objective, a diamond, ruby, pearl, or what not. And that ornament may be artistic if he can make it so. Minor considerations, with the gem always in the bold foreground. What wonder, then, that since the 17th century Mr. Jeweler has displaced Mr. Goldsmith? The jeweler can get his full carat prices, but the genius that could bring forth living poetry from the cold metals naturally faded from off the face of the earth. The possibilities, in embryo, however, are here again. And the purpose of this article is to bring clearer to sight the fact that the gold and silversmith's ennobling arts may soon come into their own again, that there are bright possibilities of a revival of these seductive methods. History may be made to "repeat itself" in this as in other branches of endeavor.

The jewelry business is all right, but let us get back to gold and silver smithery. It will pay, as I will show you.

THE GOLDSMITH OF NOW.

Collingwood says: The ornament of all early ages, notably that of ancient Egypt and Assyria, was a sacred and mystic symbolism. Its use was primarily for religious purposes, to adorn the temples, the sacrifices, the priests. Secondarily it was applied to domestic uses—not for mere luxury's sake, as men grew richer and could afford fine houses and clothes, but as a sign of the sanctification of daily life, by the introduction of divine symbols, protecting amulets and ever-present tokens of ever-present powers. Just as in India a sacred name is given to a child that the parents may utter a prayer whenever they utter their child's name, or in ancient Greece or modern Christendom that the child might be under some god's protection, or influenced by some saint's example, so early ornaments were shrines set up in the house, or charms worn about the person, as a witness between God and man. Further, the ornament was a beautiful thing, and, so derived, nobly beautiful; it raised emotion, and, with such associations, noble emotion. With us art in the house means luxury, and too often suggests vice; with them it meant religion and suggested virtue. Every pattern to them was a little oratory, or like those texts which people hang in their rooms and call them "silent comforters."

And now a word on the practical side of this topic. Some readers may think these facts do not apply as practical these materialistic times; that those artists who created these soul-inspiring works were actuated by emotions and impulses that our artists do not feel; that those artists were æsthetics. While the Mother Church always fostered and patronized art (excepting, of course, the Iconoclastic Christians—say, 750 to 867 A. D.—and later the Puritans), it must not be taken for granted that religious devotion in the artist created the impulse. Probably a much more matter-of-fact cause raised the æsthetic qualification of the worker. Good pay, popularity, dig-

nity of social position of the craftsman were an effective stimulus. For, with sadness, we must acknowledge those workers in stone and metal, even though producing masterpieces for the church, were materialists in a high degree, and, if not actually degenerates, were worldly devotees to "wine, woman and song." We call it "Bohemianism" these days. Money was, even as now, the great incentive of art.

As Fredk. S. Robinson says: "Vasari's artistic life was similar to that of the companions of his craft. The artist went where work was to be done and he could secure the doing of it, hiring himself out to conflicting popes and princes just as the 'condottieri' (hired soldiers) of former days fought indiscriminately on either side, wherever they could get the highest wages." Please remember that the artist painters of these days were recruited from the goldsmiths quite commonly. A very close likeness of our artist-artisans of this day.

And now let us sift the facts that we have dished up; let us see what they give us of instruction. The goldsmith of the pagan days put Hephaistos magic into metallic creations. They talked—ours don't. The artist-artisan of olden times was a worldly, even earthly, individual seeking gain and physical pleasures—as do ours. His popularity and success lay in the fact that he gave his patrons things that meant something—ours don't. Those patrons of the distant past enthused over productions that had a living meaning—do ours?

Well, let us see. Certain jewelers reproduced the ancient Swastika. What happened? The world went crazy over it, and they haven't got over the fad (?) yet. Score one for the jeweler. But what made the world run wild over such an old silly fetich? It was a Buddhistic as well as Brahman religious symbol in India, and so it was everywhere else—if not since God made little apples, at least since He created little man. There is no attractive beauty about those harsh angularities; but it was a mystic symbol, it had a lovely story at the back of it. It talked.

Someone, somewhere, somehow, set the old scarab of Egypt up again to be worn on the finger. If this was a jeweler, score two for the jeweler. For it was a hit, was it not? But there is certainly no beauty in his bugship to create all this furore about. Again that romantic little story at its back did the trick. It talks, and tells us such a fascinating lot of mystic symbolism.

Let us wander from the jeweler's fold and we come across a funny fact from toyland. The newspapers tell us a woman made the first "Teddy bear." What made its stupendous sale? There had been woolly-bear toys back into generations. It had life, the legs moved, so the children took the critter to their bosoms; and then there was the enormously superabundant vitality of the "Teddy" name at the back of it. No wonder the grown-ups themselves were drawn into the woolly vortex!

Someone took a piece of clay and quickly "Billikin" sat on his throne, surrounded by a legend. Is "his nibs" beloved for his beauty of contour or nobility of expression? He has, to be sure, the prominent, not to say tickling, features of a genius. He is irresistible, and if his presence does not bring a smile, go see a doctor. It's the story at the back of and all around him that enforces his popularity.

This from Paris correspondence of THE JEWELERS' CIRCULAR-WEEKLY, June 2:

"Automobile medals to carry when one is traveling are greatly in demand, being usually in the shape of the image of a saint or some heathenish fetich. St. Christopher, the patron of travelers, is often invoked, and a late design shows the head of the saint in high relief of silver set in a circlet of gold with a prayer engraved. Others of Egyptian or Persian origin are quaintly engraved in Arabic characters with some motto characteristics of good luck or there are symbolic images on elongated pieces of turquoise matrix of Chinese jade.

"Mascots for the house are also fashionable, and everywhere one sees such ornament on the mantel; even though one does not put faith in their efficacy they are worthy of acquisition because of their artisitic quality."

This also from the "gay" capital (see THE JEWELERS' CIRCULAR-WEEKLY, Oct. 27):

"It is singular in these days of enlightenment that people in every walk of life believe in the efficacy of fetishes, and any quantity are exposed in the jewelers' windows. A new one is a preservative against shedding tears, which is eagerly purchased by sentimental maidens. Novel are lucky fairy brooches of Celtic inspiration, and which are said to keep away evil spirits. The design dates back several hundred years and consists of a heart surmounted by a coronet studded with precious stones. In England and Ireland the talisman is offered by the godmother as a christening gift or given as a trotb-token by a man to his sweetheart."

But what's the use? You could paste up page after page of these "signs of the times," but if the American jeweler can't read signs, as I said, what's the use? The world wants living art. It is howling for it, and as we cannot create these days (the Hephaistos power has left us absolutely) we must rob the tombs of the ancient dead to furnish the cultural talking pieces. Paris has heard the howl and obeyed, and no doubt is reaping a rich harvest. For, if properly done, this kind of reproduction means dollars revenue for doughnuts expenditure.

The public at large of this day, you will say, is uncultured, therefore the eye and mind need some training. So were the Grecians of the archaic period, but the artificers put cultivating influences into their wares and the plebeian mind grew to an apprcciation of the beauty of life in the plastic material. The present day requirement is well expressed in Wheatley and Delamotte's "Art Work in Gold and Silver": "The study of beautiful objects should first fill us with admiration for what has been done in past ages, then it should cultivate our eyes so that we are unable to tolerate what is not in good taste, and lastly it should make us capable of elaborating new and living beauty out of the reminiscences of the old." (Note the words *living beauty!*) Those pieces of metal of the Greek, Roman, Byzantine and Gothic periods talked, and created reverence and awe in the uncultured soul.

Rome, during the Empire, was too materialistic to produce creative genius. She had power and wealth, but the heaven-born genius always had birth outside, and she had to import her artists from Greece. We also labor under somewhat similar difficulty, and our artists either come from or get their stimulus from Europe and the East. But none ever in history valued art higher than the noble Roman, unless it be the present United States Croesus. We have about squeezed that lemon as dry as Europe will let us. We must get busy and grow our own fruit from now on. Right here on our own little fruit patch. And the seeds are here. You will find them appealing to you to use them as they peer out of their glass cases at 86th St. and Fifth Ave., in "little old New York." Ask for the Metropolitan Museum of Art.

Step inside the museum—that tomb crowded with the material living souls of artist-magicians, whose ethereal essences have returned to their gods, whose clay presentments even have crumbled into shapelessness, but they have left behind, in stone, baked earth and metal, things throbbing with life and chock-full of talk, tragedy and comedy. Step in and help yourself.

Take a careful choice—those that talk the loudest, those that talk sweetest, whichever you think most suitable for your public today. There's a grand and variegated assortment of speaking individualities. But all look appealing to you to let them out of their glass show cases, that they may continue their mission among men.

In writing "The Ancient Scarab" for this periodical's issue of July 1 and 8, last year, I used the cartouche of Miss (or was it Mrs.?) Cleopatra. There's a whole stack of people who know all about that lady—more about her than she ever knew herself. And there was that delicious spicy scandal. People do love scandal, but it is scarcely necessary to tell the American jeweler that. I only want to just hint a little, you know. And this is only a repetition, more emphasized, perhaps, than the other published in February and March of the year before last, when the writer "told you so" in a gentle hint entitled "The Occult in Gems and Jewelry." But now the Parisian jeweler leads and you must follow.

Well (to get back to the museum), when you start in to introduce your living ancient trinkets, don't hand out something nearly like, "just as good," but make the actual thing (a replica—its double), even down to the true metallic alloy, if possible. Better ask the curator (he loves the ancient talkative children under his care, and will tell you a host of fascinating facts about his protegés). Just pump, and pump, till you get all he knows, then put it in print and give a copy of the story of each replica (make replicas—not near-replicas, but the exact thing). The average United States citizen is weak on the classics; treat him as from Missouri, and he will be grateful for enlightening him on so fascinating a topic. And you will be well repaid in shekels for your cultural tuition.

In your "story" that goes with each replica state that the original lies in the Metropolitan Museum; tell them to go and compare it; state the room, case, number of exhibit, etc.

Like most sermons, this is getting too long. Sermons end with a benediction. We started with quoting the immortal Homer; we leave you with the hope that his words may carry weight with some few, and close with the potent fact that "Whosoever obeyeth the gods, to him they shall gladly hearken." —Achilles to Pallas Athene.—*Iliad.*

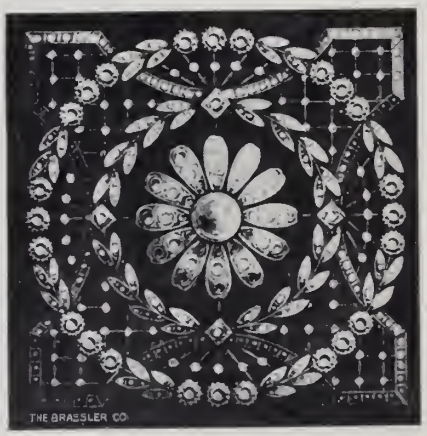
The Trend of Fashion in Jewelry.

By LILLIAN E. PURDY.

LOOKING at the year in retrospect, three facts stand out prominently: First, on the whole, conditions have been far more prosperous than they were during the preceding 12 months; second, considering the prospects, surprising advance-

ELABORATE DIAMOND TIARA IN THE DIRECTOIRE STYLE.

ment has been made in the class of jewelry produced and the development of original designs; and third, the status of affairs has reached the point when the time is eminently ripe for the launching of novelties and the promotion of enterprise. In a word, jewelry is surely progressing and we may expect great things in 1910. The recent depression may only have served to



BOW-KNOT—DIRECTOIRE STYLE.

give fresh impetus to the production of jewelry of the highest types, as it has at least afforded time for the growth of ideas, having precluded up to this time the making of new dies and machinery necessary to all innovations. Such, indeed, are the tend diversity and advance in the other:

In general, this has not been a year for the sale of novelties. Few, if any, really new articles have been produced. The fads and fancies of fashion have been pushed into the background, and the more standard articles have been in demand. They have also been average in price, barring the Christmas season when extremely expensive pieces have been sold in comparatively large numbers. The withholding of purchases till the last moment indicated some caution, but the final sale of these elaborate articles, some of them reaching hundreds of thousands of dollars, showed conclusively that the tide had turned. And, the one strikingly observable feature of this jewelry was that it was almost universally of a high type of art.

There is no longer any doubht about the trend of jewelry toward the artistic. More and more, people are traveling and learning, and their education has the one great result of cultivating in them an appreciation of the beautiful and artistic. Of course, there are still the masses who have yet to learn—those who demand the highly polished machine-made jewelry, the intrinsic value of which is equal to the actual amount paid for it. These people buy their jewelry as an investment. To them the design and the workmanship have no special meaning. They wear thousands of dollars worth of jewelry upon the street, perhaps hurrying for a train with both hands filled with heavy suit cases, while the person of more taste but less means, who could not afford these luxuries, but has a better knowledge of how to live, rides calmly in a cab to his train, thinking it bad form, to say nothing of discomfort, to carry his own bags.

The class represented by the latter person is growing rapidly. A love for art is becoming widespread, and the trained eye is quickly cognizant of the elements of art in jewelry—the design, the color combinations, the workmanship—until now the in-

DIAMOND COLLARETTE.

trinsic value has little to do with the incentive to purchase. It is art that is demanded, and there is no objection to paying for workmanship. There is so much wealth in the land that it is no distinction to have money and to blazon it forth in

large, expensive jewels. Artistic effect is the watchword, and the jeweler who can attain it, catering to those who have already developed their art sense and educating those who have not, is the one who is succeeding and whose occupation is worth while.

Perhaps the most pronounced illustrations of the growth of art are found in the dainty jewelry made of tiny diamonds set in platinum. Here, indeed, is a wide field for the designer. For, the small stones lend themselves so charmingly to dainty designs and the platinum, in the French gray finish, enhances the beauty of the diamonds so wonderfully. The designs all tend toward lacy effects, the knife-edge platinum and crochet work being marked features of the newest productions. These ideas, woven into all manner of diamond jewelry, including brooches, tiaras, necklaces, and even rings (an oval stone, for instance, being set off by platinum crochet surrounded by a row of tiny diamonds), are most conspicuous upon a new ornament, the medallion, or plaque, as it is sometimes called. This more or less flat surface of circular or irregularly circular shape, affords an excellent opportunity for beautiful designs. It varies in size from three-quarters of an inch to two inches in diameter, and forms one of the most striking ornaments of to-day. Swung from a slender 18-inch chain of harmonizing design, or held by a narrow black ribbon, it has been an important part of the costumes of the well-dressed women at the opera, concerts and dinners this season.

Of almost equal importance is the small flat locket, having a similarly treated front surface, with the addition of a transparent enamel background. When this little article first made its appearance, its sale was impeded by the fact that its color scheme was not of such a universal character that it could be worn with any gown—and for an ornament of so great an expense, this was a serious drawback. But, an ingenious jeweler soon solved this problem by making a set of enamel plates or plaques of different colors, which were adjustable. In this way, the same lacy design of diamonds could be used with any desired color of background, thus harmonizing with any gown the wearer might elect. Slipping in easily, this clever idea provides a combination of many lockets in one.

As a close second to these come the soutoires and soutoire-necklaces. The lat-

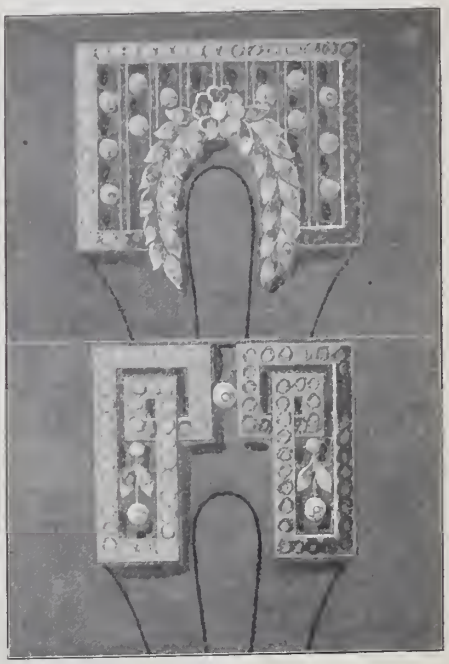
ter are perhaps the more novel, being combination affairs, the soutoire extending only half the distance around the neck, the remainder forming a chain. Made of all diamonds or diamonds and pearls, these are very effective, the tasseled ends crossing gracefully in front to form the central ornament. Whether their present vogue will continue is a question, the stole effects in braided beads and bands of pearls, as well as the jeweled sections upon ribbon or velvet being on the wane. One large manufacturer has long since discontinued making soutoires and he declares that the fashion for these has virtually passed.

But it is a marked characteristic of the ensuing fashions that neckwear of all descriptions has headed the list of sales. The tendency to barbaric ideas seen in the necklaces formed of a close succession of pendants extending all around and an inch or more in length, and the Egyptian types, having large cabochon stones with elaborate filagree in Etruscan gold, seem to be losing ground. The festoon effect, seen at the beginning of the season, is also slipping away. And, in place of these, the simple La Valliere, either consisting of a lacy design or a single stone setting with surrounding decoration, seems to be usurping the place of honor. Here, the lacy style is sometimes carried out in gold and pearls—suggesting that this treatment may also be applied to the less expensive materials and to numerous articles, as is often the course of progress with new ideas. They appear in the most costly materials and are then copied all the way down along the line. Sometimes this is fatal, as all materials do not lend themselves equally to the same effects.



Beautiful indeed are the lacy touches seen in some of the exquisite La Vallieres and brooches in which the black opal forms the center design. In these charming creations, the color effects are heightened and softened by artistic strokes in soft-toned enamel, or here and there, the lights are brought out by small diamonds, emeralds or rubies. In all of these as in other articles now in the prevailing fashion, there is a marked departure from the Oriental, the Louis XIV. and the Louis XVI. designs. They all seem to tend toward simplicity of lines, a dainty, lace-like effect, and a harmony of color, that show a love for the beautiful and a knowledge of the laws of art.

In the use of small diamonds, it is a noteworthy fact that the caliber work is now on the decline. In some cases, it is preferred and is really necessary, but as equally good results can be obtained with the round stones, the demand runs that way. And there is ample reason for this. When stones are cut to fit certain spaces, as in the keystone shape, there is a tremendous waste, but aside from this, the stones can not be used again when people wish their old jewelry remodeled. The round stones are always acceptable, fitting into almost any conceivable design. Hence, they are really more valuable, and when purchasers consider these points, they are inclined to favor the more practical stones.

Among the neck ornaments, brooches rank with necklaces in point of number of sales. Single stone brooches, with surroundings of pearls or decorated gold, have had a steady popularity, and the prospects bid fair for a continued demand. Then,

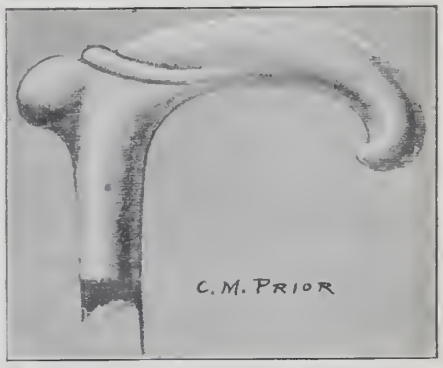
have been used in it. The pearl bow pin to wear with a fluffy maline bow has also been well received. The introduction of tiny jewels in these pins adds to their distinction and charm. Different from these, are the brooches to which the old style pendant idea has been applied. These are litt'e dangles, usually two, made of links of pearls and gold, and are hung from a

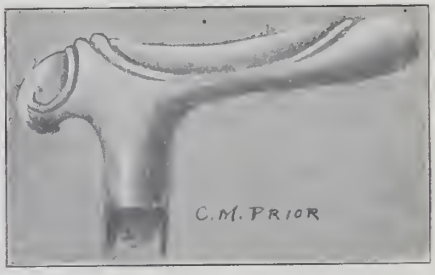
DESIGN FOR BUCKLE—NEW ZEALAND DECORATIONS.

scroll-like design that was popular in the olden days.

The attempt to reintroduce the art nouveau style in brooches has met with only luke-warm favor. Some exquisite designs have been seen—sprays of flowers with delicate veining in the leaves, or clusters of red poppies in the foreground with a sky behind, or church windows with blue enamel



DESIGN FOR BUCKLE—LOUIS XVI. STYLE.



to simulate the stained glass. But there has been no general acceptance of these ideas.

When the year opened, the sale of ear-rings was in full blast and one jeweler predicted that these were the coming "best seller." His hopes were not realized, however, for ear-rings declined quickly and there is

MODERN DESIGN FOR COFFEE POT.

MODERN STYLES IN LADIES' UMBRELLA HEADS.

now practically little call for them. The reason is poignant; ear-rings are not becoming to many women, and women are fast growing less inclined to wear those things that do not become them. The small, close-

fitting car-ring maintains a certain degree of vogue.

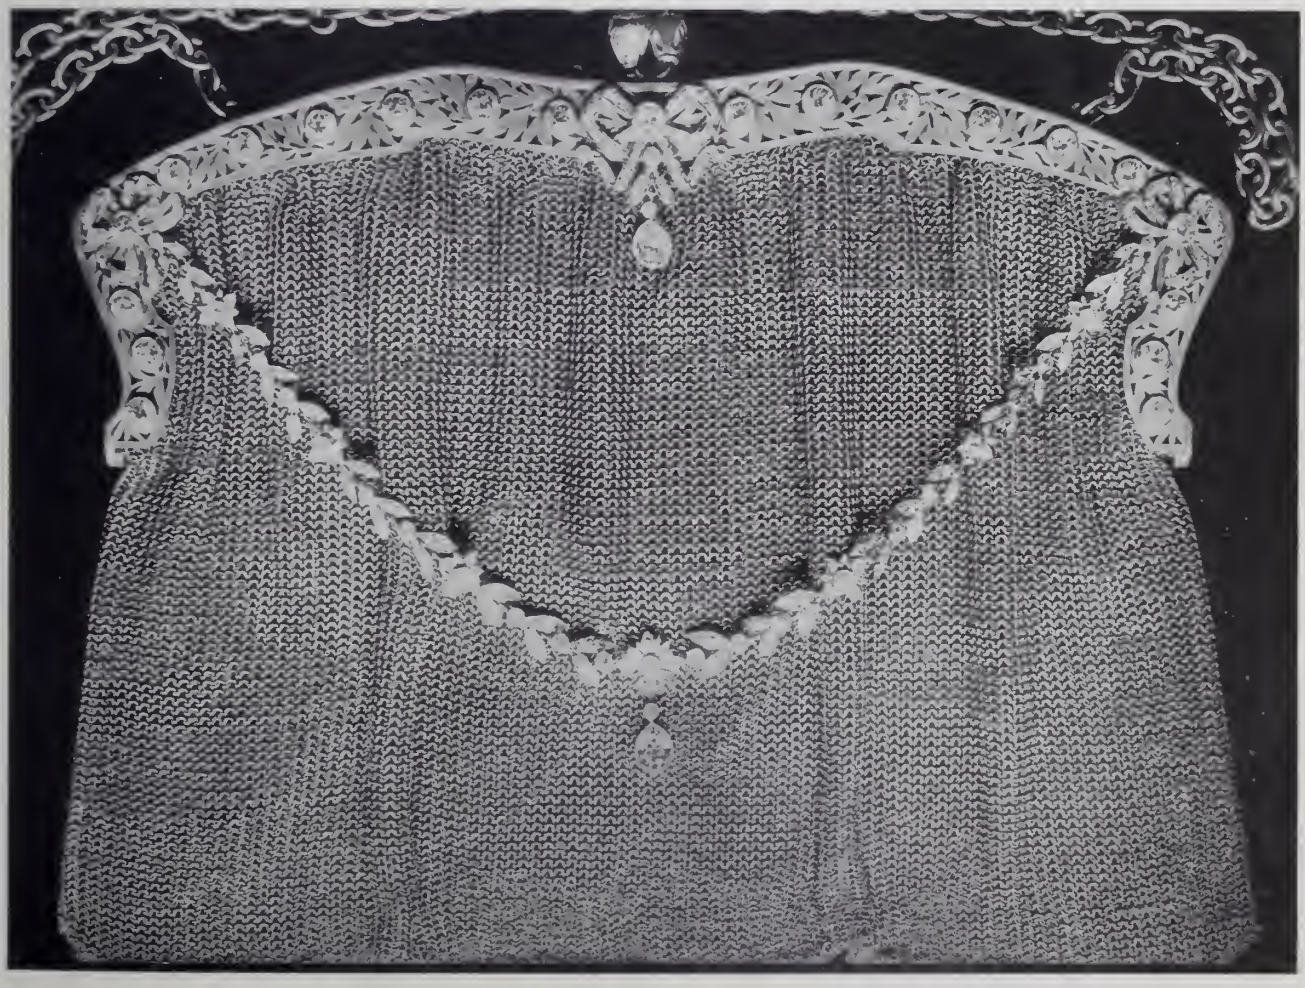
It is perhaps in the line of hair ornaments that the greatest change is noticeable in jewelry and the demands for it. With the beginning of the year the Mary Garden bandeau, the Geraldine Farrar bar-

DIAMOND PLAQUE.

rette, and the Grecian fillet were at their extreme of width and elaboration. Great barbaric bands of engraved and jeweled gold spread out on the heads of nearly all women. We wondered whither this tendency toward exaggeration would lead us! But, presto, change! The coronet braid arrived, and with it, the huge barrette at least was side-tracked for a time, or discarded forever, and the wreaths and fillets of gold gradually disappeared with it. Side and back combs had before that been thrust aside, to be revived occasionally, and the new ornaments created for the new coiffure were pairs of two-prong pins—long, with ornamental ends, to be worn in front to hold the braids in place. This, at the present writing, is the last development. What may come next is difficult to say, since all styles of hair-dressing do not suit all faces and sometimes the steady sale of an old ornament continues most successfully.

The barrette, therefore, is not in fashion, for the time being. Many women wear them, but they are at least temporarily set aside.

Some jewelers proclaim the same fate for the bracelet, but the effort of some of the Parisian modistes to recall the half sleeve, gives encouragement for the sale of the bracelet. It is a mistake to say that they are not fashionable. Even over the tightly fitting sleeve they are worn, and sometimes one sees them under the sleeve of tulle or chiffon. There should be a moderate sale, as even if they are to go out of fashion, their death is likely to be slow.



One of the most interesting developments of the year is the evolution of the mesh bag. From the simple mesh of a few years ago, there are now almost innumerable weaves and colors to be had. A particularly striking one is in striped effect of red and green gold and platinum, a band of stripes running around crosswise at the bottom to simulate a flounce. With a narrow gold bar, beautifully pierced and engraved this bag stands as a marvel of beauty and art, its broad but shallow shape affording the greatest convenience. The

DIAMOND HAIR PIN.

herringbone and basket weaves are other attractive designs of mesh—all coming in both gold and silver, with mountings of different kinds.

Quite as notable are the new vanity cases, which come in all sizes, from an inch in length to the full regulation dimensions. Engine turned, engraved and enameled, or

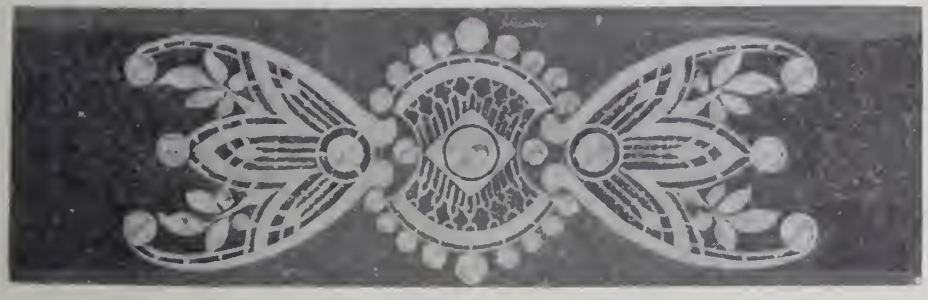
simply polished, these vanity cases comprise a department of jewelry for which there has been a general demand. One of the extreme novelties in this line is the egg-shaped case in French enamel, pale pink or blue, with a ring, by means of which it may be attached to the chatelaine.

There has been another effort, by the way, to bring back the chatelaine. Some jewelers have sold quantities of these articles in the form of a finger ring with a chain, and there is a novel line of trinkets to hang upon it. Among these is a vanity case the size of a small watch and holding a puff about as large as one's thumb-nail.

OPEN PEARL BOW KNOTS OVER SILK.

PEARL AND SAPPHIRE "MAGNET" COLLAR HOLDER.



Another development worthy of note is that of the lorgnon. Simply as eye glasses, these articles are most popular, but an extremely small size is made with round lenses to hold glasses for use at the opera. Swung by an attractive chain, possibly one that is strung with baroque pearls, they are very fetching, and they are becoming so generally adopted that they threaten to supersede the usual opera glass. Light in weight, compact and convenient, they have advantages over the old style of opera glass. The piquant, saucy, coquettish look they contribute in the hands of an attractive woman, is surely a recommendation to the one who studies and aims at effect.

Among the stones that have held sway this year, the black opal and the golden topaz are perhaps in the lead, the amethyst coming near to them in popularity. The fine topaz, which comes from Brazil, is vastly different from the usual pale yellow topaz. It is of the richest tone of gold, sometimes being as deep as Madeira, and it is exquisite when surrounded by small pearls. In brooches, LaVallieres and scarf pins, it has had an excellent sale, and the prospects are that this is only the beginning of its success.

A conspicuous development of the year that must not be omitted from these columns is the great advance that has been made in enameling and its wide application. Most exquisite colors in the transparent effect have been attained, and their use upon articles of all descriptions means a tremendous addition to the artistic work achieved in jewelry. Lockets, watches, buckles, vanity cases, La Vallieres brooches, necklaces, and even rings are decorated with the soft tints and shades of enamel and this is only the infancy of this branch, in point of perfection.

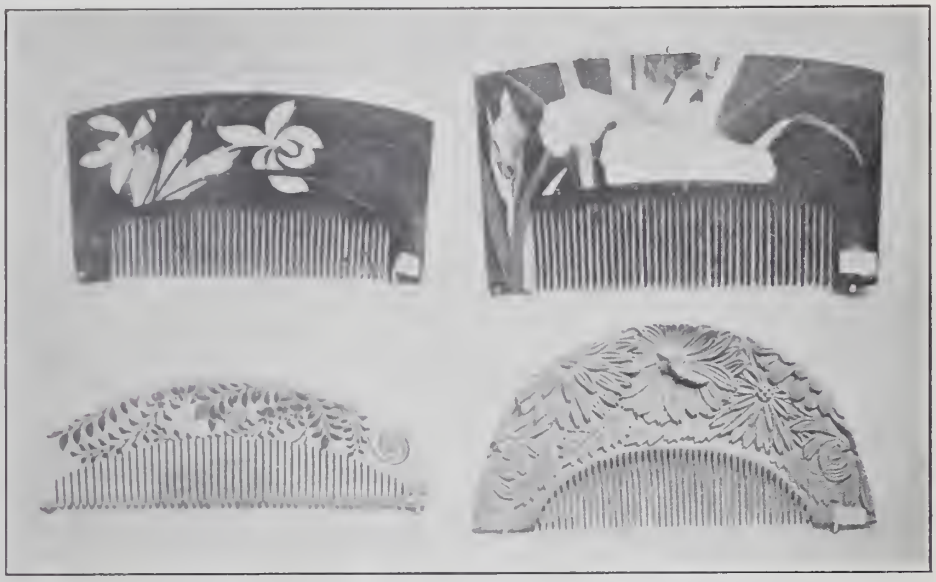
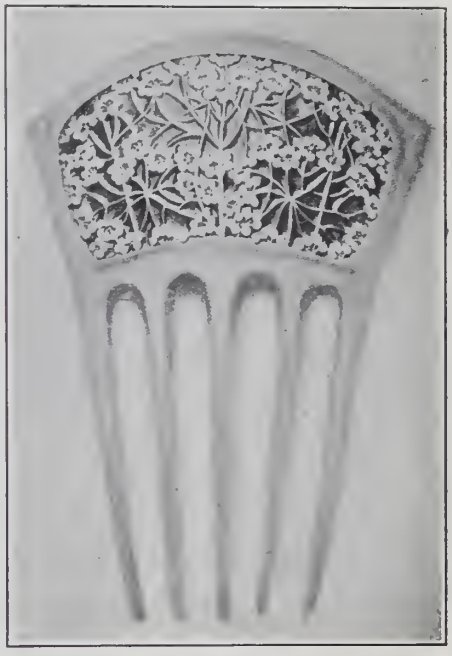
Hair Ornaments, Past and Present.



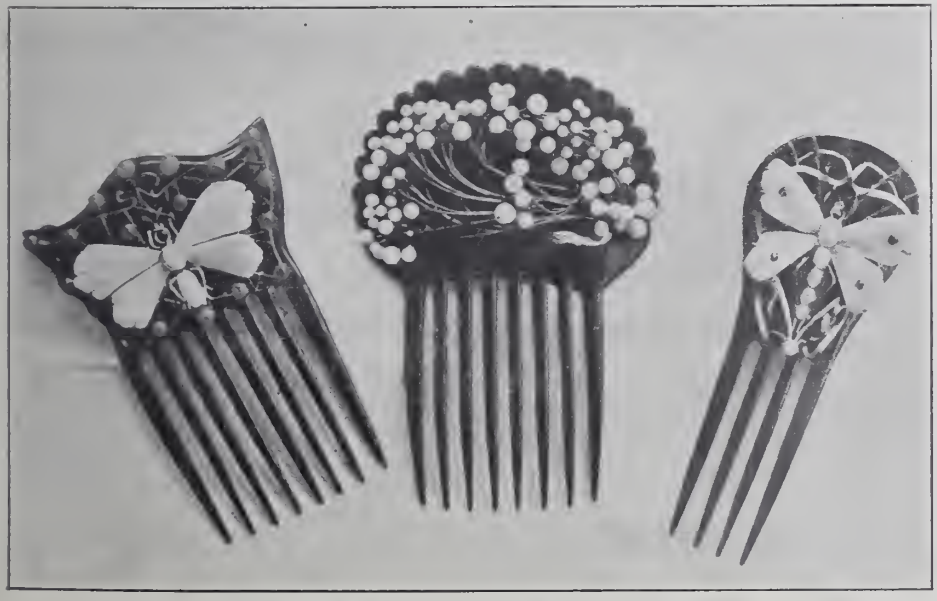
Compiled by Ralph Oliver

THE past 10 years have seen a renaissance in decorative art. This has been gradual, as is always the case after a long period of inactivity—it takes time for a general awakening of the slumbering aesthetic sense. To-day, it no longer satisfies our educated taste that objects of utility should serve that purpose alone; artistic execution is demanded even for things of daily use. As a natural consequence, a very wide field has been opened to the manufacturers of jewelry, and among the countless objects which have taken a decorative form in place of their old merely practical one, are hatpins, buckles, purses, bags, and, last of all, the long-neglected ornamental hairpin, barette and comb, which are a necessity of the latest French styles in hairdressing. The use of such combs dates back to remote antiquity; the first ornaments invented, indeed, were for the hair; and to the present revival of elaborate coiffures, a sequence of the desire for decorative effects on all lines, may be attributed the restoration to favor of the jeweled comb.



XVII. CENTURY COMB IN SOUTH KENSINGTON MUSEUM, LONDON.

The mandate of fashion seems to be that the apparent size of the head shall be increased, a fancy which has only had passing vogue since the rococo period; the coiffure has resumed the importance which it had in the days of Marie Antoinette, and its structure is supported by top combs and richly decorated pins, jeweled bands, back and side combs, barettes and fillets. The newest French models are not of tortoise shell, but of horn, in light or dark brown shades, and the latest fancy of all is for ivory tints. The top combs are narrow in themselves, but have broad tops, cut in leaf-work or flower shapes, or made in the form of a pair of birds or a butterfly, set with colored stones, baroque or Japanese pearls, coral or diamonds, or inlaid with gold, enamel or mother of pearl. Many of the novelties represent modern taste, but, as the prevalent modes follow the antique, combs, clasps and fillets in Grecian style are seen, as, for example, narrow bands of horn set with rows of little precious stones, circlets of platinum cut into tiny leaves and set with diamonds, and combs whose top is cut into a Grecian ornament, or inlaid with jewels in a Grecian pattern.



ANCIENT JAPANESE COMBS FROM THE HAYASHI COLLECTION.

A barette in modern style is a conventionalized lotus leaf and flower, the flower and stem set with little diamonds. A very beautiful top comb of brown horn has three humming birds, with ruby eyes and plumage inlaid with colored enamel. Fancy hairpins are cut in the form of ivy or grape leaves, the veins outlined with little stones; unique is one whose top is a sprig of barberry leaves and berries, the leaves cut from ivory-tinted horn, the berries of red coral. Another pin, made of pale tortoise shell, is cut at the edges into a spray of rose leaves, on which are dewdrops of

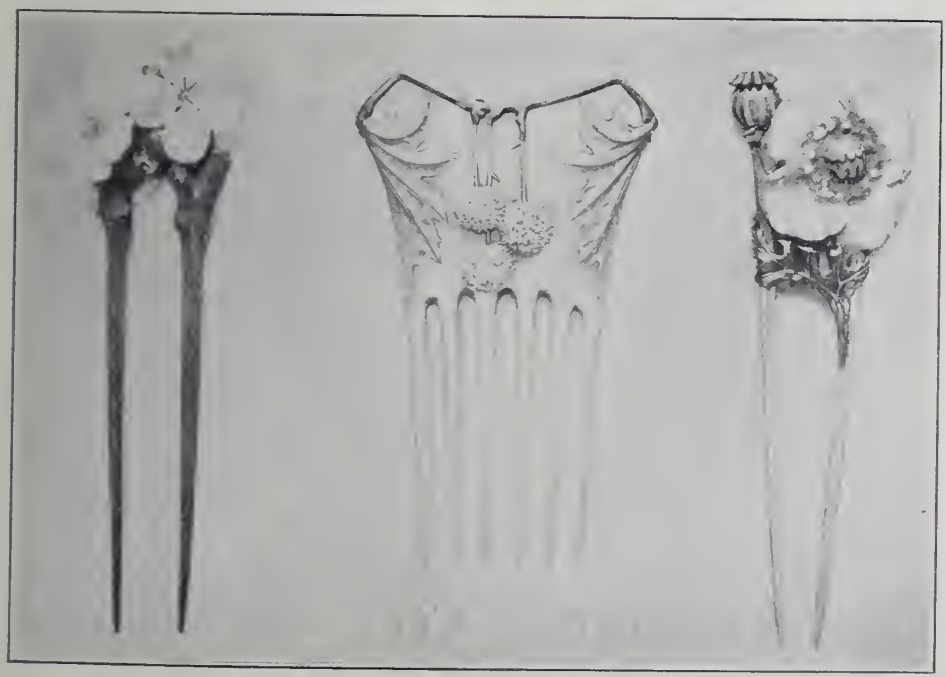
brilliants and a shimmering enamel rosebud.

A most interesting book on the subject of combs has recently been published in Germany, entitled "Die Kaemme aller Zeiten, von der Steinzeit bis zur Gegenwart." (The Combs of All Times, from the Stone Age to the Present). It is a collection of

COMBS FROM 1909 EXHIBITION AT WIESBADEN, BY A. OPPENHEIM.

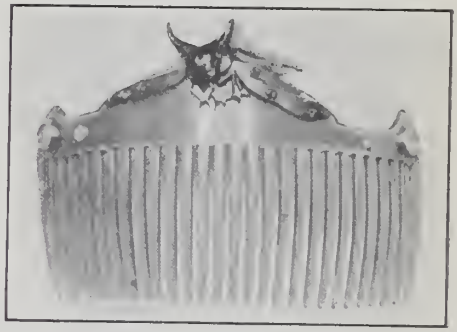
plates, with accompanying explanatory text, the contents being divided into two parts, the first (Plates 1-47), containing illustrations of combs from the ancient European world and down to the present day; the second (Plates 48-84), illustrating those found among the various nations and tribes outside of Europe. Every plate has from two to seven illustrations, and from this an idea can be obtained of the extent of the collection.



The many-sided view of the progress of art and civilization which can be obtained by devoted study of even such a limited and modest domain as that of the comb is astonishing. The illustrations carry us from the most primitive and laborious attempts of the Stone Age, or of barbarous tribes of the present, to the elaborate and elegant achievements of the Renaissance or of Japanese art, and on again to the plain and practical products of modern industry. They were gathered in such rich abundance, as the author says in his preface, by the zeal of a collector whose heart was in his task. Especial attention is given to examples from primitive epochs. It is useful and interesting to observe how, under the most different circumstances imaginable, similarity of purpose and related technical processes have led to similar results; and again, what manifold forms existed in this one domain, even in the most remote times. Nearly all the varieties which we have are hundreds or even thousands of years old.

The great French artist-jewelers—Lalique, Feuillâtre, Gaillard, Miault, etc.—have shown a decided liking for this object of feminine adornment, and have lavished much skill upon it. At all the recent Paris salon exhibitions, beautifully executed ornamental combs were to be seen, and constituted some of the most attractive exhibits.

The first creations of Lalique surprised and struck every one; even those who criticised his bold designs and his arbitrary handling of all styles, agreed that a genius had appeared, who would open new paths to the jewelers' art. Since that time the enthusiasm has cooled somewhat, although Lalique's fame has by no means been lessened. He has continued to interest the public by his highly individual achievements, especially as he understands the art



HORN COMBS OF GRACEFUL FORM BY HENRI HAMM.

ARTISTIC HAIRPINS AND COMBS BY LUCIAN GAILLARD.

of working up the simplest materials into charming ornaments. That we have become a little more indifferent to his work is doubtless due to the fact that he has had many imitators who have caught his style well. None of them, indeed, have the

COMB BY BOUTET DE MONVEL.

inventive fancy of their great leader, but the source of inspiration cannot be stamped upon every piece, and many of the imitations are hardly to be distinguished from the genuine.

Other French masters of this art, talented

and ind pendent enough to pursue their individual ways, have also gathered large followings, as, for example, Gaillard, who

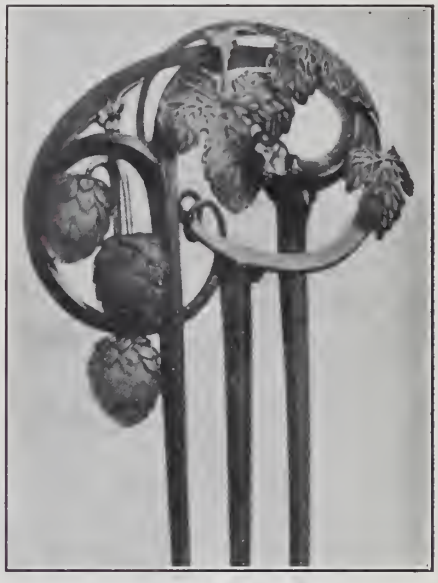
HORN HAIRPIN BY E. BECKER.

employs for his ornaments light colored transparent horn, worked with great skill,

JEWELED COMB (PFORZHEIM).

but in a very different style from that of Lalique.

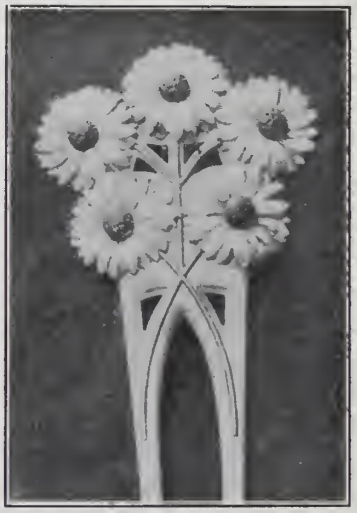
The exhibitions of the French "Societé des Artistes Français" in Paris, as well as the collections of French jewelry exhibited elsewhere, give us a complete picture of the development of the art in France in recent years. The fact must be emphasized that the leading artist-jewelers set the fashions. When Lalique shows chased and colored horn combs, decorated with enamel and precious stones, the ladies of the "beau monde" cannot quickly enough change the



CARVED IVORY COMB BY FOG.

fashion of their coiffure to make a place among the luxuriant tresses (not necessarily themselves genuine) for such a splendid ornament. Many of Lalique's pieces of jewelry are very large, and it would seem that they must be intended for exhibition purposes; the smaller combs, however, are characterized by great daintiness and grace.

Among the prettiest of his productions in this line, most of which have been illustrated in previous issues of THE JEWELERS' CIRCULAR-WEEKLY, is a horn comb decorated with cherries, and one of rich dark brown tone, with pendant stemmed berries. Some have light corymbs of flowers, others conventionalized butterflies and moths. Some very delicately colored ones, in gray white and blue, have figures of angels bearing jewels.



Gaillard, as already observed, uses a great deal of transparent horn. He polishes it, carves it, chases it and sets it with gems and enamel, obtaining in this way extremely fine color effects. Some of his creations, like some of Lalique's, seem to be suited only for show pieces. They are pre-eminently harmonious compositions, whose color and form charm the eye. The artist and art-lover find pleasure in them, but the Philistine scoffs. A superb design of Gaillard's is

COMB WITH CLOVER MOTIF.

a comb which consists of a large grasshopper in enamel, with open wings; not less graceful is one decorated with jasmine blossoms.

The Franco-British exhibition in London

IVORY HAIRPIN, E. BECKER.

has brought Miault's work in combs to the attention of the profession in both countries, and they have received much notice from art trade journals. We are able to show to our readers, in illustration, sev-

IMPORTERS OF

DIAMONDS

30 MAIDEN LANE

NEW YORK CITY

eral of these designs. The combs and barettes are of tortoise shell, made very thin by scraping, so that the carved portions are of filmy consistency. Miault's decorations are almost entirely graceful foliage. Where the stems cross each other, he applies, in his carving, precious stones, white and gray pearls, topazes, coral, etc., as if they were buds or sears on the stems, the intended effect in relation to the color being like that of the grain of the shell.

We are able to show some illustrations of French style of hairdressing with the hair ornaments from a recent Paris fashion letter, and give a short description of each.

Fig. 1. Evening coiffure. Barette or back comb of pale shell, mounted with gold. There is an opal button at each end of the bar, and rays of shell going out from it. On the top of the head is a tortoise shell barette, with raised ornamentation of gold, and inlaid with little pearls. On the edge of the bar are large pearls.

Fig. 2.

Fig. 2. Theatre or dinner costume. A tiara of platinum and diamonds surmounts the coiffure. This ornament is particularly charming; it represents ears of grain, falling loosely apart, and beautifully executed. The grains are brilliants. The whole effect is very dainty and graceful.

Fig. 3. Costume for official receptions or artists' evenings. The jewels worn on the bodice consist of two medallions with opals at the center, framed in brilliants; they are joined by strings of pearls, and there are pearl tassels. The same motive is carried out in the hair ornament; a string of pearls lies over the left side of the head, drawn back from the forehead. The style of coiffure reminds us of the picture of the fair lady loves of the Medician princes in Florence. The principal charm is in the accentuation of the shape of the head, the profile of which is strongly brought out.

Fig. 4. Evening toilette. The coiffure, in the mediæval style of the Italian masters, reminds us of Venice. It is one which was brought into fashion by a leading actress of the Comédie Française. A tiara of gold and jewels rises above the waves of hair. Barettes of corresponding style hold the hair over the temples. The necklace

Fig. 1.

is of pearls with bars of green enamel. Two square bars hold the strings of pearls at the front, and from one in the center are suspended six large pearls as a pendant.

Other Paris novelties are: A comb for

Fig. 4.

a low coiffure in the back is made of pale tortoise shell. The design is an owl, the head and tops of the wings in shell, finely modeled and carved. The feathers are incrusted with brilliants, and in the middle of the body is a large topaz set in brilliants. There is foliage set with emeralds.

Barettes are made not only of light shell in the most varied designs, but of dull gold, with pearls, in modern conventional patterns.

The very low coiffure which prevails needs a large comb to hold it in place and to support the hat. These combs are very plainly visible, and consequently the wearers like genuine and fine examples. One such comb is of pale tortoise shell, with Christmas roses in ivory at the sides. Little rows of brilliants decorate the stems, and there are leaves and buds of shell, with little emeralds in groups of three.

In Europe, the American woman is accused, rightly or wrongly, of being inordinately fond of the diadem or tiara. The nature of the tiara, when rightly worn, is to impart a certain grandeur to the appearance of the wearer. But it demands a certain poise on her part. Without an ac-

Fig. 3.

companying air of reserve and quiet distinction, it is out of place. It also requires the greatest elegance in the rest of the costume, and is therefore best suited to evening dress. It is a criterion for the "mondaine" to wear a tiara as it should be worn, especially when it exceeds the size of the ordinary agraffe, and becomes related to a crown, to wear which, in Europe, is the exclusive privilege of a very small class. The best studies in this line are to be made at the "Queen's drawing-rooms" in England, where a chosen band of Albion's blue-blooded daughters, all with historic names, parade all styles of tiaras through the halls of Buckingham Palace and pass the Queen's throne. Nowhere can we better learn to how many variations the tiara lends itself, or how difficult a problem of taste is the harmonious union of the jeweled circlet with the characteristics of the crown.

An especially hard task is to wear the crowns whose lines stand off free from the

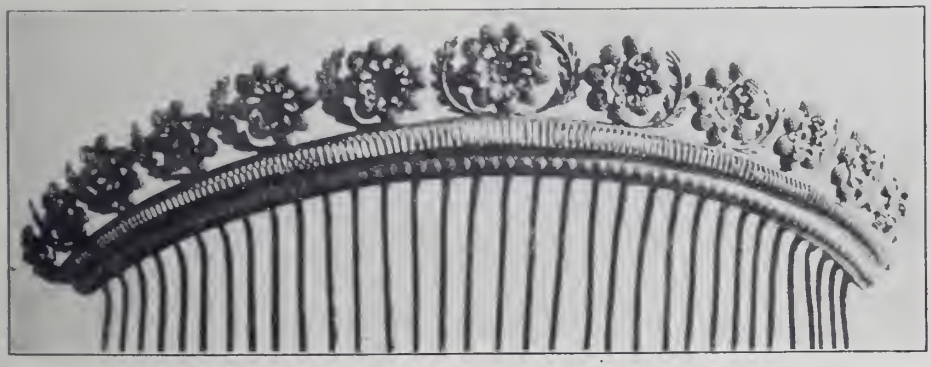
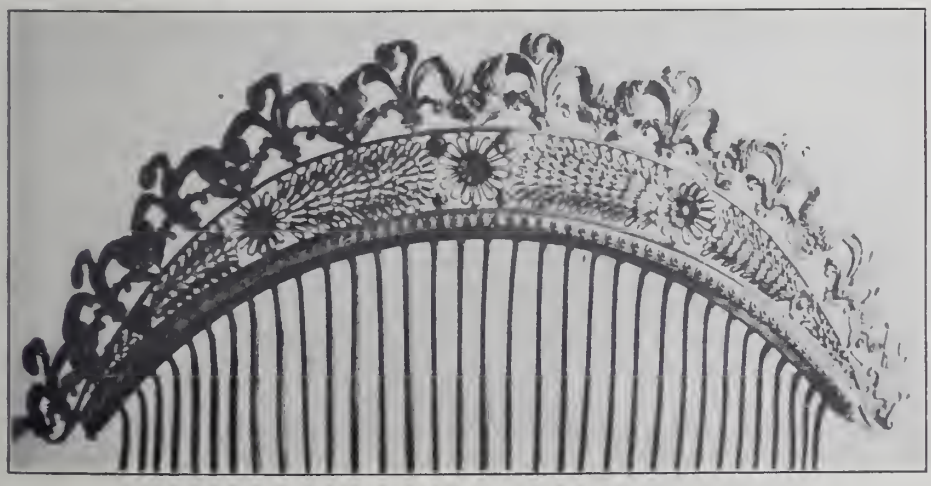
head. The English duchesses and peeresses try, with some success, all possible ways of bringing the crowned head into harmony with the rest of the appearance. They wear long veils depending from it, which bring to mind the queens of the Nibelungenlied, or splendid Indian ostrich plumes, like those which fluttered from the helmets of Shakespeare's dukes and princes, or the hero-knights of Crecy or Agincourt; or they border the tiaras with velvet or ermine. Heavy enough some of them are, and sometimes the evident oppressiveness of their weight detracts from the aesthetic effect. Real crowns have always been more becoming to masculine than to feminine rulers; while the simple tiara is capable of giving the final and highest touch to womanly beauty. Such tiaras, simple in contour, and costly in material, will always have an artistic advantage over elaborate structures of crowns, feathers and veils, whether the design is that of waving ears of grain, or the circlet rising in the center to a point, which is, however little the wearers may guess it, the primitive Oriental form. As charming as is the effect of the diamond stars, the immense pearls, the circlets with five, seven or eleven points, especially when the hair lies in soft, graceful waves beneath, the most correct lines, after all, are the antique.





SHELL COMB WITH PEARL ORNAMENTS.

ELABORATELY DECORATED SHELL COMB.

But the modern woman is wise in her generation. She knows very well that to the styles of coiffure which she effects, and to her type of beauty, which lacks the classical repose and regularity, the fantasies of the contemporary goldsmiths' art are better suited than the antique models. She does not choose to bring herself into unnecessary comparison with the Venus of Capua or the Diana of Versailles. She has too much to do in vying with her rich and beautiful sisters to enter upon a competition with the Ludovici Juno, in which the goddess would surely come off victorious.

TWO SILVER GILT COMBS FROM THE ALLEMAGNE COLLECTION.

OLD SHELL COMB SET WITH CAMEO AND DECORATED WITH HALF PEARLS.

ABOUT BLACK OPALS

OPAL is found in an amorphous state and never crystallizes; in fact, from the condition of the pockets in which this mineral is found, the indications are that the substance was once a fluid.

This beautiful mineral varies from 5.5 to 6. in hardness, has the specific gravity of 2. to 2.2, is glassy in lustre, and translucent from a slight to a very high degree.

Up to the early eighties the Czernowitza mines of Hungary were practically the sole source from which the gem market received its precious or noble Opals.

Honduras fire Opals and transparent Mexican varieties were occasionally offered in the gem trade, but these stones were irregular in quality and uncertain as to supply.

In olden times, Greek and Turkish merchants carried Opals from Hungary to the Orient and from thence they were shipped to Holland to be sold in Europe as Oriental Opals.

The famous Hungarian mines, however, were giving out, and as the find of good material grew smaller prices began to mount.

About this time Boulder Opal was discovered in Queensland and an English company was formed to work the fields; the material found ran in thin veins through a brown jaspideous ironstone, and while beautiful when cut as matrix, was more suitable for cameos and cabinet specimens than for jewelry; gem pieces suitable for mounting were rare.

About 1888 "Sandstone" Opal was found in West Queensland, and this bright, flashing, yellowish material found a ready market.

The output was considerable for a few years when severe droughts came and the supply fell away.

At this time the White Cliffs mines in New South Wales were discovered and the miners flocked to the new fields, where a steady supply of clean white Opal, free from Matrix, was obtainable.

This celebrated field was steadily worked for ten years, during which time the value of the rough output is said to have been upwards of two and one-half millions of dollars.

Then the inevitable failure of Opal came, and at present the output is irregular and small and the field is almost deserted.

The latest and most notable of Opal discoveries occurred about seven years ago at Lightning Ridge, New South Wales, when Black Opal was accidentally found by some men who were digging post holes.

This new Opal soon outranked all previously known varieties of this beautiful gem.

Few stones were sold during the first three years; then the rough began to find its way to Europe and for a long time the demand for Black Opal has exceeded the supply. Authorities who have been in close touch with the other Australian Opal finds, predict that the Lightning Ridge product will follow in the path of the Boulder, Sandstone and White Cliffs Opals, and that in a few years this unique gem deposit will be exhausted.

In formation, Black Opal is identical with White Cliffs and is found beneath a hard siliceous capping in the softer sandstones, clays, kaolin and soapstone.

The "Black" variety is scarce and is confined to a small area; it runs in an erratic way, a few stones here and there, with long barren patches between.

Strictly speaking, there is no Black Opal "Mine," as the entire field belongs to the government and is open to all miners who will pay a slight fee and conform to the regulations.

Some six or seven hundred miners are now at Lightning Ridge, each working his little patch in the hope of finding a gem, a veritable lottery in which the larger prizes are few and far between, while the medium and poorer finds are usually enough to keep the men pegging away until luck changes.

"Black" Opal almost seems a misnomer, for while some of the stones are actually black and all of them have a dark body or background, they are really a wonderful flashing, changing mass of color. All of the colors of the Solar Spectrum vibrate through "Black" Opal; some in small pin point markings, others in harlequin, peacock and formal designs.

Some stones exhibit broad flashes of red, blue, green or purple, changing rapidly from one to another of these colors upon the slightest change of angle or light.

Others exhibit cloud effects and sunsets such as Turner painted and only a Ruskin could describe.

These stones are suitable for jewelry for men and women; they offer a great field for artistic effort in combination with enamel and other gems and are a welcome change from the regulation ornaments to be found in every jewel case.

We are specialists in Black Opals and have a large and varied stock of these gems which come to us **in the rough direct from the Opal fields,** and have been cut in our New York shop.

Our prices are necessarily less than those obtaining in Europe, and the fact that no two stones are alike ought to make this gem very attractive as a profit getter. Selling Black Opal jewelry at a handsome profit is a question of salesmanship, not competition.

Our stock of rough and cut stones of every description excepting only diamonds is very complete and a trial will clearly demonstrate our capacity to fill difficult orders. We will send a list of some of the stones we cut and carry in stock, on request.

genuine, is perhaps even more expensive than a tiara, is a Juliet Cap of pearls.

An Historical Ring.

A RELIC, interesting both from its historical and its public character, has found an abiding place in the museum of souvenirs established by M. Bertrand, the librarian of the Department of Foreign Affairs, at Paris. The ring was worn for a long time by Jules Favre; it was presented by Naundorff, the reported son of Louis XVI., as an honorarium to the illustrious advocate.

On the bezel is a garnet cut *en cabochon*, representing Diana ready to draw her bow. This was used by Jules Favre as a seal and is attached to the Treaty of Frankfort, as may be seen below his signature at the bottom of the treaty preserved in the archives of the department. The ring was given to M. Bertrand by M. Gaston Velten, the French consul, a nephew of Mme. Jules Favre, from whom he received it.

The mystery shrouding the origin of Naundorff, the "lost dauphin," its first recognized owner,. adds to the interest.

Colonial Silverware, Pottery, Glass, Etc.

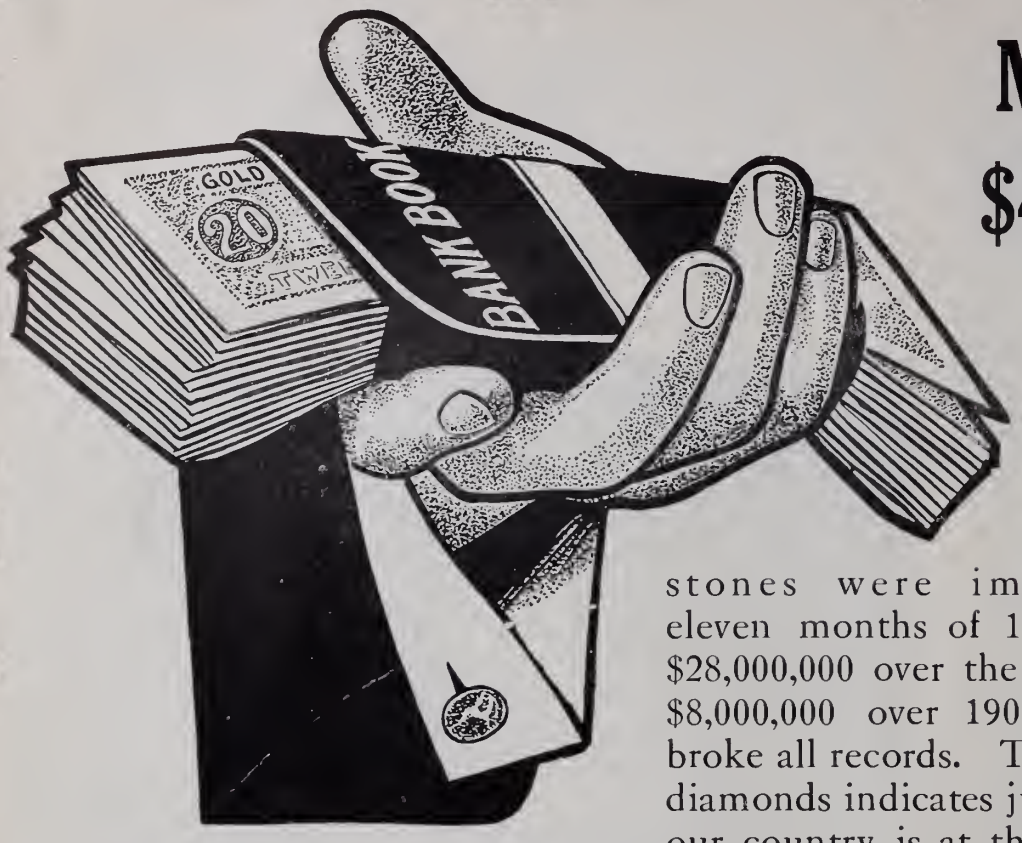
THE silverware, pottery and other articles of Colonial times which were recently exhibited at the Metropolitan Museum of Art, New York, as a part of the memorial collection made for the Hudson-Fulton celebration, have been described in THE JEWELERS' CIRCULAR-WEEKLY and in other magazines, but in each of these descriptions the articles were treated as if the line described was the only one on exhibition. As a matter of fact furniture, pottery, pewter, silverware and other pieces were to an extent exhibited together, one with and often on another.

An idea of how they appeared is given in the illustration herewith, showing one section of the exhibit.

SOME OF THE COLONIAL POTTERY, GLASSWARE, FURNITURE, ETC., RECENTLY EXHIBITED AT THE METROPOLITAN MUSEUM OF ART, NEW YORK.

Golden Dishes.

THE Czar of Russia, on the occasion of his coronation, gave a banquet at which the dishes used represented no less than 60,000 pounds of gold and silver. The Czar undoubtedly holds the highest record for treasures of gold and silver plate. Next comes the King of England, who has a table service of pure gold, only used on state occasions, when other royalties are being entertained.



The English service is kept in a chamber with steel walls, and guarded by soldiers. The service is large enough to serve 150 persons, and when the royal table is laid with it the golden dishes, forks, knives, etc., decorated with crowns, make a scene of fairy-like splendor.

A Brief History of Liberty Place.

JOHN FRICK, of the John Frick Jewelry Co., manufacturers of medals and prizes, at 8-10 Liberty Pl., New York, has long been deeply interested in the history of Liberty Pl., on which his shop has been situated for so many years. After carefully studying records and histories of the city he uncarthed the following facts about this little street in the heart of the jewelry and financial district of New York.

Up until the English conquest of New Amsterdam in 1664, what is now Liberty Pl. was a country lane beyond New Amsterdam, leading to a brook side called "Maagde Paatje" (Maiden's Path), Maiden Lane not having been surveyed until 1696. After 1664 the present Liberty Pl. was known as Green Alley, and later called Green St., and from 1704 to 1740 the first Quaker church was on this street. Green St. it remained until 1844, when owing to the location of the more prominent Greene St. the name was changed to Little Green St. This evidently did not distinguish it sufficiently from the uptown thoroughfare, and in 1849 the name was again changed, this time to Liberty Pl., which it has since been called.

Although Liberty Pl. was formerly the home of many factories and shops in the jewelry trade, to-day the industry is represented practically alone by the factory and salesrooms of Mr. Frick.

More than $40,000,000 worth of Diamonds

and other precious stones were imported the first eleven months of 1909; an increase of $28,000,000 over the total of 1908, and $8,000,000 over 1907. This last year broke all records. This big demand for diamonds indicates just how prosperous our country is at this time.

The question to us all is, are we getting our share of the business? If you will buy your diamonds of us, you will get more than your share of this increased demand.

Our mountings are 14-K., made compact and on correct lines.

Our special diamond cutting contract gives us scientifically cut stones that we can sell at prices that cannot be duplicated.

Order your diamonds of us—we have them in all sizes and grades—and increase your bank account

---

90 CENTS per dwt. net cash for 14-K. best made, and correctly proportioned Tiffany round and flat belcher ring mountings. No excessive weights.

You can have one of these Moe diamond display rings for the asking.

An Interesting Lecture on Scientific Gems.

Prof. A. Verneuil Talks on the Present State of Industrial Reproduction of Precious Stones Before the Conservatoire National General des Arts et Metiers, Paris.

PARIS, Jan. 15.—At the annual prize distribution at the *Conservatoire National des Arts et Metiers,* Sunday, Jan. 9, Prof. A. Verneuil, the eminent chemist and discoverer of the method of reproduction of rubies by fusion, gave a talk on "The Present State of Industrial Reproduction of Precious Stones." A number of men well-known in the scientific world were present, as well as many representatives of the jewelry and gem trades.

To commence with, M. Verneuil classed all the attempts at synthetic reconstruction of precious stones into three groups: that of the diamond, the emerald, and the corundum (or ruby and sapphire). He showed that experimentally, in the chemists' laboratories, all these stones were reproduced, and he showed further what was achieved up to date in the way of industrializing the reproduction of precious stones on a large scale.

THE DIAMOND.

According to the lecturer, Henry Moissan is the only one who obtained any convincing result on this subject. The crystals produced by Moissan in his electric furnace stand the test for all the properties of diamond, the principal one among which is that, when burned in oxygen it gives four times its weight in carbon dioxide. But these crystals are so minute, and the process so uncertain as to be of no interest commercially.

THE EMERALD.

Taking up the emerald next, M. Verneuil shows the admirable work of Hautefeuille and Perrey, who have obtained perfect crystals of emerald, having all the qualities of the natural stone, by melting silica, alumina, glucina and chromoxide in the proper proportions, in 100 grammes of molybdate of lithia at the temperature of 800°. Under the microscope the crystals thus obtained show the hexagonal form as well as the beautiful coloration of the real emerald; but in point of size they never exceeded 3 mm. in length by 2 mm. in width, too small, evidently, to be utilized as jewels. All attempts to reprodnce the emerald in larges masses have so far been *unsuccessful,* and *what is offered in the trade to-day as artificial emerald has neither the composition nor the hardness of the real.*

CORUNDUM GEMS.

On the subject of corundum, i. e., the

PROF. A. VERNEUIL,
Of the *Conservatoire des Arts et Metiers.*

crystallized oxide of aluminum, including the white corundum or white sapphire, the red corundum or ruby, the blue corundum or sapphire, the lecturer passed in review the numerous processes by which the production of this crystallized alumina was realized. Firstly, the process of Gaudin, by calcination of potassium alum; then the process of Ebelmen, by the fusion of alumina and borax; of St. Claire Deville, by fluoride of aluminium and boric acid; the process of Frèmy and Feil, by the solution of alumina in lead oxide; and finally, the process of Frèmy and Verneuil, by the action of fluoride upon alumina. But all these methods, while giving ruby crystals of magnificent color, and sometimes sapphires, as in the case of St. Claire Deville and Caron, and in every respect true to nature, *could have no value industrially,* since the crystals were too small, as in the case with emeralds, and useless as gems.

The lecturer showed numerous samples of the work of these men, and gave several enlarged projections of the made rubies, proving by their form of crystallization their identity with the natural rubies.

The only method of synthetic reproduction which permits of obtaining rubies of considerable size, and which is now adopted in industry, is that of fusion of chromated alumina in the oxyhydrogen furnace. This method was discovered by the lecturer and brought to the knowledge of the world in 1893. He described at length this process, stating the conditions necessary for a perfect reproduction.

"The ruby thus obtained," he said, "is in every way the same as the ruby of nature." The crystallization is the same—with possibly a slight difference in the grouping of the molecules; as two houses constructed with similar bricks, but of different styles. The hardness, phosphorescence, fluorescence, etc., of the two are so identical that a ruby made under ideal conditions cannot be distinguished from the real. On the other hand, the rubies made to-day on an industrial basis can be told from the real by their uniform clearness, brightness, lack of silkiness, and sometimes the presence of air bubbles or striations.

As to the sapphires, according to the lecturer, no complete reproduction had up to then been accomplished.* Artificial sapphires are made to-day by the same process of fusion as the ruby is made, which approach the natural very closely; but since the basis of their coloration must be cobalt, which is fused with alumina by the aid of a small quantity of magnesia or calcium-oxide, the sapphire thus obtained is not truly synthetic. Nevertheless, in point of hardness

*A dispatch from Paris recently stated that the Academy of Sciences announced, Jan. 17, that Prof. Verneuil had reproduced the sapphire.—EDITOR.

WHERE NATURE'S GEMS ARE IMITATED. (X) SHOWS PROF. VERNEUIL.

The Report of the Discovery

of the Synthetic Sapphire by Prof. Verneuil, transmitted from our laboratories in Paris simultaneously to the Academie des Sciences, Paris, and our New York office and thence—through the Press to the entire world, has created an overwhelming interest in this scientific gem, rendering it a subject of world-wide discussion and comment.

This discovery, we are advised, from Paris, is proclaimed by men of science all over Europe to be fully as important as the original discovery of the Synthetic Ruby. It is a matter of special significance to the scientist and of great concern to the jewelry industry as well as to the public in general.

Apropos of this announcement, it may be timely to acquaint the trade with the following facts: It has come to our notice that a variety of *imitation sapphires* of a quality superior to ordinary glass but having no relation whatsoever to the natural stone is appearing in the market under the name of "Reconstructed Sapphires."

To distinguish these from our "Hope Sapphires," we suggest the *hydrofluoric acid test.* This acid will react on glass, but will have no effect on either the natural or our "Hope Sapphire."

and beauty of color it is a real achievement and should be put in a class by itself.

The annual production of scientific stones, said M. Verneuil, is to-day near 7,000,000 carats, which represents about 2,000,000 carats of cut stones. And this is about the beginning; he hopes to see the industry develop in much greater proportions. The reconstructed ruby, he said, has not come to take the place of the natural one, which will always be in favor on account of its rarity. Jewelers should not misunderstand the nature of this stone, and adopt a hostile attitude against it. On the contrary, it should be recognized and classed according to its worth.

During the lecture a number of interesting experiments were conducted by M. Verneuil's assistants, showing the actual making of the ruby, its fluorescence, etc. Several views of ruby plants were shown, notably that of the "Société Hellerite," of which M. Verneuil is chemist-in-chief, as well as various samples of the stones made there: rubies, white sapphires, "Hope" sapphires, pink topaz, Oriental topaz, etc.

Professor Verneuil was warmly acclaimed by the audience at the end of his talk. As he is the uncontested authority on the subject he treated, it is certain that his words will create a better disposition toward the use of reconstructed stones; and his satisfaction at seeing his scientific achievement become the basis of an important industry will be shared by all who are familiar with the question.

The Crown Treasures of the Bavarian Dynasty.

THE ancient royal residence in Munich has various valuable depositories in which the most precious stones, turquoises, diamonds, rubies, emeralds and other valuables are contained. The greatest and most beautiful curiosity of the Munich treasure chambers is the pale blue family diamond, of the house of Wittelsbach, which weighs 42 carats; a smaller blue diamond also excited universal admiration, owing to its unique beauty. It is combined, with separate yellow brilliants, in a golden fleece, the whole constituting a wonderful color-scintillating picture.

In addition, the old, historical crowns, attract the interest of all educated observers and connoisseurs. The oldest and the most valuable crowns date from the 10th century; they formerly graced the brows of the Emperor, Henry the Good, and his consort, Kunigunde. These two crowns are a work of art in themselves and bear eloquent testimony to the skill and artistic taste possessed by the jewelers of more than 900 years ago. In the campaign against the Bohemians, in the 16th century, the costly crown of Frederick V. of the Palatinate, was captured and has since remained one of the regal treasures of the Bavarian dynasty.

Further mention must also be made of one of the art treasures and valuables of the Munich treasure chamber, in the shape of a very beautiful reproduction of Trojan's column, at Rome. It has a height of more than two meters and is made wholly of wrought silver. Another noteworthy curiosity is a statue of St. George. The knightly figure is of chased cast gold; the dragon consists of a single piece of jasper.

Interesting Antique Jewelry.

THE interesting pieces of antique jewelry shown in the illustrations below have been selected from a collection which was exhibited at the Alaska-Yukon-Pacific Exposition at Seattle, Wash., and were awarded the grand prize. The same collection won gold medal awards at the Portland and Jamestown expositions.

The first illustration shows a French carnelian cameo, in fine gold mounting and

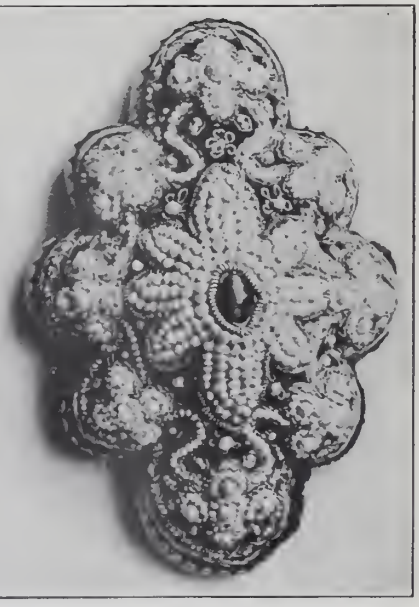
FRENCH CARNELIAN CAMEO.

set with Oriental pearls. It is a product of the 18th century and is remarkable for its delicate workmanship and artistic mounting. It is cut from onyx, the base being a deep red, contrasting vividly with the pure white of the relief work. The detail of the cutting is carefully carried out, each portion of the work standing out clearly. The cameo measures 2¾ inches by two inches. At the top of the frame is a dainty bow-knot of gold.

The other shows a framed miniature and a priest buckle; the latter Russian, 15th century, such as were usually worn by the metropolitan at special functions. It is embroidered on red plush with pearls and an emerald bead at the center, from which radiate arms formed of pearls. It is 4½ by 2¾ inches, and is made on a cushion and mounted in silver gilt.

The miniature is an Italian painting of St. Vincenti, on parchment. The likeness of the saint is shown in color effect, and is surrounded by gold filigree, studded with emeralds and pearl beads. It dates back to the 15th century. The collection from which the pieces were selected were exhibited by A. Shorr, an importer of antique jewelry in New York.

African Beans Used in Jewelry.



OF interest to the jewelry industry is the information concerning a new material suitable for carving and turning, communicated through the German commercial museum. According to this statement, at the opening of the railroad from Buluwayo to the Victoria Falls of the Zambesi tourists brought back with them, as souvenirs, two kinds of beans hitherto but little known. One of them, as large as a pea, is of a very beautiful scarlet red color and black; the other is a bean as large as a hazelnut, black, with a bright red cap.

The tourists had these beans transformed by Cape Town jewelers into scarf pins and brooches and hat pins, and the idea was at once seized upon by a wire worker, who started the manufacture of ornaments, in which the beans were used, on a large scale. The very attractive-looking novelties found numerous admirers, and have become an article in large demand in all South African jewelry stores.

The beans may be obtained from several firms in Cape Town.

Some Old Timers in the Boston Jewelry Trade.

A CHANCE observation of the inscription on the balcony in one of the oldest jewelry jobbing houses of Boston, Mass., started a train of recollections in the memory of the writer regarding the old-timers in the Boston trade.

The concern referred to was founded in 1859, and consequently began last year its second half-century of existence. The designation, Harwood Bros., is still retained and one of the brothers, Willard by name, remains at the head of the business with two of his sons, Frederick E. and Harry A., a newer generation of Harwood brothers, actively associated with him in the conduct of its affairs.

There are few parallels to this in the trade, however, although there are numerous instances where father and son, or sons, carry on a transmitted business in honorable succession to an ancestral founder of the house.

The Boston directory of 1860, for instance, contains the firm name of Bigelow Bros. & Kennard, a concern established by John Bigelow in 1830. With him subsequently united his brothers Abram and Alanson. Later the Kennards were admitted. Then Alanson Bigelow, son of the earlier Alanson, succeeded his father, and a grandson bearing the same name, with his brother Homer L. Bigelow, are the active firm of to-day. The Kennards are no longer represented in the company, but the new firm of Hodgson, Kennard & Co., whose principals were former employes of Bigelow, Kennard & Co., stands now for that branch of the older house.

Appleton, Tracy & Co., predecessors of Robbins, Appleton & Co. as selling agents of the Waltham Watch Co., then known as the American Watch Co., had an office more than half a century ago on Washington St., and the E. Howard Watch and Clock house was flourishing also in that period.

The chronometer house of William Bond & Son, then as now, was known to every sea-captain of the port, and Daniel Pratt, now represented by Daniel Pratt's Son, sold clocks in the ante-bellum days to the New England trade.

N. G. Wood was on Hanover St., always a jewelry center, and continued in active business until recent years. Two of his sons now represent the house of N. G. Wood & Sons.

WASHINGTON ST., BETWEEN WINTER AND BROMFIELD STS., SHOWING MARLBORO, WASHINGTON AND JEWELERS' BUILDINGS.

LOOKING UP BROMFIELD ST. FROM WASHINGTON ST., OPPOSITE JEWELERS' BUILDING.

S. & J. Myers, a pioneer watch and jewelry material firm, were succeeded some years ago by the son of one of the partners, M. Myers.

The establishment of C. A. W. Crosby & Son bears on its door the announcement that it was founded in 1852. The son, J. D. Crosby, now carries on the business, which has been in one location 27 years.

Shreve, Brown & Co. were the predecessors of the Shreve, Crump & Low Co., of the 20th century, according to the annals of 1859, and in 1860 the two well known houses headed by Shreve and Stanwood were consolidated. The changes that had taken place in the personnel of this old and justly famous house, prior to the union of the men whose names it now bears, cover a

OPALS

All Sizes and Qualities

period of nearly another two-score years. The Lows were in the jewelry trade in the early '20s of the past century, and a graphic story of the concern's career was printed in *The Jewelers' Circular* of Feb. 5, 1902, from the pen of Major William P. Shreve, who is a nephew of the Benjamin Shreve of the older firm. Messrs. Crump and Low are still active in the company's management.

Another house of long standing is the E. B. Horn Co., which dates back to 1839, and was started on Hanover St., but now has a Washington St. location. Edwin B. Horn was succeeded by his son, who was also an Edwin B. Horn, and the third generation is represented in the corporation of to-day by F. A. Horn, clerk and director, associated with President W. A. Whittemore and C. A. Woodsome.

Howland & Bates were jewelry manufacturers in Boston previous to 1860. R. Crosby, later of Ripley & Crosby, was also in business here at that time. They were the predecessors of the Ripley-Howland Mfg. Co. of to-day.

J. V. Kettell, later of Kettell & Blake, has mention in the directory of 50 years ago. James S. Blake, president of the Boston Jewelers' Club, now carries on the business under the old firm name.

Doubtless there are other concerns of the present time that succeed to the establishments of that era under other names and which are almost as closely connected in a business way with their predecessors as those which have been mentioned. Scores of prominent firms of that day, however, have vanished completely, leaving no successors. Most conspicuous, perhaps, is the once wealthy firm of Palmers & Bachelders, as it was styled in 1859, later Palmer & Bachelder.

A retrospect of a quarter of a century, however, would show a large number of the other present-day concerns to have been in existence during all or more than that span of time.

Conspicuous in the past 25 years have been the houses of D. C. Percival & Co., A. Paul & Co., Smith, Patterson Co., E. A. Cowan & Co., Thomas Long Co., John C. Sawyer, John B. Humphrey, E. A. Cowan & Co., Nelson H. Brown, E. H. Saxton Co., A. Stowell & Co., George E. Homer, Charles May & Son, W. A. Thompson, Harris & Lawton, Arthur H. Pray, Charles W. Foss, George W. Hazen, William Kerr & Son, H. N. Lockwood, F. G. Butler & Co., and a score or more of others who figure more or less prominently in the list for the year upon which the trade has just entered.

Interesting Aeronautic Trophy and Medals.

ON this page we give an illustration of a trophy of the recent International Aeronautic Exhibition at Frankfort on Main, masterpiece of design and technic. It was designed by Francis Joseph Maier and executed at the workshop of the skilled Munich chaser and silversmith, Frederick Pöhlmann, whose work continues to meet with universal admiration. The trophy, symbolizing aeronautic navigation in space, is executed in silver gilt and rests on a pedestal of serpentine. The zodiac is on a blue enameled ground.

A competition for the artistic medals was instituted by the management of the International Aeronautic Exhibition, the sculptors Oscar Prock, Charles Stock and Louis Mergehen being adjudged the winners. The three prize medals are shown herewith.

Jewelers Board of Trade Holds Annual Meeting.

New Board of Directors and New Officers for the Ensuing Year Elected Unanimously and Members Settle Differences Amicably.

The annual meeting of the Jewelers Board of Trade, held last Thursday afternoon at 15 Maiden Lane, New York, was a notable one in the history of this body, as it not only proved the strength of the organization in many ways, but also showed that its members could rise above factional strife and settle amicably and broadly differences which might disrupt a weaker organization or one composed of men of a lower standard of intelligence and public spirit. As a result of the meeting a new board of directors were elected unanimously, as were the president and two vice-presidents elected at the same time.

That there have been differences in the Board of Trade for some time has been generally known, and that these differences resulted in two tickets of directors was announced in the last issue of THE JEWELERS' CIRCULAR-WEEKLY. One of these tickets, which was regularly presented by the nominating committee, contained the names of 14 new directors with the former directors of Chicago and Providence, while

CHAS. H. INGERSOLL, FIRST VICE-PRESIDENT.

the other ticket contained the names of the old directors in New York and new directors for Providence, but with no change in Chicago. Both parties canvassed thoroughly, proxies were sought and every effort made to win; consequently the meeting was largely attended and a strong fight expected.

However, the threatened storm did not break. The atmosphere of the meeting, while for a time tense, was cleared by the broad and patriotic stand taken by both sides and the manifest determination of all the leaders to act for the best interests of the Board and to conduct their contest in such a way that no matter which ticket was elected unanimous support would be given to the administration by all the members.

About 150 were present when President Street called the meeting to order in the large room on the fourth floor of the Silversmiths' building and read his annual report, as follows:

PRESIDENT STREET'S REPORT.

To the Members of the Jewelers' Board of Trade:

Gentlemen—You are here at this, our annual meeting, to receive an accounting of our stewardship and to elect directors for the ensuing year. Do not let your responsibility end with your vote, but strive all you can, in the future, to sustain those whom you elect. Our statistics will show that your interests have been intelligently and carefully guarded and that we are in a prosperous condition. Our membership is 564, allowing for

M. D. ROTHSCHILD, PRESIDENT-ELECT.

resignations not yet acted upon, or 24 more than last year.

Our assets in cash, fixtures and accounts due are $13,344 88, not including our reference book and reports.

We have 42 employes in the New York office, nine in Chicago office, and five in Providence office.

Our special fund, to be used in case of fraud, has been so carefully handled that debtors are now very careful as to how they attempt fraud on any members of our corporation.

I would call your attention and that of our new finance committee to the fact that we have been doing business the past year at less than cost, in consequence of which we need a larger income. It was most fortunate that we had a surplus to meet this condition of things.

Our by-laws seemed to need revision to meet the present situation and a committee was therefore appointed to consider the matter. The committee's report was approved by the board of directors and the amendments are before you for your action.

It is my belief that the interests of the corporation would be best served by avoiding unnecessary changes in the board of management.

Perhaps not all of our problems will be solved at once, but I feel assured that, with the hearty co-operation of each and every member, our corporation, now the largest and strongest of its kind in the country, will be continued with increasing prosperity.

In retiring from the honorable and responsible position of president I wish to express my great appreciation for the most efficient and faithful co-operation of my fellow directors during the past year. Respectfully submitted,

(Signed) GEO. W. STREET, President.

Attached to this was a statement issued by the old board of directors at a meeting held Thursday, Jan. 13, which by resolution was made a part of the president's annual report. This statement explained the attitude of the old directors, their side of the controversy and the reasons why seven of them had refused to accept a nomination at the hands of the nominating committee. It concluded by stating that a new administration would be in office, that the majority must rule, and that the old directors individually had only the interests of the board at heart, and while in office or in the ranks stood ready to work for the Board and strive to make it more valuable than ever before.

This was followed by an auditors' report, and then the treasurer, C. G. Alford, rendered a brief report giving an exact statement of the financial affairs of the association.

Secretary Safford's report, which was next in order, was as follows:

SECRETARY SAFFORD'S REPORT.

For the year ending Dec. 31, 1909, our income was $85,400.03, as against $86,165.27 for the previous year; a decrease of $765.24.

The principal decrease was in the income from fees in our collection department where so much work is done for either a merely nominal charge or no charge.

H. B. O'BRIEN, SECOND VICE-PRESIDENT.

Our expenses for the year were $95,172.59, as against $85,720.14 for 1908; an increase of $9,452.45.

Expenses naturally grow with the increase of the service rendered, and as compared with an increase of $6,937.88 in 1907, and of $9,312.41 in 1908, our present increase of $9,571.27 is not out of proportion.

The principal increase was in salaries in the New York office, it being necessary to employ one additional correspondent and two additional stenographers in the collection department, and one additional reporter and an extra typewriter in the reporting department, there being practically no increase in the salaries of the other employes.

Our rent increased on account of our adding the cost of our directors' room, which seemed an absolute necessity, and the difference between a full year's rent in our present quarters as compared with a part only of the year's rent in the previous year.

The expense of our Chicago office was increased by the additional help of a reporter and a stenographer, made necessary by the increased work,

and in our Providence office of an additional reporter.

Our general expenses were increased by the payment for an examination of our affairs and the employment of an accountant to audit our books.

It is becoming necessary to pay correspondents for reports where formerly they were not paid for, and this item increased.

Our reference book grows larger each issue and more copies are printed and the expense is necessarily increased.

We had more uncollectible accounts from members by failure and otherwise.

Our only reductions were in expenses of traveling reporters, stationery and postage.

Our reference book increased 35 pages during the year The changes made in rating and otherwise were 25,893.

The new and revised reports written during the year was 30,397.

We issued to members in answer to inquiries, 63,393 reports, as against 55,890 in the previous year, an increase of service of 7,503 reports, yet these were so distributed among our members that our increased income therefrom was only $162.52.

Had our reports been charged for on the same basis as Dun and Bradstreet, our excess reports would have produced an income of over $10,000, instead of $1,668.00, as charged under our present rules.

The Board is to be congratulated that in all the years of the issue of its book of ratings and its reports, it has never been called upon to defend itself in a suit for libel or damages, such being frequently the case with the commercial agencies.

In our collection department we have been overburdened with work as the result of so many failures and extensions in addition to the regular collection business.

Since December, 1908, we have had 399 cases of failure and bankruptcy, besides over 30 extensions and compromises, to each of which we have had to devote our time and attention, and as a bankruptcy case is rarely settled in less than a year, we still have the most of these to look after as well as the new cases which arise. The constant accumulation of new matter added to the old and unsettled means increased work each year, and consequent increase of expense for competent help to handle it.

The total amount collected during the year was $590,000, of which over $215,000 was without expense to the creditors.

The number of claims received during the year for collection was 9,818, representing $1,215,000, being an increase of over 1,400 claims over last year.

In handling the various bankruptcy cases during the year we have met with our usual success and difficulties.

I shall only mention the following as illustrations:

In the case of M. A. Lipman, Brooklyn, N. Y., we filed a bankruptcy petition Dec. 23, 1907, found the liabilities to be about $3,800, and that the assets would amount to only $200 or $300. We elected a trustee, and after many hearings and the taking of much testimony secured a finding by the special commissioner to the effect that Lippman should turn over concealed assets to the amount of $3,474. The referee raised this amount to $6,539. We applied to the District Court for a commitment order, but upon motion of the bankrupt's counsel the matter was referred back to the referee in March, 1909, for a revision of the referee's former finding. The matter has been pending since that date and we have been unable to get a disposition of the case.

In the case of Isadore Kahn, Washington, D. C., we filed a bankruptcy petition, May 12, 1908, and found that he had liabilities of $14,000, and assets estimated by him to be worth $3,000. We secured an adjudication, set aside the attachment covering about $1,400 worth of goods, sold the assets for $3,500, which was more than the appraised value, and after taking about 500 pages of testimony filed a motion for an order upon the bankrupt to show cause why he should not turn over about $18,000 in concealed assets, and secured a finding in November, 1909, that he had concealed assets amounting to $1,244 and held up Kahn's discharge. We are informed that this is the first case in the District of Columbia where an order has been entered. The bankrupt's attorneys will probably take the matter to the Supreme Court of the United States.

In the case of A. J. Levin, Kansas City, Mo., a petition was filed on Jan. 5, 1909, and we found that the bankrupt's liabilities were $45,650.59. We controlled the trustee, sold the assets for $3,710, which amount was $500 more than the appraisal. We expended some $700 in securing evidence, including the examination of the books of all the express companies in Kansas City, and the bringing back to Kansas City of two former employes of Levin for whom he had secured positions in Texas, and then filed a motion for the bankrupt to show cause why he should not turn over approximately $20,000, the disappearance of which amount he had failed to explain, held up his discharge and placed the matter before the United States District Attorney. The referee ruled that the evidence was not sufficient to justify Levin's imprisonment if he failed to comply with an order to turn over, and our attorneys thereupon certified the case to the District Court, Oct. 9, 1909, and it is still pending without decision. The United States District Attorney has promised to take up the criminal side of the case when final decision is rendered, and if the District Court rules against us we can take the case to the United States Circuit Court of Appeals.

In my reports to you in the case of S. W. Jacobs, Worcester, Mass., since 1904, I have been telling you of the progress made in the prosecution of Jacobs, and how we finally obtained his conviction and sentence to two years in the Federal prison at Charlestown, Mass. On a technicality he obtained a new trial which is now pending. Recently, through his attorneys he submitted a proposition to settle with his creditors at 20 cents on the dollar, and we felt it our duty to submit the offer to the creditors, and to our amazement a large majority of the creditors expressed their willingness to accept.

Is this loyalty to the Board of Trade? Of what use to prosecute if creditors forget the object for which prosecution is urged upon the board, when a mere pittance is dangled before their eyes.

These are some of our difficulties.

Respectfully submitted,

D. L. Safford, Secretary.

New York, Jan. 27, 1910.

The secretary then read the corporation's report, a document which must be filed each year in accordance with the law.

Harry Cutler, one of the Providence members of the board, said that he believed that the president's and secretary's reports should not be put on file at once, and suggested that they be laid on the table for the present.

The meeting then proceeded to the election of the board of directors. Leopold Stern, in presenting the report of the nominating committee, asked for a few minutes in which to explain the action of that committee. He then briefly outlined the work of the committee and said that in view of certain conditions and dissatisfaction in the workings of various departments of the board that it had been deemed advisable to make some changes. He said that seven of the old board in New York had been renominated, but had refused to serve, so that other names had to be substituted in their places. He spoke of another ticket which, he understood, would be placed in the field, and said that all the men whose names appeared on the ticket, with the exception of two, had declined to serve in a letter to the members. He said he believed that these gentlemen were in the same position as if their names had never been nominated, and that he had good legal authority to back up his statement.

In concluding his remarks Mr. Stern made a strong appeal to the members to act calmly and deliberately, thinking only for the best interests of the board. No charges of incrimination or reincrimination had been indulged in at the meeting, and he hoped none would be. He urged all members to support loyally and whole-heartedly whatever ticket was elected and officers chosen. That remark struck a responsive chord, as was evidenced by the applause which greeted him.

Hiram A. Bliss spoke on behalf of the opposition ticket containing the names of the old directors. Mr. Bliss carefully and concisely reviewed the work of the old directors, showed how they had served the association well and faithfully, and commented upon their able and unselfish work in behalf of the board for years, urging that they were best fitted not only to take care of the work of the association but to judge the merits of the controversies that had arisen. New men, he explained, could not have that knowledge which comes from years of experience, which is necessary in taking charge of such a large and important corporation. He spoke long and earnestly in behalf of the second ticket, stating that it was but just and proper they should be elected as a whole, and defending the action of those who had resigned from the nominating ticket when they found that they would be in minority.

Mr. Bliss took the whole responsibility of the opposition ticket, saying that the old directors, with the exception of himself and Mr. Rothschild, had been nominated without their suggestion, and that even though they had resigned in a letter to the membership he had been legally advised that their names were still before the meeting. He closed with an earnest plea for their justification and election.

F. H. Larter then asked for the names of the tickets to be read, and this was done. Before the ballot was taken, however, the point of order was raised that the second ticket, with the exception of Mr. Bliss and Mr. Rothschild (who had not resigned) was not legally before the meeting for action, as the other members whose names appeared thereon had taken the only way they could to withdraw from the race, namely, by sending out a letter to all the members declining to serve. On an appeal to the house this point of order was declared well taken, and the chair therefore finally ruled that the only candidates before the committee were those named on the nominating committee ticket and Mr. Bliss and Mr. Rothschild on the other ticket, as neither of these had resigned.

Mr. Rothschild, however, was on both tickets, and as Mr. Bliss then refused to run there was only one ticket before the meeting.

David Kaiser, one of the old directors, said that he had refused to run and the use of his name on the second ticket had been unauthorized, and he felt that a great many others were in the same position. F. H. Larter, who talked to the same effect, said that he hoped all would abide by the decision of the meeting, which had ruled out the second ticket, and that he hoped this would do away with all dissension in the organization. He expressed his best wishes for the incoming administration while paying a tribute to his former associates for their long and faithful service.

On motion, the secretary was authorized to cast one ballot for the ticket nominated by the nominating committee, in which one change had been made since it had been sent out to the members, namely, the substitution of Emil Despres, of Despres, Bridges & Noel, Chicago, for C. J. Dodgshun, of the Waterbury Clock Co., who died after the nomination was made.

The directors unanimously elected are:

4th Floor

New York—Henry Bodenheimer, Bodenheimer & Jaskow; Irving Day, Day, Clark & Co.; Arthur Henius, Bruhl Bros. & Henius Co.; A. V. Huyler, N. H. White & Co.; Chas. H. Ingersoll, R. H. Ingersoll & Bro.; Jonas Koch; Alfred Krower, Albert Lorsch & Co.; Joseph Meurer, Saunders, Meurer & Co.; Ludwig Nissen, Ludwig Nissen & Co.; H. B. O'Brien, Alvin Mfg. Co.; M. D. Rothschild, American Gem & Pearl Co.; A. L. Stearns, Roy Watch Case Co.; Seth E. Thomas, Jr., Seth Thomas Clock Co.; G. H. Tomes, Cross & Beguelin, and E. J. Wittnauer, A. Wittnauer Co. Chicago—Ben Allen, Benj. Allen & Co.; Emil M. Despres, Despres, Bridges & Noel; John H. Hardin, F. A. Hardy & Co.; Wm. F. Juergens, Juergens & Andersen Co.; M. A. Mead, M. A. Mead & Co., and A. L. Sercomb, International Silver Co. Providence—Geo. H. Cahoone, Geo. H. Cahoone & Co.; Wm. A. Copeland, Martin-Copeland Co.; Harry Cutler, Cutler Jewelry Co.; Theo. W. Foster, Theo. W. Foster & Bro. Co.; H. W. Patterson, Smith Patterson Co., Chas. T. Paye, Paye & Baker Mfg. Co., C. L. Watson, Watson & Newell Co., and Geo. K. Webster, Webster Co.

The meeting then proceeded to the election of officers, and Ludwig Nissen presented the name of M. D. Rothschild as president for the ensuing year, saying that he was well enough thought of by all the members to be placed on both tickets. Leo Wormser seconded the motion and the secretary was instructed to cast one ballot for Mr. Rothschild as president.

President Street requested Frederick Larter to escort Mr. Rothschild to the chair, whereupon Mr. Street extended to the new president his hearty wishes for every possible success in his work.

Mr. Rothschild, in thanking the membership for the honor conferred upon him said that he was the president of no factions, but of the board as a whole, and would be guided by the majority voice of the organization. He called upon the old board of directors for support, and said that he would like to see the by-laws so amended that not more than one-third of the board could go out in any one year.

Mr. Cutler voiced to the new president the hearty congratulations and best wishes of himself and the other Providence members of the board, and said that he hoped that every action of the new president for the good of the whole organization will bear fruit.

Alfred Krower placed in nomination for first vice-president the name of Charles H. Ingersoll, and he was elected unanimously.

Harry B. O'Brien was then nominated and elected second vice-president.

It was moved, seconded and carried that the old nominating committee be re-elected, with the exception of Mr. Mason, who could not serve, as his partner is a director. The nominating committee consists of David C. Townsend, Leopold Stern, Geo. R. Whitehead, Geo. E. Fahys, August Oppenheimer, Edward S. Smith and Leo Wormser.

Ludwig Nissen moved that the discussion as to the amendments to the by-laws then in order be laid on the table, and this was decided upon.

David Kaiser offered a vote of thanks for the use of the room in which the meeting was held.

Leopold Stern asked for a vote of thanks to the retiring president and directors of the board, which was given with a will.

Frederick Larter moved that the reports of the president and secretary be taken from the table and made a part of the minutes, and that they be printed and distributed to the members. It was finally decided that all reports be received and placed on file, but that they be not printed.

After the meeting adjourned the board of directors met in the directors' room of the Board of Trade and organized.

Albert L. Stearns, of the Roy Watch Case Co., was later elected treasurer, and A. V. Huyler, of N. H. White & Co., secretary. The following committees have been appointed.

Finance—Charles H. Ingersoll, of Robt. Ingersoll & Bro.; H. B. O'Brien, of the Alvin Mfg. Co.; Arthur Henius, of Bruhl Bros. & Henius Co.; Alfred Krower, of Albert Lorsch & Co.; Ludwig Nissen, of Ludwig Nissen & Co., together with the president and treasurer, ex-officio.

Auditing—Henry Bodenheimer, of Bodenheimer & Jaskow; G. H. Tomes, of Cross & Beguelin, and A. V. Huyler, of N. H. White & Co.

Arbitration—Ludwig Nissen, of Ludwig Nissen & Co.; E. J. Wittnauer, of the A. Wittnauer Co.; Joseph Meurer, Saunders, Meurer & Co.; Seth E. Thomas, Jr., of the Seth Thomas Clock Co.; H. B. O'Brien, of the Alvin Mfg. Co.

Membership—Albert L. Stearns, of the Roy Watch Case Co.; Irving Day, of Day, Clark & Co.; Jonas Koch, of Jonas Koch.

It was stated last month that creditors of Ida M. Buskirk will receive 25 per cent. on the claims. The costs of administration will reach $200, leaving about $1,800 on hand for distribution among the creditors. The trustee has succeeded in recovering from a Rochester creditor about $800 which the bankrupt paid to him within four months before the failure.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Jan. 26.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Vera Cruz: 3 cases plated ware, $278; 3 cases scopes and views, $262.

Wellington: 7 cases clocks, $236.

J. T. Quick, Water Valley, Miss., Makes a General Assignment.

WATER VALLEY, Miss., Jan. 26.—An assignment has been made under State laws by James T. Quick, who for over 10 years has conducted a jewelry business in this town. The assignment opens the way for bankruptcy proceedings on the part of the creditors, but whether or not these will be filed is not yet known.

Mr. Quick has been a long time in the trade, having been located at Wagoner, Ind. Ter., and Coal Hill, Ark., before he came here in 1898. In 1901, with Mr. Spearman he formed the firm of Quick & Spearman, who met with financial difficulties and dissolved. The business was then taken over by Mr. Quick's wife for whom he managed it until 1905 when he started again in his own name.

Knowlton & Rider, jewelers at Malone, N. Y., have dissolved. E. W. Knowlton becomes the sole owner. He has been interested in the store for 26 years.

Wm. H. Ludwig, Chambersburg, Pa., recently installed in his store a modern type of safe, weighing 6,600 pounds. The safe is made of chrome steel and is alleged to be both fire and burglar proof.

Friends Pay Last Honors to the Late Daniel Ostrander Scofield.

The funeral of the late Daniel O. Scofield, head of the firm of Scofield, Melcher & Scofield, manufacturing jewelers, was held from his late home, 169 Rugby Road, Flatbush, Brooklyn, Wednesday evening, and the large attendance at the services reflected the esteem in which the deceased was held. The interment took place the next morning in the family plot at Greenwood Cemetery.

As noted in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, Mr. Scofield died suddenly Monday morning of last week of

THE LATE DANIEL OSTRANDER SCOFIELD.

heart trouble. The funeral services were conducted by the Rev. Dr. Waters, pastor of the Tompkins Ave. Congregational Church.

Mr. Scofield was one of the best known men in the Maiden Lane district and was esteemed by all who knew him. He was kind-hearted and thoughtful of all with whom he came in contact and his deeds of generosity will live after him and keep fresh his memory with his many friends and with those to whom he often lent a helping hand. He was a man of strict business integrity, of cheerful disposition, and always looked on the bright side of life.

In testimony of the esteem in which he was held, the Brotherhood of Traveling Jewelers sent to his bier a magnificent floral token. A number of other tributes from his associates in the trade were also sent.

Mr. Scofield was associated with the trade in New York 42 years, having begun as a boy when 13 years of age.

The business will be continued without change in style.

F. S. Owen, Hico, Tex., Offers Creditors a Settlement at 33 Per Cent.

HICO, Tex., Jan. 26.—F. S. Owen, a jeweler of this town, is offering to compromise with his creditors, proposing to settle his indebtedness at 33 cents on the dollar.

Mr Owen has been in business here since 1905 and has carried a large stock, though he has not had much cash capital. At one time he had a branch store at Rotan, Tex., which he later sold to his son, R. O. Owen.

The Career of the Late Charles D. Tucker, Medford, Mass.

BOSTON, Mass., Jan. 26.—Charles D. Tucker, whose recent death in this city caused profound regret to his many friends, was formerly in the jewelry and optical business in Medford and more recently had been in the optical business in the Paddock building in this city.

Mr. Tucker was born in Medford, Oct. 26, 1865, and was the son of Olivia Richards and Daniel T. Tucker. After graduating from the local high school in the class of '83 he became associated in the wholesale jewelry business of Palmer, Batchelder & Co., and was later with N. H. Brown. While engaged in the jewelry trade he studied optics and graduated from an optical school. He established the jewelry and optical store in Medford Sq., but the optical end of his business developed so largely that he in time gave up the jewelry trade and devoted his entire time to this work, opening an office for that purpose.

In early life Mr. Tucker joined the First Universalist Church and at the time of his death was a parish trustee. He was president of the Men's Club and a teacher in the Sunday school. In fraternal circles he was also prominent, having been Past Master of Mount Hermon Lodge and a member of the Mystic Royal Arch chapter, A. F. & A. M. He was a member of the Appalachian Mountain club, the New England Association of Opticians, and a director of the Klein Optical School, of this city.

Deceased is survived by three sisters and a brother.

Death of M. J. Withers.

DIXON, Ill., Jan. 26.—M. J. Withers, well known in the jewelry trade, who has had a store in this city for nearly five years, died at his home, 916 3d St., Sunday, after an illness of two weeks. The funeral services were conducted yesterday afternoon at his residence by the Rev. F. D. Stone, of the Methodist Church.

Deceased was a native of England, where he first saw the light in London in 1888. His father was a manufacturing jeweler, and the son followed in his footsteps at an early age. When a young man he came to America, but after a short stay returned to his native land, but shortly again returned to the United States and made his permanent home here.

Mr. Withers followed the jewelry business in various places and was located at different times in Sioux City, Ia.; Tremont, Nebr; Clarksville and Jackson, Minn. In October, 1905, he came to Dixon, Ill., and soon gained quite a reputation by his ability in practical lines. He built up an excellent repairing business and carried a small stock.

Mr. Withers was married Nov. 9, 1904, to Miss Laura Virginia Anderson, of this city, who survives him.

Death of Alfred Worch.

WASHINGTON, D. C., Jan. 26.—The local trade lost one of its oldest members when Alfred Worch passed away Sunday evening at his home, 1912 Pennsylvania Ave. Mr. Worch has been an invalid for the past two years from heart trouble, but his condition did not become critical until a week ago. He then grew gradually worse until the crisis on Sunday, when he lost consciousness and remained in this state until he passed away. Heart trouble was the cause of his death.

Mr. Worch was a German and was born in Pottsdam, Prussia, in 1847. He came to America about 1861 and settled in Washington. About 37 years ago he established himself in the jewelry business at Pennsylvania Ave., where he continued without interruption until his death, his store being under his residence.

Mr. Worch is survived by four daughters and one son. The latter, Rudolph Worch, for a number of years was associated in his father's business, but has been recently in the Post Office Department. The funeral services, which were held yesterday afternoon, were conducted by the Rev. Paul Menzel, pastor of the Concordia Lutheran Church.

Recent Decisions by General Appraisers on Jewelry and Kindred Lines.

Decisions of the Board of United States General Appraisers, New York, in cases involving duties on jewelry and kindred lines have been announced as follows:

IMITATION PRECIOUS STONES.—Protests of B. Altman & Co., R. F. Lang et al., and A. Lorsch & Co., New York. Protests sustained as to precious stones and imitation precious stones.

IMITATION JET.—Protest of Lewengart & Co. (Portland, Ore.). Articles made of imitation jet were held dutiable as manufactures of glass or paste under Par. 112, Tariff Act of 1897, as claimed by the importers.

SILVERED BOTTLES.—Protests of American Thermos Bottle Co. et al. (New York). Protests sustained as to glass bottles, silvered.

PRECIOUS STONES—IMITATION PRECIOUS STONES.—Protest of Rud. C. Hahn and protest of Albert Lorsch & Co. (New York). Protests sustained, the goods being held dutiable either as precious stones or as imitation precious stones.

J. T. Burke, Wilmington, N. C., Executes a Deed of Trust.

WILMINGTON, N. C., Jan 27.—J. T. Burke, a retail jeweler of this city, has executed a deed of trust. His failure comes after a long fight to meet his obligations. Attorneys for the creditors had commenced actions and this precipitated his insolvency.

Mr. Burke has been in business here since 1894, and is prominent in the local community. The amount of his assets and liabilities is not known, though the latter is not supposed to be large.

The annual meeting of the stockholders of Evans & Sons, jewelers at 32 Columbia St., Utica, N. Y., to elect directors, will be held on Feb. 7 at 10 o'clock.

Creditors Seek Lucien Deutch, Who Disappeared from San Francisco, Cal., Jan. 1.

SAN FRANCISCO, Cal., Jan. 26.—The local office of Pinkerton's National Detective Agency has sent out circulars containing the portrait and description of Lucien Deutch, who disappeared from San Francisco about Jan. 1 with considerable jewelry said to belong to wholesale merchants of this city. The Jewelers' Board of trade of this city, through its attorney, offers $100 reward for the capture of Deutch.

The missing man is described as about

LUCIEN DEUTCH, MISSING JEWELER.

36 years old, five feet three inches high, of slender build and weighing about 120 pounds. He has a fair complexion, blue eyes, light brown hair and mustache and a prominent nose. He is a Frenchman and speaks English with an accent, though he speaks Spanish and German as well as his native language.

Deutch conducted a small manufacturing business here until the first of the year, when he fled from this city; since that time a number of wholesale jewelers who had given him articles to sell have been seeking his whereabouts. He is said to have also owed considerable money.

A warrant charging embezzlement is now in the hands of the chief of police.

Death of George Winchester Paton.

PROVIDENCE, R. I., Jan. 29.—George Winchester Paton, one of the oldest manufacturing jewelers in this vicinity, died at his home at Riverside on Tuesday evening. He had been seriously ill for about two months, but his death was unexpected. He had suffered occasionally from severe colds and had not enjoyed the best of health for the past two years.

Mr. Paton was born in this city May 12, 1839, and when a young man learned the jewelry business with the old manufacturing concern of Sackett, Davis & Co., and was employed by that firm when the Civil War broke out. He had then been a member of the Providence Marine Corps of Artillery for several years and had advanced to the rank of major. With the first call for troops he enlisted in the First Battery, Rhode Island Volunteers, April 17, 1861, and served for more than a year. He was wounded in battle near Tennallytown, N. C., July 22, 1862, and was mustered out Aug. 30, 1862.

Upon his return he engaged in the jewelry business again, and for several years, during the latter part of the '60s and the early '70s, was in the manufacturing jewelry business for himself. He then engaged in the real estate business and settled in Riverside, where he has since resided, conducting one of the largest Summer hotels on Narragansett Bay. He leaves a widow, one son and a daughter. Edgar Mowry, of the George L. Vose Co., was the husband of a second daughter, who died recently.

Charles H. Ballou & Co., Providence, R. I., Go Into Voluntary Bankruptcy.

PROVIDENCE, R. I., Jan. 29.—Charles H. Ballou, doing business as Charles H. Ballou & Co., manufacturing jewelers at 129 Eddy St., this city, was adjudged a bankrupt, yesterday, by Judge Arthur L. Brown in the United States District Court upon his voluntary petition. The matter was sent to Referee in Bankruptcy Chester W. Barrows, who has called a meeting of the creditors for Monday, Feb. 7, at 11 o'clock, in his office, 87 Weybosset St.

The schedules place the indebtedness at $3,241.38 and the assets at $3,743.64, included in the latter being stock, finished and unfinished, valued at $1,626.87, and machinery, tools, fixtures, etc., $1,013. The largest crediotrs are the Union Trust Co., of this city, on note, $900; Venerbeck & Clase Co., this city, platers, $605.51; Julius Mamluck & Co., this city, imitation precious stones, $410.70; John F. Brady, this city, colorer, $292.72.

Included in the list of creditors, of which there were 33 unsecured, are the following, a majority being local dealers in jewelers' supplies: B. A. Ballou & Co., Inc.; Leeder & Bernkopf, Albert Lorsch & Co., Rueckert Mfg. Co., Edward L. Knight, Colvin Mfg. Co., the Jewelers' Supply Co., Young Bros., A. T. Wall Co., Alfred Vester & Sons, Venerbeck & Clase Co., Julius Mamluck & Co., H. Nordlinger's Sons, *The Manufacturing Jeweler*, E. E. Smith Co., John F. Allen, Thomas H. Early & Co., John F. Brady, Martin Low & Taussig, Thompson & Thompson, R. L. Greene Paper Co., Providence Telephone Co., Manufacturing Jewelers' Board of Trade, Manufacturers' Outlet Co. and and William H. Miller & Sons, all of this city; George H. Fuller & Son Co., Pawtucket; the Metallic Co. and Leach & Garner Co., Attleboro; Thomas Long Co., Boston; Vitrified Wheel Co., Westfield, Mass., and F. S. Gesswein, New York.

Mr. Ballou was the sole owner of the business, which he conducted under a partnership name at 129 Eddy St. He is a toolmaker by trade and became well known through his invention of a corrugated bead stock which he patented a few years ago. He was formerly connected with the N. Barstow Co., and worked for three years for the H. H. Curtis Co., North Attleboro, Mass. He started in business for himself at 239 Thurbers Ave. about Sept. 1, 1898, as a manufacturer of bead necklaces, and last Spring moved to his present address.

Keystone Watch Case Co.'s New Policy in Dealing with Jobbers Causes Discussion.

There was much interesting comment and discussion in the watch trade, last week, resulting from the letters sent out by the Keystone Watch Case Co. announcing the company's policy in dealing with jobbers handling the various lines of watch cases, movements and watches controlled by that concern. This policy, if adhered to, will keep the company's lines entirely out of the hands of those wholesalers who handle watch cases made by other manufacturers.

As many jobbers now handle all, or almost all, of the prominent makes of watch cases these firms will have to reduce the number of case lines which they carry, no matter what action they decide to take. Already several large jobbers have agreed to accede to the wishes of the Keystone interests, while other large houses have positively refused to do so. The number of distributers of Keystone products will therefore be reduced.

The letters sent to the jobbing trade which accompanied the new price list of Keystone products changing the latter from a list to a net basis read as follows:

We enclose herewith new price lists which we are mailing to the retail trade to-day. These prices are subject to the usual catalogue discount and the cash discount only.

We also enclose memoranda of the prices at which Boss, Crescent, Planet, Crown and Silveroid cases, and Excelsior watches will be billed in future to our jobbers. These prices are net subject to the cash discount only.

These prices are confidential.

For the best interests of our business we have determined to sell our goods exclusively to jobbers whom we find voluntarily conforming to our wishes as to the disposition by them of such goods.

We shall make all specific sales, except of Howard watches, without any restrictions whatever.

Whether or not our wishes as hereinafter stated be complied with we shall from time to time exercise our right to select the jobber to whom we shall sell our goods, and we shall, irrespective of any past dealings, refuse to sell to those jobbers who, in our opinion, handle our goods in a manner detrimental to our interest or whose dealings with us are in any other respects unsatisfactory.

Our present wishes are as follows:

First. Our goods bearing the following trademarks, to wit: Boss, Crescent, Planet, Crown, Silveroid and Excelsior, will be sold by us to our jobbers at fixed prices subject to a cash discount, and we desire that sales of these goods by jobbers, whether to retailers or to jobbers, shall be without deviation at the prices fixed by us for sales to retailers subject only to the cash discount.

Second. Howard watches are sold only under the terms of the license covering their sales.

Third. On all our other goods we place no restriction as to the prices at which they are to be sold by jobbers.

Fourth. And further, we desire that the jobbers to whom we sell our goods bearing the following trade-marks, to wit: Howard, Boss, Crescent, Planet, Crown, Silveroid and Excelsior, shall not deal in any watch cases other than those manufactured by us.

Fifth. All advertisements of our goods will be subject to our approval.

Very truly yours,

THE KEYSTONE WATCH CASE CO.

Frank R. Zoller, former superintendent of the poor of Herkimer county, has bought the jewelry store of Frederick Witherstine in Main St., Herkimer, N. Y., and took possession on Feb. 1. Mr. Witherstine and family have gone to Peoria, Ill.

Inventory of Assets of Lapp & Flershem, Bankrupt Chicago Jobbers. Now Being Taken.

CHICAGO, Jan. 29.—An inventory is being taken of the stock of Lapp & Flershem at the cost price. The receiver has received permission to employ an expert accountant to audit the books, which have not been balanced since 1893. The Dueber-Hampden Companies have filed a petition asking for the return of $1,800 worth of movements and cases consigned to Lapp & Flershem and received by them just prior to the filing of the petition in bankruptcy.

Three creditors, S. O. Bigney & Co., with a claim of $500; Sturtevant & Whiting, $612, and the estate of O. M. Draper, $656, have petitioned the court for the return of this money, claiming they were checks sent to Lapp & Flershem to take up notes for these amounts which the latter were unable to meet.

The examination of Mr. Lapp and Mr. Flershem and their credit man, A. B. Towers, showed that during the life of the concern they had lost upward of $100,000 in different ventures, their lease on the building, 195 State St., alone causing them a loss of over $75,000.

Everyone here wants to see the bankrupts get a settlement, but no one knows exactly how it is going to be done. Rumors are afloat that a settlement of 25 or 30 cents, extended over a period of two years, is in contemplation, but nothing of a definite nature will be learned until stock has been inventoried and the books have been audited.

For the past 10 years the firm did an average business of over $600,000 annually.

Itinerant Jewelry Vendor of Pittsburg Commits Suicide in New York.

PITTSBURG, Pa., Jan. 27.—It has just come to light that the Pittsburg man, Benjamin Lewis, who killed himself in the vestibule of the home of a former Pittsburg woman in New York last Friday, was a peddler of jewelry The father of the suicide, Morris Lewis, went to New York Tuesday where it is said he identified the body as that of his son.

The dead man was 27 years old and lived with his parents at 11 Miller St., Pittsburg. His mother in speaking of her son's death to THE JEWELERS' CIRCULAR-WEEKLY correspondent, stated that he kissed her goodby two weeks ago last Monday and said he was going away, but did not say where. The mother said that her son evidently was in love and that he had been disappointed, giving this as the probable reason for his rash act, although she admits the son had never confided any love affair to her.

Lewis formerly had been a bookkeeper, but lately he had been selling jewelry and had built up a satisfactory trade. His body was buried in New York.

According to information received here, the woman who occupied the house in which Lewis took his life, insists that she did not know the man. Lewis had destroyed nearly all papers on his person, but marks on his clothing assisted in identifying him. The father of the suicide went to New York in response to a telegram from the morgue officials.

Mrs. Lewis, the mother of the dead man, had received no word from her husband that he had identified their son at the time THE JEWELERS' CIRCULAR-WEEKLY correspondent visited her.

Increased Imports Shown by Customs Report of Providence, R. I.

PROVIDENCE, R. I., Jan 29.—The Collector of Customs, George W. Gardiner, has completed his quarterly report for the quarter ending Dec. 31, showing a material increase in the value of importations received through this office and of duties received, as compared with the similar period of 1908. During the last three months of 1909 the value of importations was $626,629, of which $157,832 were free and $468,827 subject to duty, upon which $157,684.52 was collected. This is in comparison with 1908, when the value of importations was $343,418, of which $34,655 were free and $308,763 subject to duty, upon which $109,173.97 was collected.

Since the previous quarter, through the presentation of the condition by Collector Gardiner, the Department has made a ruling allowing the officials of the Customs Houses to figure the tariff on jewelry of the several classes on the basis of a 75 or 85 per cent. equivalent instead of the greatly complicated system that was involved in following the language of the new law.

The largest single item of importation during the quarter was imitation precious stones, which were received to the aggregate valuation of $118,436, or approximately one-fourth of the entire importations of the office. Other jewelry importations were as follows: Clocks, $459; precious stones, $1,441; cut-glass, $726; enamels, $92; opera glasses, $112; manufactures of paste or glass for hatpins, $639; gold leaf, $541; bags and purses, $4,883, dutiable at 85 per cent.; chains, pins, etc., $2,895, dutiable at 85 per cent.; metal stampings, $1,217; gold jewelry, $1,189, dutiable at 60 per cent.

In 1908 the importations pertaining to the jewelry industry were as follows; Clocks, $959; precious stones, $158; imitation stones, $96,072; cut-glass, $266; opera glasses, $104; manufactures of paste or glass, $47; gold leaf, $1,083; manufactures of gold, $380; manufactures of silver, $5,363 (the last year this item only showed $40, because the mesh bags were figured by themselves); jewelry, $349, engraved, $313.

Death of Henry J. Goffe.

PROVIDENCE, R. I., Jan. 29.—Henry J. Goffe, of this city, died at the home of his son, F. L. Goffe, 119 Carnation St., Pawtucket, last Tuesday. He was in his 74th year and had been ill for about five months. He was born in Bambury, Oxfordshire, Eng., and came to this country when a small boy and learned the tailoring business, but finally went into the retail jewelry business with his son on Main St., Pawtucket. For several years, however, he has not taken any active part in the business.

The firm style of Goffe & Son will be retained.

Retail Jeweler's Clerk Skips Away and Diamonds Valued at $1,100 Are Missed.

WATERTOWN, N. Y., Jan. 31.—Twelve diamonds, valued at $1,100, were stolen from the store of H. W. Radder, 107 Washington St., and the local police have sent out circulars asking for the apprehension of Leslie Tooley, aged 20, who lived with the Radder family and made himself useful about the store. Young Tooley is believed to be in New York.

Mr. Radder left young Tooley in the store while he delivered a clock to a customer. The diamonds were in an envelope in the safe. Tooley later that day asked Mr. Radder for permission to go out driving with the family horse so as to take "his girl" for a drive. The consent was given. Tooley did not return that night.

The following morning Mr. Radder discovered that the diamonds were missing. Suspicion was at once directed to Tooley and the local police were notified. No trace of the boy could be found.

On Saturday afternoon Mr. Radder received a postal card from Tooley which had been mailed the day before at Station E in New York. He wrote that Mr. Radder's horse was at Carthage, and it was found there. The police also ascertained that one of the diamonds had been pledged to J. Epstein, a pawnbroker in Court St., for $15. It was a three-quarter carat stone and worth $80.

Tooley is described as follows:

Age, 20 years; height, five feet seven inches; weight, 145 pounds; light complexion, light brown hair, greenish blue eyes; wore a gold band ring, with two pearls and a red stone, ring old and worn; wore a thin blue suit, a black coat and steel gray trousers with heavy dark stripe, white flannel vest, pink tie, white union suit, gray overcoat with velvet collar, black derby hat, size 6⅞. He has a very small foot, and wore shoes one size too large.

Tooley has had unusual privileges about the store, because Mr. Radder's son, Oscar C. Radder, was in New York, where, on Jan. 22, he was married to Miss Leone Butterfield. Young Mr. Radder returned home just about the time his father discovered the loss of his diamonds.

The Tooley boy is a son of Mr. and Mrs. James Tooley. He has traveled considerably in Canada and in the west, and the young man's reputation has been of the best. He enjoyed the confidence of the entire Radder family. It is believed that he took some clothing and shoes from the Radder home before going away.

The description of the missing diamonds is as follows:

One diamond ring, plain Tiffany setting, about ½ carat; 10 loose diamonds, weighing from ½ to ¾ carats, and one small quarter-carat stone.

The New York police have been asked to watch for young Tooley about Station E, as it is believed Tooley will visit there to post letters.

This is the second diamond theft here within a few months. A swindler obtained about $250 in jewelry from J. L. Townsend's store, representing that he was an old friend of Mr. Townsend's and wanted his wife's approval before purchasing.

Whoever Gets Your Ring Business Make Him Win It

We Seek the Jewelers Who Want Light

We seek jewelers who are anxious for a way to increase their ring business.
We seek jewelers who want to sell the only permanently guaranteed ring in all the world.
We seek the wise jewelers—the good business men—the men who want more actual profits.
We will tell these men how, with absolute certainty, to pick out the rings of which they will sell two where they formerly sold one.

The Light-of-Heaven Factory

The factory behind the W. W. W. ring—eighty-six windows and three skylights—the Light-of-Heaven factory facilities bring us the choice of America's skilled workmen.

Our jewelers and stone setters are high-priced men.

No other factory can obtain superior workmen.

Each man here does but one thing and he becomes expert in that one thing.

Each part of each ring is made by an expert, who holds his place only because no other man can do better.

Rings in Which the Stones Do Stay In

There is just as much difference in rings as there is in butter and shoes.

The Light-of-Heaven factory attracts the best stone setters in the world.

Consequently W. W. W. rings are set by the best stone setters in the world.

They are the only rings made in which the stones are positively guaranteed to stay in.

However, we are not the largest makers of rings.

We are limited by the standards we have set.

There are not enough experts developed of the class we employ to make rings for but ten in every hundred jewelers.

Our vast reputation is due to the fact that *the stones do stay in W. W. W. rings.*

Permanent Guarantee of Stones Staying In

We have such implicit confidence in the superior stone setting and general workmanship of our rings that with each one we give a certificate of guarantee. This guarantee says that no matter how many sets there are in a W. W. W. ring and no matter what price ring it is, it is guaranteed to have the sets stay in and guaranteed to give satisfaction in every other way. In case, however, the sets should come out or in case the ring should prove unsatisfactory in any way, we will replace the sets absolutely free or, if necessary, give your customer a new ring, no matter whether ring is worn over one year or five years.

W. W. W. Rings Are the Only Permanently Insured Rings in All the World

If you are not selling the famous W. W. W. insured ring, now is the time to begin. It is the only ring made that carries a written insurance with it. It is usually sold to only one man in a town. It is the only ring made that gives you an opportunity to get three-fourths of the ring business in your town. People want to buy insured rings. It is the only ring made that is advertised absolutely free for the retailer who sells it.

For Only Ten Jewelers in Every Hundred

There are thirty thousand jewelers in the United States. Only ten in every hundred can buy W. W. W. rings during the year 1910—for the men who make them are few.

In most cities and towns W. W. W. rings are supplied to only one jeweler. We are now making arrangements with jewelers who are not selling W. W. W. rings. We seek more live, hustling jewelers who want to sell the only insured ring in all the world. If you want to sell a ring in which the stones are guaranteed to stay in, if you want a book of advertisements, absolutely free, if you want a new, wonderful mechanical window display that will attract thousands to your window, if you want all this advertising absolutely free—advertising that will be a revelation in the business world and a profit-maker for you—then

Makers of Rings in Which the Stones Do Stay In

Buffalo, N. Y.

H. M. Collins, Petoskey, Mich., Files a Deed of Trust.

PETOSKEY, Mich., Jan. 27.—If bankruptcy proceedings are begun against H. M. Collins, a local jeweler, they will be the outcome of a deed of trust which he filed about a week ago, naming Dr. J. J. Reycraft, Mayor of this city, as his trustee, to whom he turned over possession of his entire property. Under date of Jan. 19 Mr. Collins wrote to his creditors that on taking inventory he found he was unable to pay in full, stating that his total liabilities were about $9,538 and his assets were about $3,616.67, less exemption.

He offered to turn over all his property of every kind (except that which was exempt from execution) to a trustee for the benefit of the creditors on the condition that the trustee realize the best price possible for the assets and turn over the proceeds *pro rata* to the creditors. A deed of trust was filed pending the acceptance of this proposition.

Mr. Collins asked his creditors to make a thorough investigation and to send representatives to attend a meeting of the creditors to be held at the office of Dr. Reycraft Feb. 4.

Plan to Settle Financial Difficulties of Schneider & Baxmeier, Pittsburg, Pa.

PITTSBURG, Pa., Jan. 27.—The firm of Schneider & Baxmeier, of the South Side, have notified their creditors that they are unable to meet their obligations and are seeking a settlement or extension of claims. In order to bring about an adjustment of the firm's financial condition, Heeren Bros. & Co., the largest creditors, have addressed the following letter to the creditors:

Owing to the financial conditions and change of surroundings, the firm of Schneider & Baxmeier, 1817 Carson St., South Side, Pittsburg, Pa., are unable to meet their obligations. And whereas the liabilities are $7,885.86 and the assets $3,045, and whereas a forced liquidation will cause a great sacrifice: Therefore, we, who are the largest creditors of said firm, after investigating this matter thoroughly, have taken it upon ourselves to suggest a plan for our mutual benefit as follows:

We, together with the other creditors, whose claims amount to $5,725, have agreed to cut our several claims in half and give said firm one year's time to adjust the same. Creditors whose claims aggregate $525 have agreed to give all the time the said debtors need. The smaller creditors, whose claims total $836.86, shall receive 25 per cent. of their claims in full settlement thereof, as soon as we receive a favorable reply from them all. Thus said firm will be able to continue in business and purchase from us from time to time.

Any other course means bankruptcy, with a much smaller dividend, if any. An early reply will greatly oblige.

It is said that the extension will probably be granted. There are also reports that there may be a dissolution of the partnership, but nothing definite is now known.

Louis E. Densmore, Waltham, Mass., Goes Into Voluntary Bankruptcy.

BOSTON, Mass., Jan. 29.—Louis E. Densmore, of Waltham, Mass., doing business under the name of the Densmore Jewelry Co., has filed a petition in bankruptcy.

Densmore's liabilities are given as $9,150, of which $3,296 is secured and $245 is for notes and bills on which he is liable as indorser, the balance of $5,609 being owed to about 35 creditors, who are not secured. The assets are given as $3,352.

Association Notes.

The 1910 convention and exhibit of the American Association of Opticians will be held Aug. 15 to 18 at Cedar Point, O. The call was sent out last week by William E. Hueston, Kansas City, Mo., secretary of the association. The chairman of the exhibit committee is F. P. Barr, Lancaster, O.

A. W. Voedish, president of the South Dakota Retail Jewelers' Association, and E. Sharp, secretary, have sent a circular of greeting to all members and an invitation to non-members soliciting them to join this State association. At the semi-annual meeting it is promised that the secretary will put the members in possession of information that will be of deep interest to all who attend.

The members of the Pennsylvania Retail Jewelers' Association have received from President Ira D. Garman and Secretary C. F. Wiley an interesting letter of association affairs, with the corrected by-laws and list of members to date. In the letter the officers speak of the work of the committee appointed at the last meeting to raise a fund for prosecuting the work of the association. John M. Roberts, chairman of the committee, announced subscriptions of more than $200 within a half-hour of the creation of the committee. Members wishing to subscribe to this fund and who have not yet done so are requested to communicate with Mr. Roberts at 435 Market St., Pittsburg, Pa. The letter tells of the correction of many abuses since the organization has been formed, and urges all jewelers to be sure and attend the convention which will be held in Philadelphia during May.

Death of Joseph Kahn.

ST. LOUIS, Mo., Jan. 26.—Joseph Kahn, formerly a well-known jeweler, died, Tuesday, at his home, 3524 Sidney St., from a complication of diseases. He was 74 years old. His body was cremated.

Mr. Kahn was born in Mayence, Germany, and came with his parents to Mobile, Ala., where he was educated in private schools. He came to St. Louis in 1854 and embarked in the jewelry business at 217 N. 4th St. He continued in business until 1869.

In 1869 Mr. Kahn disposed of his interests to E. Jaccard and accepted a position as salesman with the firm that bought him out, and remained there until 1896. Since that year he had been an insurance broker.

Receiver in Bankruptcy Appointed for Wm. A. Thompson, Boston, Mass., Who Recently Assigned.

BOSTON, Mass., Jan. 29.—Proceedings under the assignment made by William A. Thompson last week to A. S. Hirshberg and Ira C. Nye have been superseded by the bankruptcy action brought by the George E. Smith Co., William H. Jordan and George Rosen.

On Wednesday, Jan. 26, Alfred W. Putnam was appointed receiver by Judge Dodge, of the United States District Court.

John Klock, Jr., is a new jeweler in Belleville, Mo.

C. R. Hotchkiss is about to begin business in Jackson, Tenn.

Gus. Leuder has engaged in the jewelry business for himself at Minden, Nebr.

J. Lee Ewing, formerly of Muscatine, Ia., will soon open a store at Mangum, Okla.

A new manufacturing business has been opened by Marks Bros. at Providence, R. I.

B. Rosenbloom has opened a store of his own at 503 Washington Ave., N., Minneapolis, Minn.

Meyer Lieberman has opened a jewelry repairing establishment at 90 Nassau St., New York City.

Oakes & Wulze have opened offices at 226 Mercantile Pl., Los Angeles, Cal., as manufacturers' agents.

Meckinberg & Gerhardt have engaged in the manufacturing jewelry business at 5th and Elm Sts., Cincinnati, O.

Richard Giacobbi has started in business on his own account in San Francisco, Cal. He will carry several manufacturers' lines.

" 26.....	41,692.49
" 27.....	72,587.71
" 28.....	56,216.62
" 29.....	25,264.97
Total	$458,871.92

The business of the late James M. Foley, Mount Crawford, Va., has been discontinued.

PATENT PENDING

THE BRUSH WHICH CAUSED A REVOLUTION

The Thin-Model Travelers'

Shown above almost actual size — Side and back views

No one who sees the TRAVELERS' ever cares to buy an old-style, wide-back clothes brush again. At Christmas the demand exceeded the supply. Now we have caught up and are ready to fill orders again.

THE TRAVELERS' IS FLAT, slips into a suit case or bag, and takes up almost no room at all.

THE TRAVELERS' is wonderfully effective — does the work better than an old-style brush.

THE TRAVELERS' is a brush anyone is proud to own — looks well wherever one lays it down. For the dressing table at home, for the pocket of the automobile.

THE TRAVELERS' is made with backs of ebony, coco-bola, French ivory, leather and sterling silver. Cased singly in leather envelopes (assorted colors) or in pairs — cloth and velvet brush together.

Complete Price List forwarded upon request

TRAVELERS' FOLDING GARMENT HANGERS

Reigning Jewelry Fashions Noted in Paris.

Dainty Novelties in Men's Jewelry, Watches, Canes, Umbrellas, Etc., Now in Demand Among the People of Taste in France's Capital.

PARIS, Jan. 20.—While there should be nothing conspicuous in jewelry for men, good taste, even in the simplest matters, should reign supreme.

Perhaps the most universally worn ornament is the cravat pin, and these little affairs are varied and artistic. Insects and animals enjoy great prestige—bees, flies, spiders, beetles, pug dogs, rabbits, cats and horses. These are usually of gold, the eyes of jewels, and exquisitely carved. The Benjamin Rabier comic animals have enjoyed great popularity, also the silhouette animals cut from a thin piece of gold or silver, flat and without the slightest relief.

A handsome scarf pin is in the form of a ruby heart cut from a single stone and surrounded with scintillant diamonds; on one side is a horseshoe in platinum with ruby nails. In choosing the gem which corresponds with the zodiacal birth sign a good-luck emblem is evolved.

Men remarked for their taste insist that the scarf pin, shirt and cuff buttons suitable for each particular sport be worn. For riding to hounds or taking the morning constitutional the bit and bridle is proper; for golf there is the golden golf stick and a tiny pearl ball; for yachting, a pair of sculls or an anchor and rope; for polo, a golden horse and ball for the days when a man enjoys this sport. These little affairs are of exquisite workmanship. There are besides pins in medallion shape, inclosing a three-leaf clover, a *fleur-de-lis*, a tortoise, a grayhound, a serpent, a lyre, an eagle, a golden ball, etc.

Shirt buttons *a la mode* are of white rather than black or gray pearls, and not very large. More fanciful are others consisting of a disk of enamel in various colors, *rayonné* or in checker-boards or stripes like those of a percale shirt. Others are of mother-of-pearl encircled with gold, a carved ivory or coral head or a flat button of jade or jet. Such buttons always come in a set of two, and are connected by a slender gold chain. The sleeve links should match, and are either round or oval.

Middle-aged men prefer finely carved cameos or a simple button of dead gold with a gem sunk in the middle, or buttons of ruby, turquoise, cat's eye, emerald or opal.

Useful are tie holders, those to hold up the socks, the suspenders, and sets of gold buttons for the under-clothing. These little objects are in simple designs, and the gold is ciselé or engraved.

While showy rings are not in the best taste, men are now wearing narrow and inconspicuous ones, two being often worn, and those always on the right hand. For a married man the French always wear a plain gold wedding ring, and above it a narrow golden circlet of dead gold with from one to three sunken gems, generally *en cabochon*. Others prefer a ring engraved with their coat-of-arms or crest on bloodstone, carnelian, lapis or amethyst. Rings are never worn excepting on the third or little finger, and never on the first or middle one.

The watch chain is much in evidence in gold or platinum, very fine and with closely serried links; it is passed through one of the waistcoat buttons upon the breast and is looped from one pocket to the other. In one reposes the watch, which is often rather ornate, of gold, with a beautifully engraved *genre* scene or of *rayonné* enamel in dark blue, green or red, with golden circlets.

Open-faced watches with enamel faces on which are golden numerals are liked, and also the watch of blackened silver with a scene in low relief. In the corresponding pocket is slipped the gold pencil and tiny gold-handled knife, a small pair of scissors, the toothpick case and the little gold-meshed coin purse. These little objects, as well as the match box and cigar holder, are of silver or gold, and often enameled with art.

Canes and umbrellas are always of interest, and there is but scanty change to be noted in them. Canes are of exotic wood, of laurel or of rhinoceros hide, with a straight handle and ring and fittings of silver. They are rather heavier than formerly. Others have curved handles, and a rather curious one shows for a handle a woman's naked foot carved in the same wood as the cane. More useful canes are heavy and solid, the curved handles leather covered and fashioned from bamboo, cane, pepper wood, etc., with silver ornamentation or gold, incrusted with a design in metal or heavily tipped and ringed with gold or silver.

Umbrellas are of silk levantine with a faille border, or in taffetaline with a leather case, black or brown. Handsome umbrellas show many fancy ideas in tops, among which are handles a finger long, of quartz, jade or ivory, or imitation stones which spread at the top, on the apex of which sits a saucy-looking pug with brilliant eyes of the same or a contrasting stone. Others show a network of gold or silver over a coral, ivory or quartz handle, while still others are of solid gold carved in high relief, of crystal or incised silver, or in the celebrated dascene work gold, steel inlaid, whose sober elegance appeals to the man of taste. A cock in gilt is a new top.

Card and pocket books combined are convenient, and one is so arranged that the series of pockets open fan-fashion, so that the cards are easily extracted. Many men like the small gold mesh purse, and others prefer morocco in dark green Russia leather or black. The cigar case is always in platinum or gilt, with a small monogram in one corner. The cigarette holder is of amber with a golden mouthpiece.

A small gilded pin fixes the flower in the buttonhole. The favorites are the white carnation or a tiny bunch of violets. The boutonniere is seldom worn except for evening over here.

COUNTESS DE MONTAIGU.

Herman M. Ricard, formerly of Quinn, S. Dak., is now located at Murdo, S. Dak.

G. C. Vahl Music Co., Milwaukee, Wis., Reported to Be in Bankruptcy.

MILWAUKEE, Wis., Jan. 31.—The G. C. Vahl Music Co., which conducts a jewelry business at 667 3d St., is reported to be in bankruptcy.

The present business is owned by Gustave C. Vahl and his son, Wm. Vahl, and the business was started by the former in 1882, who admitted his brother Anton into partnership under the style of Vahl Bros. about three years later. Anton died in 1897, and for a while Mrs. G. C. Vahl was a partner.

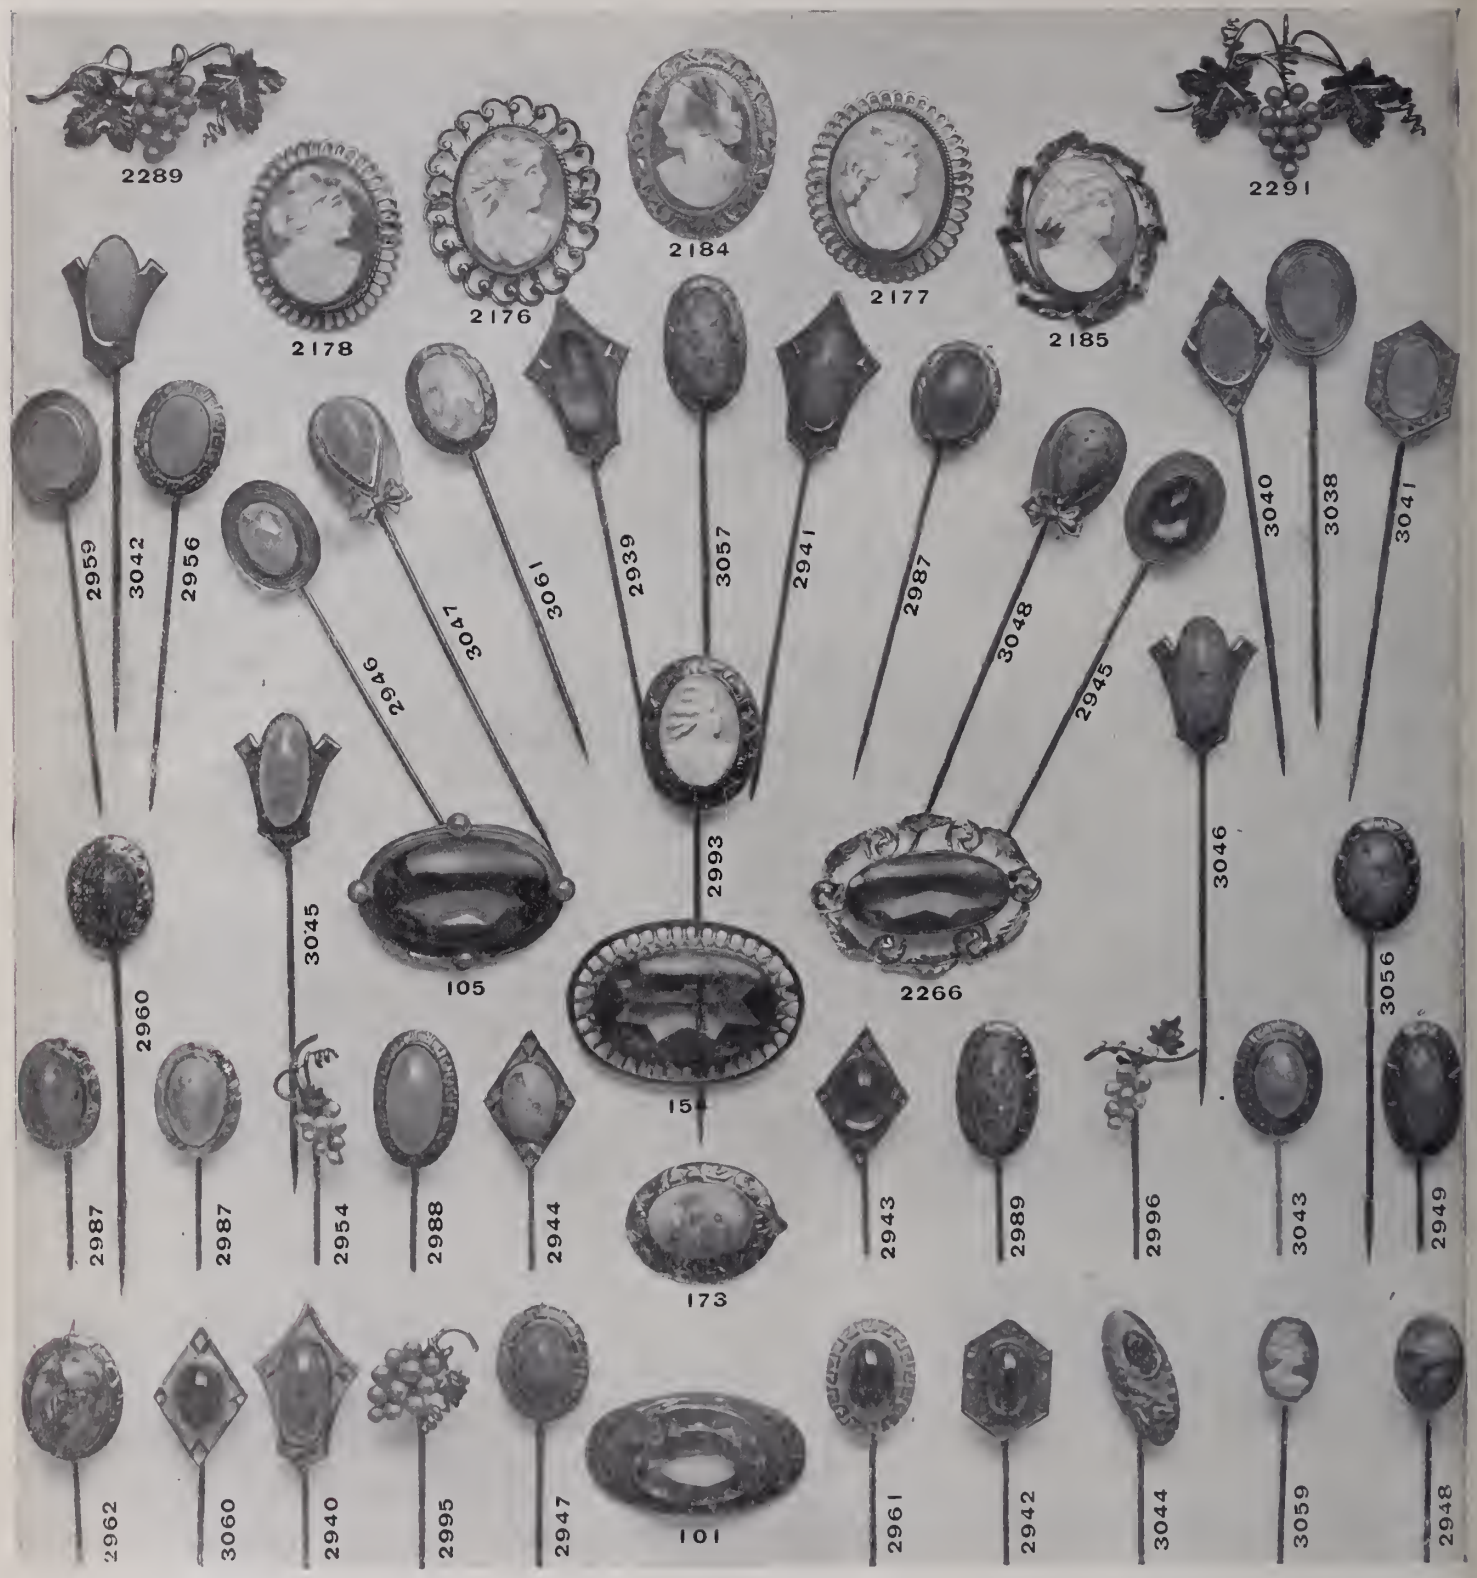
The music line was a prominent part of their business for a number of years, and for a while was conducted under the style of the American Music & Publishing Co. However, they have been gradually discontinuing it for a number of years, and for the past year or two have practically confined themselves to the jewelry and instrument lines. When Mrs. Vahl died, in August last, her son, Wm. Vahl, was taken into the firm by his father.

Outside of the local market their principal merchandise indebtedness is supposed to be in Chicago.

Business of Roy R. Smithers, Cameron, Mo., Reported to Be in Hands of Trustee.

ST. LOUIS, Mo., Jan. 28.—Local creditors of Roy R. Smithers, Cameron, Mo., were notified, Thursday, that he had failed and his business had been placed in the hands of a trustee for the benefit of creditors. The liabilities are said to be about $7,500 and the assets about $5,000.

It is probable that a basis of settlement with the creditors will be arrived at.



Smithers, who is about 34 years old, has been in business at Cameron since 1901, in which year he succeeded his father. Early in 1906 he bought out Foy & Young, and since then has had one of the finest establishments in this section. He carried a stock worth between $4,000 and $5,000, and was thought to have a capital of about $6,000.

Death of Jacob Nye.

Jacob Nye, one of the pioneers of Hollister, Cal., died at that place a short time ago. Mr. Nye came to San Juan and started in the jewelry business there in 1868 and moved to Hollister a few years later.

Deceased was in business until shortly before his death, but had been ailing for the past two years. He was a practical jeweler and stood high in trade and social circles.

As a result of the publication in THE JEWELERS' CIRCULAR-WEEKLY of the photograph of the man held at Norristown, Pa., on the charge of robbing Gustave Lanz, 211 De Kalb St., that town, the prisoner has been identified by F. S. Davis, 5143 Market St., Philadelphia, Pa., as the man who was in his store and stole a locket four months ago and was forced by Mr. Davis to restore it. Mr. Davis went to Norristown, visited the jail, and positively identified the prisoner. The Norristown police believed there were other charges against the man, but were unable to learn anything about him until the matter was taken up by THE JEWELERS' CIRCULAR-WEEKLY.

TRADE-MARK

Gorham Mfg. Co. Awarded Preliminary Injunction Against F. & M. Weintraub in Suit Alleging Infringement of Trade-Mark.

Judge Lacombe, in the United States Circuit Court for the Southern District of New York, handed down an opinion, Monday afternoon, in which he granted a preliminary injunction to the Gorham Mfg. Co. in the concern's action against F. & M. Weintraub, New York, alleging infringement of the complainant's trade-mark used on sterling silver ware. The trade-mark under litigation consists of a lion and an anchor and the letter "G" in old English type.

A bill of complaint was filed some time ago, and Judge Lacombe heard argument on the motion to grant a preliminary injunction, as reported in full in THE JEWELERS' CIRCULAR-WEEKLY, Jan. 12. The decision on the motion has since been pending, a restraining order having previously been issued by Judge Ward on the filing of the complaint.

The opinion is as follows:

UNITED STATES CIRCUIT COURT,
Southern District of New York.

GORHAM MANUFACTURING COMPANY,
vs.
FREDERICK WEINTRAUB and ano.

MOTION FOR PRELIMINARY INJUNCTION.

Lacombe, C. J.

This is a suit to restrain alleged infringement of trade-mark. The bill recites that complainant is a citizen of Rhode Island and defendants citizens of New York. It is contended that diversity of citizenship is not sufficiently alleged because distinct traversable averments thereof are not presented. If the affidavits in any way disputed such diversity the objection might be important, but since the assertion is not disputed, and an averment alleging diversity would be granted as of course, where there is no dispute as to respective citizenship the objection is not persuasive to denying relief, if on the facts complainant is entitled to it, to sustain a common-law trade-mark.

Irrespective of what complainant's predecessors may have done, it is not disputed that since 1863 complainant itself has used upon its sterling silverware a mark consisting of an anchor, lion and the letter "G." And the record indicates that the trade in such goods has for many years recognized these conjoined marks, when impressed on silverware manufactured in this country, as indicating origin in complainant's workshops. Nor does it appear that during that period, since 1863 any other manufacturer has made or sold silver or plated ware manufactured in this country, with the same combination mark.

The defendants contend that since each of the three devices—anchor, lion and G—had a certain significance when affixed to English-made silverware, complainant could not in this country establish as its trade-mark the combination of the three.

The defense is presented with such wealth of learning in the silversmith's art, fortified with elaborate quotations from English statutes regulating hall-marks on gold and silverware for centuries, and with recognized text books dealing with the subject and giving the interpretation of every English mark that has survived on every piece of English silver which the authors have been able to find, that the study of the record has been singularly attractive. Nevertheless, in the ultimate analysis the single question is whether a maker of silverware in this country is precluded from selecting as his trade-mark an impression which is made up of three of these marks, although when conjoined they would indicate to a buyer of English silver that the particular piece was sterling ware made in the city of Birmingham in 1831. It is thought that he is not thus precluded, and that when he has used the particular combination on his ware made in this country for upwards of 40 years and the same has been accepted by the trade as his identifying mark, without imitation by anyone, he is entitled to an injunction, at least until final hearing. The security given by complainant ($2,500) is abundant to protect defendant against any possible loss, especially as defendants assert that they use other combinations of old hall-marks, and have almost an infinitude of such combinations which they can freely use, without infringing on the trade-mark of any American manufacturer.

From the standpoint of the collector of old silver, it might well be desirable that no reproduction of any old hall-mark, English or Continental, should ever be affixed to silver or plated ware made here, but there is no authority for any such ruling.

Since the argument defendant has submitted a circular notice sent by complainant to the trade, contending that since it was issued after argument it was improper and should be considered a contempt of court. It merely states that complainant is asserting the validity of its trade-mark and is endeavoring to sustain it in court, and that these defendants were stayed from infringing it by an order of this court issued simultaneously with the order to show cause. There seems to be no impropriety in giving such notice to the trade.

If the security bond is so phrased that it might be contended that the decision of this motion terminates its obligation, it should be renewed to extend till decision on final hearing.

Injunction granted.

Thieves Lock Jeweler in His Store, Smash Show Window and Escape.

BALTIMORE, Md., Jan. 29.—The jewelry store of Mrs. D. A. Snyder, 3430 Eastern Ave., was robbed in a most daring manner last night at about 10.30 o'clock, when two thieves walked up to the store door, and securing it by fastening a stick through the door handles, smashed the plate glass window and grabbed two trays containing diamonds worth over $1,000. All this was done while the proprietor was standing near the door, and as he was secured inside, he was helpless. The thieves then dashed down Eastern Ave. to Third Ave., then to an alley, when they doubled on their track by means of back yards to Third Ave., and made good their escape. In their flight they dropped the trays and all of the stones with the exception of two rings valued at $150. All the stones dropped were found.

The chase after the thieves was very exciting, being led by Mr. Snyder, who was followed by many persons in the neighborhood. It is thought that the men had colleagues who aided their escape in some house along Third Ave. All the houses in the square were searched but no clews could be found. Some men standing by heard the crash but made no effort to interfere, as they stated they thought the men accidentally broke the window, and, becoming frightened at the accident, ran off.

Under date of Feb. 1 the Elgin National Watch Co. sent out circulars announcing net prices to the retail trade on all its watches. This does not mean any change in prices, but simply a change in the method of computing the prices, from a list to a net basis. The prices to the retailer are subject to cash discounts only.

Manufacturing Jewelers of Newark, N. J., Hold Annual Meeting and Re-elect Officers.

The annual meeting of the Manufacturing Jewelers' Association of Newark was held Monday night at the Davis' parlors, on Broad St., and proved to be one of the most enjoyable and profitable meetings of the organization yet held. The officers of the association were re-elected for the ensuing year. After the meeting the jewelers enjoyed an informal luncheon.

The meeting was called to order by President Howe, who called for the reports of the secretary and treasurer, which were read and approved. They showed a flourishing condition in the organization's affairs. The secretary's report reviewed the work done during the past year. The treasurer's report showed a substantial surplus in the treasury.

The president gave a short address, in which he spoke of the work done during the year.

Mr. Osmon, as chairman of the good and welfare committee, called the attention of the meeting to the good effect resulting from the efforts of the organization to educate the public to look for the karat mark and trade stamp on jewelry. He said that 400 replies had been received from the circulars sent out. The committee asked that the work be continued along the same lines. The matter was referred back to the good and welfare committee to formulate further plans for reaching the public on this matter.

The meeting took up the matter of devising means to protect the members of the association against possible peculation by dishonest employes, and it is expected that some such plan will be recommended as is now in force in Providence.

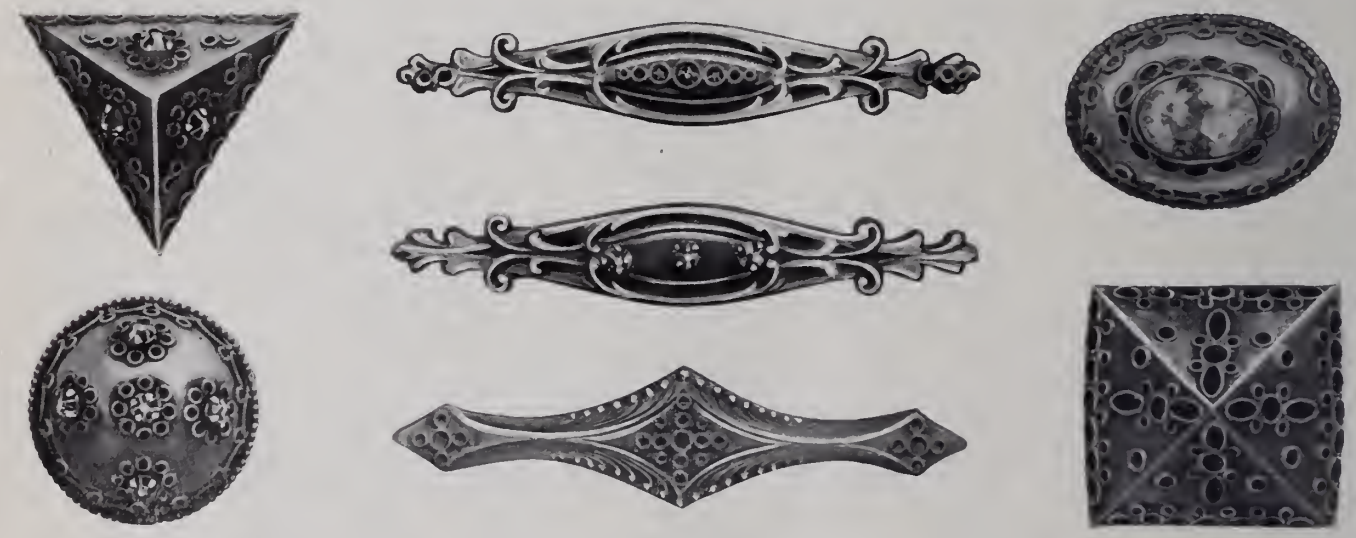
The officers re-elected are: President, Geo. R. Howe, of Carter, Howe & Co.; treasurer, Joseph Riker, of Riker Bros.; secretary, Harry Durand, of Durand & Co.

Atlanta, Ga.

Word has been received here that the D. Ed. Kennedy Co., of Cordele, has applied for a charter to conduct a wholesale and retail jewelry business, with a capital of $10,000, with privilege of increasing the amount to $50,000.

Wm. Fine & Bro., who own the Radius Jewelry Co., and are now located at 83 Peachtree St., have leased the store at 107 Peachtree St., of which they will take possession in the Spring. The jewelers announce that by that time they will convert the new premises into the finest establishment in the city and will enlarge their stock in many lines.

The establishment of Maier & Edlemann, 34 Marietta St., was robbed a short time ago of jewelry worth about $200. Entrance to the building was effected through a door in the rear of the establishment opening on a small court. Examination by the police disclosed the fact that the burglary had been committed by professionals and had been well planned. The thieves were unable to get into the safe where the valuable stock was carried, but succeeded in getting away with a number of watches, pins and rings. The police department have been working on the case.



TRADE-MARK

ETRUSCAN JEWELRY NOVELTIES

TRADE-MARK

For Wide-Awake Jobbers

We are showing 100 styles of ETRUSCAN HAT PINS, SASH PINS and COLLAR PINS. Absolutely new. Hand-made from original designs. Our Hat Pins and Sash Pins may be had plain Etruscan or mounted with faceted stone in Amethyst, Topaz or Genuine Turquoise Matrix.

George S. Champlin, with S. B. Champlin Co., will leave to-morrow for a trip to Japan.

Mr. and Mrs. Charles H. Angell have started on a two months' recreation tour of Europe.

Jerome Fleischer & Co., 21 Eddy St., this city, have opened an office at 717 Market St., San Francisco.

Howard H. Schott was in New York in the past week in the interests of the Unique Findings & Supply Co.

Ellis W. MacAllister, vice-president of the Irons & Russell Co., has returned from a successful western trip.

Alfred C. Noyes has returned from an extended trip through eastern Massachusetts and New Hampshire.

Edwin A. Bush, general manager of the Charles S. Bush Co., left, Saturday, for a business trip to Rochester, Vt.

Englehart C. Ostby, president of the Ostby & Barton Co., has been elected a director of the Industrial Trust Co.

Horace F. Carpenter, of Horace F. Carpenter & Son, refiners, has booked for a trip to the West Indies, leaving Feb. 22.

William J. Pearson, of Heimberger & Pearson, has been elected vice-president of the Jonathan Driving Club of Rhode Island.

Walter Callender, Samuel M. Nicholson and Arthur L. Watson have been re-elected directors of the Rhode Island Insurance Co.

Everett L. Spencer, of the E. L. Spencer Co., left Tuesday for Rock Ledge, Fla., where he will make a stay of about a month.

R. W. Cohen, western representative of George H. Cahoone Co., has returned to Chicago, after a visit to the factory in this city.

Meyer Harzberg, of Goldsmith & Harzberg, left Wednesday for an extended trip through the west with the firm's new samples.

Walter E. Lassell, with William K. Potter, has been elected assistant recording secretary and trustee of America Council, O. U. A. M.

A reception was tendered to Edward I. Mulcahey and his wife by the Sir Knights of St. John's Commandery, K. T., Wednesday evening.

The Joseph W. Heller Co., 129 Eddy St., has opened a New York office at 9 Maiden Lane, New York, with H. P. Lanzas as manager.

Anson D. Manning, salesman for D. Wilcox & Co., has been drawn by the town of East Providence as a petit juror in the Superior Court.

Marks Bros. is the style of a new firm at 21 Eddy St. that will manufacture a general line of brooches, stick, hat and scarf pins and combs.

Henry M. Abrams was quartered at the Crown Hotel in the past week while placing orders with local manufacturers for several firms in San Francisco.

Ralph G. Ostby, with the Ostby & Barton Co., visited the firm's offices at Chicago, last week, while on an extended business trip through the west.

Harry Cutler, of the Cutler Jewelry Co., was the toastmaster at the complimentary dinner given by Company E, First Light Infantry Regiment, last Friday night.

R. G. Grode, manufacturer of chain trimmings, a. 234 Chestnut St., is to remove to a larger shop on the top floor of the same building, early in February.

About 750 young people attended the seventh annual concert and ball of the Boston Store Employes' Association, held Wednesday evening in Infantry Hall.

The handsome silver loving cup presented to the retiring police commissioner, Harold J. Gross, was made by the Gorham Mfg. Co., and is about 14 inches high.

Alfred K. Potter, of the E. A. Potter Co., has returned from Louisville, Ky., where he was the best man at the wedding of Capt. G. Edward Buxton, Jr., of this city.

The manufacturing jewelry business of J. W. Henry & Co. will be continued by the surviving partner, John Williams, under the same firm name and at the same address, 9 Calender St.

The S. & S. Novelty Co., 9 Calender St., are shipping large orders of pearl and ivory goods to the west. An order of 10,000 pairs of pearl sleeve links constituted a recent shipment.

The Manchester Mfg. Co. and the Manchester-Smith Co. are now represented on the Pacific Coast by Howard E. Anthony, Los Angeles, formerly with the Whitley Jewelry Co.

The plant of the late Gifford Mfg. Co., Attleboro, has been purchased by the E. A. Eddy Machinery Co., of this city, who have dismantled it and offer the tools and machinery for sale.

Englehart C. Ostby and Henry D. Sharpe are members of the special committee that has been appointed to raise an additional endowment fund of $50,000 for the Rhode Island School of Design.

The Manufacturers' Outlet Co. Employes' Beneficial Association, through its many committees, is making elaborate arrangements for the third annual concert and ball in Infantry Hall.

The board of directors of the Roger Williams Silver Co. has declared a dividend of 10 per cent. on the capital stock, of which 5 per cent. is payable on and after Feb. 10, and 5 per cent. on Aug. 10.

Harold W. Ostby, superintendent of the Ostby & Barton Co., has joined the ranks of local autoists and has just had a 28-horsepower Cadillac touring car registered at the State Board of Public Roads.

Frederick W. Aldred, with B. H. Gladding Co., was one of the representatives of the Harvard Club of Rhode Island at the meeting in Boston of the New England Federation of Harvard Clubs, the past week.

F. Bloom, formerly with Howard & Bullough, American Machine Co., Pawtucket, has started in business at 72 Clifford St., this city, as the Providence Forge Co., and will make a specialty of jewelers' tools and forge work.

Providence manufacturers are interested to a considerable amount in the bankruptcy proceedings in Boston against William A. Thompson, a Washington St. jeweler. His liabilities are given at $60,000 and his assets at only $4,000.

The Weybosset Jewelry Co., 219 Weybosset St., which was recently burned out, has been conducting an auction sale in the past week. As soon as the stock is disposed of the store will be closed for extensive alterations and refitting.

A quarterly dividend of 1¾ per cent. on the preferred stock and 1 per cent. on the common stock of the United Wire & Supply Co., and an extra dividend of 2 per cent. on the common stock have been ordered. These are payable on and after Feb. 1.

Fire threatened the Brown & Sharpe Co.'s big plant on Promenade St., early Tuesday morning of last week, and but for the timely discovery of an employe, might have caused a large amount of damage. As it was, the damage was caused mostly by water.

The case of Williams & Flash Co. against J. Perry Carpenter, of Ford & Carpenter, was heard before Justice Tanner in the Superior Court Monday, without a jury, and decision given for the defendant. This is a case upon an alleged promise to pay a debt of the Eastern Oil & Supply Co.

John C. L. Shabeck, manufacturing jeweler, has removed his plant from 7 Beverly St. to the new building recently erected by him on W. Exchange St., where he has nearly four times the room that he had in the old quarters. Much new and improved machinery has been installed and he now has a modern up-to-date plant in every respect.

Among the foreign importations that have been received through the Providence Customs House during the past week were the following: From Bremen, 19 packages of imitation precious stones and jewelry; from Glasgow, one package of manufactures of marble; from Hamburg, one package of imitation precious stones, two of glass and three of manufactures of metals.

The S. & B. Lederer Co. Mutual Relief Association held its fifth annual concert and ball in Elysium Hall, Wednesday evening of last week, with a gathering of between 250 and 300 members and guests. Several members of the firm honored the occasion by their presence. These included President Sigmund Lederer, Treasurer Benedict Lederer, Superintendent Walter B. Lederer and Edward Lederer.

Rufus L. Griffith, president of the R. L. Griffith & Son Co., left last week for Rock Ledge, Fla., where he will remain until May. This is the 15th Winter that he has passed at this place. Next week, Tuesday, his son, Walter A. Griffith, treasurer of the company, and his wife, together with William A. Schofield, of Schofield, Battey & Co., and wife, will leave for a few weeks' stay at Rock Ledge.

Among the traveling representatives here last week were the following: E. D. Cole, of D. C. Percival & Co., Boston; H. C. Barnum, of Shafer & Douglas, Newark; representative of Bodenheimer & Jaskow, New York; C. Horton, of Mandeville, Carrow & Crane, Newark; C. E. Mott, of J. B. Bowden & Co., New York; F. H. Elliott, of Smith, Patterson & Co., Boston, and Joe D. Varley, of Allsopp Bros., Newark.

Later advices from Chicago show that the manufacturing jewelers of this city and vicinity who were creditors of Lapp & Flershem, the Chicago jobbers, were hit considerably harder than was at first supposed. The official list of creditors shows

JEWELERS SHOULD CUT THIS PAGE OUT FOR FUTURE REFERENCE

that the amount involved here and the Attleboros was between $150,000 and $175,000. Of the 92 accounts of more than $1,000, there were 41 in Providence and hereabouts with claims ranging from $1,000 to $10,947.

Word was received here last Thursday that Meyer Harzberg, of the manufacturing jewelry firm of Goldsmith & Harzberg, 43 Sabin St., this city, and his wife were in a train wreck at Ashtabula, O. They left here Wednesday, combining business with pleasure, Mr. Harzberg intending to call upon the firm's customers in Chicago and the west. A telegram received here said that neither were seriously hurt. Mrs. Harzberg was thrown against a mirror in the Pullman car and her face was cut.

Among the jewelry buyers who have been in the city in the past week were the following: H. J. Meyer, of the Emporium, San Francisco; J. R. Miller, Jr., of Webb-Freyschlag Mercantile Co., Kansas City; Miss R. S. Merebaum, of Simpson, Crawford & Co., New York; F. M. Ehlerman, of Ehlerman Bros. Co., Sioux City, Ia.; E. H. Forrester, San Francisco; L. A. Jarslon, of J. Abeles, Montreal, Can.; Harry Morris, of Morris, Mann & Reilly, Chicago, and H. D. Stevens, of Strawbridge & Clothier Co., Philadelphia.

A. T. Wall & Co., manufacturers of rolled plate for jewelers, are to have a large up-to-date factory building of their own. This is to be erected on the northeast corner of Clifford and Claverick Sts, and is to be constructed of reinforced concrete, three stories in height and have a total floor area of 13,000 square feet. The work of construction will begin in the early part of March and it is the intention to have the building ready for occupancy in the early fall. The company now has rooms in the Manufacturers' building on Sabin St., but its business has become so extensive that more room is necessary to relieve the cramped condition.

A mass meeting of the manufacturers and business men of Rhode Island was held in the rooms of the Providence Board of Trade Tuesday of last week, for the consideration of the Federal corporation tax law, and a vigorous protest was made to Congress in resolutions adopted against the publicity features. The resolutions were introduced by Henry D. Sharpe, of Brown & Sharpe Mfg. Co. Among those present were: Sigmund and Benedict Lederer, of the S. & B. Lederer Co.; Robert and Ralph Hamilton, of Hamilton & Hamilton, Jr.; Charles Briggs, of J. Briggs & Sons Co.; Arthur L. Claflin, of George L. Claflin & Co., and James Smith, of Smith Bros.

Patrolman John J. Bowen, of the Fifth Station, made a good catch last Friday when he arrested Danforth L. Willis, 21 years old, finding him trying to dispose of scrap brass. The officer suspected the brass might have been stolen and his good judgment was rewarded when Willis told the whole story to Capt. Lawrence, of the Fifth Station. His story connected two other youths with the theft, which was from the Metal Products Corporation, and both were later arrested. They were George Gravell, 22 years old, and Ernest E. Ferguson, 25. All three were before Judge Rueckert in the Sixth District Court Saturday morning. Gravell pleaded guilty to the charge of stealing $44 worth of the brass from the company. He said that he and Ferguson were in the stock room and passed the brass out to Willis, who disposed of it and shared the profits with them. Ferguson also pleaded guilty to a similar charge. Willis pleaded guilty on two charges of receiving stolen goods and was fined $25 and costs on each charge. Ferguson and Gravell were fined $25 and costs each, for the larceny of the stock.

The manufacturing jewelers were well represented at the dinner of the Commercial Club, Monday evening, at which Charles M. Schwab, president of the United States Steel Corporation, was the principal speaker. The meeting was presided over by Henry G. Thresher, of the Waite-Thresher Co. Among those in attendance were Mayor Henry Fletcher, John S. Holbrook, Henry D. Sharpe, E. Frank Aldrich, William H. Thurber, Samuel M. Nicholson, Theodore W. Foster, T. Clyde Foster, William P. Chapin, Jr., William F. Lythgoe, Frederick A. Ballou, Englehart C. Ostby, Harold W. Ostby, Horace Remington, Walter Hidden, Fred D. Carr, A. Tingley Wall, John J. Butler, George H. Holmes, Augustus A. Greene, Harry Cutler, Henry W. Harvey, Arthur H. Watson, Albert A. Remington, Charles Briggs, Frederick C. Lawton, William A. Schofield, Walter A. Griffith, Morris W. House, John Webster, Joseph P. Burlingame, Walter R. Callender, Albert E. Stevens, Everett I. Spencer, Joseph A. Fowler, Nathan B. Barton, Everett I. Rogers and Edward B. Hough.

Troy, N. Y.

James F. Murphy died at his home, 227 4th St., Jan. 21, after a lingering illness from rheumatism of the heart. Mr. Murphy was a native of this city and about 40 years of age. He was a jeweler by trade and for 26 years had been in the employ of Samuel C. Tappin.

The first meeting of creditors of James M. Rockwell, jeweler in Fifth Ave., who was forced into bankruptcy by Albany, N. Y., and Attleboro, Mass., creditors, resulted in the election of Frank H. Deal as trustee. A large number of claims were filed, and it was decided to examine Rockwell at a later meeting.

Savannah, Ga.

The stock of F. W. Serber, Waycross, Ga., was damaged by fire on Thursday night, Jan. 21.

The following traveling representatives were in Savannah, Ga., recently: A. Edwards, Alvin Mfg. Co.; M. E. Finerty, T. B. Clark & Co.; D. A. Havens, Meriden Britannia Co.; John E. Valk, N. H. White & Co.; E. M. Sachs, Wolfsheim & Sachs; William B. Durgin, William B. Durgin Co.; M. F. Loomis, C. Sidney Smith & Co.; Mr. Henderson, Crane & Theurer; A. E. J. Wineer, Enos Richardson & Co; R. A. Hunken, Allsopp Bros.

L. M. Kelly, Olean, N. Y., has completed arrangements to move his stock into neatly furnished quarters in the Masonic Temple Block, where he will have more space for his increasing business.

North Attleboro.

Louis D. Barrows has gone to Florida for a short vacation.

F. S. Gilbert returned from a western trip last Wednesday.

Frank P. Bonnett was confined to his home last week by illness.

William Boss has just completed a trip with the line of Boss & Baldwin.

W. J. Dunn has acquired a third interest in the firm of Hanlon & Thornton.

Charles Hayes, New York, was a visitor last week among the manufacturers.

A number of the local firms are running their factories on a 55-hour schedule.

Donald Lestage has returned from a trip taken in the interests of H. D. Merritt & Co.

Andrew E. Morris was in New York last week in the interests of G. C. Hudson & Co.

E. J. Scheer, a retail jeweler of Rochester, N. Y., was in town, last week, placing orders.

T. I. Smith, of the T. I. Smith Co., has gone to Florida for the remainder of the Winter.

Charles H. Clark, of W. G. Clark & Co., arrived in town last Tuesday from a western trip.

Charles T. Paye, of the Paye & Baker Mfg. Co., spent a few days in New York last week.

George H. Kettelty, a salesman for the A. H. Bliss Co., is home from an extended western trip.

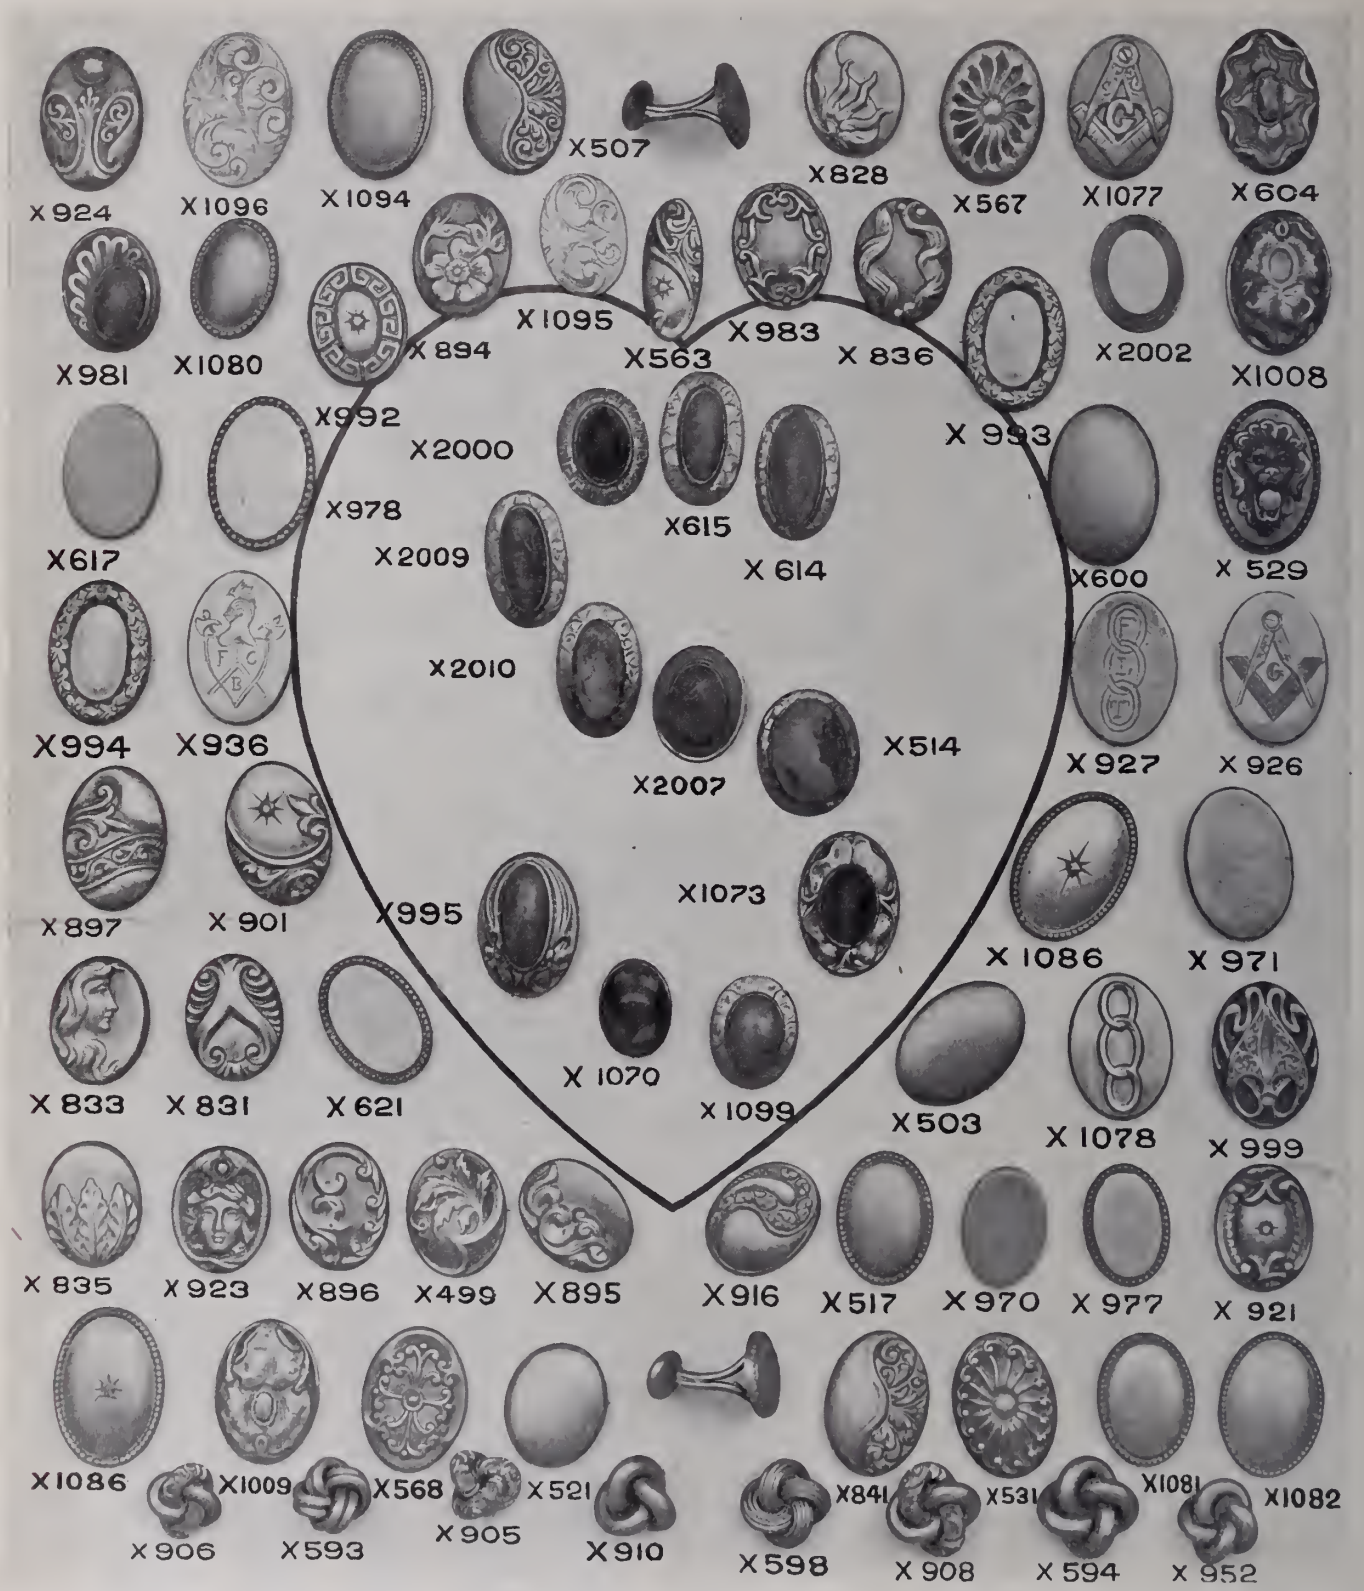
Charles H. Peckham is home from a western trip taken in the interests of J. H. Peckham & Co.

H. H. Curtis, of H. H. Curtis & Co., is back from a western trip in the interests of his concern.

Henry M. Abrams, San Francisco, was in town last week, calling on the manufacturers he represents.

Herbert J. Straker, of Straker & Freeman, has declined to accept another term as a member of the school committee.

The Mason Progress Club, which is composed of the employes of the Mason Box Co., is planning to build a club house.



At the meeting of the Plainville Savings and Loan Association, last week, W. F. Maintien was re-elected a member of the board of directors.

Jan. 28 the refining shop of H. C. Saunders, on Chestnut St., was visited by fire and $5 000 damage was done. The loss was covered by insurance.

Frank Hofmann, who had charge of the slide department in the factory of the H. F. Barrows Co. for 27 years, resigned his position last Saturday to enter tthe employ of the Attleboro Chain Co.

The work of the modeling and designing class of the evening school which has just closed is on exhibition at the superintendent's office. E. J. Curry, Providence, and Percy Ball, of F. M. Whiting & Co., were the instructors of the class.

A continued meeting in the case of the Miller, Fuller & Whiting Co. was held last week in the regular session of the bankruptcy court at Taunton. Arguments were heard as to disputed counsel fees. Fees were allowed, outside of expenses, to the amount of $250.

We take pleasure in advising the trade that our representatives will shortly leave for the road with complete lines, including many new "Sellers."

The territory in which we were formerly represented by Mr. L. M. Heymann will now be covered by Mr. Joseph Graf. The trade on whom the latter called will be visited by his brother, Mr. Dave Graf. We bespeak for both the courteous consideration of our customers and friends.

It is our endeavor to keep in as close touch as possible with the requirements of the trade, both through our salesmen and the home office, where we carry a complete stock of watches, diamonds and jewelry. We are always in a position to give prompt and efficient service.

ATTLEBORO, MASS.

New York Office
3 MAIDEN LANE

U. S. Mint, Philadelphia

THE UNITED STATES GOVERNMENT ACCEPTS

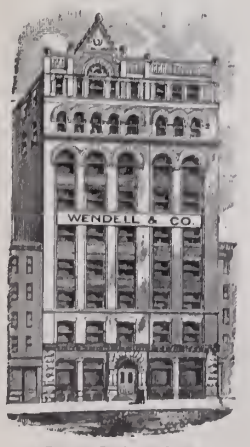
OLD GOLD

at its mints and assay offices, large consignments of old gold, refines same and remits proceeds by express.

About 6 to 8 days' time is required to get returns, from which refining and coinage charges are deducted and return expressage to pay.

The value placed by the U. S. Government on a consignment is absolute and final, from which there is no recourse.

Wendell and Company accept at their assay offices and refineries small lots of Old Gold ($1 to $250), remit full value at once by draft, before refining, and hold consignments until valuations are accepted.



If there is any doubt about the valuation placed upon a consignment by them, it is immediately returned in its original condition, express charges prepaid.

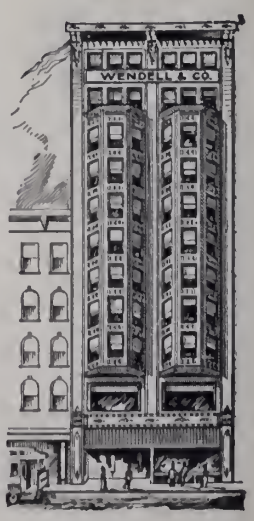
Their large business requires complete assaying, smelting and refining departments. They handle without additional expense and use in their own factories all old gold and silver consigned to them. The difference in the value of old gold (before refining) and fine gold (after refining) is their profit, which is very much smaller than it would have to be if they conducted a separate refining business with a large investment in plants and expenses ranging from 15 to 25 per cent. of the value of old metal received.

THE UNITED STATES GOVERNMENT DOES NOT BUY OLD SILVER

It accepts same for refining, and returns the fine silver in bars, less the refining charges, by express.

Wendell and Company buy old silver outright at the full market value, which is governed by the price of fine silver.

45-49 John Street
New York



DO NOT PAY YOUR BILLS WITH OLD GOLD OR SILVER

Sell it to Wendell and Company for full cash value and pay your bills with the returns. You will save much by so doing. Most of the firms that take gold and silver on account do not use it themselves; nor have they any means of ascertaining its exact value, but depend on others, who place a value on it that will afford two profits.

WENDELL AND COMPANY
ASSAYERS, SMELTERS AND REFINERS

Established 25 Years

Polishings, crucibles, bench and floor sweeps economically handled and proceeds promptly remitted.

256-260 Madison Street
Chicago

Boston.

Carl D. Smith, of the Smith, Patterson Co., with Mrs. Smith, will go abroad for a European tour, March 5.

Augustus Sandberg, of Sandberg Bros., Quincy, is constructing an automobile of special design for his own use.

Mrs. Charles W. Davidson, with a party of friends from Boston, started about a week ago on a Mediterranean tour.

Thomas Fox, head of the clock department of Bigelow, Kennard & Co., has been ill at his home for the past two months.

A. E. Myers, of Myers & Franks, who was sick for a couple of weeks, is able to be back at his place of business again.

B. J Stirk, who has been identified with the John Harriott Co. for the past year or more, has recently withdrawn from the concern.

William Birks, of Henry Birks & Sons, Montreal, was in Boston during the past week to attend the motor boat exhibition, and called on business friends in the trade.

The certificate of award of the grand prize for its clock exhibit at the Alaska-Yukon-Pacific Exposition has just been received from Seattle by the E. Howard Clock Co.

E. A. Cowan sails for Europe Feb. 7 from New York on the *Kaiser Wilhelm Der Grosse*, to be absent about two months. He will visit Berlin, Paris and other continental centers.

The members of the benefit association of the employes of the Smith-Patterson Co. will hold their annual dance Feb. 4 in Howe Hall on Huntington Ave., this city. James Kingman, head of the retail department, is president of the organization.

Lawrence F. Percival was elected on the membership committee of the Boston Yacht Club at the annual meeting Wednesday. Mr. Percival started on a southern recreation trip Monday, accompanied by L. D. Barrows, of the H. F. Barrows Co., Attleboro.

Philbrick & Webster, wholesale opticians at 373 Washington St., have added to their sales force O. F. Prentiss, formerly with E. B. Meyrowitz, New York, and more recently with Harvey & Lewis, Hartford. He will cover the State of Maine for this house.

Eugene W. Rollins, of the Nelson H. Brown clock house, has been chosen managing director of the Iola Orchestra of this city. He is also the director of the Boston Jewelers' Band, recruited almost entirely from musicians identified with the jewelry trade in this city and the suburbs.

Fred E. Chick, head of the diamond department of the Smith, Patterson Co., sails for Europe Feb. 19. He will visit Amsterdam and other diamond centers, and will be accompanied by Mrs. Chick. On the same steamship, but with a different itinerary abroad, will be Fred A. Mansfield, of the Montreal establishment of the concern.

Robert J. Taylor, traveler for E. A. Cowan, started on his Spring trip south and west, last week, and Walter F. Macomber, who has crossed the continent, visiting the principal Gulf and Pacific States en route upward of 100 times for the house, started Monday on his 1910 Easter trip.

The police have been notified that a diamond brooch, diamond ring, stud, cuff links and other articles of value, aggregating several hundred dollars, together with $165 in cash, are missing from the establishment of W. B. Foster, 6 Hanover St., and that an employe has also been missing since the loss was discovered.

The E. Howard Clock Co. has recently installed a watchman clock system at the Coney Island Hospital; a special double-dial post clock, having the appearance of a gold open-face watch, for the sidewalk in front of the store of R. H. Wilson, jeweler, of Ocean Park, Cal., and a tower timepiece at Hudson, N. Y., for the Hudson City Savings Institution.

Buyers in town, during the week, included: J. H. Tattersall, Exeter, N. H.; Loring Smith, Brockton; H. B. Bingham, Lowell; G. A. Schmidt, Lawrence; W. E. Rose, Taunton; E. W. Durgin, Worcester; J. A. Brightman, Southbridge; Henry Tisdale, Taunton; A. J. Hurd, Adams; D. R. Nichols, Worcester; S. J. Gurney, Brockton; Samuel Yafa, Lowell. A. Howard, for Thomas E. Gard, Worcester; Warren Barker, Fall River, Mass.

A movement is on foot to revive the New England Jewelry Travelers' Association, which, a few years ago, was a thriving organization, with headquarters in this city, and had a large membership. The promoters of the project contemplate making arrangements for a big midsummer harbor excursion, at which the organization shall be effected, and Elmer E. Knight and Walter B. Snow are the committee on preliminary plans. They expect to call a meeting of others interested in the near future, to take more definite action on the matter.

Traveling men visiting Boston, during the week, included: L. F. Clark, Cory, Clark & Noon; E. E. Allsopp, Wordley, Allsopp & Bliss Co.; H. N. Van Bergen, Snow & Westcott Co.; Arthur Connett, Link & Angell; Raymond C. Gowell, Alling & Co.; George W. Read, Larter & Sons; H. E. Slater, Whiteside & Blank; R. W. Simpson, Jr., Riker Bros.; Victor L. Burgesser, Krementz & Co.; Jacob Schorsch, Emrich, King & Schorsch; Mr. Friedlander, Levison & Friedlander; Ed. Colby, Towle Mfg. Co.; Samuel Mendelssohn, I. Ollendorf Co.; Fred. Barry, L. Stern & Co.

Notice has been sent out to the stockholders of the Dennison Mfg. Co., stating that the resignation of Mr. Pond, received by the directors last October, was accepted at the January meeting, Mr. Pond having decided to retire after practically 40 years service with this company. This resignation makes necessary some changes in the organization, Mr. Pond's work as sales manager of New England being now taken up by F. E. Ewing, and his place on the various committees by Mr. Ewing, Mr. Lockwood and Mr. Adams. Mr. Lockwood and Mr. Franklin will make their headquarters in South Framingham as general sales managers, the former being in charge of his present territory and the latter of the New York territory. Mr. Adams will take up the work in St. Louis as general sales manager, and Mr. Thomas in Chicago, which will complete the plan of having a sales department managed by five general sales managers.

James G. Burkhead, Mineola, Tex., has gone out of business.

Attleboro.

The J. F. Sturdy Sons Co. has been working evenings.

The new Manual Training School was opened last Friday for boys.

A. R. Crosby, of Smith & Crosby, is planning a pleasure trip to Cuba.

Fred Somes, of the Bates & Bacon Co., was in New York for a short time last week.

The Vandyke Club of the Fontneau & Cook Co. held a fancy dress party last week.

J. R. Miller, Jr., of the Webb-Freyschlag Mercantile Co., Kansas City, was in town last week.

Charles O. Sweet, of C. O. Sweet & Co., is mentioned as a candidate for the office of selectman.

The E. A. Eddy Machinery Co., Providence, has purchased the plant of the late Gifford Mfg. Co.

Milton Sandfelder, representative of the D. F. Briggs Co., is visiting the trade on the Pacific Coast.

Charles M. Robbins and wife will leave this week for a two months' vacation in the southern States.

Charles M. Robbins, of the C. M. Robbins Co., was one of the speakers at the meeting of Co. C, last week.

In the Jewelers' Bowling League last week the C. M. Robbins team defeated the Bay State Optical Co.'s team two out of three.

Charles H. Tappan, of the D. F. Briggs Co., has donated the sum of $300 to the Boys' Club of Mansfield, to be used in fitting up rooms.

Patents were secured by Attleboro jewelers at Washington last week as follows: Thomas S. Bennett, band for bracelets; Ralph C. Thompson, badge.

C. D. Lyons, Mansfield, has been appointed a member of a committee which will have charge of the annual banquet of the Congregational Men's Club.

John M. Fisher, Charles O. Sweet and Joseph Finberg were appointed a committee by the board of trade to arrange for celebrating Lincoln's birthday.

Robert H. Moore, foreman of the Horton-Angell Co., has resigned his position with that company. As yet he has not announced his plans for the future.

The J. M. Mossberg Co. is selling its fixtures this week. It required six days and nights of ceaseless work by 250 men to move the machinery of the firm.

H. A. Hall has been installed as worshipful master of Bristol Lodge of Masons. Charles H. Parker and Silas Dyer were other jewelers honored with offices.

Louis F., George T. and Harry P. Thatcher have formed a company, to be known as Thatcher Bros. & Co., and will manufacture colored glass for the jewelry trade and glass workers.

Everett S. Horton has been elected president of the Attleboro Savings & Loan Association. Among the directors are: E. S. Horton, Edward A. Sweeney, Frank W. Weaver, A. S. Ingraham, C. P. Keeler and Harry P. Kent.

Pauling & Keene, Condon, Ore., have been succeeded by the Red Cross Co.

NOTICE TO THE TRADE

It has recently come to our notice that goods bearing an imitation of our well-known trade mark, the lion, the anchor and the letter G have been put upon the market by the firm of F. & M. Weintraub of New York.

The trade is hereby warned that under no circumstances should any of these goods be sold or further exposed for sale and any dealer selling or offering these goods is equally accountable with the manufacturer by reason of such sale.

We would appreciate it if you would notify us if any of these infringing goods have innocently come into your possession and if you will notify us of the quantity of such goods, we will take immediate steps to relieve you of the stock you may have. Under no circumstances will any further sale of goods bearing these infringing trade marks be permitted.

While our trade mark of the lion, the anchor and the letter G is used on our sterling goods only, the goods bearing the imitation of our trade mark are of plated ware but the imitations of our trade mark are so close as to not only deceive the general public but persons in the trade who have been long acquainted with our own trade mark. In order that you may recognize these imitations, if any of same come into your possession, a reproduction of two styles of the imitations of our trade mark are herewith shown.

Trade Mark of the Gorham Mfg. Co.

Imitation Trade Mark of F. & M. Weintraub

Imitation Trade Mark of F. & M. Weintraub

A restraining order issued by the Circuit Court of the United States and signed by Judge Ward on December 17, 1909, is now in force and such further measures will be taken as are necessary to preserve our rights.

Our Anniversary Issue.

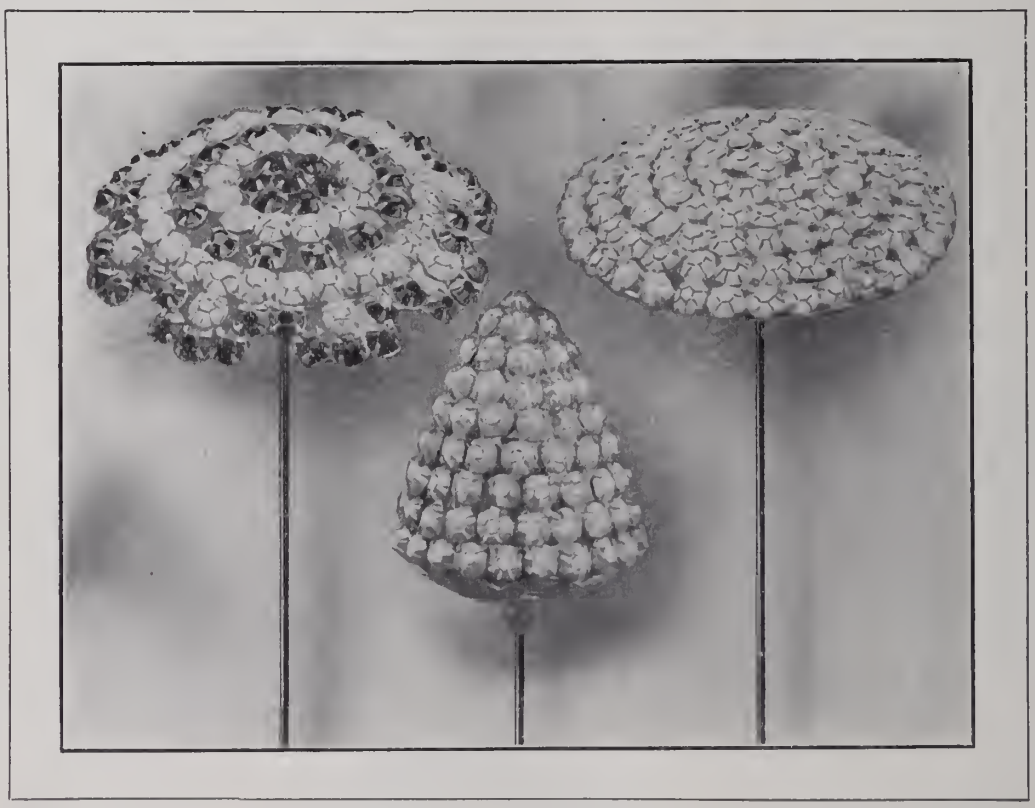
THE appearance of the anniversary issue of THE JEWELERS' CIRCULAR-WEEKLY has for some years been looked upon as an important event, both in the jewelry trade and in trade journal circles, and we sincerely hope that the present number will receive the same welcome and be as interesting to our readers generally as were its predecessors. In quality more than in quantity we have this year attempted to produce one of the most interesting numbers that we have ever issued, and we hope that our readers will find between its covers information that will be not only good reading, but on instructive and educational lines will prove valuable to them in the conduct of their business. From the first article on the "Gold and Silversmith Work at the Louvre Museum" (to which a note of additional interest is given by the news from Paris in the last week, telling of the threatened destruction of this edifice by the flood) to the last page of the Workshop Notes, there should be some one article of interest to every reader, and many articles useful to the majority of our subscribers.

A glance at the index which appears above will serve to give an idea of the variety of the subjects treated, which cover every standpoint of the industry; and if they add, as we hope they will, to the general information of the trade on the historical, artistic, practical, business or technical sides, we feel that our efforts have not been in vain.

With this issue begins THE JEWELERS' CIRCULAR-WEEKLY'S 41st year as a trade paper, and we hope that during this year we will deserve and receive the same aid, co-operation and hearty support from the jewelry trade which we have received in the past, in order to enable us to give the most complete service that an up-to-date trade journal is capable of performing.

Do Not Compromise with Criminals.

MEMBERS of the jewelry trade, as well as those in other industries, often complain that they do not get the proper co-operation from the prosecuting authorities when they seek the aid of the criminal courts on charges against employes and customers who are guilty of larceny or embezzlement, and among many merchants the idea prevails that prosecutors are unduly lenient with prisoners who are not professed criminals.



As painting the other side of the picture a magistrate of New York, who has had a long experience in criminal proceedings, recently complained that business men generally do not give the courts proper support in stamping out crime. After speaking of the aversion of business men to sit upon a jury in a criminal case, or to act as witnesses, he said that this even extended to the prosecution of charges, and that time and time again the district attorneys and the courts were put at a disadvantage simply because a business man or firm, after making charges of dishonesty, would refuse to follow them up, and even allow the accused man to go free rather than take the time and trouble to appear in court. What he complained of most, however, was the frequency with which embezzlement and larceny cases were dropped when restitution or payment was offered by the accused, and he intimated that prosecutions of this kind were started as often to enforce restitution as to punish wrongdoers.

Admitting that both the complaints of the judge and the merchant are just, is it not evident that one condition begets the other—that lack of co-operation on the part of the merchants causes indifference to their complaints by the authorities and lack of zeal by the authorities causes lack of support by the business interests?

However, the matter should not rest here, as the accounts do not balance as far as the State and industrial world are concerned. The jeweler should remember that no matter what the attitude of the prosecuting authorities, he owes it as a duty both to the State and to his trade to insist on the punishment of every criminal of whom he is the victim. To drop a charge of felony because restitution has been made is a crime, and the man who does it is a criminal; he has violated the laws of his State, and in addition he has encouraged crime and by so doing put in danger other members of his trade.

White Stone Hat Pins

The demand has led us to largely increase our line and we are certain you won't see a better variety of the latest patterns at popular prices than we are now showing.

We would suggest an early inspection. Selection package sent on request.

You will find them Rapid and Profitable Sellers.

CROSS & BEGUELIN

23 Maiden Lane **New York**

New York Notes.

Maurice Brower, 12 John St., is at present in the European markets.

Edward R Cohn, 41 Maiden Lane, is spending a vacation in Florida.

Harry Ryrie, of Ryrie Bros., Toronto, spent part of last week in this city.

D. Wormer, with Joseph Frankel's Sons, sailed recently on the *Lusitania* for Europe.

Louis Manheimer, Chicago, was a visitor at the local offices of his concern during the week.

Arthur Reichman, of Reichman Bros., returned Friday from a trip to the Pacific Coast.

E. S. Rose, of Charles Rose, 47 Maiden Lane, will sail Feb 8 for Amsterdam and London.

S. T Morrison, Iowa City, Ia., was a caller on the Dreyfus Mfg. Co., 61 Gold St., last week.

Jacob S. Cohen, of the Jacob S. Cohen Co., St. Paul, Minn., was a visitor in this city last week.

R. D. Hudson, representing the L. E. Waterman Co., has started on his territory in Ohio.

Oppenheim & Strauss, 87 Nassau St., have engaged Irvin A. Lewis to represent them on the road.

A store at 964 Flatbush Ave., Brooklyn, has been leased to Jeweler John J. Ashley for a term of five years.

Frank C. Osmers, of Osmers-Dougherty Co., 291 Seventh Ave., has moved to his new home at Haworth, N. J.

William Lowe, in charge of Austin & Stone's local offices, has accepted a position with A. A. Greene & Co., Providence, R. I.

Walter Hallum, who represents the E. L. Spencer Co., in this city, is now also representing the S. K. Merrill Co., Providence.

The Keystone Watch Case Co. declared a regular semi-annual 3½ per cent. dividend, payable Feb. 1, to stock of record Jan. 27.

Mr. Ripestein, buyer for the Dominion Jewelry Co., Winnipeg, Man., was among the out-of-town visitors in this city last week looking over local lines.

George Matthews, for a number of years assistant salesman at the local offices of the Webster Co., 13 Maiden Lane, is now in charge of Waite-Evans & Co.

Phelps & Perry, now located at 3a Maiden Lane, will move in a short time to the offices next door at 3 Maiden Lane, now occupied by the Oliver M. Farrand Co.

D. Le Stage, of the H. D. Merritt Company, North Attleboro, Mass., stopped in this city a short time last week, en route from the west for the factory at North Attleboro.

Alphonse Judis, of the Alphonse Judis Co., San Francisco, sailed from this port on the *Oceanic* Saturday to visit the diamond markets of London, Antwerp and Amsterdam.

Mary T. Bynner, widow of the late T. S. Bynner, died suddenly Jan. 24. The funeral services were held at the home of her son, W. B. Bynner, Arlington, N. J., with interment at Greenwood.

Adolphe Schwob, 170 Broadway, was called as a talesman in the Panama libel suit, which was instituted by the Government against the Press Publishing Co., but was excused.

Simon Spiro & Co., 65 Nassau St., announce that they have retired from the jewelry business and are now engaged in importing diamonds. The jewelry business will be conducted in the future by Irving Spiro & Co.

The Bustanoby Corn Server Co. has been incorporated to manufacture and deal in corn servers, silverware, etc., with a capital of $50,000. The incorporators are E. E. Stowell, W. H. Ohn and J. L. Feeney, all of this city.

The territory which was formerly covered by L. M. Heyman, for Henry Freund & Bros., 71 Nassau St., will now be covered by Jos. Graf, and the trade on which the latter called will be visited by his brother, Dave Graf.

Edgar T. Oakes, formerly with the E. W. Reynolds Co., but now of the new firm of Oakes & Wulze, manufacturer's agent, Los Angeles, Cal., was in New York last week. Mr. Oakes is in the East making connections for his new concern.

Mayor Gaynor has appointed Alphonse Weiner to the Board of Education, to fill the place caused by the appointment of Thomas J. Higgins as Park Commissioner for the Bronx. Mr. Weiner is a jeweler at 2827 Third Ave. and a member of the North Side Board of Trade.

The firm of Stewart & Crocker has been incorporated under the laws of New York to manufacture and deal in cut glass, etc., with a capital of $7,000 The incorporators are James N. Stewart, 728 Westminster Road; William Stewart, 923 Foster Ave., Brooklyn, and William A. Crocker, 78 Van Sice Ave., Yonkers.

The Gus Gnam Co., Brooklyn, has been incorporated under the laws of New York State, to deal in jewelry, etc., with a capital of $30,000, consisting of $100 shares each. The trustees for the first year are William Schimpf, Gustav Gnam and Katherine Gnam, Brooklyn, and Andrew J. Smith and H. S. Reynolds, Manhattan.

Mr. Wachter, of the Wachter Manufacturing Co., Hartford, Conn., returned to this city recently from a trip to England and Switzerland, where he visited the different factories of *La National*. To these factories, and to the Dennison Watch Case Co., Birmingham, Eng., which he also visited, he sold, last summer, the sale rights of Europe.

The Jewelers' Security Alliance has received notice from Boettinger & Co., Baltimore, Md., that a gentleman's gold hunting case watch has been stolen from their store. They report that it was an old-style Howard movement, stem-winding; the number was 206122. The watch had been left with them to be repaired. It is thought that it was stolen by a negro.

Among the out-of-town visitors in the city during the past week were: Alexander Winkelstein, Elmira; A. Maschmeyer, president of the Maschmeyer-Richards Silver Co., St. Louis; Mr. Meyer, buyer for "The Emporium," San Francisco; Daniel Chrisholm, of the Bugbee & Niles Co., North Attleboro, and Edmond Eaves, buyer, from Montreal, Can.

A petition in bankruptcy has been filed against Edwin C. Morine, who resides at 3100 Broadway, and who has been interested in a wholesale jewelry business in Maiden Lane. The creditors are Corinne Russell, $425; T. K. Boyle, $50, and Isadore J. Pollitzer, $60, all for money loaned. It was alleged that he is insolvent, made prefential payments, and admitted in writing his inability to pay his debts. Mr. Morine became a partner in the firm of Robert O'Donnell & Co. in July, 1907, but it is said was not personally active in the business. The petition was filed against Mr. Morine, individually.

The annual banquet of the Boost Club, of New York, was held Friday night at the Hotel Astor. Professor Hugo Münsterberg, of Harvard University, and Samuel Gompers were among the principal speakers of the evening. For the benefit of the speakers and guests President John A. Anderson of the Boost Club explained before the speechmaking began that the club was an organization of business men, banded together to promote good fellowship and encourage a cheerful outlook on many questions. He received a loving cup from the 200 or so boosters who were there. Henry R. Towne, president of the Merchants' Association; Judge Rufus B. Cowing, Edward Lauterbach, ex-Senator Charles A. Towne, Major-Gen. Charles F. Roe, Frederic R. Coudert, and Gen. Horatio C. King were other speakers.

A second meeting of creditors of M. Juster, 2280 Eighth Ave., was held Wednesday at the office of Weschler & Rothschild, 299 Broadway, at which time the committee appointed at the meeting held the previous Monday, reported that it had taken an inventory which showed assets of $3,677.75, consisting of stock, $3,377.75, and fixtures, $300. The committee secured an offer of 50 cents in full settlement of all claims against the debtor payable as follows: 33⅓ per cent. in cash within 60 days; 8⅓ per cent in 4 months and 8⅓ per cent. in six months. The last two payments are notes indorsed by J. Charles Weschler, who is a relative of the jeweler. The committee strongly recommends acceptance of this guaranteed offer, believing that it is more than can be realized in bankruptcy proceedings should the usual procedure be followed.

James Richardson, of 351 Bowery, was arrested last week by detectives of the headquarters force, on a charge of grand larceny. The complainant is John H. Morch, jeweler, of 130 Broadway, Brooklyn, who claims that Richardson and a man named Charles Poster, who is now in custody, stole property worth about $5,000 from him. Poster was previously arrested on another charge. He is a jewelry salesman, and obtained property to the value of $5,000 on a memorandum from Mr. Morch. He had been working for Mr. Morch on commission for some time. Among the things he received and for which, it is alleged, he did not pay, were a La Vallierc of diamonds, worth $2,900; a ring with two diamonds, worth $1,300, and another ring, which was pledged for $600. It is claimed that Richardson did the pledging, and managed to sell the pawntickets. The accused pleaded not guilty in

New York Notes.

(*Continued from page* 153.)

the Adams Street Court, and was held for later hearing.

L. M. Zell, of the American Gem & Pearl Co., returned last week from Europe on the *Kronprinz Wilhelm*.

Michael M. Goldberg, 14 Maiden Lane, sails for the European markets Feb. 8 on the *Kaiser Wilhelm der Grosse*.

Newton H. Rogers, of Hayden W. Wheeler & Co., sailed Saturday on the *Oceanic* for the European markets.

George Cahn, 49 Maiden Lane, notifies the trade that A. Levy, formerly his sample carrier, is no longer in his employ.

L. W. Levy & Co., importers of novelties, moved this week from 580 Broadway to 590 Broadway, where they will occupy the store floor.

Albert Ginzberg, representing Eliassof Bros. & Co., left yesterday for his Spring trip in the eastern and middle western States.

A. Schorr, importer and dealer in antique jewelry, etc., has moved from 212 Broadway to the Silversmiths' building, 15 Maiden Lane.

Leo Pohoriles, formerly with Spiro & Hirsch, will in future represent Korones Bros., 49 Maiden Lane, in this city and in the middle States.

Dattelbaum & Friedman, 51 Maiden lane, will in the future be represented in Chicago by H. M. Heymann, who will have his office at 1103 Heyworth building.

Jos. E. Judels, of Henri E. & Jos. E. Judels, just returned from Providence and Boston, and Jac. Judels, of the same concern has started on his usual western trip.

A meeting of the creditors of H. Kurtzeborn & Sons, St. Louis, Mo., will be held in this city to-day at 2.30 P. M. at the rooms of the Jewelers Board of Trade, 15 Maiden Lane.

Abraham Levy, a retail jeweler at 783 Eighth Ave., has sold his fixtures and good will to Mrs. L. Pesky, who took possession yesterday. Mr. Levy will go to Los Angeles.

Meyer Lieberman, formerly with Silbermann, Kohn & Wallenstein, started in business for himself Saturday at 90 Nassau St. He will do all kinds of jewelry repairing for the trade.

Charles E. Clarke, a clerk of 42 W. 60th St., has filed a petition in bankruptcy, with liabilities $2,000 and no assets. The debts were contracted mainly in 1900 to 1903 in the jewelry business.

James Flint Barclay is at present manager of the Heintz Art Metal Shop, 6 W. 40th St. He was some time ago manager of the wholesale department of the Mauser Mfg. Co., in this city.

Frederick C. Barrett, 214 E. 118th St., a former jeweler, has filed a petition in bankruptcy, with liabilities $7,588 and no available assets. He has 85 creditors in various cities, whose claims range up to $500.

Comrie & Brokaw, auctioneers at 14 Maiden Lane, have finished a sale for J. F. Gilles, Wilkes-Barre, Pa., and for D. C. Cowels, Spartanburg, S. C. They began a sale Saturday for Kleber Denmark, Kinston, N. C.

Mr. Basthcim, of Bastheim, Adams & Able, San Francisco; B. Abelson, of Abelson & Liberman, Utica, N. Y., and A. E. Burgess, of A. E. Burgess & Co., Toronto, Can., were visitors in the Maiden Lane district during the week.

Henry Labouseur, who is a member of the bowling team representing Joseph Fahys & Co. in the Jewelers' Bowling League, broke all records for individual high score last Friday evening by rolling a score of 289. The record was made in a game between teams representing Joseph Fahys & Co. and Robt. H. Ingersoll & Bro. According to the last report the William Barthman team is tied for first place with the Hayden W. Wheeler & Co. rollers.

Among the recent accessions at the Metropolitan Museum of Art are: Pottery, beads, mace heads, ivory spoon and other objects, principally of the pre-dynastic period, 93 pieces (gift of the Egypt Exploration Fund). Temple relief, glazed models from foundation deposit, bronze and iron arrow heads, 46 pieces (gift of the Egyptian Research Account). Marble head of a girl, Greek, fourth century B. C. (gift of James Loeb). Pair of bough pots, Belgian, early 19th century; small bowl, Chênghua, 1466-88; temple jar, K'ang-hsi, 1662-1722; small bowl, Yung-chêng, 1723-36; bottle, jardinière, plate, small vase, Chien-lung, 1736-95, Chinese; Delft vase, Dutch, early 18th century; Wedgwood; pair of vases, vase, box and cover, flower pot, cup and cover, sucrier and cover, teapot and lid, pair of cameo medallions, pair of Crown Derby dessert plates and one Flight and Barr Worcester vase, English, late 18th century; large jug, Italian, 15th century; plateau, La Fralta, early 16th century; small Loreto cup, 17th century, Italian; three tiles, Spanish, 16th century; cup and saucer, Swiss, late 18th century (purchase). Clock, probably by Boulton and Watt of the Soho Works, Birmingham, late 18th century (purchase). Dial, Italian, dated 1838 (gift of Giovanni Danicli). Six toddy glasses, ewer, whistling bottle, three mugs, one bottle, Dutch, 18th century (purchase). Painted glass bottle, Dutch, early 18th century (gift of Horace L. Congdon). Bronze medallion, portrait of Pope Pius V., 16th century, with 19th century frame; pair of bronze medallions, portraits of Roman emperors, 17th century, Italian (purchase). Set (nine) of the official commemorative medals of the Hudson-Fulton Celebration, designed under the direction of the American Numismatic Society by Emil Fuchs (gift of the Medal Committee of the Hudson-Fulton Celebration Commission). Two bronze Hudson-Fulton medals, by John Flanagan, 1909 (gift of Mr. and Mrs. Frederick S. Wait). Bronze incense burner and vase, Chinese, Ming dynasty (purchase). Silver-mounted cocoanut drinking cup, German, 17th century; silver-mounted nut begging bowl, Dervish, about 1720 (purchase). Two miniatures from a manuscript, Persian, 16th century (purchase). Twenty-nine copies of gold and silver objects, European, 13th to 19th century: Bronze statuette, Sampson killing the lion, Florentine, 15th century; bronze statuette, crouching man, school of Michel Angelo, 16th century; bronze inkstand, Paduan, 15th century (purchase); terra-cotta relief, Virgin and Child, by Andrea del Verrocchio, 15th century (purchase); bronze bust (replica) of Robert Fulton, by Jean Antoine Houdon (purchase). Included in the list of loans is a Celadon vase, Chinese, Ming dynasty (lent by J. Pierpont Morgan); tall faience vase, Italian, 16th century (lent by Mr. and Mrs. V. Everit); Wedgwood cup and saucer, English, late 18th century (lent by Mr. and Mrs. Samuel Byerley); carved-wood cabinet, Dutch, 17th century (lent by Theodore Sutro); day bed, American, early 17th century (lent by Mrs. Robert W. de Forest); cupboard, American, early 17th century (lent by Mrs. Chester Bidwell Albree); vase, Chinese, Chien-lung period (lent by Thomas Franklin); gilt-bronze bell, Chinese, Ming dynasty (lent by Thomas Franklin); 74 pieces of silver, American, 18th century (lent by George S. Palmer); silver racing bowl, inscribed, dated Oct. 11, 1751 (lent by Dr. Lewis Morris); two-handled gilt cup and cover, London hallmark, 1677, maker R. C. (lent by the trustees of the Cathedral of St. John the Divine); silver sauce boat and ladle, Irish, middle of the 18th century (lent by Herbert DuPuy).

Trans-Atlantic Voyagers.

TO EUROPE.

E. S. Rose, of Charles Rose, New York, will sail Feb. 8.

Fred Chick, of the Smith-Patterson Co., Boston, will sail for Europe Feb. 19.

D. Wormser, of Joseph Frankel's Sons, New York, sailed recently on the *Lusitania*.

Michael M. Goldberg, New York, will sail on the *Kaiser Wilhelm der Grosse* Feb. 8.

Alphonse Judis, of the Alphonse Judis Co., San Francisco, and Newton H. Rogers, of Hayden W. Wheeler & Co., New York, sailed Saturday on the *Oceanic*.

FROM EUROPE.

L. M. Zell, of the American Gem & Pearl Co., New York, returned on the *Kronprinz Wilhelm* last week.

Market Prices for Silver Bars.

Jan. 25	24 1-8d.	$0.54⅜
" 26	24 1-8d.	.54⅜
" 27	24 1-8d.	.54⅜
" 28	24 1-8d.	.54⅜
" 29	24 1-8d.	.54⅜
" 31	24d.	.54⅛

Arthur W. Ware & Co., makers and importers of walking sticks, riding crops, corkscrews and bottle openers, formerly of 109 Leonard St., New York, have removed to 41 E. 20th St., where they occupy the entire building. The whole first floor is devoted to the sample room and offices, while the factory occupies the upper stories. The sample room is handsomely fitted up and the samples conveniently arranged for a thorough and easy inspection of the entire line, which is most complete and comprises all the latest novelties. The factory is equipped with the most modern machinery, electricity furnishing the motive power.

Newark.

TRADE CONDITIONS.

Almost without an exception the retail dealers of Newark report brisk business for the month of January. Many of them say business has been far better than any other January for several years. Others say that while the actual new business is but little ahead of other years collections have been unusually good. While sales have been good many of the retailers have not been buying any more than was necessary to keep their stock in good condition of late because of stock taking. Although it is expected that the general business will be a little slow through Lent an optimistic spirit seems to pervade the fraternity and a good year is expected. Among the manufacturers there is a difference of opinion. Most of them, however, look forward to a busy year.

Travelers representing the La Pierre Mfg. Co. are about to start out on the road.

J. Wiss & Sons have started the excavation for their new building on Broad St. between West Park and Cedar Sts.

The lease of the store occupied by S. Seff, 119 Market St., expires May 1. He will have to look for another location.

P. B. Levy, 641 Broad St., has just closed an alteration sale. The front window will be enlarged and made more attractive.

The Waverly Refining Co. has been incorporated with a capital of $100,000. The incorporators are: William Seton Gordon, Clarence De Witt Rogers and John Menges.

The firm of Scofield & De Wyngaert announce that by mutual agreement they have dissolved partnership. The business will be conducted in the future by F. P. Scofield & Co., 48 Walnut St.

R. C. Dick is at present in St. Louis. He has been traveling through the middle west for M. Alexander, 50 Columbia St. Fred Bentz is traveling through the far west for the same firm.

Archibald Rutherford, vice-president of Taylor & Co., Inc., 47 Chestnut St., is traveling through the middle west, visiting only the larger cities. He reports a good condition of business and looks for a good year.

Frisch Bros., Richardson building, Columbia St., are putting in new machinery in anticipation of a big year's work. At present their specialty is watch fobs, but they are planning to branch out into the manufacture of jewelry of all kinds.

J. P. Benjamin, of the Elm Mfg. Co., 391 Mulberry St., has just returned from a very successful trip to Philadelphia. R. C. Dick, of the same company, who is traveling through the middle west, reports business conditions as very good.

Victor L. Kurtz, representing A. Rosenberg, 50 Columbia St., who has been at the home office for several weeks, has returned to the Philadelphia office. Thomas H. Leake, representing the same firm, has just left on a five months 'trip through the south, starting in North Carolina and taking in all the States to Texas. Charles W. Weinberg, of Los Angeles, will represent him on the Pacific Coast during 1910.

In celebration of the fact that the deposits in the Merchants' National Bank have reached a total of $4,000,000, Jos. M. Riker, of Riker Bros., president of the bank, Tuesday night of last week gave a dinner at the Essex Club to the directors of the institution, and they, in turn, presented to Mr. Riker a bronze bust of Washington, mounted on a handsome marble pedestal. The presentation of the bronze was made by Edward T. Ward, who complimented the president on his good work and spoke briefly on the prosperous condition of the institution.

The *Weekly Call* gave considerable space recently to an article in regard to teaching of jewelry making and die sinking at the Fawcett Drawing School, on Academy St. The entire designing and die sinking courses are under the supervision of Henry Grasmuk, who is one of the ablest designers in this city. The jewelry class numbers about 40 pupils at present, and it is contemplated adding an enameling class and a more elementary class in jewelry designing. One pupil made a splendid application of his knowledge of die sinking. He was offered a position by a firm in this city if he could stamp their trade mark on steel, which he did successfully and got the position.

Connecticut.

Col. Clayton H. Cass, Hartford, left, recently, for a trip around the world.

Sam Kirby, of Samuel H. Kirby & Sons, New Haven, is improving, after having been ill for about two weeks.

H. J. Dunlap, Naugatuck, attended the ninth annual banquet of the 24-Karat Club, at the Hotel Astor, New York, recently.

Timothy McNamara, for many years with the Seth Thomas Clock Co., Thomaston, died recently at his home in Thomaston.

State Senator Irving H. Case, secretary and treasurer of the Waterbury Clock Co., was elected secretary of the Chase Rolling Mills and vice-president of the Waterbury Mfg. Co., recently.

Cephas B. Rogers recently celebrated his 73d anniversary. Mr. Rogers was born in Saybrook, this State, and founded C. Rogers & Bros., in 1866, which he continued until it was finally taken over by the International Silver Co.

Max J. Buechler, Bridgeport, has purchased a lot on Main St., opposite Lumber St., which has a frontage of 50 feet and a depth of 135 feet, and on which he will erect a building containing three stores and six apartments. The structure will cost $50,000.

J. A. Masterton, at the recent meeting of the Connecticut State Optical Society, held in the Tontine Hotel, New Haven, read an interesting paper on "Glaucoma." The officers of the society are: President, C. M. Parker, New Haven; first vice-president, R. Gwillan, Bristol; second vice-president, F. Lyman, Bridgeport; secretary, P. H. Tiffany, Torrington; treasurer, L. L. Gregory, Derby.

Wallace K. Bacon, who has been acting as temporary receiver for the Middletown Silver Co. for several years, was discharged from his trust, Jan. 25, in the Superior Court, by Judge Case, affairs in the case having been brought to a satisfactory close. The Merriam interests have purchased the so-called Sage interests. The appraisal showed assets of $125,374. The capital stock amounts to $30,000.

Former Councilman William F. Lally, who has just resigned as superintendent of the E. A. Bliss Co.'s factory, may go into business for himself in Meriden. Mr. Lally was not prepared to-day to state his plans for the future beyond saying he probably would engage in the manufacture of novelties, on a small scale at first, and preferably in Meriden. Mr. Lally was with the Bliss Co. for several years, being assistant to the late Martin Brown, and later promoted to superintendent after Mr. Brown's death.

Lancaster, Pa.

S. Kurtz Zook and wife have been in Keyser, W. Va., on a pleasure trip.

Arthur D. Long, Detroit, is visiting Lancaster, where he expects to locate. He went to Detroit five years ago from Boston.

Ezra F. Landis and Frank F. Landis, of the Fred. Frick Clock Co., Waynesboro, Pa., spent several days in Lancaster, last week.

The funeral of Simon R. Stibgen, of Marietta, one of Lancaster County's oldest jewelers, was held on Jan. 25 and was largely attended.

J. H. Strawbridge, York, has taken a position as bookkeeper with William Reisner, this city. Mr. Reisner has just issued a handsome catalogue illustrating a line of loving cups and trophies suitable for any event.

Paul Macher left, last Friday, for a trip to the Pacific Coast and will combine business and pleasure on his two months' trip. While out there he will visit San Francisco, which he left after the earthquake disaster.

The factory at the rear of the jewelry stores of T. Wilson Dubbs and Marcus Edelstein, which was gutted by fire several weeks ago, was on fire again Jan. 24, but the flames were extinguished before they made enough headway to endanger near-by property.

Charles D. Alton, Providence, R. I., has entered the local technical school as a student in engraving and watchmaking. Don H. Garrecht, of Lancaster, has entered the jewelry department as a student. Kendig H. Bare, head instructor of the watchmaking department, paid a visit, last week, to York.

Charles T. Owens, for the past 13 years in the finishing department of the Hamilton Watch Co., died last week, after a brief illness, from a complication of diseases. He was born in England and came to America in boyhood. After learning the watchmaker's trade he was employed at different times in some of the leading watch factories of the country.

The following traveling representatives visited the trade in Lancaster, recently: George L. Shepardson, C. A. Marsh & Co.; W. C. Hough, New England Watch Co.; John Young, Simpson, Hall, Miller & Co.; Frank Byrnes, H. D. Merritt Co.; Louis Glick, Hammel, Riglander & Co.; Mr. Talbot, Alvin Mfg. Co.; John C. Hull, Silver Plate Cutlery Co.; Henry G. Alsopp, Alsopp Bros.; Harry W. Briggs, Henry Froehlich & Co.; Alex. Patterson, Smith & North; Wm. H. Izzard, H. M. Justus & Co.; R. P. Warrington, Stott Bros.; Chas. R. Grandlun, Wm. L. Gilbert Clock Co.; C. E. Platt, Theodore W. Foster & Bro. Co.; Mr. Moore, Wilcox Silver Plate Co.; F. L. Avery, Louis Manheimer & Bro.

The Organization Movement—Its Aims and Objects and What Is Being Accomplished.

By J. P. Archibald, President of the American National Retail Jewelers' Association.

IN the past quarter century the retail jeweler lost sight of the great field of merchandising. His superior knowledge of mechanics made him a slave to the mechanical part of his business. This being the fact, a great increase in the sale of jewelry by department stores, mail-order houses and other side channels of distribution took place. These outside channels of distribution flourished. The purchasing public soon began to notice that the quality of all lines of jewelry and kindred lines was getting "shoddy" and did not possess the wearing qualities. It was observed by the buying public that department store goods and mail-order goods did not possess good workmanship and by no means the "touch of art." The buying public began to clamor for better goods and more distinctive lines.

The retail jeweler had been giving nearly all his time and attention to bench work and had lost sight of the great merchandise field at his door. He awakened only in the past few years to the full realization of the fact that he was mostly running a repair store and not a merchandising establishment. To his surprise he found, after his long period of apathy, that his line of goods was being carried in nearly every department store. He observed that the great mail-order houses had arisen and were doing a flourishing business in his line and others. He began to look here and there for the cause of his business going to these channels. The reasons were so self-evident that a great awakening took place among many retail jewelers.

Investigation showed that nearly every watch company was permitting its watches to be sold by department stores and mail-order houses at any price they chose to ask for them. Investigation further proved that silverware was largely distributed by the manufacturer and jobber through the mail-order house and the department store. It was demonstrated beyond a doubt that jewelry and all kindred lines of goods legitimately belonging to the trade of the retail jeweler was dispensed to the public by the aforesaid channels of distribution. It was observed that even the buying public was not satisfied with the new channels for the distribution of these lines of goods.

The retail jeweler is the legitimate distributor of watches, watch cases, jewelry, silverware and other kindred lines. He is the legitimate distributor because he has the scientific knowledge of the mechanism, material and workmanship required in the manufacture of such lines of goods. The jeweler has also a higher conception of skill in labor. He has a keener perception of things aesthetic. He is a "past master" so far as art is considered in the manufacture of goods.

Knowing his ability as a master in workmanship he sought the aid of his brother jeweler to bring back to his store the business that had passed to other channels. A great struggle has been going on for several years. Organization began in a small way, but the wave has steadily spread day by day till now its power is overwhelming.

The fundamental in organization is the uniting of all interests in the trade (manufacturer, jobber and retailer) into one harmonious unit, so that no interest of anyone will dominate the other. The relationship of the three, or the three organizations representing them, should be so closely allied in their interests that the welfare of any one means the welfare of all.

The much discussed questions of retailing jobbers, mail-order houses, department stores, trade-marks, long credits, fixed selling price, assaying, stamping laws, tariff legislation, interstate commerce, time guarantees, etc., would be absolutely unnecessary if the three branches of the trade were cemented together on a working basis. The great work at which the American National Retail Jewelers' Association has been aiming and working for is the uniting of all these interests. To this end a great beginning has been made. The results speak for themselves.

Take a retrospect of all the things accomplished in the past few years of organization of retail jewelers. Examine the list of watch companies working in the interest of the retail jeweler and the results are most gratifying. Any observing retail jeweler cannot help but feel that organization has put the watch business on a new plane. The silverware houses are changing the channels of distribution as fast as definite steps can be taken. The jewelry manufacturers are marking the lines sharply in favor of the retail jeweler.

These are only a few of the fundamentals that are being accomplished. The present year will bring forth many specific things in favor of the retail jeweler.

The question of a fixed selling price is being given much attention. It is our aim to have the manufacturer put a fixed selling price, with a living profit, on all standard articles. The fixed selling price on an article, maintained by both the manufacturer and the retailer, simplifies the whole question of salesmanship. It also puts all classes of dealers, large and small, on the same level. It further largely eliminates the so-called useless shopping done by many customers.

It is an inevitable fact that all watches having a "fixed selling price" are much easier sold than those on which the retail jeweler sets the price.

At the last national convention of retail jewelers at Omaha, Nebr., the president was authorized to appoint a national committee, whose duty it is to compile a tabulated fixed minimum selling price on all watch movements and gold-filled cases in this country. The compiled list is to be submitted by the committee to all manufacturers for their approval of the price upon their respective products. The committee has been appointed and the work of compiling the list is progressing. It is confidently expected that every manufacturer will accept the list or agree with the committee on an equitable price list. It is further desired that manufacturers of staple silver lines will place a "fixed selling price" on their goods.

The organization movement among retail jewelers has been a great factor for the elevation of the individual member. The forward movement of organization is bound to be of greater value to each retail jeweler who attends conventions and who takes an interest in the association work. Every convention brings together more members of the craft. Every convention unfolds more latent talent among our fellow associates. The State meetings, the "round table" meetings and the national convention meetings are the collegiate courses for the retail jewelers. Every retail jeweler in the land should avail himself of these great opportunities.

The convention seasons are soon to begin. Every jeweler who attends these meetings will improve his methods of salesmanship; he will return home with a better feeling toward his business associates; he will go home with a larger circumscribed area of knowledge and a better opinion of his own calling. It is at conventions that we become "polarized," so to speak. Whenever we become polarized units in the mass we will be as irresistible as the magnet. "Go to the conventions and get polarized."

The prospects for successful organization in the retail jewelry business never were better. The whole country has regained its equilibrium from the financial distress. It looks as if the year 1910 would be a year of great prosperity. In times of great prosperity it is much easier to sell goods. The question of getting good prices never enters into the distribution of goods when money is plenty. The organization movement should make rapid progress, for the retail jeweler can afford to spend the money. Therefore, we contemplate a large increase in membership.

One of the most hopeful signs of successful organization in the jewelry business is the number of letters received from retail jewelers all over the country, asking for assistance in eliminating abuses in the trade. Many letters have been received from jewelers in well organized States who are not members of State associations, reporting irregularities and price cutting. Many more letters have been received from jewelers in States having no organizations, seeking information how to eliminate abuses in the trade in their States and also how to form organizations and how to operate such organizations. Never before have we noticed so much general interest taken in organization by the retail jewelers in the whole country from ocean to ocean.

We believe the organization movement in the jewelry trade will spread from State to State till the entire jewelry interests will be united into one harmonious unit.

H. H. Greiner, Bethlehem, Pa., accompanied by his wife, has left for a short trip to Philadelphia and Palm Beach, Fla.

B. R. Jolly, Raleigh, N. C., is the inventor of a novel device for testing gold. The fineness of the gold may be determined within one-tenth of a karat. The device is known as the specific gravity gold testing machine, and has interested many jewelers and experts to whom it has been displayed.

Philadelphia.

J Spiegelman moved recently from 117 S. 8th St to 135 S. 7th St.

L P White will pass the month of February at Palm Beach, Fla.

G A Terhune, traveling for Robert H. Ingersoll & Bro., was a recent visitor.

The meeting of the Wholesale Jewelers' Association was held last Monday evening.

Ira Thomas has resigned his position as manager for L. M. Nelson, Camden, N. J.

H E. Sweet, of R. F. Simmons Co., Attleboro, Mass., was a visitor during the week

C J. Wocher, watchmaker, is receiving the sympathy of the trade upon the death of his mother.

Joseph B. Bechtel, L. Sanders and Thomas Judge have started on their regular Spring trip.

D. C. Hart, with F. B. Wallen, of Camden, is spending a few days with friends in south Jersey

E. H. Darrah, jeweler for many years for the trade, died Friday morning at his home, of tuberculosis.

Mr and Mrs. William Pinkstone will entertain a party of friends at their home Monday evening

J. B. Stokes, of the Van Dusen & Stokes Co., has returned from a pleasure trip to Pinehurst, N C

S C. Vincent, secretary of the Electric Clock Co., Baltimore, Md., was here on business last week.

R Levy, engraver, 811 Sansom St., has given up this business and will shortly embark in a new line

The Philadelphia Watch Case Co., Riverside, N. J., has again started work after a temporary shut down.

J. P. Archibald, president of the American National Retail Jewelers' Association, was a visitor last week.

H. Ogden, watchmaker for R. T. Ferguson, 2358 N Front St., is able to resume work after a serious illness.

T. Compton Pomeroy, of Ohio, spent the week end in this city and visited the Philadelphia College of Horology.

William Miller, formerly watchmaker for the trade, has accepted a position with F. L Kirkpatrick, 273 S. 11th St.

Joseph B. Bechtel & Co., 725 Sansom St., have added a new office to their store and are making general improvements.

George Chance, enameler for I. Bedichimer & Co., is receiving the congratulations of his friends owing to his recent marriage.

John Shierloh and C. F. Trewin, of the Keystone Watch Case Co., were recent visitors to this city in the interests of their house.

At the annual meeting of the stockholders of the Keystone Watch Case Co. last week the old board of directors was re-elected.

The Keystone Watch Case Co. has declared a regular semi-annual 3½ per cent. dividend, payable Feb. 1 on stock registered Jan. 27

Gabe A. Gorfine, 52 N. 11th St., has closed out his business and has associated himself with the Pratt Food Co. as a traveler.

A valuable diamond belonging to R. J. Stokes, of 833 W. State St., Trenton, N. J., was recently discovered in the store. The stone has been missing since last November and is valued at $950.

John Johnson, the old time watchmaker of Darby, Pa., celebrated his 74th birthday last Monday. Mr. Johnson was the recipient of many gifts and has the heartiest greetings from the trade.

Fred Hurlburt, of H. O. Hurlburt & Sons, bade adieu to his many friends Friday, prior to his departure for Egypt. Mr. Hurlburt will be absent for three months, and in that time will have studied the country thoroughly.

All the jewelers of Front St. and Kensington Ave. agreed to close their stores on Thursday evenings at 6 o'clock until Nov. 1. The agreement has been signed by S. J. Lyons, Chas. Kranich, H. Donath, O. F. O'Neill, H. Petrosky, John O. Ackroyd, R. T. Ferguson, Emil Spies, Harry J. Gold, E. Jaschik and F. Witaskis.

Henry Bolte, Jr., a well-known jeweler at 920 Atlantic Ave., Atlantic City, has offered a magnificent silver loving cup to the winner of a competition between military companies of Atlantic County, N. J., for the marksmanship championship of the county. This offer has stimulated interest in indoor shooting.

The annual meeting and banquet of the Veteran Athletes, of this city, was held at Boothby's restaurant Friday evening, and was the largest event ever given by this organization, 150 men who were once prominent as competitors in various branches of sport being present. The jewelers present were: Allen A. Kerr, C. S. Powell and Walter S. Rodenbaugh.

Police officials of Atlantic City declare that under the terms of a bill before the City Council pawnbrokers will be required to report daily to the authorities a complete list of all goods pawned with them. The names and addresses of the temporarily embarrassed owners must also be furnished. Some brokers assert that if this law is enforced it will ruin their business.

The ninth annual dinner of Joseph B. Bechtel & Co., Inc., was held, Jan. 22, at the home of the president. While the dinner was enjoyed, the most interesting feature was the distribution of checks—the profit-sharing system which was introduced by this house some years ago. The president, while assuring the employes of his appreciation of their services, made the important announcement that John C. Oberholzer was elected vice-president of the firm as appreciation of his untiring energy and great ability.

The following jewelers were visitors to this city during the week: M. C. Williams, Trenton, N. J.; E. D. Sturner, Easton, Md.; W. L. Roberts, Wilmington, Del.; M. K. Loudenslager, Souderton, Pa.; H. Frank Freeman, West Chester, Pa.; Lewis Thomas, Phoenixville, Pa.; Horace Thoman, Woodbury, N. J.; John Sherwood, of the Solidarty Watch Case Co., and L. Ostereicher, representing the Standard Watch Works, New York; Frank Kline, Spring City, Pa.; E. K. Bean, Lansdale, Pa.; D. H. Krause, North Wales, Pa.; H. B. McFarlan, East Dowingtown, Pa.; M. E. Hunter, Beverly, N. J., and Roland Oliver, Burlington, N. J.

The first meeting of the year of the Horological Club, of Philadelphia, was held Thursday evening at the Soules' Parlors, 5th and Miner Sts. Interesting trade topics were discussed. Several members had exhibits in the watch line, which were very interesting. William E. Talbot gave an appreciative talk on watchcase repairing. Many new members were enrolled. The meeting was instructive and thoroughly enjoyed by all.

C. J. Blackhurst, a former engraver of this city, who for a number of years was located at 7th and Sansom Sts., is now at Bennett, Utah. Mr. Blackhurst recently sent postals to some of his friends here, which contained a sketch of a lone figure sitting on the sand looking at a prairie dog, and the following: "Nearest grocery seven miles; nearest saloon, 35 miles; nearest railroad, 100 miles; nearest city, 150 miles. Gold bless our home."

The New York Standard Watch Co. recently transferred to the Keystone Watch Case Co. its plant, located in Lafayette, Jersey City. The property conveyed includes the factory building on the southeast corner of Communipaw Ave. and Woodward St., also the buildings on Woodward St., and a parcel of land located on the west side of Van Horne St. The consideration paid was not made public, the consideration mentioned in deeds being nominal. The conveyances were signed by T. Zurbrugg, president, and C. M. Fogg, secretary, for the watch company.

Harrisburg, Pa.

The Lewisburg Business Men's Association has been organized with 52 members. Permanent organization was effected Feb. 1.

S. B. Miller, Chambersburg, has bought the fixtures in the cigar factory of John Sheets, on S. Main St., and will remove his store to the Sheets location.

Mr. and Mrs. Frank E. Commings, 14 N. 4th St., entertained Friday evening of last week in honor of the birthday anniversary of their son, Charles B Commings.

The committee of 100 have succeeded in raising the $50,000 industrial building fund, which movement was inaugurated last Fall. Among the recent subscribers to this fund was S. G. Diener with $100.

These officers of the Board of Trade of Middletown, this county, were chosen last week: President, E. O. Hendrickson; vice-president, W. D. Matheson; secretary, Colin S. Few; treasurer, John J. Landis.

At their meeting last week the Harrisburg Merchants' Association elected these officers for 1910: President, D. P. Jerauld; first vice-president, W. H. Bennetheim; second vice-president, Wilmer Crow; secretary, Robert F. Cook; treasurer, P. G. Diener. The officers, with past presidents, form the executive committee.

John P. Messmer, optician at the Stewart & Son jewelry establishment in Huntingdon, passed through here last week on his way to the Jefferson Hospital, Philadelphia, where he underwent an operation for a trouble from which he has been a sufferer for years. The operation was a success, but Mr. Messmer is now troubled with something similar to lockjaw as a consequence.

How Pleasing!

Wasn't it a pleasure to inventory those Mount Vernon and Monticello patterns!

"Nothing to it"—Most all gone—It's time to stock anew.

SILVERSMITHS

Greenfield TRADE MARK R&L BCo STERLING Massachusetts

Buffalo, N. Y.

It is reported that the Walter E. Longmate Co will move to 106 W. Water St., Elmira

The Elks of Troy, N. Y., have just unveiled a beautiful bronze memorial tablet in memory of deceased members.

Peter L. Van Allen, who formerly represented a Cincinnati company, is now representing the Van Allen Co., jewelry supplies, Brisbane building, in this city.

A beautiful silver cup furnished by Weed & Co was recently presented to the pupils of Lafayette High School by Frank W. Fiske, president of the Havard Club of Buffalo

Victor Leseritz, Nate Slohm, I. Slohm, D. E. Goldstein and E. Stern have left Buffalo to represent White, Wile & Warner H. H. White and A. B. Warner, members of the firm, will take a business trip later this month.

Louis J. Heintz, of Heintz Bros., will sail from San Francisco early this month for a trip around the world. He will be accompanied by his wife. According to present plans, Mr. and Mrs. Heintz will return to the United States in July.

By means of the old-time trick of substituting an imitation for a genuine stone, a thief recently got away with $500 in cash and a valuable Tiffany-set ring valued at $500, which was pledged as security, from the Rothchild pawnshop, 315 Main St.

The Credit Men's Association, to which some of the local manufacturing jewelers belong, will meet in the Lafayette Hotel, Saturday evening, Feb. 12. Howard Marshall, president of the New York Credit Men's Association, will address the meeting on "The Man of the Hour."

W. G. Shadduck, F. M. Trew and Charles H. Hess have started on western trips for Heintz Bros. Norman Slohm is representing the company in the east and Max Dreyfus is covering southern territory, while A. B. Weber is calling, as usual, on the trade in Buffalo and vicinity.

A. E. Sipe has just bought a farm on the Main State Road in Erie County, near this city. The farm includes 75 acres of clear land, eight acres of orchard and 10 acres of woods. Mr. Sipe expects to build a residence on the farm and spend the Summer months there with his family, going to and from the city daily in his automobile.

Eugene Bock and A. P. Shattuck, with King & Eisele, have left Buffalo for the west. A. G. Pape, who covers Ohio, Indiana, Michigan and Wisconsin; C. A. Randecker, who visits the trade in New York State and West Virginia, and Walter Lipsett, who covers Pennsylvania, have departed on their first trips of the year. W. I. Goodfellow has gone to the Pacific coast.

O. G. Martin, who is employed by Best & Co., 11 E. Genesee St., this city, is the inventor of a universal descriptive alphabet for the blind and dumb on an exceedingly simple basis. The circle, square and two lines used in different combinations form all the letters of the alphabet and the numerals. Mr. Martin has arranged his alphabet on a small card, which is copyrighted. This is in a form adaptable for use on souvenir post-cards, blotters, etc. He is endeavoring to interest jewelers and opticians in the use of these as advertising mediums.

The Wholesale Merchants' Board of the Chamber of Commerce met for the first time as an organized body Tuesday evening of last week. After a dinner at the Ellicott Club the various committees which will conduct the affairs of the Board for 1910 were announced. A long list of members, recently published, includes the following jewelry firms: King & Eisele, King, Raichle & King, White, Wile & Warner, Queen City Ring Mfg. Co., Buffalo Jewelry Case Co., the Niagara Ring Mfg. Co., and Weed & Co.

Among the travelers who recently called on the Buffalo jewelers were: M. G. Olin, A. & Z. Chain Co.; J. W. French, John Davidson; Charles A. Paine, Machpherson-Roubaud Co.; W. R. Berth, William B. Durgin Co.; Herman Hamberger, S. Pitzele; G. G. Tibbals, Meriden Brittannia Co.; Charles A. Hartshorn, Alling & Co.; H. J. Fink, Heyman & Kramer; F. C. Allen, Allsopp & Long; E. A. Reed, Reed & Barton; S. A. Lynch, William B. Kerr Co.; A. E. Haywood, Seth Thomas Clock Co.; Henry E. Hart, Albert Lorsch Co.; Joseph S. Frank, Sussfeld, Lorsch & Co.; Clayton Shepperd, Krementz & Co.; J. W. Armbruster, Illinois Watch Co.

Pittsburg.

Edward H. Will, the Smithfield St. dealer, contemplates taking his family on another trip during the coming Spring.

Sol Cerf has returned from an eastern buying trip, having gone to New York and Attleboro to lay in some big stocks, since he enjoyed a splendid holiday trade.

Kingsbacher Bros. are preparing to move into their new building in Liberty Ave., which will be remodeled before they establish themselves in the new quarters.

Dr. Lies has bought out the establishment of C. H. Meltzer, Federal St., North Side, which has been operated under the name of the Union Jewelry Co.

Steele F. Roberts, president of the Jewelers' 24-Karat Club of Pittsburg, was slightly ill, last week, and did not go to his store for several days. He was suffering from a cold.

Wm. Heeren, of Heeren Bros. & Co., who is on a trip around the world, on New Year's Day mailed New Year's greetings in Japan to every employe of the Penn Ave. establishment.

Adolph Davis, arrested in Altoona two weeks ago for attempting to swindle jewelers by use of the United States mails, was still in jail here at last accounts, having been unable to give the required $2,500 bail.

George S. Dunbar, last week, started out on the road for the Geo. B. Barrett Co. Wm. G. Ingham, former manager of the house, has retired, but Mr. Ingham has not as yet fully decided what he will engage in.

Among the out-of-town jewelers in Pittsburg, last week, were: Asa Joseph, Donora; Thos. Tomlinson, Charleroi; H. C. Morrison, Mt. Pleasant; D. L. Cleeland, Butler; Harry Bloser and E. A Bloser, New Kensington, and Frank Worrell, Canonsburg.

No word, so far as known, has been received from Charles W. Morgan, the missing Butler St. jeweler, since he disappeared from his home in this city more than a month ago. The stock of the store is slowly being disposed of by the temporary receiver for the benefit of the creditors.

The Smithfield St. jewelers and other merchants who are opposed to the present street car traffic arrangements in that thoroughfare, are discussing the advisability of going into court and testing the traffic rules as they are now being arbitrarily enforced by the city and which, it is contended, without any authority of ordinance of law.

J. Alexander Hardy, of the Hardy & Hayes Co., is in New York on special business. A splendid display of diamonds is being made at the Hardy & Hayes Co.'s store, a large number of model busts being used to show the gems in a most attractive manner. The models have been most tastefully arranged in a wall case which has been brilliantly lighted.

Horace R. Rose, Johnstown, Pa., has been appointed referee in the matter of the bankruptcy petition filed by Jared Irwin Kearns, Barnesboro, in the United States District Court at Pittsburg, as fully set forth in a recent issue of THE JEWELERS' CIRCULAR-WEEKLY. Harvey Roland, of Edensburg, Pa., is counsel for Kearns, who has been adjudged a bankrupt.

S. & B. C. Weinhaus announce that, April 1, they will begin the erection of a building adjoining their present establishment in the rear. The structure will be 20 by 60 feet, and will be an addition to their present store room. The front of the adjoining building has not as yet been rented, as the firm cannot come to terms with the landlord. If the front building is rented it will give the Weinhaus establishment two buildings fronting in Penn Ave.

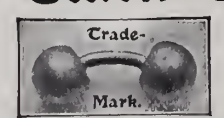
The Jewelers' Duckpin Bowling League has decided to play 100 games, and this will continue the contest until April 18. The scores made Monday night of last week follow: The Wattles broke even with the Vilsacks; the Terheydens and the Lochs did the same, and the Diamonds took all four from the Roberts team, Holyland of the Diamonds making the highest average score of the night. Holyland appears to be showing the other fellows how to play. He is a well-known engraver of Pittsburg.

Among the traveling representatives who recently called on the trade at Pittsburg were the following: J. T. Griffith, Jr., Carter, Howe & Co.; Walter E. Welch, Hoyt, Obrig & Geiger Co.; D. DeNike, Champenois & Co.; George W. Bleecker, Martin-Copeland Co.; Mr. Trone, Wm. L. Sexton & Co.; A. J. Parker, Osmun-Parker Mfg. Co.; C. T. Barbour, Watrous Mfg. Co.; Joseph J. Sideman, Redlich & Co.; John Hall, Joseph Fahys & Co.; D. Skutch, New Haven Lock Co.; E. E. Stockton, E. Ingraham Co.; A. E. Hayward, Seth Thomas Clock Co.; Lucien Rockwell, Poole Silver Co.; Horace D. Sherrill, Sinnock & Sherrill; Lee Powell, S. O. Bigney & Co.; Mr. Ellmore, LaPierre Mfg. Co.; Mark Perl, Wagner Comb Mfg. Co.; Frank L. Wood, Ludwig Nissen & Co.; J. M. Morrow, American Watch Case Co.; Lewis P. Cook, S. Sternau & Co. and Jules Franklin.

Hair Pins and Barrettes

OF SHELL

GOLD TRIMMED



LARGE Hair Pins and the Barrette go with the Coronet Braid, now the fashionable head-dress. In fact four of such hair-pins and one barrette are necessary to be worn.

¶ This factory has just produced a special line adapted to this style of wearing the hair. The goods are made of shell and are gold trimmed. They are decidedly effective and all brand new.

NEW—WATCH REPAIR RECORD—NEW

Three distinct points have been sought in compiling this Watch Repair Record, namely: That it should be COMPLETE, CONCISE and CLEAR.

A Record that eliminates all so-called "Red Tape"—that does not burden one with lengthy writings and descriptions which are so unnecessary, and at the same time affords one an ABSOLUTE COMPLETE Record.

From the following illustration you will readily note how well these points have been fulfilled, showing the superiority of the "Swartchild's Watch Repair Record" over all others.

SWARTCHILD'S WATCH REPAIR RECORD Copyright applied for.

Date	Job No. or Private No.	OWNER'S NAME	Kind of Movement	Number of Movement	Kind of Case	No. of Case	Date D'l'v'd	Charges	Extent of Repairs and Remarks

Book is most substantially made with heavy, best ledger sheets and most durable binding.

No. H932. Swartchild's Watch Repair Record (indexed) One thousand entries $1.00
No. H933. " " " " " Two " " 1.50
No. H934. " " " " " Three " " 2.00

OWNER AND LICENSEE OF ABOVE-MENTIONED PATENTS

Let Us Send Samples of New Numbers for Spring

Wouldn't It Benefit Your Customers

To Have the Kreis & Hubbard Detachable Feature Put on Their Old Umbrellas Free?

You don't have to send handles to us. You can do the work yourself. By carrying a small assortment of K & H bases (bases are umbrellas without handles) with K & H detachable feature.

In ten minutes your customer can walk out with his old handle fitted to a new base with K & H Detachable Feature, and once an umbrella is fitted with the device it can be put on a new K & H base as often as desired.

There Is No Money in Re-Covering

It is much more satisfactory to your customer to have a new base, and cheaper in the long run. He gets a new frame as well as a new cover, and a case in the bargain. Besides, an old frame is liable to rust out and break through the new cover in a short time.

Remember This —

We do not solicit department or dry goods store trade.

You can obtain K & H Umbrellas with or WITHOUT the Detachable Feature. Many people prefer the regular handle. You should carry both.

How the K & H Detachable Feature Excels

Ours is the only practical Detachable Feature on the market because it is the ONLY one having corrugations — a double safeguard which keeps the handle as tight as though made in one piece — the strongest and simplest ever devised.

Send for a stock of K & H Bases (cover, frame and case) to-day. Also free electro. State price assortment you wish.

Write for Free Newspaper Electro To Help Spring Sales

We have prepared a neat newspaper advertisement for use in your local newspaper to get the benefit of the re-covering business at this time. Write for one of these electros — it will be mailed free to any K & H dealer on request.

KREIS & HUBBARD

The Jeweler's Line

Jackson and Franklin Streets - - - CHICAGO

We supply our product to a limited number of the best wholesale watch houses in the country. Vol. LX. CHICAGO, WEDNESDAY, FEBRUARY 2, 1910. No. 1.

Chicago Notes.

Chas E Howes has returned from a western trip.

V Courrege has opened a new jewelry store at 1058 E. 43d St.

J Cheney Wells, of the American Optical Co., was here last week.

R Breuning, with the Schrader-Wittstein Co., is on a northwestern trip.

B. F Roberts, with T. A. Willson & Co., is on a trip to the Pacific Coast.

Herb Richards, buyer for E. V. Roddin & Co., is in New York this week.

Arthur Jacobs is on a trip through the middle west for Theo. Jacobs & Co.

J H. Fry, of the Fry Cut Glass Co., Rochester, Pa., was here last week.

L. A Kelly, of the Kelly, Parritt Co., Des Moines, Ia., was here last week.

The capital stock of Burley & Tyrrell has been increased from $800,000 to $900,000.

W R Stevens, representing the Bay State Optical Co., is on a trip to the Pacific coast.

R J Bourgeois, of the Bourgeois Bros. Co., was confined to his home last week by illness

G V Dickinson, general agent of the Elgin National Watch Co., visited St. Louis last week.

Geo. H. Thomas is on a western business trip and will spend a few days at Excelsior Springs, Mo.

A. Lipman has bought the Chicago samples of the Middletown Silver Co., which recently failed.

Geo. T. Byrner was called east last week on account of the death of his mother, who died in Brooklyn.

Fred McIntyre, of the Kankakee Watch Co., was here last week showing the company's new models.

Percy Lucas, with the Frank W. Smith Co., Gardner, Mass., stopped over here last week on his way east.

A W. Schuman, with the Theodore W. Foster & Bro. Co., is on a trip through Michigan and Wisconsin.

F. C. Miles, employed by A. L. Williams & Co., celebrated the 25th anniversary of his marriage last Thursday.

Roy I. Daniels, representing Max Deutz, Providence, R. I., has taken an office in room 1020, Republic building.

The residence of L. C. Goldsoll, 6016 Jackson Park Ave., was recently robbed of silverware amounting to $1,200

E. P. Sundberg, Fargo, N. Dak., stopped over here last week on his way to Florida, where he will spend the Winter.

J. F. Lisher has given up his retail jewelry store at Elwood, Ind., and will travel on the road for F. W. H. Schmidt.

M. Jerome Hardy, secretary of the Towle Mfg. Co., was here all last week on a visit to the Chicago offices of that corporation.

Inquiries are being made as to the whereabouts of A. M. Price, Roodhouse, Ill., who has disappeared, forgetting to pay a few bills.

Hugh E. King, of Fessenden & Co. and the Queen City Silver Co., is on a trip to the Pacific Coast, accompanied by Mrs. King.

The residence of Geo. Spies, of Spies Bros., was robbed by burglars last week and a quantity of jewelry and clothing was stolen.

The United States agency of the Omega Watch Co. have taken an office in room 501, Heyworth building, in charge of W. G. Grimes.

A. D. Miller, Broadwood, Ill., has sold his Wilmington, Ill., store to his brother-in-law, Carl Markert, who was also his former watchmaker.

W. H. Alger, of the North American Watch Co., has taken up his residence here. Mrs. Alger and Master Alger arrived here from Mansfield, O., last week.

B. W. Perks, formerly with the D. L. Auld Co., Columbus, O., has been engaged by the Juergens & Andersen Co. to represent this concern in the middle west.

Lee Ewing, formerly employed as watchmaker for F. W. Swan, Muscatine, Ia., was here last week buying his opening stock for his new jewelry store at Mangum, Okla.

G. H. Miller, formerly traveling salesman for the Oneida Community, Ltd., has been engaged by the International Silver Co. to represent the Rogers & Hamilton lines on the road.

Mrs. Wm. Hirseh, wife of Wm. Hirseh, of A. Hirseh & Co., who injured herself by falling down stairs some weeks ago, was removed from a hospital to her residence last week.

G. W. Titus, formerly with the Middletown Silver Co., now represents the solid gold line of the Steeber-Kraus Co., Newark, N. J., and the filled line of the Macomber Mfg. Co., Providence, R. I.

Hugo P. Keller, of the Keller Jewelry Mfg. Co., visited John S. Braude, western representative of the concern, last week. Frank C. Shinn is making his initial trip for this concern in the northwest.

Harry H. Miller is on a trip east, which includes a visit to the factory of Hutchison & Huestis and a pleasure trip to Philadelphia, New York, Baltimore and Washington. Mrs. Miller accompanies him.

H. M. Tenney, formerly with Lapp & Flershem, has signed with Otto Young & Co. to cover Illinois and Indiana. Mr. Tenney was with Lapp & Flershem for nearly 27 years, 24 of which were spent on the road in the interest of that firm.

In an examination before Referee Wean last Saturday, Samuel Fenerstein, bankrupt jeweler at 1328 Milwaukee Ave., and until eight months ago located at Green Bay, Wis., testified that his expenses have literally eaten him up. He owes $7,800.

Walter Frazer Brown, Chicago representative of the Bannatyne Watch Co., is a poet of note, and one of his recent masterpieces hangs on the wall in room 503, Columbus Memorial building. This is an epic entitled "Papa's Office," and in its rhyme includes the names of Mr. Brown's office associates.

Chicago creditors of the T. M. Roberts Co-operative Supply Co., Minneapolis, Minn., a mail order concern, have received notice that the Roberts people have filed an answer denying insolveney. According to the communication an inventory has been taken. The available assets total $258,000, and the liabilities are $173,000.

Andrew J. McCormick, brother-in-law of W. A. Alister, of Norris, Alister & Co., and employed by that concern, died here last Thursday of heart failure, aged 65 years. The funeral took place last Saturday, interment being in Milwaukee, Wis. Mr. McCormick was a fine old gentleman, quiet and unobtrusive, and his death is regretted by his associates.

Among the out-of-town retail jewelers here last week were: H. E. Gragg, Brook, Ind.; Christian Jansen, Davepnort, Ia.; Carl L. Rost, Indianapolis, Ind.; Wm. H. Carew, Streator, Ill.; Frank Thayer, Roekford, Ill.; Carl Oesterle, Joliet, Ill.; Perry Jackson, Roekford, Ill.; A. Marks, Lawrence, Kans.; Mr. Bastheim, of Bastheim, Adams & Abel Co., Los Angeles, Cal.; F. S. Ulery, Hoopestown, Ill.; M. U. Basinger, Lima, O.; Geo. Nelson, of Nelson & Sons, Marion, O.; Mr. Emeriek, Freeport, Ill.;

SPECIAL ORDER WORK ALWAYS RECEIVES OUR BEST ATTENTION

J. D. Hanks, Centerville, Ia.; Herman Idzal, Des Moines, Ia.

G. Frangiamore, formerly in the retail jewelry business here at 520 Oak St., and against whom a petition in bankruptcy was filed last week, has been sentenced to 14 years penal servitude in the Louisiana State Penitentiary for passing worthless checks in New Orleans, La., a short time ago. The creditors who petitioned the estate into bankruptcy and the amounts due them are as follows: A. C. Becken Co., $156; Alexander Labsevitz, $454; S. Glickauf & Co., $91. Frangiamore disappeared from here a short time before his arrest in New Orleans. He claimed he was a victim of the "black hand" society and attributed the cause of an incendiary fire on his premises to them, by which fire he and his family nearly lost their lives.

The Chicago Credit Men's Association is to have enacted at the next regular session of the Illinois Legislature a Bulk Sales law similar in character as has been passed in 43 States and has been declared constitutional by the highest courts in nine States. This law prevents any merchant selling his stock in bulk without giving his creditors five days' notice. The National Association of Credit Men, through its committees in the various States, has been quite successful in getting this law passed. Five years ago Illinois passed a similar law, which, however, was declared unconstitutional by the Illinois Supreme Court two years ago on the ground that it was class legislation. Since that time precedents have been established in nine States wherein it has been held constitutional. The United States Supreme Court has also passed in favor of it and the Chicago Credit Men's Association feel that Illinois should be brought into line in protecting honest merchants and manufacturers.

Indianapolis.

I. Grohs, of the I. Grohs' Jewelry Co, has gone to St. Louis, Mo., for a month.

Frank L. Bryant will go to Pittsburg this week to visit relatives for a few days.

William Beatty, West Lebanon, will leave Feb. 7 for Florida, where he will spend the remainder of the Winter.

M. J. Bieber, of the Baldwin-Miller Co., who has been ill in a local hospital two weeks, is able to be out once more.

Charles W. Lauer, Jr., traveler for Charles W. Lauer & Co., will visit Noblesville, Tipton, Kokomo, Peru and Plymouth, this week, on a business trip.

There has been a brisk trade for several days in gifts for common school graduates who graduated Jan. 28. Several jewelers state this business this year has been exceptionally large.

Travelers for the Baldwin-Miller Co., including John C. Gardner, Howard W. White, Harry Sebel and M. H. Douglass, have started on their spring trips over their respective territories.

The spring arts and crafts class of Charles B. Dyer will begin its sessions Feb. 14. So far about 25 young men and women have applied for entrance and the class promises to be larger than usual.

Following an illness of some length, Mrs. Ellen O. Bremerman died at the home of her son-in-law, A. P. Craft, 1436 Central Ave., one day last week. She was 77 years old and had lived in this city 54 years.

Charles B. Dyer has had printed an elaborate calendar, which he is giving to patrons. Most of the work on it is in copper plate. The engraving was done by George G. Dyer and the press work by John Dyer.

Owing to the fact that the old Y. M. C. A. building is to be razed March 1, Gray, Gribben & Gray have leased the building at the northwest corner of Illinois and Ohio Sts., where they will move their main store as quickly as possible.

Retail jewelers in the city last week included: Mrs. B. Maier, Edinburg; John W. Hudson, Fortville; H. B. Conley, Morristown; John L. Duncan, Wingate; S. B. Merrick, Plainfield; M. E. Chastine, Roachdale; I. H. Barnes, Greenfield; Fred Pennington, Knightstown, and J. F. Kiser, Muncie.

The police are exerting every effort to apprehend thieves who are making a specialty of jewelry thefts in private residences. Last Wednesday night the home of Carl V. Griffith, 1420 N. Delaware St., was entered and robbed of $900 worth of jewelry. This included one platinum necklace set with nine diamonds, one diamond ring, one diamond pin, one bracelet set with a diamond, three gold pins set with sapphires and pearls, one bracelet set with turquoises and one pearl necklace.

Owing to a delay in hearing from those who have been asked to participate in the program, the official programs for the convention of the Indiana Retail Jewelers' Association probably will not be ready for distribution until a day or two before the meeting. The convention is to be held in the Grand Hotel in this city, Feb. 7-8. Mr. Higginbotham, of the South Bend Watch Co.; Mr. Duncan, of the Waltham Watch Co.; Mr. Sackett, of the Rockford Watch Co., and J. P. Archbold, president of the National Retail Jewelers' Association, will be among those on the program. A. G. Schwab, president of the National Jobbers' Association, has also been asked to attend. On Tuesday evening of the meeting a banquet will be given by manufacturers and jewelers of the city at the Grand Hotel, to the retailers and their guests.

Milwaukee.

Several out-of-town jewelers were in Milwaukee, last week, including J. T. Wendling, Chilton; F. P. Beswick, Racine; Henry Bayer, Whitewater; Clarence Dahlberg, Beloit.

Among the traveling representatives who called upon the Milwaukee, Wis., trade last week were: A. A. Neuberg, Castiglioni Co.; Fred England, Frolichstein, England & Klein, and C. A. Nation, of Henry Baschkopf.

The junior member of Littlefield & Son, Delavan, Wis., was here last week, purchasing new fixtures and additional stock for the store which the firm now occupies. Mr. Littlefield reports that the new store is larger and more modern than the former quarters.

Milwaukee jewelers have received announcements of the marriage, Jan. 24, of John J. Koehler, Manitowoc, Wis., to Miss Mary Catherine Wit, also of Manitowoc. Mr. Koehler has been connected with the firm of C. Liebenow & Son, at Manitowoc, for the past 10 years.

Louis Esser was one of a number of Milwaukee business men who attended a successful ski tournament recently at Chippewa Falls, Wis., by the North Star Ski Club. Mr. Esser reports that nearly 90 participated in the event, the largest number ever in a ski tournament held in this country outside of a national meet.

Louis A. Kuesel, of Kuesel Bros. Co., announced that the affairs of R. J. C. Bott, former retail jeweler of Milwaukee, who made an assignment some months ago, have been settled. Mr. Kuesel, who acted as trustee in the matter, says that creditors are realizing about 25 per cent. Mr. Bott is now at Kansas City, where he is associated with a jewelry establishment.

Isadore Greenberg, an optician formerly in the employ of David Goldman, a jeweler, who charged the optician with embezzlement, has been found guilty in the municipal court and has been fined $5 and costs. The defense was made by Mr. Greenberg that the sum in question, amounting to only $2 in a single bill, was accidentally dropped by him during a transaction in the store and that he did not take the money. A countercharge was also made that Mr. Goldman owes him several hundred dollars as his share of the receipts from the optical department.

A judgment for $42 has been granted by Judge O. T. Williams on the verdict returned by a jury in his court several weeks ago in the case of Miss Vladyslava Josefacka against Isaac Goldman, a Mitchell St. jeweler. Suit was brought by the plaintiff for $42 on the charge that this was the value of a purse and contents which she alleged Goldman took from her while she was shopping in his store, April 13, 1908. Soon after the purse was missed Goldman was arrested on a criminal charge and acquitted. Then Miss Josefacka began the civil action for recovery of $42.

Very little was accomplished at the recent meeting of the directors of the Wisconsin Retail Jewelers' Association and the Jewelers' Mutual Fire Insurance Co., Wisconsin, held in Milwaukee. The first meetings were postponed because of the small attendance resulting from the snow blockades. The directors find that the St. Charles Hotel, at Milwaukee, the headquarters of the convention, will not be available July 19, 20 and 21, while the gathering cannot be held on the following week because of the fact that it would conflict with the conventions of certain other State associations.

The quarterly meeting of the directors of the Jewelers' Mutual Fire Insurance Co. of Wisconsin showed that the company has made excellent progress during the past three months, and it is confidently expected that it will be possible to make a refund of 20 per cent. at the close of the fiscal year, in April. During the nine months that the company has been writing insurance it has not experienced a single loss, a most unusual record. Directors present at the meeting included Vice-President W. H. Upmeyer, A. J. Stoessel, George Durner and E. J. Rohn, Milwaukee, and J. R. Chapman, Oshkosh.

MANUFACTURING JEWELERS :: :: DIAMOND IMPORTERS

Masonic Temple, CHICAGO, ILL.

Los Angeles.

H. F. Wallace is staying, with his family, at Ocean Park for several months.

A. G. Perham, Ocean Park, recently filed a voluntary bankruptcy petition. His stated liabilities are $6,673 and his assets $8,785.

Peter J. Koke is a new member of the force of Hambright & Walsh, and will represent them on the road. Mr. Koke formerly lived in Grand Rapids.

David Miller, watchmaker with O. L. Wuerker, 229 S. Spring St., has bought out the business of C. F. Haeni, on W. 2d St., between Spring and Broadway.

Three traveling representatives of the E. W. Reynolds Co., Ed. and Arthur Turner and Frank Sterling, have returned from trips and are now in this city.

The Whitley Jewelry Co. made several pieces of jewelry to be worn as special features at the Bachelors' Ball, held in the California Club House, Jan. 28.

Simon and Samuel Pearlin, who are accused of embezzling jewelry and were recently extradited from Connecticut, have pleaded not guilty and will be tried March 3.

The following traveling representatives, all of San Francisco, have been in this city recently: W. R. Landram, Albert Lee, Peter Johnson, Geo. F. Miller and A. W. Bennett.

Albert Fink, who recently had a trunk full of samples stolen between this city and San Francisco, has heard no further news of it, although detectives were put to work on the case immediately.

Joseph Lawton, of the Whitley Jewelry Co., who was absent from the store for a couple of weeks as the result of a street car accident which crippled him temporarily, is again at his post.

Mr. Bosch, of Krenkel & Bosch, Winnemucca, Nev., has been spending his honeymoon here. Mr. and Mrs. Bosch returned to their home a few days ago, after a very enjoyable stay in this vicinity.

R. H. Schwarzkopf and H. A. Curry left, recently, for the north on business, and will visit Oregon and Washington, as well as cities in the northern part of California. They will be absent several months.

M. L. Bowen, a buyer of all kinds of pearls, whose home is at Fort Madison, Ia., is in this city on a business and pleasure trip. Mr. Bowen is accompanied by his wife and will remain for several weeks.

C. S. Strobel, who recently came here from San Francisco, has taken a position as engraver with Brandenberg & Graham, Broadway Central building. A. Larson, formerly of Seattle, is now a jeweler with the same firm.

During the recent aviation meet business was rather slack among the jewelers of this city, as attention seemed to be diverted entirely to the sports, but since then there has been a revival and at present business is even more brisk than usual at this time of the year.

S. Nordlinger & Sons furnished a handsome silver cup presented by the Los Angeles Chamber of Commerce to Louis Paulhan, the French aviator who took part in the recent aviation meet here. The cup is 21 inches high, including the base, and is beautifully engraved.

A new firm of manufacturers' agents under the style of Oakes & Wulze has opened an office at 226 Mercantile Pl., this city. Edgar T. Oakes and Harry W. Wulze are the partners. Mr. Oakes, who was formerly connected with the E. W. Reynolds Co., is now in the east making arrangements for his firm.

Out-of-town jewelers who have been in Los Angeles recently include: Frank A. Conant, Santa Barbara; Chas. Nelson, Fowler; H. C. Warner, Fresno; A. H. Witman, Pomona; Wm. C. Guerth, Redlands; E. B. Smith, Santa Ana; Leo M. Schiller, San Diego; F. B. King, Redlands; C. P. Kryhl, Santa Ana; Geo. F. Blakeslee, Tonopah, Nev.

The Whitley Jewelry Co. is supplying the prizes for the Marathon races to be run on Washington's Birthday under the auspices of the Los Angeles Athletic Club. The race is from Venice-of-America to Los Angeles, and covers the same distance as the original Marathon race. The first prize is a fine watch and the others are silver cups.

A local correspondent notes the fact that on the west side of Broadway, between 3d and 4th Sts., there are 12 business houses, and with one exception every one of these concerns handles jewelry. In this block are situated Montgomery Bros., S. B. Bailey, the Whitley Co. and the Geneva Watch & Optical Co., the other concerns being dry goods or department stores which handle jewelry.

The Carl Entenmann Jewelry Co. furnished about 50 medals for the members of the aviation committee and the aviators who took part in the recent meet. The plaque shows a lady's figure and a monoplane, with the wording, "Aviation Meet, Los Angeles, Cal., Jan. 10-20." On the top bar is engraved the name of the recipient of the medal, and from this bar is suspended a small American flag which supports the medal itself.

Messrs. Reichman, diamond dealers of New York, recently spent some time in Los Angeles. They were recently the guests of George M. Williams, of the Geneva Watch & Optical Co., on an automobile tour through some of the prettiest parts of southern California. The trip occupied two days, and the party visited Riverside, Redlands, Arrowhead Hot Springs, San Bernardino and intermediate points, also driving into a number of beautiful cañons.

Recently a number of the members of Brock & Feagans' force gathered at the Orpheum Theater and witnessed the performance, afterward going to a nearby café where a private room had been prepared for them. Here supper was enjoyed, with songs, stories and music by the guests, among whom were a number of excellent musicians. The affair was entirely informal, being in the nature of a general jollification. Those who took part were Louis J. Andrenei, A. H. Laack, C. S. Douglas, E. G. Turner, R. V. Phillips, J. Portenstein, C. B. Gray, A. S. Kaa, C. F. Crossman, Robt. E. Hodgson, E. B. Josephson, Theo. Hobgood, Jr., M. G. Smith, E. M. Furlong, S. Ealkins, O. Willumsen, Wm. Risch, Harry H. Miller, T. E. Ashton, John Bosworth, Geo. W. Miller. It is purposed to form a permanent social club to meet once a month, but without the formalities of an organization.

Omaha.

C. S. Shindler, the oldest resident jeweler of Omaha, is seriously ill at his home.

Albert Edholm has returned from Chicago, where he attended the jewelers' banquet.

L. A. Borsheim has returned from Sulphur Springs, Ark., where he spent two weeks.

Douglas Mekhoir, representing K. B. Griffith, is traveling through northern Nebraska and Dakota on business.

The first annual banquet of the Omaha Jewelers' Club, which was to have taken place Jan. 26, has been indefinitely postponed.

Harry Holmes and Louis Neble, of Fred Brodegaard & Co., are on a three days' inspection tour of the Union Pacific time service.

The Ryan Jewelry Co. has supplied the Omaha High School with several medals, to be awarded the High School Regiment, Companys A and E.

Word was received, last week, by a local jeweler that Hilmar Anderson, Fremont, Nebr., intended to leave soon for a six months' trip to Cuba.

Henry Copley has just finished redecorating the interior of his store. The show window, when completed, will be the handsomest in the city.

Fred Brodegaard celebrated his 44th birthday, last week, Jan. 24, and during the day a lunch was served in the store to his employes. A large bouquet of flowers was presented to him by his employes.

F. L. Combs has returned from Detroit, Mich., where he attended a meeting of the jobbing jewelers' executive committee, of which he is a member. Mr. Combs also stopped off in Chicago to attend the jewelers' annual banquet.

Wm. Smith, West Point; John Crabill, Plattsmouth; E. E. Heinemeyer, Clarks; S. H. Clay, Long Pine; P. J. Holtzinger, Pleasanton; D. Marshall, Shenandoah, Ia.; R. F. Kerwin, Griswold, Ia.; C. L. Furnald, Carroll, Ia., and H. A. Scarr, Portsmouth, Ia., were in this city, last week, replenishing their stocks.

Traveling representatives in Omaha, Neb., last week, included: B. Bernstein, Tuthill Cut Glass Co.; Carl P. Kionka; W. R. Booth and George E. Tinker. Wm. B. Durgin Co.; T. W. Agnew, New Haven Clock Co.; Mr. Sutherland, H. H. Curtis Co.; Mr. Whiting Whiting & Davis; Mr. Howes, E. L. Logee & Co.; Mr. Sherman, S. K. Merrill & Co.; Mr. Fleming, Alvin Mfg. Co.; James Baker, Frank Whiting.

T. L. Combs, president of the Nebraska Jewelers' Association, spent a day in Lincoln with the executive committee, completing arrangements for the State convention, which is to be held there Feb. 14, 15, 16 and 17. A splendid program is now being prepared, and it is expected that First Vice-President Jos. Mazer, of Oklahoma; National ex-President Mack Hurlbut, Iowa; National Secretary Claud M. Wheeler, Columbia, Mo., and several others will be present. A joint banquet of the Optical Society and Jewelers' Association will be held at Lincoln Hotel Feb. 16 at 7 P.M. The Opticians will hold their convention in Lincoln Feb. 15 and 16.

Jewelry Repairing

San Francisco.

TRADE CONDITIONS.

Dealers are just commencing to give accurate figures in regard to the amount of business done during the holiday season just closed. Shreve & Co. make the statement that their sales were larger by fully one-third than they were during the 1908 season and that they did the largest volume of business ever done by them even in the most flourishing seasons before the fire. John Hammersmith, of Hammersmith & Co., states that they had all the business offered that could well be attended to, and that the season was in the nature of a record-breaker for his firm. The same reports are being received from wholesalers, and it is declared that business in the country districts has been even better that it was in the large cities. Stocks are now depleted and buyers are commencing to come to San Francisco in large numbers.

E. P. Marshall is no longer with A. I. Hall & Son.

Richard Giacobbi, formerly with J. S. Lehrberger & Co., is now in business for himself.

Henry Abrams, of the Henry M. Abrams Co., is in the east at the present time, visiting the factories represented on the coast by this concern.

G. F. Arnold, formerly connected with the Burr W. Freer Co., is now traveling in the southern part of the State for A. Eisenberg & Co.

Al. Eisenberg, Jr., of A. Eisenberg & Co., is now in Amsterdam, making purchases for his firm and will be gone from home for about three months.

Among the retailers here last week were: Walter E. King, Stockton; D. L. McCarthy, Fresno; W. H. Bishop, Ely, Nev.; Phillip Roche, Concord, Cal.

The services of Walter J. Farrell have been secured by the Burr W. Freer Co. and he will soon commence to travel for this firm, making his headquarters at Denver, Colo.

Alphonse Judis, of the Alphonse Judis Co., is on a trip to the diamond markets of Europe. He recently went to New York from which port he sailed Saturday after a short stay in the metropolis.

Leo Stein, formerly connected with a Chicago concern, has taken a position as traveling salesman with the Alphonse Judis Co. He has taken the place of Chas. F. Rednall, who has severed connections with the big wholesale house to go into the retail business for himself.

Rothschild & Hadenfeldt now have representatives in the middle west who have never visited the home office. W. J. Farrell, who covers a part of the interior of the country, is visiting San Francisco for the first time and is having some special samples made for him. He expects to leave for his territory within a short time. Rothschild & Hadenfeldt usually close their factory for some time at this season of the year while stock taking and cleaning up is in progress, but this season so many advance orders are waiting that it has been deemed advisable to close down only as long as is absolutely necessary and it is thought that three days will be sufficient for this work.

Burr W. Freer announces that the business that has formerly been conducted in his name will be continued under the name of the Burr W. Freer Co. The change is made for the purpose of having a better organization and of meeting business demands in a better way. Burr W. Freer is president of the company and is being assisted by the same corps of assistants as formerly and announces that there will be no change in the policy of the firm.

Max Baruth, who, some months ago, was arrested and charged with grand larceny for taking some jewelry from the store of S. J. Johnson, Gridley, had a preliminary hearing in court there recently. Baruth sold the goods to the jeweler on credit, but his firm objected to the terms and asked him to get the goods back. He returned to the store and informed the clerk in charge that Johnson had agreed to allow the goods to be returned to the wholesale house. Later Johnson appeared and it transpired that no such permission was granted. After hearing the merits of the case the district attorney moved that the case be dismissed and this was done. Johnson, however, has announced his decision of proceeding with a civil suit to recover damages.

Minneapolis.

William Cohen, with L. J. Wilk & Co., is ill.

S. Alexander, of the American Jewelry Co., will leave in a few days for New York on a purchasing trip.

W. A. Lawhead, secretary of the firm of J. B. Hudson & Son, has gone to French Lick Springs, Ind., to spend two weeks.

Louis Lazarus, St. Paul, announces a removal March 1 from 21 E. 7th St. to a store several blocks east, at 167 E. 7th St.

Mrs. John D. Bodfors, wife of John D. Bodfors, who has been seriously ill with nervous prostration for the past three months, is now well on the way to recovery.

S. Gittelson, of the Gittelson Jewelry Co., left Sunday evening on a trip to California, where he will spend several weeks. He was accompanied by Louis Finklestein, St. Paul.

The Security Trust Co., St. Paul, has been named administrator of the estate of John Clayton, St. Paul, who committed suicide. The estate is said to be valued at about $5,000.

P. H. Winterberg, formerly with Sproehnle & Co., Chicago, but now representing Louis Manheimer & Bros., of the same city, called on the local jewelers in his new capacity last week.

Arthur Kauffman, salesman at the store of the B. Jacobs Jewelry Co., 41 Washington Ave., S., who sustained a fractured leg some weeks ago by falling on the icy sidewalk, has entirely recovered.

Thomas F. Wilson, Mina B. Wilson and F. B. Sweet have incorporated as the Wilson Jewelry Co., and will continue in business under the new name at 238 Nicollet Ave. The company is capitalized at $50,000 and has a capital of $20,000, all paid in.

Harry H. Green, of the firm of H. H. Green & Bro., 412 Nicollet Ave., was obliged to go to the hospital very suddenly last Thursday to have an operation performed. The operation did not, however, turn out to be a very serious one and he recovered quickly, being able to attend to business on the following day.

The Golden Rule Department Store, St. Paul, is installing a hanging clock from the upper part of the second story of the 7th St. front. The clock hangs at right angles to the building, with faces on each side. The diameter of the dial is about five feet. The Westminster chimes will be sounded in connection with the clock, which cost $4,000.

Miss Mathilda Jackale, St. Paul, has secured a judgment for $6 and costs as a result of a suit against the La Lucia Jewelry Co., St. Paul. Miss Jackale bought a watch from the defendants which was guaranteed to be satisfactory. It failed to run properly and she demanded a return of her money, which was refused, after which she brought suit.

The following traveling representatives visited the Twin Cities during the past week: C. A. Howes, E. L. Logee & Co.; Albert E. Levy, Marchand Frères; William Barton, Gorham Mfg. Co.; Otto C. Hanisch, George H. Fuller & Son Co.; Elias Markens, Borgzinner & Co.; Milton Newitter, Veit, Hirsch & Co.; L. H. Green, Manchester-Smith Co.; L. A. Eppenstine, Illinois Watch Case Co.; F. C. Bennett, Standard Jewelry Case Co.

George A. Stone has been acquitted of a charge brought against him of impersonating or representing himself to be the agent of the American Jewelry Co., and accepting a payment of $5 on a ring which Mrs. Anna Herman had purchased. Mr. Stone stated that he was so desirous of keeping the accusation from the knowledge of his aged grandmother that he would pay the money, but he would not admit a charge of theft. He faced the trial in preference and was vindicated.

Pacific Coast Notes.

W. A. Mosgrove, Angel's Camp, Cal., has moved to Fresno.

Chas. N. Baker has taken a position as watchmaker with F. E. Jenkins, Santa Paula, Cal.

F. E. Jenkins, Santa Paula, Cal., has opened a new store at Fillmore, Cal. Mr. Jenkins will manage both stores.

M. Cheney has gone to Anaheim, Cal., where he has taken a position as watchmaker and engraver with B. Hartfield.

H. L. Frederick has purchased a store at Santa Barbara, Cal., and is now having this remodeled for his business.

John H. Drumgold, formerly of San Francisco, has purchased property near Ventura, Cal., and will make his home there.

J. H. Hodges, Vaughn, N. Mex., will shortly move into a new store at that place, a new building being in the course of construction.

M. K. Giant, Vallejo, suffered a considerable fire loss recently and is holding a "Fire and Smoke Sale" at the present time, in order to dispose of the stock on hand The fire started from a defective flue and did considerable damage to the store.

G. N. Deck has succeeded the Arcade Jewelry Store, Blanchester, O.

The home of M. Harrison, Roanoke, Va., was broken into by burglars a short time ago, and jewelry worth $300 was stolen. Checks and cash amounting to $70 were also taken.

Kansas City.

T. S. Simrall is about to start out on the Missouri territory for D. B. Ward & Co.

Harold Perrin, Sargent, Neb., was recently married to Miss Woods, of that place.

J. R. Mercer has taken a lease on the building at the southeast corner of 12th and McGee Sts., for a term of 99 years.

Mr. Finch, formerly traveling for the Excelsior Watch Co., is now covering Kansas territory for the Shook Mfg. Co., Omaha.

J. L. Combs, of T. L. Combs & Co., Omaha, Neb., was in Kansas City last week on his return trip from the Chicago convention.

News reaches this city that Roy Smithers, Cameron, Mo., has turned his stock over to a trustee for the benefit of creditors. His assets are given as about $4,000 and his liabilities at $6,000.

J. H. Bastock, formerly with the engraving department of the Porter & Wiser Jewelry Co., but now with C. S. Poole, Joplin, Mo., visited friends in this city during the past week.

W. F. Kirkpatrick & Co., St. Joseph, Mo., are about to make improvements in their store. They have leased the adjoining room on the corner of the street, and will take out all partitions and make the space into a single big store, with fine mahogany fixtures and a neat diamond room.

The following traveling representatives of the Woodstock-Hoefer Watch & Jewelry Co. are in the house, assisting with the inside: Purde Firstenberger, from the Nebraska territory; Otto Knaul, whose territory covers part of Missouri, Kansas, Arkansas and Oklahoma; George F. Taylor, Kansas territory, and C. L. Palda, Iowa. L. H. Snow, who travels for this house, was also expected in, but was detained at home in Eureka, Kan., by the illness of his wife.

The following travelers called on the trade during the past week: Mr. Bennett, Waite, Evans & Co.; Mr. Levy, Fox Mfg. Co.; Otto A. Schultz, Oscar Trilsch Co.; Wm. Lamb, Geo. W. Fuller & Son Co.; Geo. W. Whittemore, Sessions Clock Co.; J. E. Stockton, E. Ingraham Co.; Maurice Kohn, Silbermann, Kohn & Wallenstein; Mr. Buffum, J. A. & S. W. Granbery; C. L. Barnum, International Silver Co.; H. V. Hedge, Excelsior Watch Co.; E. A. Moore, Sykes & Strandberg; Mr. Frothingham, T. G. Frothingham & Co.; Donald deStage, H. D. Merritt Co.; W. S. Sparrow, Furbish, Swift & Fisher; Chas. E. Howes, E. L. Logee & Co.

The following retailers were in this market during the past week: J. H. Whiteside, Liberty, Mo.; T. S. Terry, Nevada, Mo.; J. A. Clement, Springfield, Mo.; Dick Irion, Cleveland, Okla.; Frank Chaddock, Gypsum, Kan.; W. I. Smith, of Smith Jewelry & Optical Co., Stockton, Kan.; C. F. Boy, Raymond, Kan.; J. W. Phillips, Chanute, Kan.; O. M. Atwood, Clifton, Kan.; L. S. Slocum, Corning, Kan.; M. H. Hill, Smith Center, Kan.; Sam Friedberg, Topeka, Kan.; Mr. Morrison, of Morrison Bros., Olathe, Kan.; Walter Sperling, Seneca, Kan.; F. R. Cullumber, Eldon, Mo.; Frank Winkler, with J. S. Pfieffer, Parsons, Kan.; J. O. Stott, Paola, Kan.; Geo. Rowley, Afton, Okla.

Cincinnati.

L. M. Levy, of the Philadelphia Watch Case Co., was here on business last week.

George A. Gruen & Sons are arranging an extended business trip to Canada in the Spring.

Abe Levine, W. 6th St., and his bride are home from their honeymoon trip through eastern cities.

Mr. and Mrs. J. W. Campbell, Bowling Green, Ky., were the guests of A. J. Thoma, of the Thoma Bros. Co., last week.

John Dougherty, Bethel, O., has sold out his business at that place and has opened a retail and repair business at Latonia, Ky.

Arno Dorst, of the Dorst Co., is home from a business trip to New York. While there he was a guest at the 24-Karat Club banquet.

The case of Max Schaparia, watchmaker for the D. Jacobs' Sons Co. vs. M. J. Greenwald, of the M. J. Greenwald Jewelry Co., has been amicably settled.

Abe Art, Zanesville, O., last week, placed his 13-year-old son in a school here to study the violin. The boy is said to be a prodigy, and every effort is being made by his parents to further his success in this direction.

The Frank Hersehede Co. bowling tournament which A. Westhoff, of this company, is managing will take place on Feb. 2. The trophies, furnished by various silversmiths of New York, are three handsome silver loving cups.

The D. Jacobs' Sons Co. wish to correct a rumor that is now abroad to the effect that the Jacobs stock is distributed. This stock is owned only by members of the firm, as Julius D. Jacobs, Arthur C. Jacobs and Edwin B. Jacobs.

J. P. Bannar, of the Gruen Watch Co., visited the home office of the company, last week, and presented the company and office force with a barrel of oysters he had shipped from his oyster beds on his farm at Mt. Mobyack, on Mobyack Bay, Virginia.

I. N. Fox, son of Henry Fox and a member of the firm of Fox Bros. & Co., is reported as improving in health and will be able to see his friends in a short time. About six weeks ago Mr. Fox sustained an injury and recently underwent an operation at the hospital.

Roy Faust, Meadville, Pa., has returned home after spending a week here in a plating factory prior to his establishing a plating plant in his home town. He expects to be ready for business about Feb. 1, and will do all kinds of plating, making a specialty of flat ware.

Louis Mecklinberg and Fred Gerhardt, who have been connected with Ed. H. Croninger as engraver and jeweler, respectively, since Mr. Croninger went into business in 1897, have gone into the jewelry manufacturing business in the Miami building, 5th and Elm Sts., under the firm name of Mecklinberg & Gerhardt.

The Miller Jewelry Co. has contracted to make 134 gold and silver medals for the First Regiment meet of the O. N. G. here on Feb. 24. The company will also furnish 134 gold and silver medals for the annual meet here, Feb. 14 and 24, at the Music Hall, at the Celts' Athletic Club and the A. A. U., under the auspices of the local club of Celts.

Out-of-town jewelers who were here the past week buying goods included: Frank Emmerling, Hillsboro, O.; Roy Churchhill, Elizabethtown, Ky.; A. B. Cox & Son, Bridgeport, Ill.; Fred Saul, Chattanooga, Tenn.; John Krohme, Clarksburg, W. Va.; C. F. Held and George Held, Falmouth, Ky.; R. W. Clark, Lawrenceburg, Ind.; E. B. Thomas, Birmingham, Ala.; T. L. Candel, Frenchburg, Ky.; R. D. Washington, Russell, Ky., and W. L. Fredeking, Hinton, W. Va.

Traveling representatives who called on the Cincinnati (O.) trade during the past week included: Milton Goldberg, J. J. White Mfg. Co.; Ed. Brooks, Attleboro Mfg. Co.; Paul W. Smith, Roger Williams Silver Co.; J. T. Griffith, Jr., Carter, Howe & Co.; G. S. Trow, Wm. L. Sexton & Co.; W. H. Gregory, Strobell & Crane; Mills Smith, R. Blackinton & Co.; Lewis P. Cook, S. Sternau & Co.; Louis Berger, Ehrlich & Sinnock; H. L. Strauss, Nathan Wallach; Henry C. Woods, Dominick & Haff; Frank L. Wood, Ludwig Nissen & Co.; H. R. Blackman, Enos Richardson & Co.; J. W. McClannin, Wilcox Silver Plate Co.; Jos. Guntzberger, I. Guntzberger & Son; W. J. Miller, Seth Thomas Clock Co.; J. Laffey, Gorham Co.; Jules Franklin, F. Baumeister; Charles S. Miller, Ansonia Clock Co.; William F. Koch, American Moroceo Case Co.; F. C. Allen, Allsopp & Long; Mr. Fowler, Fowler Bros.; Mr. Hirsch, Nathan Hyman Co.; G. W. Bleecker, Martin-Copeland Co.; Mr. Vaslett, Fletcher, Burrows Co.; H. E. Vincent, Simpson, Hall, Miller & Co.; Mr. Wile, Buffalo Jewelry Case Co.; F. C. Winship, Wright Rich Cut Glass Co.; D. Skutch, New Haven Clock Co.; C. H. Horton, Bradley & Hubbard Mfg. Co.; Lucien Rockwell, Poole Silver Co.; Leo Henle, Sussfeld, Lorsch & Co.

Columbus, O.

P. H. Sparks has taken charge of the jewelry and optical business at Sabina left by his father, J. W. Sparks, who died last month.

Genevra Smith, daughter of W. G. Smith, milliner and jeweler at 1013 Mt. Vernon Ave., either lost or had stolen from her, last week, at the Columbus School for Girls, a fashionable private school, three diamond rings and two gold bracelets, valued at $300.

Chas. Edwards was found guilty of burglary in common pleas court last week and sentenced to the Ohio penitentiary for 10 years for robbing the store of Edward C. Voeller, 41 E. Town St. Edwards cut a hole in the display window, the night of Oct. 28, 1909, and reaching his hand through stole 24 rings. He was also charged with robbing two clothing stores, but these counts were dropped after his conviction on the Voeller charge.

John M. Graves, Mountain View, Okla., has sold his business to J. E. Long.

O. L. Ross, northwestern representative of the L. Bauman Jewelry Co., arrived in the city Wednesday from his home at Sioux Falls, S. Dak., and is getting his samples ready to go out in a few days on a trip through his territory.

Joseph Knapp, of Knapp Bros., Belleville, Ill., was married at St. Peter's Cathedral, Monday morning, to Miss Josephine Reis, also of Belleville. Mr. Knapp and his bride left after the ceremony for Florida, where they will spend several weeks.

T. G. Yore, traveler for the Imperial Clock Co., Granite City, Ill., is prolonging his stay in the city longer than he intended, on account of some personal business, but he will leave soon on a trip through Missouri, Oklahoma, Arkansas and Texas.

Otto Buder, of 2118 S. Broadway, was elected a member of the board of directors of the South Broadway Merchants and Manufacturers' Association, at the annual meeting, Tuesday night. He is one of the most active members of the association.

Oscar F. Kay, of the Jno. Bolland Jewelry Co., was a member of a jury in the Clark Ave. Police Court Friday, which fined the Terminal Railway Association of St. Louis for illegally obstructing Cardinal Ave. with a switch not authorized by ordinance.

The store of A. Kurtzeborn & Sons, at which an auction has been in progress since early in December, was closed Monday. The firm has considerable unsold stock. An office has been engaged upstairs over the old location, and the goods still on hand will be disposed of there.

The L. Bauman Jewelry Co. has filed suit in the Circuit Court to revive a judgment which was obtained Nov. 15, 1899, against John W. Smith, of 5036A Morgan St. The judgment was for $358.20, debt and damages, and $66.40 costs. The defendant has taken no steps to resist the action, and a default has been taken.

Mrs. Eliza Jane Aehle, mother of Charles S. Aehle, secretary of the Whelan-Aehle-Hutchison Jewelry Co., died on Thursday at the home of another son, Ernest F. Aehle, 5143 Page Boulevard. The deceased was the widow of the late C. F. Aehle, formerly of Boonville, Mo.

George Oberting Jr., son of Vice-President Oberting, of the Blankenmeister-Oberting Jewelry Co., who was recently added to the traveling force of the firm, has been assigned to southern Illinois territory. He is now out on his first trip and is giving a good account of himself.

J. J. Burke, president of the Brooks Jewelry & Optical Co., returned Wednesday from a southern trip, which took him as far as Jacksonville, Fla. He made stops at Nashville, Chattanooga, Atlanta, Jacksonville, Datona, Fla., and New Smyrna, and was back in St. Louis in nine days.

Frank W. Baier was one of a committee of three that made the arrangements for a farewell dinner tendered Thursday evening at the Missouri Athletic Club by St. Louis Lodge, No. 13, Knights of Honor, to Capt. B. S. Drown, who has been secretary of the lodge for 33 years and has resigned to go to California. A gold watch, appropriately engraved, was presented to Captain Drown.

Creditors of Isadore N. Kosminsky, doing business as the Rose Jewelry Co., against whom bankruptcy proceedings are pending before Referee in Bankruptcy Coles, held their first meeting, Monday, and appointed Alfred C. Wilson trustee. His bond was fixed at $6,500. He filed his bond and it was approved. The meeting of creditors adjourned to Feb. 8, at 2 P. M. The hearing of Mr. Kosminsky was continued to Feb. 8.

Oscar Blankenmeister, secretary of the Blankenmeister-Oberting Jewelry Co., returned on Wednesday from Chicago, where he and Joseph Forshaw and Harry Lang composed a team that took part in the skating contests at Garfield Park. They took second place in the mile race. They expect to win championships in the national contests to take place at Crystal Palace here, Feb. 22 and 23.

The first meeting of the creditors of Vahlman & Jacobs, East St. Louis, who recently went into bankruptcy, will be held next Thursday at the Federal building, in East St. Louis. Daniel Hogan, Jr., of Danville, Ill., who has been appointed receiver by the United States District Court for the Eastern District of Illinois, will be there. Letters have been sent to all the creditors notifying them of the meeting. Mr. Hogan has not been down this week. The store is in the custody of W. Jenkins.

Among the out-of-town jewelers in St. Louis, the past week, were: H. W. Bare, Albany, Mo.; Henry Haverkamp, Troy, Mo.; John Fink, of Klein & Fink, Fort Smith, Ark.; Adam A. Hafner, Jr., DeSoto, Mo.; B. H. Barnes, DeSoto, Mo.; Roy Goulding, Alton, Ill.; J. H. Booth, Alton, Ill.; William Westphal, St. Charles, Mo.; A. Kahn, with N. P. Jenson, Marissa, Ill.; Mr. Wagner, of Wagner & Williamson, Ava, Ill.; George N. Moore, Marion, Ill.; Nicholas S. Weiler, Cape Girardeau, Mo.; William Mosby, Newport, Ark.; R. G. Rutherford, Mount Vernon, Ill.; Dan C. McCarty,

HOLSMAN & ALTER

176-178-180 East Madison St. CHICAGO, ILL.

Charleston, Ill.; E. Anderson, Fremont, Nebr.; S. T. Parker, Palace Jewelry Store, Newport, Ark.; Julius Reinhardt, Centralia, Ill.; J. C. Futrall, of the J. L. Duke Jewelry Co., Fayetteville, Ark.

Many merchants are in the city from Missouri, Indiana, Illinois, Ohio, Oklahoma and the southern and southwestern States on account of the inducement of reduced rates obtained by the Interstate Merchants' Association in which several jewelry firms are represented. The rates will be in effect until Feb. 6 and the reduced rate tickets will be good returning until Feb. 16. The reduced rates will be in effect again Feb. 12 to 20, Feb. 26 to March 6 and March 12 to 20. Jewelry firms have made arrangements to suitably entertain the visiting merchants.

Arthur Kurtzeborn, of the A. Kurtzeborn & Sons Jewelry Co., thinks he has $140 of the money of the train robbers who held up a Missouri Pacific express at Glencoe, near St. Louis, one night last week. The day after the robbery a man shabbily attired and wearing a pair of "phony" eyeglasses, seemingly for the purpose of disguise, came into the Kurtzeborn store on N. 6th St. and asked to be shown some diamond rings. He selected one worth $140. He took out a roll and handed over a $100 bill and a $50 bill, received his change and the ring and walked out. The man's prosperity was go greatly out of harmony with his appearance that Mr. Kurtzeborn took a good look at him. When he later saw a description of the train robbers he concluded that his customer was one of them and told the police about it.

Traveling representatives in St. Louis, the past week, were: S. C. Powell, S. C. Powell & Co.; George H. Thomas, Powell & Co.; Alfred Nathan, Henry Baschkopf; Frank G. Ruggles, W. E. Richards Co.; Mr. Bennett, Waite, Evans & Co.; H. L. Strauss, Nathan Wallach; A. Rutherford, Taylor & Co.; Russell A. Talbott, Alvin Mfg. Co.; George S. Benedict, Rochester Spectacle Co.; B. S. Cohen, Michigan Optical Co.; H. M. Leclair, Central Optical Co.; Mr. Heine, Henry Lederer & Co.; Mr. Deutch, Ciner & Seelman; Mr. Nebenzah, Nebenzah & Monk; H. J. Dietz; Mr. Oppenheimer, Oppenheimer & Stern; Mr. Wakefield, Burstow, Kollmar & Co.; Wm. A. Lamb, George H. Fuller & Son Co.; Joseph Rifkin, S. Heller & Sons; S. E. Dickson, Adelphi Silver Co.; Frank L. Wood, Ludwig Nissen & Co.; C. N. Davison, Kohn & Co.; W. J. Miller, Seth Thomas Clock Co.; Jake Levin, Martin, Low & Taussig; James Baker, Frank M. Whiting & Co.; Otto A. Schultz, Oscar Trilsch Co.; S. R. Henderson, Jr., T. B. Clark & Co.; J. M. Curtis, Meriden Silver Plate Co. and Eureka Silver Co.; George H. Thomas, Scharling & Co. and Hartford Sterling Co.; Henry R. Shirley, Maddock & Miller; George W. Birnbaum, J. Wodiska; Alex. M. Thanhauser, Wolfsheim & Sachs; Herbert A. Kidder, William Scheer; Charles S. Miller, Ansonia Clock Co.; George Gubbins, Illinois Watch Case Co.; S. McKenna, Wayne Cut Glass Co.; W. R. Elliott, Meriden Cut Glass Co.; Sol. Eppenstein, Illinois Watch Case Co.; J. M. Tolbert, S. L. & G. H. Rogers; Alex. Fraser, Rochester Cut Glass Co.; Emil Herbeck, Herbeck-Demer Cut Glass Co.; J. H. Johonnet, Sterling Cut Glass Co.; Mr. Quinsey, Irving Cut Glass Co.

Cleveland.

Elmer Thurston has been ill for the past week.

Capt. R. E. Burdick is spending some time in New York.

M. Backenstos, Niles, O., was in town, last week, and reported a fine holiday trade in that city.

A. G. Armbruster, general sales agent of the Illinois Watch Co., was in Ceveland, this week, on business for that company.

L. Stotter, manufacturing jeweler, succeeded in rescuing his automobile from a burning garage where he had stored it for the day, last Saturday.

W. C. Fisher, Lorain, will move his stock across the street from his present location, temporarily, until the new four-story business block is completed on the site of his present location.

Geo. W. Schribner has been seriously ill for the past two weeks. His friends will be glad to learn, however, that he was removed from the hospital to his home, last week, and is now convalescent.

Otto Suter, well known to the local jewelry trade by his long connection with the Bowler & Burdick Co., wrestled Johnny Billiter, of Toledo, for the welter-weight championship of the world, last Thursday, the bout lasting nearly four hours. Suter lost the match.

W. G. Gilger, Norwalk, secretary of the Wagner-Gilger-Cohn Co., may now be classed as a resident Clevelander, as he finds it necessary to spend nearly all his time here looking after the interests of the new concern. Lloyd Dillingham is now acting as manager of the retail Gilger store in Norwalk.

C. A. Miller, Louisville, Pa., was in Cleveland, last week, exhibiting to the local trade the new self-adjusting pendulum that he recently invented and patented. He is on his way east to show the manufacturers the advantages of the contrivance. Mr. Miller has also applied for a patent on a dial fastener, which he says is a winner.

The following out-of-town jewelers were here last week, to buy: A. P. Humphreys, Bellefontaine; Mr. and Mrs. Whittaker and son, Clyde; W. C. Fisher, Lorain; Benj. Mosley, Willoughby; A. O. Kintner, Painesville; C. F. Gardner, Newton Falls; Ralph Moore, Cuyahoga Falls; Robt. Miller, Lorain; A. L. Hale, Cuyahoga Falls; L. J. Goddard, Ravenna, and I. Schiff, Lorain.

Some of the travelers who called on the local trade, last week, were: J. C. Otis, Harvy & Otis; H. W. Hedge, New York Standard Watch Co.; E. C. Warner, New England Watch Co.; Mr. Talbot, Alvin Mfg. Co.; J. S. Frank, Sussfeld, Lorsch & Co.; W. E. Welch, Hoyt, Obrig & Geiger Co.; H. Rosensteel, Davis & Welkenson; D. Zimmern, Zimmern, Rees & Co.; Mr. Bleecker, W. S. Hedges & Co.; Mr. Armbruster, Illinois Watch Co.; M. H. Loebnitz, Deuber-Hampden companies.

The police are working on a case brought to their notice by a conductor named Lewdanowski, on the E. 55th St. line. He reported to the police that Thursday night two men carrying several packages of rings, brooches and unset stones, leaped from his car on the 49th St. bridge when he discovered them in the act of looking over the jewelry. He became suspicious when he saw the large number of jewels the men had, and went forward to tell the motorman to get to the Hamm St. station as soon as possible, so that a patrolman might be called from the Sixth Precinct station. The men, however, divined his intentions and jumped from the rapidly moving car into a snowbank. No jewelry robbery has been reported for some time. Other cities have been notified and a good description of the men has been furnished by Lewdanowski.

Canada Notes.

H. G. De Paris, Montreal, has assigned.

H. E. Prince, Dutton, Ont., has assigned to W. J. Milton.

S. L. Kent, of B. & H. B. Kent, Toronto, Ont., is in New York on a buying trip.

E. Pommier, Buckingham, Que., has made an assignment to F. Duggan. He is asking for an extension.

Grondines & Taylor, silver platers of St. John, N. B., have dissolved partnership. The business will be continued by J. Grondines.

Among the visitors to the trade in Montreal, during the past week, were: Harry Ryrie, Toronto; Mr. Stern, Stern Bros. & Co., and I. Barry, D. A. Hart Co.

Out-of-town buyers calling on the Toronto, Ont., trade recently included: T. C. W. Watson, Newmarket, Ont.; J. S. Gill, Sudbury, Ont., and C. B. Wark, Prince Rupert, B. C.

Among travelers calling on the Toronto, Ont., trade, last week, were: George Meroz, watches, Chaux-de-fonds, Switzerland; J. B. Fenton, Wm. L. Gilbert Clock Co.; N. B. Stern, Stern Bros. & Co.; I. Berry, D. A. Hart Co.; Mr. Beiderchase, Alvin Mfg. Co., and W. A. Hodgson, Montreal.

W. Eaves is moving from 103 Notre Dame St., Montreal, to 107 Notre Dame St. The removal has been necessitated through the purchase of the Eaves property by J. W. Cooper, of the St. Lawrence Hall, who intends to transform the premises into a first-class hotel. Mr. Eaves and his father before him occupied the present business house for 45 years.

Henry Birks & Sons, Ltd., Montreal, will not have their new business premises in Winnipeg completed before the Autumn of the present year. No expense will be spared in making the building, which is at present occupied by the Winnipeg Young Men's Christian Association, one of the finest jewelry houses in the Dominion, and on a scale equal only to the magnificent premises of the Birks company in Montreal.

The Waite, Thresher Co., Providence, R. I., has issued an attractive souvenir in commemoration of its 50th anniversary, in the form of a thermometer, neatly mounted on a plate representing the well-known traveling case, bearing the name of the concern, which has become universally identified with this house. The plate is mounted on an oblong block of wood, and makes a most attractive and valuable souvenir. The business was started in 1860.

SQUARE DEAL; will exchange for real estate; a long established, well known and reliable wholesale jewelry firm will exchange for improved or unimproved real estate, part or all of a stock of jewelry, all staple goods suitable for first class retail jewelry business; every article is strictly up-to-date, reliable in quality and of the best well known standard makers; two-thirds of this stock is in 10 K. and 14 K. gold jewelry, about one-eighth is in sterling silver goods, and the balance is first class gold filled jewelry; we have about $10,000 worth and will trade in portions of $1,500 or upward, and invest some cash if required; prices on our goods will not be advanced on account of trading; dealings will be upright and open to investigation and inspection; the well known name of this firm will be a safe guarantee of honest dealings; your side must be as fair and honest as ours; write at once. Address "A.," 2060 E. 9th St., Cleveland, O., and the full name of the firm will be given in reply.

FOR SALE, jewelry store in large southern city; population over 100,000; industrial stock invoices about $3,500; good location, main street; object of sale, bad health. Address "C. A., 1111," care Jewelers' Circular-Weekly.

A WELL ESTABLISHED business, located in one of the very best cities in the country, with a population of 70,000; stock will invoice $10,000, but can reduce to suit purchaser. "S. S., 813," care Jewelers' Circular-Weekly.

ATLANTIC CITY, N. J.; for sale, nicely furnished jewelry store, established 15 years; up-to-date stock; excellent chance for wideawake person; splendid location on the board walk. "R. D., 882," care Jewelers' Circular-Weekly.

WANTED TO BUY, a jewelry store within 200 miles of New York City; I have a customer for a store in a city of 10,000 or over; want it by Feb. 15. Address, with full particulars, all will be in confidence, Dan I. Murray, 3 Maiden Lane, New York.

FOR SALE, the jewelry business of Quintard Bros., Poughkeepsie, N. Y., due to sudden death of both partners; building, stock and good will for sale; established over 40 years. Address estate of Quintard Bros., 316 Main St., Poughkeepsie, N. Y.

FOR SALE, business clearing $200 per month, pawnbroker, jewelry and repairing; bench work, $75 to $100 per month; stock all new; growing city; cash required, $3,000; good reasons for selling. Address "P., 1113," care Jewelers' Circular-Weekly.

DIAMONDS at great bargains, $45 per carat and up; mounted rings and other diamond jewelry bought from private people sold at half the regular price; sent on memo. bill to rated dealers; sold for cash only. D. I. Murray, 3 Maiden Lane, New York.

GET QUICK ACTION and immediate cash for surplus diamonds and watches, liberal prices paid; business confidential; National Bank references. H. Schwartz, 903 Heyworth Bldg., Chicago, Ill.

REALIZE MONEY QUICKLY on your surplus watches, diamonds and jewelry; send me your left over stock; now is the time to clean up; bank references. Emil Noel, 541 E. 46th Place, Chicago, Ill.

EXCEPTIONAL OPPORTUNITY to purchase the largest and oldest established jewelry store in central Illinois, city of 30,000; up-to-date, modern store; all mirrored cut glass room, tile floor; fine diamond salesroom; this store has the established reputation of honest dealing; stock and fixtures about $40,000; owner wishes to retire. Address "A. W., 1108," care Jewelers' Circular-Weekly.

DO YOU WISH TO RETIRE? Are you looking to raise ready cash quick? We are ready to purchase your entire or surplus stock of diamonds and jewelry, no matter how large it may be; we also advance liberal cash on same; highest prices paid for entire stocks; communicate with us before consulting others and get quick returns; communications strictly confidential. Address Brooklyn Purchasing Syndicate, 608 Broadway, Brooklyn, N. Y., Telephone, 2328, Williamsburg.

FOR SALE, rare snap, complete jewelry store, tools, stock and fixtures, invoice about $3,000; no competition; situated in the Salt River Valley; semi-tropical climate; large trade, overrun with bench work; population, 2,000; have other business. Address H. H. Custead, Mesa, Ariz.

For Sale.

OFFICES AND SPACE

For Light Manufacturing

EDGAR & CURTIS, 81 Nassau Street NEW YORK

The Detroit *Free Press* says: It requires no special talent to sell average merchandise at auction, but in selling a stock as fine as that carried by Sturgeon & Co. a man of more than ordinary ability is needed. The magnificent collection of precious stones, the products of the famous silversmiths, the objects of art, etc., that comprise the largest stock of its kind in this section of the country, were described and sold by Mr Hand in a manner both interesting and instructive. Never before has such a representative audience been collected at an auction sale in Detroit."

JAMES L. HAND.

The *Association Jeweler* says: "Mr. Hand has avoided at all instances identifying himself with fake sales or poor business alliances, as in the present case he has allowed his name to be coupled with only high-class retail concerns."

The Omaha *World-Herald* says: "The auction sale of the fine stock of the Mawhinney & Ryan Co. was ably conducted. Its success was due to the personality of Mr. Hand, the auctioneer, who is a man of education and refinement."

THIS IS HAND!

The most successful auctioneer of high-class Jewelry in the United States.

The auctioneer that does not "knock" others to exalt himself. The auctioneer that proves his ability before you send for him. Not the oldest, but the most conservative. If he starts your sale he finishes it. No inferior assistants, but two auctioneers of character and ability to help at all large sales. A specialty of sales where the jeweler has a reputation and wishes to retain it. Only your own goods sold, and without misrepresentation. Don't believe what the others say — investigate. Don't you want a well-educated gentleman to conduct your sale, a man that *can,* and *will* treat your customers as you want them treated?

$1,000 to any Charitable Institution which you select

if I cannot prove that I have sold the largest and finest stocks of jewelry ever offered at auction in this country in recent years.

Have you noticed the better standard that is demanded of Jewelry Auctioneers since Hand entered the field?

What auctioneer but Hand has sold such stocks as these?

The Duhme Jewelry Co., Cincinnati, O.
W. A. Sturgeon & Co., Detroit, Mich.
Mawhinney & Ryan Co., Omaha, Neb.
Emil H. Leffert, Council Bluffs, Iowa
L. W. Vilsack & Co., Pittsburg, Pa.
B. J. Feldman's Sons, Franklin, Pa.
Robert Strachan, Fort William, Canada

I will send you free for the asking a great illustrated treatise on Jewelry Auctions. It shows a great "Hand" sale in progress, and tells the methods that have made me

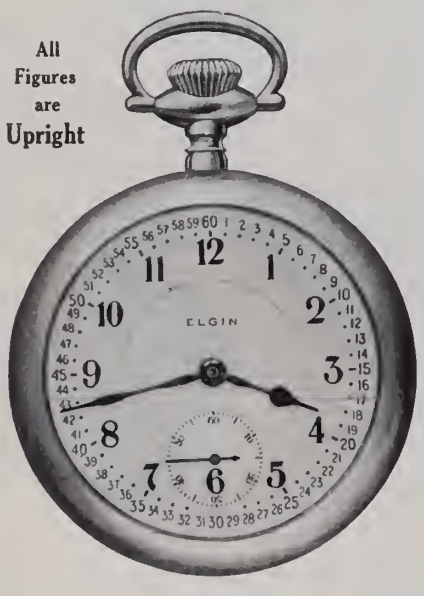
407 FOURTH AVENUE NEW YORK

This New Minute Numeral Dial

(MONTGOMERY PATENT)



With Upright Figures

was designed by the chief watch inspector of a large railway system, for railroad men's use and is now supplied on any of the

Railroad Models of the Elgin Watch

All Figures are Upright

Each minute is numbered with clear, sharp, upright figures. The figures of the even five numbers in the minute circle are printed in red. This dial is so well designed that the complete time is read at a glance, doing away with even the momentary calculation necessary with old style dials. Railroad men want Elgins with this dial. The complete line of Elgin Railroad Watches with this dial will be well advertised in railroad men's publications. Be prepared to furnish them to your trade.

Write your jobber or this company direct.

THE HOROLOGICAL REVIEW

The Development of Watches and Other Portable Timepieces from Ancient to Modern Times.

Written Expressly for The Jewelers' Circular-Weekly by H. Reinecke.

IN discussing the above subject it has seemed pertinent to have recourse to historical data quoted from a treatise by Rev. H. L. Nelthrop and others. In the former we read on page 56: "John Gabriel Doppelmayer, born at Nuremberg in 1677, professor of mathematics in that city, and in 1733 elected F. R. S., published at Nuremberg in that year his "Historical Account of the Mathematicians and Artists of Nuremberg,' and in his account of the famous mechanics will be found as follows:

FIG. 1.

"'Peter Hele, a clockmaker, was everywhere held to be a great artist on account of the pocket clocks, which, soon after the year 1500, he first made in Nuremberg, with small steel wheels. The invention, which may with great justice be ascribed to him, being something quite new, was praised by almost everyone, even by the mathematicians of the time, with great admiration. He died in 1540. Hence it is evident how erroneous it is to ascribe, as many do, the invention of small striking clocks, as of these pocket clocks, to Isaac Hebrecht, a well-known mathematician who lived about the last century and dwelt at Strasburg, whereas Peter Hele had made them in Nuremberg 100 years before.'"

It would appear that the mainspring, when first applied to a watch, was not enclosed in a barrel, but the outer end of the spring was bent in the form of a hook and fixed to the winding arbor, together with a ratchet wheel and click. A guard was attached to one of the plates in order to check the outer coil of the spring and to prevent its expanding too far. The inner end was made fast to the axis of the great wheel, consequently it was wound up from the center. The expansion set the train in motion.

A singular contrivance was used to equalize the expanding force of the mainspring. On the great wheel was screwed down an eccentric wheel, having a groove cut into its circumference. The peculiarity of this wheel consisted in its center being more distant from the circumference at one part than another. A strong curved spring having at one extremity a roller fixed to the plate at its other end, pressed strongly on the grooved wheel, otherwise termed a snail.

As this snail makes its revolutions and the power of the mainspring becomes less strong, the retarding spring also becomes less strong; this retarding spring presses with diminished force, till at length, when the watch is nearly down and the force of the mainspring considerably weakened, from a peculiar curvature of the snail, the pressure of this spring, having gradually diminished, changes from a retarding to an accelerating action, thus equalizing in a degree the force of the moving power by retarding it while it is strong and accelerating it by a union of its own force when it is weak. There is every reason to conclude that this was the original form of the stackfreed. See Fig. 1. The balance of this watch was merely a bar with weights at each end to form the equipoise.

The circular balance must have been introduced about 1530, at the latest, as any other form was not adapted for a pocket watch which might be put into any position by the wearers. In all the early watches the movements were made entirely of iron or steel, for which the reason suggested might be that the first makers were in reality locksmiths, who must have been very skilful artists and machinists.

A more developed stackfreed (Fig. 2) is represented in F. J. Britten's "Former Clock and Watch Makers and Their Work," which was the forerunner of the fusee invented by Jacob Zech, of Prague, about 1525, and which is described in the same volume, page 37, as follows: "It consists of a spirally grooved pulley, which is interposed between the barrel and the great or driving wheel of a clock or watch, the connection between the barrel and the fusee being made by a cord or chain, one end of which is attached to the barrel and the other to the fusee. [See Fig. 3.]

"When the spring is relaxed, there must be at least as many coils of the cord around the outside of the barrel as the barrel is to make in winding the spring. To wind the spring, the fusee is rotated by means of a key fitting a square formed at one end of the arbor, whereby the cord is drawn from the barrel onto the fusee, the first coil being on the larger end of the fusee, as shown in the accompanying sketch. Then, as the mainspring runs down, the barrel rotates and coils the cord

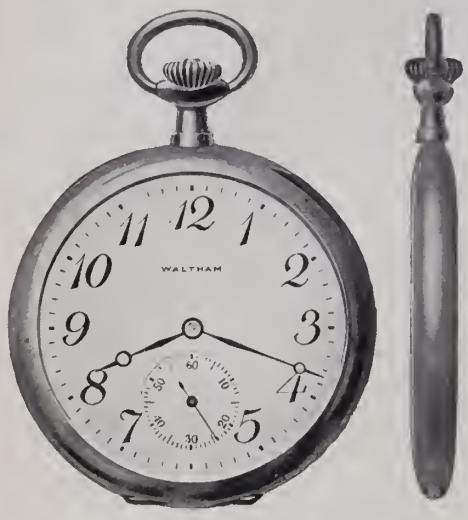

FIG. 2.

on its periphery again; but while the mainspring, when fully wound, turns the fusee by uncoiling the cord from the smallest part of the fusee, it gets the advantage of a larger radius as its energy becomes lessened, and, by proportioning the diameter of the fusee to the varying pull of each successive turn of the mainspring, an excellent adjustment is obtained, so that the pressure exerted by the great wheel on the center pinion is constant.

"The fusee is fixed to its arbor, on which the great wheel rides easily, the connection between the fusee and great wheel being by means of a ratchet wheel and click; this allows of the fusee being rotated to wind the mainspring.

"To prevent undue strain on the cord when the winding is completed, the cord, as it is being coiled on the smallest turn of the fusee, pushes an arm which is pivoted to the framing of the timekeeper in the path of the snail-shaped flange of the

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver Finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these goods for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

WALTHAM WATCH COMPANY
WALTHAM, MASS.

fusee, and this forms a stop. The barrel arbor is always stationary.

"In the early fusees the cord was of catgut, and this material is still used at times for clocks. Chains were introduced in place of catgut for watches, in 1664, by one Gruet, a Swiss, and they are still used for marine chronometers, for some clocks, and for the few fusee watches that are made."

The preceding most excellent mechanical and functional description of the fusee is here introduced as being one of the attributes of the ancient watches, which has survived to the present time in the marine chronometer.

Watches were not carried in the pocket for a century after they were introduced. The larger ones were kept on a table or cabinet, and the smaller ones, when attached to the person, were originally on a chain worn around the neck. The fob, from the German "fuppe," meaning a small pocket, seems to have been introduced by the Puri-

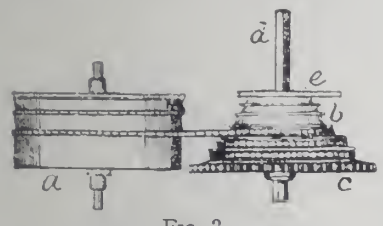

FIG. 3.

tans, whose dislike of display induced them to conceal their timekeepers from the public gaze; besides which, for men engaged in active pursuits, who carried timekeepers for use rather than for ornament, the fob was decidedly more convenient. This conjecture as to the origin of the fob is borne out by the fact that a short "fob" chain belonging to a watch of Oliver Cromwell's in the British Museum, is, in point of date, the first appurtenance of the kind to be found.

The leading escapements used in watches are five in number (although many others have been invented from time to time, which have never come into general use). They are the verge, the cylinder or horizontal, the duplex, the lever and the detached or chronometer. The verge may be considered obsolete, or nearly so, although at certain times it was used for excellent timekeepers. For pocket watches the lever has become in almost general use, with the exception of the detached or chronometer escapement, which is used exclusively for marine chronometers.

In consequence of the rewards offered by Philip, of Spain, A. D. 1598; the State of Holland; the British Parliament, in the reign of Queen Anne, 1714; the Duke of Orleans, Regent of France, 1716, respectively, for a timekeeper which would enable the captains of ships to ascertain to a certain extent the longitude at sea, all eminent clock and watch makers, in whatever country they were residing, immediately applied their inventive powers to the construction of the required timekeepers in the hope of gaining some portion, if not all, of these rewards.

Harrison, Berthoud, Peter Le Roy, Mudge, Arnold and Earnshaw, all succeeded, more or less, in obtaining money recognition of their inventions. The only one, however, which has been of real use, except the lever, and still maintains its supremacy, is the chronometer, or detached escapement, of Earnshaw or Arnold the elder, who died in 1799.

Arnold's rendering of the balance spring of his timekeepers isochronal or of adjusting the long and short arcs of vibrations of the balance is given as follows, the terms long arcs and short arcs being used indiscriminately:

"The balance spring may be made of steel wire, hardened and tempered, of steel wire hard rolled or of gold wire alloyed with copper. Steel wire hardened and tempered is the most elastic, then gold and lastly steel wire drawn. Springs composed of any of the above substances, if the material be good, will answer the purpose. The quantity of copper alloy put to the gold will answer the purpose. The quantity of copper alloy put to the gold has been found to answer in the proportion of from one-eighth to a quarter, and many other proportions may probably do as well.

The form of the spring is helical or cylindrical, except for a portion of a turn at each end, where it curved in, and fastened at an equal distance between its center and circumference, which may be seen by inspecting one end at the stud. It may also be observed that the two end turns are curved in, or smaller than the others. Were not these turns curved inwards, but left of the same diameter with the others, the spring would not have its present easy concentric motion, but, on the contrary, it would jolt, wabble and be distorted. Whether the balance vibrates in an arc of 230 degrees from the point of rest or in its forward direction or re-vibrates 230 degrees in its backward direction, making together 460 degrees, the cylindrical figure is still preserved.

Upon the length of this spring depends the isochronism of the vibration of the balance, and in every spring of a sufficient length there is a place where all the vibrations—long, short or intermediate—will be performed in equal times.

When the timekeeper is first set going, and always immediately after cleaning and putting in good order, the mainspring pulling with all its force, the oil applied to the pivots clean and good and every part performing its function to the greatest advantage, the balance may vibrate from 180 to 230 degrees from the point of rest, according to the power of the mainspring and the relative weight of the balance. The balance also vibrates on the other side of the point of rest nearly the same arc, but here the vibration is only reckoned on one side.

From continual exertion of the mainspring it will undergo some diminution of its original power and very great resistance will be created from the thickening of the oil and from the accumulation of dirt, so that at the end of a long voyage, suppose three or four years, the arc of vibration of the balance will gradually decrease from 230 to probably 130 degrees, and so on, till in time it will come to rest. From this it must be evident that if the different arcs from 230 to 130 are not all performed in equal times a great irregularity must take place from that cause. If the large arcs are performed in longer time than the small ones the timekeeper will accelerate, or go faster and faster; and if the small arcs are performed in longer time than the large ones it will retard and go slower and slower.

To adjust the long and the short arcs, let the timekeeper, when clean with the balance vibrating to its greatest extent, go for a few hours, and then, without stopping it, by means of the click and the ratchet above the barrel cap and a key applied to the barrel arbor square, let the mainspring down a turn or two, till the arc of vibration decreases from 230 to 130 degrees, or thereabouts. Then let it go for the same time as before, and if it goes slower with long arcs than with the short ones, which is generally the case, shorten the spring by drawing it through the lips at the stud. Then try again in the same manner, and so on till they are performed in equal times.

If, on the contrary, the short ones should be performed in longer time than the long arcs be performed in less time than the short ones, which amounts to the same thing, the spring must be let out or lengthened at the stud, and so on repeatedly until they correspond. If after letting out the spring several times there should be no more to spare, a longer spring must be made. The length of the spring in this timekeeper before us is about 18 inches.

Preceding and succeeding the invention of marine chronometers many circumstances and personal efforts have contributed periodically to the development and improvement of the pocket watch, of which some of these may be recorded.

(1) The revocation of the "edict of Nantes" in the year 1685, which was the means of driving out of France many intelligent and talented horologists, Protestants, who sought refuge in other countries, in England and the Continent, the descendants of whom had a good deal to do with the education of watchmakers in their new homes in the early part of the 19th century.

(2) The introduction of steel escape wheels by the Swiss, without which the cylinder escapement might have been short-lived, or perhaps ended in entire failure.

(3) The museum of ancient watches largely increased by specimens gathered from the fallen soldiers of the battle of Waterloo.

(4) The invention of the lever escapement by Mudge, about 1765.

(5) And last, though not least, the introduction of the manufacture of watches by machinery in the United States, in 1854.

As the writer of these lines was employed for six years in the different operations in two of these factories under the tuition of Ambrose Webster, one of the early watch-tool constructors, he may be allowed after the lapse of 25 years to state that the claims put forward at the inception of the manufacture of watches by machinery have been substantially justified, and that reliable timepieces as imported formerly from Europe can be manufactured at these American factories at one-third of their former cost.

Erastus M. Walker, Taunton, Mass., will shortly remove from 20 to 26 Main St.

The Nicolet Jewelry Store, Fall River, Mass., is closing out stock at auction, with a view to enlarging the optical business of the concern.

Points on Safety Action of the Lever Escapement.

Written expressly for The Jewelers' Circular-Weekly
by T. J. Wilkinson.

IN commencing the study of the safety action of the lever escapement, it is desired to point out for the benefit of those not quite familiar with the subject, that the explanations given apply to that condition of the escapement when the bankings are open, allowing the normal amount of slide or second lock of tooth on the pallet to be present; otherwise stated, when a watch is in normal running order.

From experience gained as a teacher of

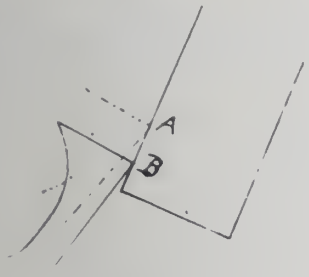

FIG. 1.

escapement work to advanced students, *i. e.*, men with some years of practical bench experience, and from conversations with many others, the writer finds that but a hazy idea exists in the minds of many watchmakers regarding the parts and action comprising the safety action and safe action of an escapement. Even the replies in some of the trade journals given to watchmakers' queries on this topic are not above reproach.

In no branch of watch work can a workman gain so much benefit as from a study of the entire action of the lever escapement. It repays the workman manifold, resulting in his doing intelligently what before was rule of thumb and guesswork combined.

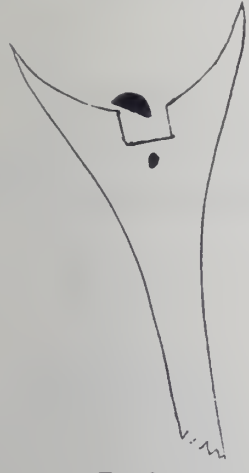

FIG. 2.

This latter it eliminates, and in its place comes rapid and accurate work.

In this paper it is purposed to outline the entire points which ensure the safe action of a single roller lever escapement, and I will commence with a short explanation of what constitutes a safe-acting escapement.

It will be found that when the lever rests against its bank, there exists between the guard pin and the edge of roller table a slight space, which will exist as long as the lever remains in contact with its bank. Should, however, the watch receive a sudden shock sufficient to cause the lever to leave its bank, the result is contact of the guard pin with the edge of the roller table. As this takes place, a corelated effect is observed, namely, a decrease in the extent of the lock of the escape wheel tooth on the locking face of the pallet jewel, as shown at B, Fig. 1.

The dotted outline of a tooth, as shown at A, represents the position of the tooth on the pallet when the lever was at rest against its bank, *i.e.*, prior to the shock

FIG. 3.

which threw the guard pin against the edge of the roller table.

This brings us to the question as to the action which must now become effective in order to draw the guard pin away from the edge of the roller table and, concurrently, the lever against its bank. The force which performs this act is known as draw. We now come to another factor in maintaining a sound safety action. It will be noticed that as the roller jewel passes the corner of the slot in the lever, Fig. 2, perfect clearance between these parts will be detected. Should rough handling or some defect cause the lever to leave its bank at the moment the roller jewel is passing the corner of the slot, and the effect is as depicted in Fig. 3, namely, contact of roller jewel and corner of the slot, it results in a lessening of the lock of tooth and pallet.

As illustrated in Fig. 1, the position at A indicates the amount of total lock, and the position of the parts at B indicates the lessening of the lock, when the corner of the lever notch came in contact with the face of the roller jewel. Here again the force known as draw effects the separation of the roller jewel and corner of slot; hence the lever will be drawn back to its bank.

In all sound escapements it will be found that the guard pin will not pass the edge of the roller table, which, of course, means that the lever will not pass over to the opposite banking except when effected under the normal escapement action of being unlocked by the roller jewel. Should the lever pass over to the opposite banking without the aid of the roller jewel, the erroneous condition usually termed "overbanked" is present and requires correction.

The last consideration in the safe action of an escapement is the position of the

FIG. 4.

banking pins as they relate to entrance of the roller jewel in the slot of the lever. We are not now considering their relationship to the lock of tooth and pallet, but merely to the depthing of the roller jewel in the lever slot, as indicated by Fig. 4.

With this brief outline of the factors

FIG. 5.

which are corelated in effect and unitedly maintain a sound safety action we shall more fully investigate each action, giving each part more technical consideration and using a slight amount of theory, the better to explain their action and associate relationship.

We herewith give the specifications and

figures we shall make use of. Separation of guard pin from edge of roller table lever against bank, one degree; separation of roller jewel from corner of lever slot, as before; lever against bank, one and one-quarter degrees; total lock of tooth of escape wheel on locking face of pallet jewel, two degrees, when lever rests against its bank; draft angle on pallet jewel,

Fig. 6.

12 degrees; slant on each tooth of the escape wheel, 24 degrees. By the aid of the foregoing figures and drawings we shall clearly explain the corelationship of the parts connected with the maintenance of a sound safety action.

In Fig. 5 is graphically illustrated the

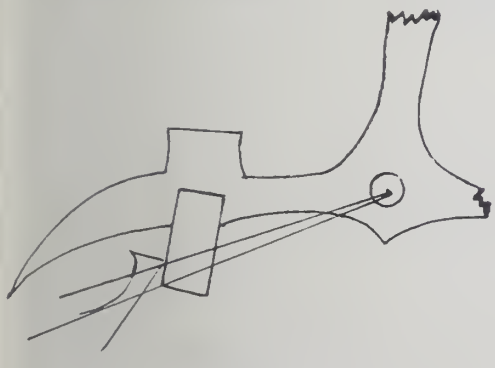

Fig. 7.

angle which separates the guard pin (lever against bank) from the edge of the roller table.

In Fig. 6 is illustrated the angle which separates the corner of the lever slot from the face of the roller jewel, lever against bank.

In Fig. 7 is shown the total angle of lock of tooth on pallet jewel, lever against bank.

The origin of each of the angles illustrated in Figs. 5, 6, 7 is the pallet staff center; hence they are intimately related and are associate angles.

In Fig. 8 is illustrated an all important angle, namely, the draft angle which gives slant to the pallet jewels. This angle is shown as enclosed by the lines A, B, C, the apex of the angle being at B; usually it is one of 12 degrees. The incline on the teeth of the escape wheel is in its nature somewhat of a draft angle. This angle is shown in Fig. 9. The apex of the angle controlling this slant is at D, and the extent of the angle 24 degrees.

Having now reviewed the safety action from its more theoretical standpoint we shall return to a more practical investigation of the subject. The draft angle or pitch given the locking face of a pallet jewel is of prime importance in obtaining an absolutely sound safety action in order to secure the lever against its bank. Should the escapement be subject to harsh usage, thereby causing the lever to leave its banking, upon the draft angle devolves the medium which causes the lever to return to its banking and seeks to retain it there..

The draft angle is in its nature a *mechanical suction*, as will be evident to all who have observed and studied its effect and action. Hence we may sum up the practical use of the draft angle as that power which retains the lever against its bank and thereby normally ensures complete separation of the guard pin from the edge of the roller table, and of the corner of the lever slot from contact with the face of the roller jewel. Strongly corelated to the draft angle or pitch of the locking face of a pallet jewel is the slant given the teeth of the escape wheel.

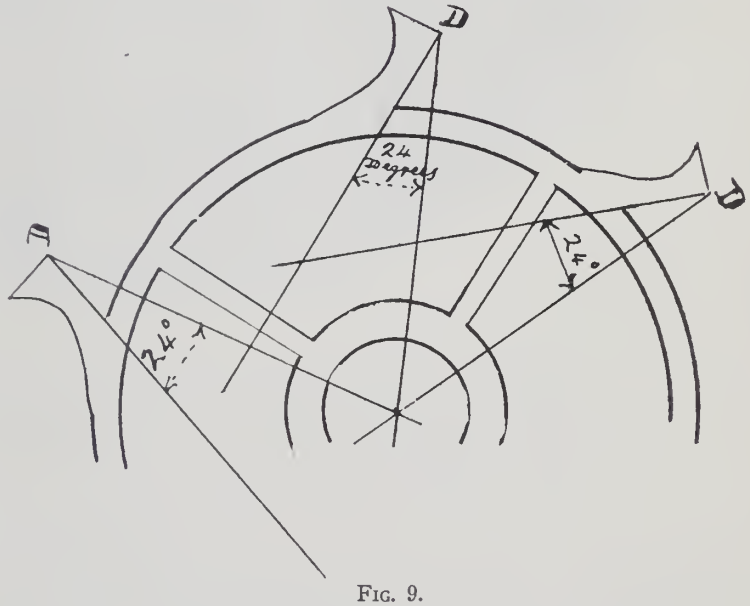

Fig. 9.

This slant is also in its nature the draft angle of the tooth. The slant of each tooth should be such that only the locking corner of the tooth must touch the locking face of the pallet jewel, as shown in Fig. 10; otherwise, if more than the corner of the tooth came in contact with the pallet jewel's locking face, what we have termed the mechanical suction or act of drawing and holding the lever against its bank would be more or less destroyed and consequently we would be liable to find that the tooth would remain on the pallet jewel just where it dropped, the lever showing no desire to come to rest against its bank. This condition is also experienced when caused by dirt or the oil becoming gummed.

Therefore, to pronounce accurate judgment on the action of these parts the en-

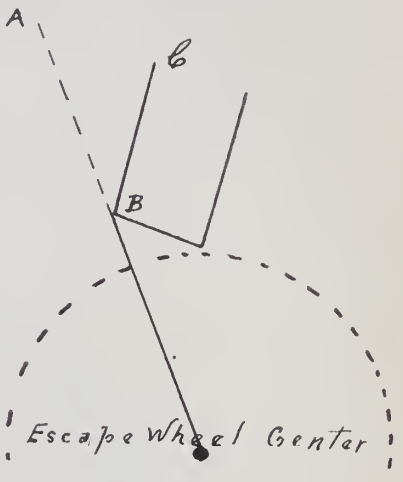

Fig. 8.

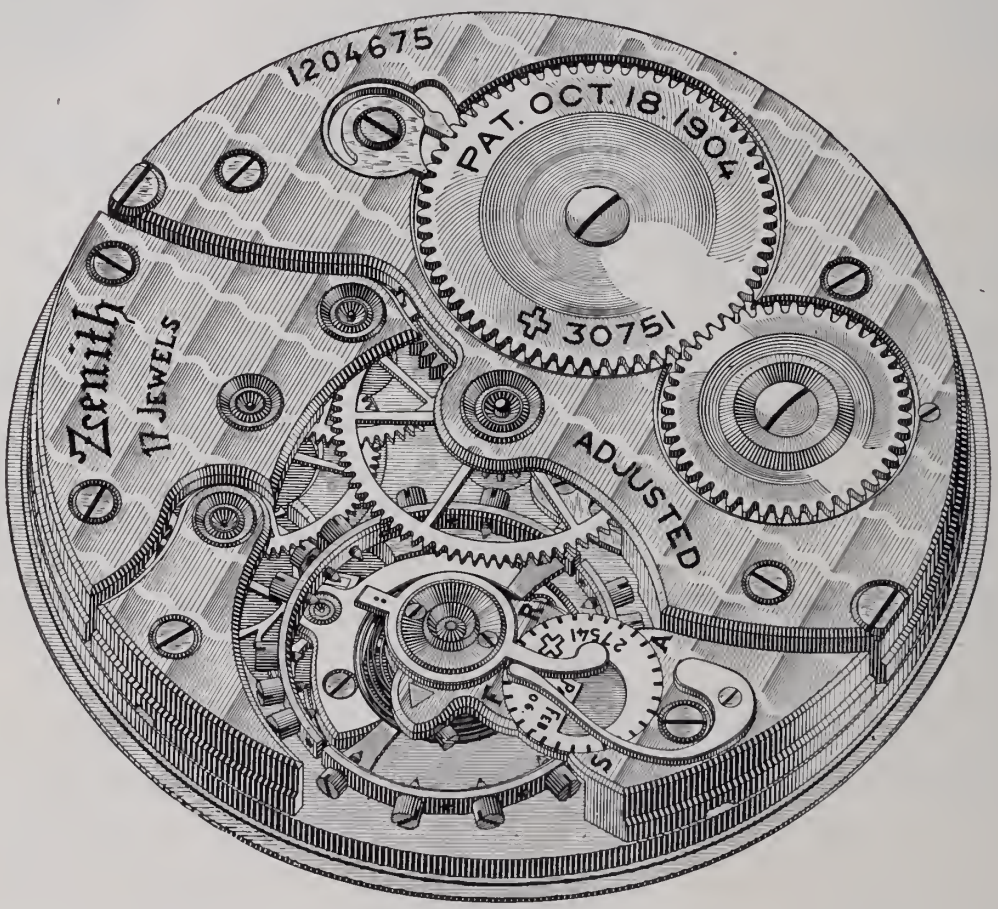
tire watch should be cleaned and oiled.

We have, in Fig. 5, illustrated the angle separating the guard pin from the edge of the roller table in an escapement. This separation of the parts is maintained through the effect of the draft angles. In the event of the draft angle failing to take effect the result would cause contact of the guard pin with the edge of the roller table.



If this should frequently happen, it would result in spoiling the time-keeping qualities of a watch.

We will next assume an escapement wherein we find that the space separating the guard pin from the table is in excess of the total lock of tooth of escape wheel on pallet jewel, which conditions are shown in Fig. 11. It will be seen that the space between guard pin and table, A to B, is in excess of the total lock of tooth on pallet, C to D. Whenever we find an escapement with such an adjustment of the parts as

(*Continued on page 215.*)

ZENITH

A Wonderful Watch

Movements fit all sizes of American Cases, besides a number of Swiss sizes; there are six grades, from 7 to 21 Jewels, adjusted to heat, cold and positions.

The ZENITH watch has taken prizes at Expositions and Observatory Contests, and occupies a prominent position in the horological world. At the last Observatory Contest, held at the Observatory at Neuchatel (Switzerland), the ZENITH watch excelled all records made at that Observatory prior to January 1st, 1909.

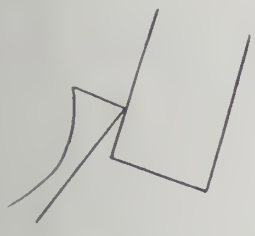
ROCKFORD, ILL.

the drawing shows, we will also discover that if from any cause the guard pin be brought in contact with the edge of the roller table, an error will develop, namely, the tooth of the escape wheel will, under the condition given, leave the locking face of the pallet jewel as illustrated in Fig. 12. It will always be found that the extent to which the tooth slips over the pallet's impulse face depends on the extent of space which separates the guard pin from the edge of the roller table. The effect of such an error, technically termed tripping, is demoralizing to the safe action of an escapement, as it will either cause a decided stop or else one of the more troublesome



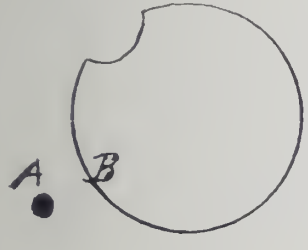


Fig. 10.

kind, *i.e.*, a very slight trip, one of the class of escapement errors which cause workmen lacking some escapement training loss of time and reputation.

Our specifications called for two degrees of total lock of the tooth on the pallet jewel's locking face and for a space of one degree between the edge of the roller table and the guard pin.

Hence, if from any ill usage, the lever should be thrown off its bank and the guard pin come in contact with the edge of the roller table, the tooth and pallet will remain locked one degree. This we can

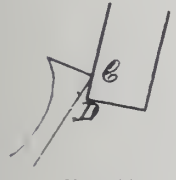

Fig. 11.

readily figure from our specifications, viz., 2 — 1 = 1 degree = the remaining safety lock, as shown at B, Fig. 1. This part of the safety action is therefore proven sound.

Our next subject is a consideration of the relationship of the roller jewel to the corner of the slot in the lever in so far as these parts are a factor in the safety action. When the roller jewel is opposite the corner of the lever slot, see Fig. 2, we find that the guard pin is then within the crescent.

We here arrive at the question, "Upon what does the maintenance of the safety action now depend?" While the guard pin is outside the crescent we have shown that the safety action depends on the adjustment of the guard pin relative to the roller table, but in the phase of escapement action already outlined, namely, the guard pin within the crescent and the roller jewel opposite the corner of the lever slot, the safety action devolves upon the roller jewel and corner of lever slot. A little thought on the part of the student will show why only the shortest possible horn is necessary to soundness of action in a single roller escapement.

To return to our specification as an aid in explaining these actions, the space separating the corner of the lever slot (lever against bank), from the path of the roller jewel, was stated as one and one-quarter degrees, and the total lock of tooth on pallet (lever against bank), was given as two degrees. Now in the event of rough treatment the lever should be thrown off its bank at the moment the roller jewel was passing the corner of the slot, the result would be contact of the slot's corner with the face of the roller jewel, as depicted in Fig. 3. When this contact takes place, there results as a coincidence a lessening of the lock of tooth and pallet, as drawing B, Fig. 1, shows.

The extent to which this lock is lessened depends, of course, upon the amount the lever moved forward until intersected by the face of the roller jewel. According to the specifications, the total lock of tooth on pallet is two degrees, and the space, lever against bank, which separates the corner of the slot from the path of the roller jewel, was given as one and one-quarter degrees. Consequently 2 — 1¼ = ¾ degree, which is the extent of safety lock which will remain when the lever slot is in contact with the face of the roller jewel.

The foregoing illustrates a safety action absolutely sound at this phase of action. Sometimes we meet instances wherein the tooth of the escape wheel does not possess a safety lock, but in its place a trip exists, such as is shown in Fig. 12. Such a condition is the result of some error of the parts. As the subject of correcting escapement errors involves many factors, it is impossible in this paper to discuss errors, their cause, effect and correction.

To make this paper more practical and of benefit to students, we will add that both types of a tripping error as already treated can be discovered as follows: Bring the guard pin in contact with any part of the roller table edge (outside the crescent), then hold the lever in this position by means of a fine broach of watch oiler; with an eye glass observe the remaining lock of tooth on pallet; likewise bring the roller jewel opposite the corner of the lever slot, then, with the broach, lift the lever off its bank, thereby causing contact of the slot's corner and face of roller jewel, and again observe the remaining or safety lock of the escape wheel tooth on the pallet jewel.

It should be carefully noted that when making the tests before mentioned, each and every tooth must remain safely locked, as the slightest sign of a trip calls for correction. In brass escape wheels we frequently find that the distance of the locking corner of the teeth from the center of the escape wheel is a variable factor; in other words, some teeth are longer than others, and hence the necessity for examining each tooth in order to discover any possible tripping error. The slighter the error, the more troublesome to locate. It might be well to emphasize the fact that no escapement error should be corrected upon the basis of one escapement test. By employing four or five different methods of escapement testing every possible chance of arriving at wrong conclusions is guarded against; then, and only then, can corrections be safely made.

From what has already been written, it will have been deducted that we may have sound and unsound escapement actions in the same escapement, and at the same phase of action, due chiefly, as explained, to the varying strength of the teeth in brass escape wheels. Steel escape wheels are far more accurate in this respect and retain their shape even after years of rough usage, and should always be used in the better grades of watches.

We have deferred considering the rela-

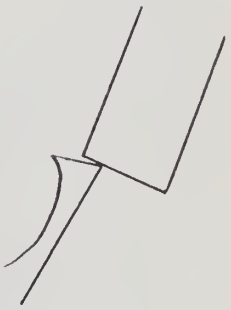

Fig. 12.

tionship of the horn of the lever to the roller jewel in single roller escapements, but will do so in our next paper, as we desire to make a comparison of the similarity and difference between the safety action of single and double roller escapements.

(To be continued.)

New Clock for Wesleyan University.

WESLEYAN University is to install a new time-telling scheme, which will revolutionize the systems by which Wesleyan men for four generations past have attended classes and cut classes and made various inartistic comments about the differences between Wesleyan time and town time.

The university is to have a master clock at the college office, with an electric system communicating with the various laboratories and reciting halls. Bells will ring automatically at the hour when classes are over and at 10 minutes past the hour, when classes convene according to the fraternal regulations.

M. J. Johnson, for many years a well-known jeweler in Wynne, Ark., is reported seriously ill at Punta Gorda, Fla.

Among the few trade representatives in Lancaster, Pa., recently, were: W. H. Young, Simpson, Hall, Miller & Co.; Walter J. Mays, McIntyre, Magee & Brown; S. Roggenbury, H. B. Somers & Co.; W. L. Hough, New England Watch Co.

There is one 7-jewel watch that is sold only by retail Jewelers at restricted retail prices and is so advertised to the public that a large trade which the Jeweler controls is being built up.

THE MAN WHO STOOD STILL

¶ Did you witness Louis Mann's presentation of his interesting drama at the Armory Tuesday evening? How were you impressed with his portrayal of the character—THE MAN WHO STOOD STILL?

¶ Did you think, as the play progressed, and the old watchmaker, Krause, was slowly but surely forced out of business by a rival establishment with modern methods, of merchants in Binghamton and elsewhere who are standing still?

¶ Krause did not advertise. He would not cater to the public. He insisted that the public should buy expensive Swiss watches while they wanted only dollar Ingersolls. HE STOOD STILL WHILE PROGRESS MARCHED BY.

¶ Mr. Mann's drama forms a lesson which should appeal to the intelligence of every modern merchant. No man in business to-day can STAND STILL. Either he must push forward with all his might—must utilize every modern method for extending and building up his business—or must fail, and as Krause said, "The public does not like failures."

¶ Look about you and see who is STANDING STILL. Ask yourself if you are in step with progress or if you are gradually losing hold of the trade you once held instead of continually adding to and increasing your business.

¶ Then decide whether you will STEP or STAND STILL—you can only do one or the other.

The "Talk" above appeared the day after the play in The Evening Herald, Binghamton, N. Y.

—— IMPORTERS OF CLOCKS ——

Local and Universal Time.

Written expressly for The Jewelers' Circular-Weekly by James Arthur, Author of "Time and Its Measurement."

EDITOR'S NOTE.—In issue of Dec. 1, 1909, we reviewed an interesting handbook on "Time and Its Measurement," published by H. H. Windsor, of *Popular Mechanics Magazine*, Chicago. The author James Arthur, gives here in a condensed form what he considers the most important of his proposals and conclusions in relation to a universal time for all business and domestic purposes covering the whole world. For more extended details it will be necessary to consult the book itself.

LOCAL TIME.

IT is necessary to pass over the astronomical basis of our 24-hour day here, so as to present the most important bearings of *local* and *universal* time in the space available. Let us, therefore, refer at once to Fig. 2, in which the apparent motion of the sun is as per large arrow. The annulus, half black and half white, containing the 24-hour numerals, is supposed to be fastened to the sun by a rigid bar and to move around the earth along with him; therefore, this bar is always 12 o'clock, or noon. In such illustrations the sun must always be made small in proportion, but this rather tends to plainness.

For simplicity, we assume that the illustration represents an equinox when the sun is on the celestial equator. Imagine your eye in the center of the sun's face at A, and you would be looking on the meridian of Greenwich at 12 noon; then in one hour you would be looking on 15° west at 12, noon; but this would bring 13 o'clock to Greenwich. Continue till you look down on New York at 12, noon, then it is 17 o'clock at Greenwich (leaving out fractions for simplicity).

If you will make a simple drawing, like Fig. 2, and cut the earth separate, just around the inside of the annulus, and stick a pin at the North Pole for a center, you may rotate the earth as per small arrow and get the actual motion, but the result will be just the same as if you went by the big arrow. We thus see that every instant of the 24 hours is represented, at some point, on the earth. That is, the earth has an infinity of local times; so it has every conceivable instant of the 24 hours at some place on the circle.

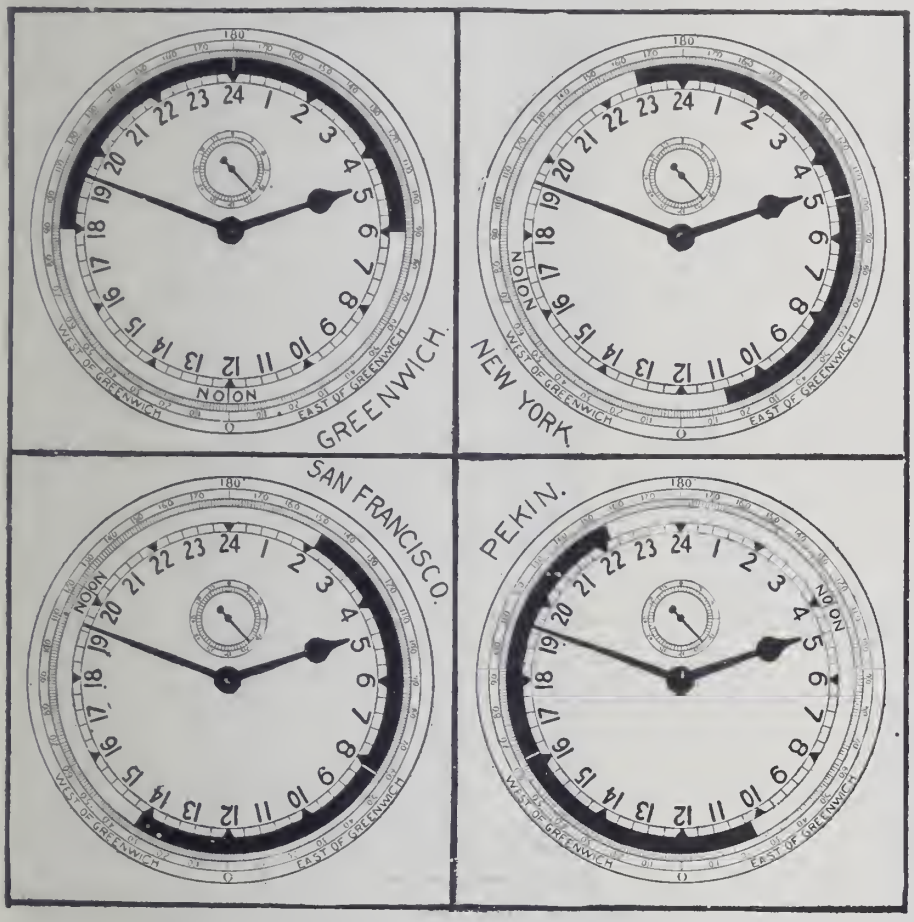

FIG. 1.—UNIVERSAL TIME DIAL SET FOR FOUR PLACES.

Suppose we set up 1,440 clocks at uniform distances on the equator, then they would be about 17 miles apart and differ by minutes. Now make it 86,400 clocks, they would be 1,500 feet apart and differ by seconds. With 864,000 clocks they would be 150 feet apart and vary by tenths of seconds. It is useless to extend this, since you could always imagine more clocks in the circle; thus establishing the fact that there are an infinity of times at an infinity of places always on the earth. Strictly, local time has never been used, because it has been found impracticable in the affairs of life.

This will be plain when we draw attention to the uniform time of London, which is Greenwich time; yet the British Museum is 30 seconds slow of Greenwich, and other places in London even more. This is railroad time for Great Britain; but it is 20 minutes too fast for the west of England. This led to no end of confusion, and clocks were often seen with two minute hands, one to local and the other to railroad time. This mixed-up method was followed by "standard time," with which we are all pretty well acquainted.

Simply, standard time consists in a uniform time for each 15° of longitude, but this is theoretical to the extreme, and is not even approached in practice. The first zone commences 7½° east of Greenwich, and as that is near the eastern edge of the British Islands, their single zone time is fast at nearly all places, especially the west coast of Ireland. When we follow these zones over to the United States we find an attempt to make the middle of each zone correct to local time, so at the hour jumping points, we pass from half an hour slow to half an hour fast or the reverse.

We thus see that towns about the middle of these four United States zones have sunrise and sunset and their local day correct, but those at the eastern and western edges average half an hour wrong. As a consequence of this disturbance of the working hours depending on the light of the day, many places keep two sets of clocks and great confusion results. Even this is comprehensible; but it is a mere fraction of the trouble and complication, because the hour zones are not separated by meridians in practice, but by zigzag lines of great irregularity.

Look at a time map of the United States and you will see the zones divided by lines of the wildest irregularity. So great is the confusion that no man understands it all. The amount of wealth destroyed in printing time tables, and failing to explain them is immense. The amount of human life destroyed by premature death, as a result of wear and tear of brain cells is too sad to contemplate. And all by attempting the impossible; for local time, even if it was reduced to hourly periods is not compatible with any continental system of time and matters can only get worse while the attempt continues.

A civil, or legal, day ends at the instant of 24 o'clock midnight, and the next day commences. The time is continuous, the last instant of a day touching the first instant of the next. This is true for all parts of the earth, but something in addition to this happens at a certain meridian called the "date line." Refer again to Fig. 2, which is drawn with 24 meridians, representing hours. As we are taking Greenwich for our time, the meridians are numbered from 0°, on which the observatory of Greenwich stands.

Degrees of longitude are numbered east and west, meeting just opposite at 180°, which is the "date line." Our day begins at this line, so far as dates are concerned; but the local day begins everywhere at midnight. Let us start to go around the world from the date line, westward. When

we arrive at 90° we are one-quarter around and it takes the sun six hours longer to reach us. At 0° (Greenwich) we are half around, and 12 hours ahead of the sun motion. At 90° west, three-quarters, or 18 hours, and when back to 180° we have added to the length of all days of our journey enough to make one day; therefore, our date must be one day behind. Ships "throw out" one day here, making a six-day week, *going west.* It is not necessary to go over the same ground for a circuit of the globe *eastward*, but if you do so you will find that you shorten your days and on arriving at the date line would have a day too much; so in this case you would double a date and have eight days in that week. In both cases this is caused by compounding your motion with that of the sun; going wtih him westward and lengthening your days, or eastward meeting him and shortening them.

Fig. 2 shows Greenwich, noon, we will say on Monday, and at that instant, Monday only, exists from 0 to 24 o'clock on the earth; but the next instant, Tuesday, begins at 180° B. In one hour it is noon of Monday at 15° West, and midnight at 165° East; so Tuesday is one hour o'd and there is left 23 hours of Monday. Monday steadily declines to 0 as Tuesday steadily grows to 24 hours; so that, except at the *instant* of Greenwich noon, there are always two days on the world at once. It is an instantaneous change.

As we cannot conceive of *no time*, the statement that there is only one day on the earth at Greenwich, noon, is not strictly permissible. Since there are always two days on the world at once, let us suppose that these two are Dec. 31 and Jan. 1; then we have two years on the world at once for a period of 24 hours. Ten years ago we had the 19th and 20th centuries on the world at once, etc. Suppose there was an impassable sea wall built on the 180° meridian, then there would be two days on the world just as explained above; but, *practically*, there would be no date line, since in sailing west to this wall we would "lengthen our days," and then shorten them the same amount coming around east to the other side of the wall, but would never jump or double a date.

When it is complicated by the international standard time—or jumping hour system—and also with the fact that some islands count their dates from the wrong side of the line for their longitude, scientific paradoxes arise, such as having three dates on the world at once, etc. Ships change date on the nearest night to the date line; but if they are to call at some island port in the Pacific, they may change either sooner or later to correspond with its date.

UNIVERSAL TIME.

As what is to follow relates to the growing difficulties of local time and a proposed method of overcoming them, let us recapitulate:

1. Local time has never been kept, and the difficulties of using it have increased as man advanced, reaching a climax of absurdity on the advent of the railroad; so it broke down and became impractical.

2. To make the irregular disorder of local time an orderly confusion, the "standard time"—jumping by hours—has helped a little, but only because we can tell how much it is wrong at any given place. This is its only advantage over the first method, where we had no means of knowing what to expect on entering any new territory. That is, we have improved things by throwing out local time to the extent of an hour.

My proposal is to throw local time out totally and establish one, invariable, universal time. Greenwich time being most in use now, and meridians numbered from it, may be taken in preference to any other. Still another reason is that the most important timekeepers in modern life—ship's chronometers—are set to Greenwich time. Universal time—no local time—only local day and night.

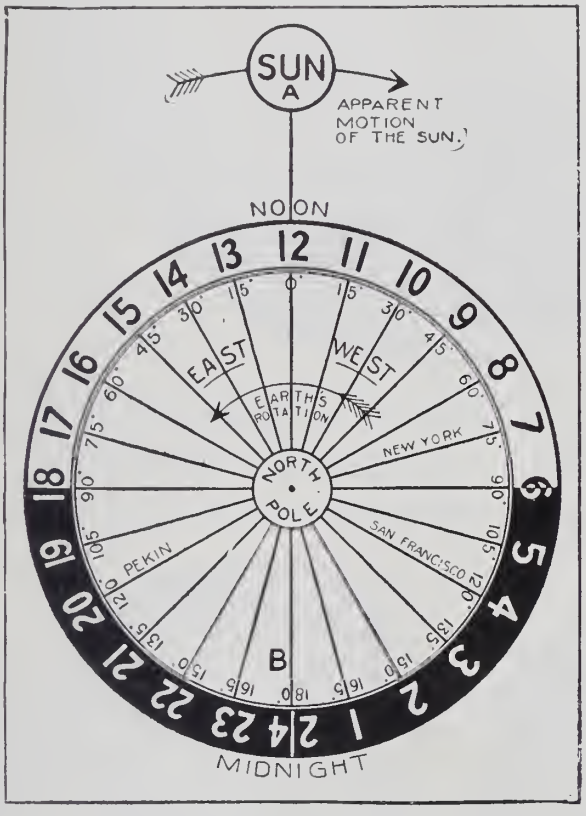

FIG. 2.—LOCAL TIME—STANDARD TIME—BEGINNING AND ENDING OF THE DAY.

The 24-hour system is all right, so do not disturb it, as it gets rid of A. M. and P. M., and makes the day our unit of time. Our railroad time now throws out local time to the extent of one hour; but I propose to throw it out entirely and never change the clock hands from Greenwich time. The chronometers do that now, so let us conduct all business to that time.

Now refer to Fig. 1, in which Greenwich is taken as universal time. The annulus, half white and half black, indicates the average day and night, and is a separate ring in the dial which can be set so that "noon" is on the meridian of the place, as shown for four places in the illustration. It is the same dial in all four cases set to local day and night. Strictly, the local time conception is dropped and the local day left for regulating working and sleeping time. In traveling east we would not have the short hours; or west the long hours. All business would have the same time. All clocks and watches would show the same time as ships' chronometers do now. The only change would be the names of the hours for the parts of the local day. This is just the difficulty, for we are so accustomed to associate a certain number, as seven, with the morning and breakfast time.

Suppose breakfast time in London is 7 o'clock, then, according to the local day, it would be 12 o'clock breakfast time in New York; but in both cases it would be the same time with reference to the local daylight. Let it be distinctly understood that our association of 12 o'clock with noon is not necessary. The Japanese called it "horse" and "nine"—the ancient Romans, the New Testament writers, and the Turks called it the "sixth hour"—the astronomers now call it 24 o'clock, and the Chinese represent it by several characters; but, in all cases, it is simply the middle of the day at any place.

By the proposed universal time, morning, noon, and evening would be—at any given place—the same hours. There would be no necessity of establishing legal noon with exactness to the meridian, because that would only regulate labor, meals, etc., and would not touch universal time. Sections in manufacturing districts could make their working hours correspond at pleasure and no confusion would result. That is, local working hours to convenience but by the same universal time.

Note how perfectly this would work in traveling—you arrive in Chicago from the east and your watch corresponds all along with the railroad clocks. As you leave the station you glance up at the clock and see that Chicago noon is 17.30, so you set the

The above illustration shows the Actual Dial Size of all of the 3-inch sizes. The 3½ and 4-inch sizes are approximately relatively larger. There are 3 sizes of each Model—see Price List. All cases are of the approved "screw bezel," water and dust proof type and are made of Polished Brass—but "to order" will be finished Nickeled and other finishes.

EXCELLENT for use on AUTOMOBILES and MOTOR BOATS

THE BOSTON

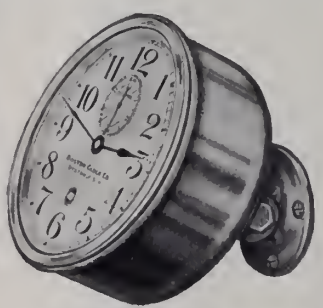
8 Day High Grade } **AUTO CLOCK**

- Nothing but unusually large facilities, highest grade automatic machinery and a specially large force of highly skilled employees permits the Prices made on these Excellent Clocks.
- It gives the user an excellent clock at (for the quality) a very moderate price.
- We give Discounts to Dealers and to Legitimate Jobbers, insuring a reasonable profit.
- The movements are all 8-Day, high grade, very rigidly built, are 7-Jeweled and have Breguet Hairspring and Compensation Balances with Timing and Balance Screws, etc., and are secured by screws through back of the case—the best possible way.

—PRICE LIST—

MEMO.—If any of these clocks are wanted fitted with our (patent applied for) STEM WIND and STEM SETTING Device, the most effective, compact and convenient device of the kind ever put on the market, ADD $2.50 to below list of Prices.

Size	Models A, B or C	Model D	Model E
3 inch	$15.00	$18.00	$21.00
3½ inch	$16.50	$21.00	$24.00
4 inch	$18.00	$24.00	$27.00



The Illustrations below show in Reduced Size the General Style of the various Models

Model A
In 3 sizes—see Price List

Model B
In 3 sizes—see Price List

Model C
Adjustable to various angles by Ratchet and Nut at back. In general appearance it closely matches many makes of speedometers. In 3 sizes—see Price List.

Model D
In 3 sizes—see Price List

The Illustrations below show the (patent applied for) STEM WINDING and STEM SETTING Device

Secured to Dashboard by Satety Locking Device.

Model E
In 3 sizes—see Price List

On Models A, B and C it projects through side of case. On Models D and E it projects through bottom of case and eliminates seconds dials. Compact and effective.

⋙ IF CLOCKS wanted FITTED with this device, ADD $2.50 to Price Lists.

TO JEWELERS During 1910 a quite complete line of our BOSTON MANTEL CLOCKS will be ready.

day and night ring of your watch to match the same ring on the clock, but no disturbance of the hands. As you register at the hotel you ask, dinner? and get answer 24.30—then breakfast, 12.30. These questions are necessary now, so I do not add complications here.

When you arrive in a strange city you must ask about meals, business hours, theater hours, "doors open" hours, etc., etc.; so all this remains the same. Let us put the matter forcibly—while we count *days*, or *dates*, something must vary with east and west; I propose the fixing of hours, for business and sleep to suit each locality, but an invariable time. Get rid of the idea that a certain number, as 7 o'clock, represents the age of the day at all places. As this is the only difference from our present time system, keep the central conception firmly—universal time—local day and night.

Suppose Chicago decided that "early to bed and early to rise" was desirable; then it could establish its legal noon at 17.30, which would be about 20 minutes early for its meridian. You cou'd do business with Chicago for a lifetime and not find this out, unless you looked up the meridian of Chicago and found that it was 17.50 o'clock. None of the railroads or steamship lines of the city would need to know this, except as a matter of scientific curiosity, for the time tables would all be printed in universal time.

For hiring labor, receiving and delivering goods, etc., they would only need to know Chicago business hours. To state the matter in different words, Chicago would only need to decide what portion of the universal 24 hours would suit it best for its day and which for its night, and if it decided, as supposed above, to place its working day forward a little to give some daylight after labor, nothing would be disturbed and only the scientific would ever know. We thus see that great local freedom and great accuracy are alike possible. With our present system, accuracy in local time is impracticable, and has never been attempted, and is confusion confused, since we added the railroad hour jumps. Why did we nurse this confusion till it has become almost intolerable? Because man has always been a slave to mental associations and habits.

Primitive men divided the local day into parts and gave them names, and this mental attitude sticks to us after it has served its day. The advantages of universal time could hardly be enumerated, yet we can have them all by dropping our childish association of 7 o'clock with breakfast time!

How about the date line? No change whatever, so long as we use *dates* which now mean numbering *local* days. It is useless multiplying examples; all difficulties disappear, as if by magic, the moment we can free our minds of local time and the association of the same hour with the same portion of the day at all places.

We are now in a position to consider the next possible—and even probable—improvement in our clocks and watches. To minimize the next step it might be well to see what we can do now. Clocks are often regulated by electric impulses over wires. Electricians inform me that they can do this by wireless, but that owing to the rapid attenuation of the impulses it cannot be done commercially over great distances. In the history of invention the first step was to do something and then find a way of doing it cheaply enough for general use. So far as I know, the watch in the wearer's pocket has not yet been regulated by wireless.

A watch to take these impulses might be larger than our present watches, but it would not stay larger and would ultimately become smaller. You know what has happened since the days of the big "onions," described in the third chapter, Fig. 34; so get your electric watch and make it smaller at your leisure. We have made many things commercially practicable, which looked more revolutionary than this. Now throw out the mainspring, wheels, pinions, etc., of our watches and reduce the machinery part to little more than dial and hands and do the driving by wireless, say, once every minute. I feel certain that I am restraining the scientific imagination in saying that the man lives among us who can do this. I repeat, that we now possess the elementary knowledge—which if collated and applied—would produce such a watch.

Now I have a big question to ask—the central note of interrogation in this little scientific conversation with you—does the man live who can make the earth automatically record its rotation? Do not be alarmed, for I am prepared to make a guess as to this possibility.

A direct mechanical record of the earth's rotation seems hopeless, but let us see what can be done. You are aware that some of the fixed stars have a distinct spectrum. It is not unreasonable to suppose that an instrument could be made to record the passage of such a star over the meridian. Ah, but you say, there is no mechanical force in this. Do not hurry, for we have long been acquainted with the fact that things which, apparently, have no force can be made to liberate something which manifests mechanical force. We could now start or stop the greatest steam engine by a gleam of sunlight, and some day we might be able to do as much by the lately discovered pressure of light. That is, we can now liberate the greatest forces by the most infinitesimal, by steps; the little force liberating one greater than itself, and that one another still greater. A good example is the stopping of an electric train, from a distance, by wireless.

The standard clock in Philadelphia is a delicate instrument, and its most delicate part, having the least force, moves a little valve every minute, and by several steps liberates the air pressure, 200 feet higher in the tower, to move the four sets of great hands. I am not traveling beyond the record when I say that the invisible actinic rays could be used to liberate a great force; therefore, what is there unreasonable in the supposition that the displacement of the sodium line in the spectrum of a star might be made to record the earth's rotation? So I say to the electrician—the optician—the photographer—the chemist and the mechanic—get together and produce this watch.

Permit me to name the new timepiece *Chroncosmic*. For pocket use it would be *Cosmic* watch. In the first chapter I allowed to the year 2,000 for the production of this watch, but it is likely we will not need to wait so long.

Having stated my proposal for universal time, as fully as space will permit, and given my guess as to the coming cosmic watch, let us in this closing paragraph indulge in a little mental exercise. Suppose we copy the old-time lecturer on astronomy and "allow our minds to penetrate into space."

We can think of a time system which would discard months, weeks and days. What is the meaning of the financial almanac in which the days are numbered from 1 to 365 or 366? Simply a step in the right direction, away from the months and weeks, so that the distance between any two dates may be seen at a glance. We would really be better without months and weeks.

Now let us consider the year of the seasons as a unit and divide it into 3,000 chrons. Clocks regulated by star transits, as at present, would divide this decimally, the fourth place being near enough to make the new pendulums of convenient length. This would throw out months, weeks and days, local time and the date line. Each of these chrons would represent the same time in the year, permanently. For example, 464.6731 would mark to a dixmilliemechron (a little more than one second) the point reached in the year; while the date does not, as I have shown in the first chapter. But you object that this is a great number of figures to use in fixing a point in the year.

Let us see what it takes to fix a point in the year now. *Aug.* 24, 11-16-32 P. M., *New York standard time.* A pretty long story, but it does not fix the point of the year even then; for on account of leap years it would require the assistance of an astronomer to fix such a point in any given year, say 1909. But 464.6731 would be eternally right in absolute time of the seasons, and has only one meaning, with no qualifications for any year whatever. I think the astronomers should use a method something like this. Ah, but there is a difficulty in applying this to the affairs of daily life which looks insurmountable. This is caused by the fact that the day and year are incommeasurable. One of them cannot be exactly expressed in terms of the other. They are like the diagonal and side of a square. The day is now the unit, and therefore the year has an interminable fraction; conversely, if we make the year the unit, then the day becomes an endless fraction.

This brings us face to face with the local day which we ignored in our scientific year unit. We must regulate our labors in this world, to day and night, and with the year unit, the chrons would bear no fixed relation to day and night, even for two days in succession. So the year unit and absolute time must be left to the astronomers; but the day unit and the uniform world day of universal time as explained in connection with Fig. 1, I offer as a practical system.

I am satisfied that all attempts to meas-

Three-Ply All Gold and Permanent Watch Cases

MR. DEALER:—

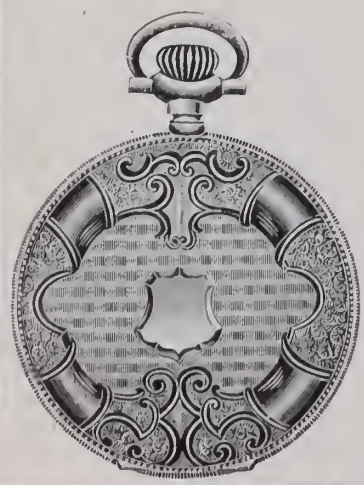
Some reasons why you should stock our Cases:

Every factory claims to make the best on earth, a trial order will convince you we do.

Every factory claims to put more gold into a case for the money than any other. Assay them. If ours does not prove the best value we will pay the loss of making the assay.

Because of the method of construction of our case it will outwear all others.

We have never sold Mail Order Houses. We have turned down every overture made us by Mail Order Houses.



If we are giving your customers good value—

If we are giving you a good profit—

If we are refusing to sell Mail Order Houses and other unfair competitors of yours—

Are we not entitled to a share of your business?

Send for a Catalogue and let us have a trial order.

Pennsylvania Watch Case Company

YORK, PENNSYLVANIA

ure the year and the day by the same *time yard stick* must fail and keep us in our present confusion. Therefore, separate them once for all time. Brought down to its lowest terms my final proposal is:

1. An equinoctial year unit for the astronomers, divided somewhat as suggested, but no attempt to make the divisions even approximate to days and hours. This would fix all astronomical events absolutely. In translating this astronomical, or year unit time, into clock time, no difficulties would be added, as compared with our present translation of sidereal time into clock time. Deal with the year unit and day unit separately and convert them mutually when necessary.

2. A universal mean time day of 24 hours, as now kept at Greenwich, all human business being regulated by this time. Dates and the date line, as well as leap years, all being retained as at present.

3. Weight and spring clocks and watches to be superseded by the cosmic clocks and watches regulated by wireless impulses from central time stations, all impulses giving the same invariable time for all places.

4. Automatic recording of the earth's rotations to determine this time.

In an ultra scientific community one step more might be taken by having only *one day* on the world at once, simply using *Greenwich dates* all over the world. That is, the date would change at *all places* at 24 o'clock, just as it does now at Greenwich. Therefore, dates would change at the same instant at *all places;* which means at all instants of *local* light or darkness. By this method the *date line* would disappear and with it the anomaly of two days on the world at once. This would make very little disturbance to 90° E. and W. of Greenwich; but on the other half of the globe opposite to Greenwich the date would change in *daylight* and there would be two *dates* in a day's work.

Fundamentally, this would not be serious, for night workers and sailors have two *dates* in a night at present, and no confusion results.

Milan's First Clock.

SINCE celebrations are the order of the day, why not observe the sixth centenary of the introduction of clocks? It was, we are told, in 1309 that the first clock known to the world was placed in the tower of San Eustorgio, in Milan. The greatest astonishment and admiration were manifested by crowds who came to see the timepiece. In 1344 a clock was installed in the palace of the nobles at Padua. This was a wonder of mechanism indeed, for besides indicating the hours it showed the course of the sun, the revolutions of the planets, the various phases of the moon, the months and the fêtes of the year. The period of the evolution from the clock to the watch was 71 years—not so very long, all things considered—and the record of the first watch is 1380. A half-century later an alarm clock made its appearance. This, we are told, was looked upon by the people of that age as "un instrument prodigieux." —*London Globe.*

Interesting Old Clocks at Versailles.

Written expressly for The Jewelers' Circular-Weekly by Chas. A. Brassler.

THE celebrated palace at Versailles, the usual residence of the former French court, contains among its many interesting rooms one apartment which is known as the "Salle des Pendulés" or "Clock Room." It was so named on account of the splendid timepieces that have been kept in it. From the accompanying photograph it appears that the number of these clocks is not large now, but there are still to be found three. Among others is the famous clock of Caffieri, of which we present a separate photograph. This clock is reputed to be one of the most magnificent timepieces in existence.

The mechanism by Passment is quite wonderful, including as it does many complicated and astronomical features; but it is to the maker of the case, Caffieri, that this work owes its name. The glass sphere above the dial contains the astronomical attachments, showing the movements of the earth and the heavenly bodies. The dates, week, months and year are indicated below the dial, as are also the phases of the moon. The embellishments of the case are of surpassing beauty, following as they do the style of Louis XV.

There is also a clock by Dauliot, a most complicated piece of mechanism, marking the phases of the moon, the courses of the planets, the days, months and years. Another clock is of English make and was taken at Algiers in 1830.

A clock of the period of Louis XVI. is accompanied, as was the style then, by two candelabra. The timepiece itself bears the figures of two cupids, one looking through a telescope, the other using a pair of compasses on a globe. A handsome clock in a long case is also preserved here. This clock is likewise in the style of Louis XVI.

Among the objects that belonged to Marie Antoinette, which are kept at Versailles, is also a valuable musical clock, which has probably been silent since the death of the Queen. In the course of all these years the mechanism had become defective and the finest parts of the musical attachment had been destroyed by rust. Many gazed upon this relic of the hapless queen, but no one thought of putting it in order again. It was not until recently that Count de Beauchamp caused the French Government to consider the question of restoring this work of art to its original condition, Mr. Leroy, a descendant of the constructor of the clock, being entrusted with the work.

This task has been entirely successful, and in the presence of the Assistant Secretary of State of the Fine Arts the clock was tried a very short time ago. As reported by Paris papers the persons present at the test could not resist a certain emotion when they heard again the old airs to which the unhappy queen had once listened and the simple songs of times long past, by Gluck and Ramean, made a deep impression upon the audience. The old musical clock will find a permanent resting place in the room dedicated to Marie Antoinette in the castle of Versailles.

It is not generally known that at one time there was a sort of royal horological workshop in the Versailles palace, but it is, nevertheless, a fact. It was Louis XVI. who had it fitted up. Louis XVI. not only had a very pronounced taste for mechanics

PALAIS OF VERSAILLES CLOCK, STYLE LOUIS XVI.

in general, but showed especial fondness for horology. From the time of his grand sire, Louis XV., he possessed several small clocks, which he never ceased from observing. He attentively studied the effects, followed the movement of the wheel-work and was enraptured with the perfect harmony that reigned in the entire mechanism.

When a striking movement was deranged

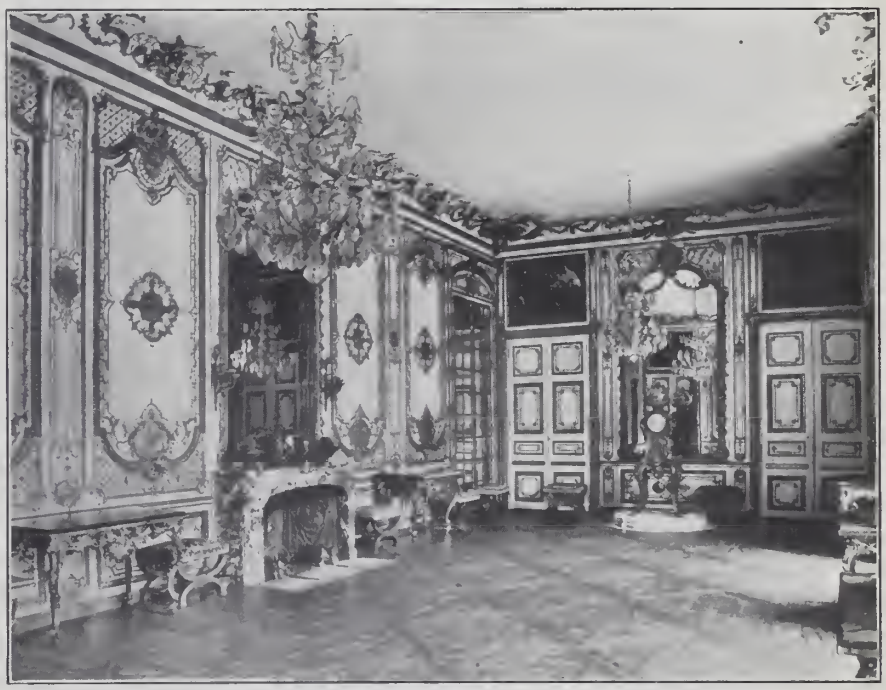
he well knew how to readjust it in accordance with the time. He also succeeded, quite often, in discovering the cause of a periodical or accidental stopping of the members of a watch or a clock, and it was a great pleasure for him, when taking his

CLOCK AND CANDELABRA, STYLE LOUIS XVI., PALACE OF VERSAILLES.

preceptor, Monsieur de la Vauguyon, by the arm, he would lead him into his cabinet and prove to him, mathematically, that the clock did not go because some gearing was too small or too large, or because the escapement lever was too short or too long.

Monsieur de la Vauguyon had no desire to contradict his royal pupil, who would one day ascend the throne and dispense his royal favors. He complimented him on his scientific progress and on his remarkable perspicacity. "I see now as you do," he would say, "why this clock stops." The truth is that the royal tutor saw nothing. In the meantime the dauphine triumphed.



Sometimes, however, his knowledge proved insufficient. An ordinary clockmaker was then called in, who, examining in turn the clock, sometimes showed Monseigneur that he had been entirely mistaken; but this clockmaker of the period in question, who was no other than young Caron, who later styled himself Beaumarchais, knew well how to mollify by his words and by his adroit compliments that which as a formal denial would have been displeasing.

"Monseigneur," he would say to him, "your superior knowledge of the exact sciences places you far above us poor clockmakers of Paris, but if you possess in a supreme degree the theory, properly expressed, you do not know, allow me to tell you, all the difficulties of practice. You would know, then, if you wished, for nothing of ours is impossible to you until then, in that which pertains to the chattels of the trade, we may be slightly superior to you." The young prince, a little confused, felt that the artist had spoken the truth, but being endowed with an excellent character and an intelligence beyond his age, he preserved his habitual serenity, and, profiting by the presence of the horologist, caused him to impart to him a lesson in horology, of which he was quick to take advantage.

"Mons. Caron," he said to him, "you are a very skilful man, for it was you who made for my good friend, Madame de Pompadour, that pretty ring, in which is set a two new members of your invention. They are, I believe, an escapement that is very ingenious and a supplementary wheel, with the aid of which the watch can be removed without requiring a key. Madame de Pompadour is proud of the jewel, and in her place I should be as proud as she is. But, tell me, my dear master, can you not make me a similar watch? I will pay you well, because I am not extravagant, and I am saving. Will you? We will say nothing to any body and they will be surprised to see it on me. I shall show it to my aunt, Princess Victoria, for whom you have made a charming little clock.

"I know, M. Caron, that this good princess has a high regard for you, for she has often said in my presence that you are a great artist and a man of much intelligence." Caron was not cautious of yielding to the wishes of the young prince; the future author of the Barber of Seville and the marriage of Figaro had long dreamed of giving up clockmaking to devote his attention exclusively to dramatic literature, for which he felt an irresistible inclination.

From the age of 15 years the dauphin had had set up in his apartments at Versailles a delightful workshop, in which he worked alternately at locksmithing and at clockmaking. Many of his historians say that he well knew how to repair locks and take apart and put together again, passably, complicated clocks. These manual amusements were quite respectable, even for a future King of France, above all, during the reign of Louis XV., when manners were corrupted, when license openly prevailed, and when it would have been so easy for young Louis of France to have followed the baleful examples before his eyes, to give

CLOCK ROOM OF LOUIS XV., VERSAILLES, WITH CLOCK BY CAFFIERI.

watch movement. My God, what patience you needed to make all the little wheels that work with so much regularity in their housing of gold, studded with diamonds. It is said that there are in this mechanism himself up to worldly pleasures, and, above all, to the impure but regally beautiful sirens who tempted him daily. But no, the grandson of Louis XV., who possibly foresaw the storm that was gathering

in the heavens, prayed, studied and worked.

After his marriage the dauphin, who occupied the Castle of Frianon, continued to occupy his leisure with occupations connected with clockmaking, and he really only ceased when he became King of France. But even then he encouraged artists and never allowed an opportunity to escape to purchase horological and chronometrical productions of evident merit, and he soon had at Frianon a collection of the finest horological specimens made by Ferdinand Berthoud, d'Autian, Le Paute, Robin, Lepine and Janvier. Many of the clocks that

FAMOUS ASTRONOMICAL CLOCK OF CAFFIERI.

belonged to Louis XVI. are to be seen today in the apartments of the Trianon and in those of the palace of Versailles.

And while the royal personages are long resting in their graves these mute witnesses of their doings, which told them of the passing of many gay and sad hours, still keep on ticking and marking the flight of time in their accustomed places.

It is news to thousands of Buffalonians who have been passing Lafayette Sq. in the last few days to know that the big clock workmen have been building there is a novel idea in raising funds for the new Buffalo Hahnemann Hospital. It is hoped to raise $150,000 by the clock in the next two weeks. This big clock will be electrically lighted at night and will tell people the amount of the receipts.

Novel Electric Clock for High or Low Voltage

Described and Elucidated for The Jewelers' Circular-Weekly by the Inventor, H. D. Hickok.

THIS clock, invented by R. D. Hickok, Atlanta, Ga., is in that class in which electrical contact is made at "minimum beat," and, it is claimed, has the advantage over that in which a spring or weight is used, by the fact that an escapement is not necessary. Moreover, it is claimed it makes practically no difference whether a high or low voltage is used.

In a case where a weight is raised by a magnet to propel the clock, any fall in voltage below that necessary to lift the weight will result in the stoppage of the clock.

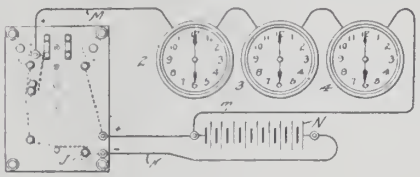

FIG. 1.

This arrangement for obtaining a contact and impulse at "minimum beats" is in several ways unique and differs largely from the trailing tongue device frequently used.

Referring to the drawing, Fig. 2, will be noted an inverted V-shaped piece B, which is attached to a swinging arm a. The piece B is placed in the path of a pin C, which swings with the oscillations of the pendulum. It will be seen that when the pendulum swings to the right the pin C will lift the piece B, pass under it, and, returning to the left, will depress B and pass over it, except at such times as the pendulum falls to "minimum beat," when C will catch the notch in B, thus making the electrical contact at J (Fig. 1), by raising arm F and depressing spring H.

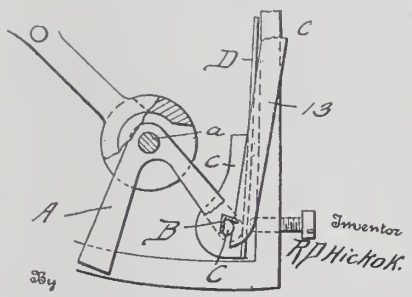

FIG. 2.

Among the advantages embodied in this device may be mentioned the small amount of power required to operate the parts. The movement of the pendant A caused by the swinging of the pendulum is very small, as the total movement of A is only about eight degrees. A is also made of aluminum and the pivots are jeweled.

The greatest saving of power is made in the arrangement of the spring H. It will be noted from the examination of Fig. 1 that the bending of the spring H takes place during the first half of the swinging of the pendulum to the left, and that during the remainder of the swing, the spring H is brought back to its normal position. Therefore the power required to bend the spring H during the first half of the swing of the pendulum is returned to the pendulum during the last half of its swing less the friction of the parts.

When the clock is used as a master the same contact by the spring H is used to propel the secondary clocks by simply adding a switch at 19, Fig. 3, and an arm 13,

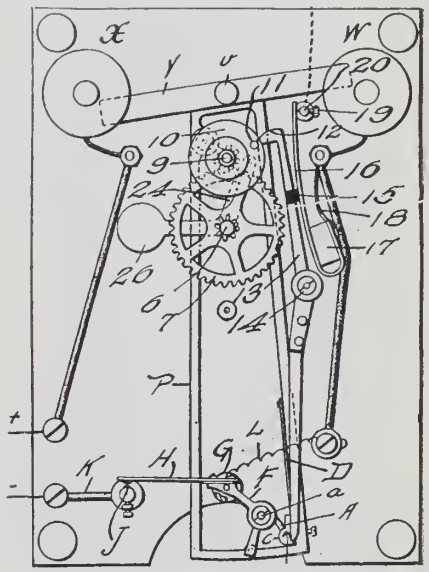

FIG. 3.

which closes the switch at 19 through the spring 16. The movement of the arm 13 is caused by contact with pin 11, which is carried on the seconds wheel arbor 9; the lower end of the arm 13 engages pin C, and causes the contact device both at 19 and J to operate once per minute.

The secondary circuit is placed in a shunt with the driving electro-magnets of the master clock, as shown in Fig. 1. It will be seen from the above that the secondaries will be operated only at the periodical minute contacts, and those contacts which occur between the minute contacts will not operate secondaries because at such times the switch at 19 is not closed.

The clock has been in use for several years and has been shown to be a very accurate timepiece, the maximum variation of three seconds per month being an ordinary rating.

The current consumed by this clock per impulse is six one-hundredths of an ampere; the Watt-minutes consumed per day are about 11.

A company has been organized and a factory built for the purpose of manufacturing these clocks. The factory is fully equipped with machinery and electric motors with a capacity for 200 clocks per day.

It is the intention of the concern to have subsidiary companies formed in the different cities, and these subsidiary companies

will install secondary clocks in office buildings on a rental basis of 10 cents per week.

This system is particularly fitted for public buildings, colleges, schools and tower clocks.

Mr. Hickok was formerly a watchmaker associated for five years with Charles W. Crankshaw, one of the leading jewelers of Atlanta.

Having recognized the necessity for a satisfactory electric clock, he set to work

R. D. HICKOK, ATLANTA, GA.

to produce a clock without any electric contacts in the secondaries, and the result is now before the public.

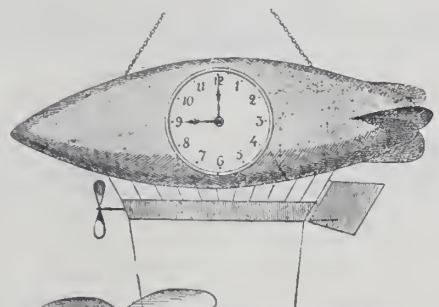
Some Aeronautical Show-window Displays.

SINCE the famous aviator Blériot crossed the channel in an aeroplane, the whole world has been interested in aviation. The localities that arrange meets of aviators see them attended by throngs of curious people. I was recently in a city in the north, in which the daring Paulhan was flying, says G. Delannoy in *La France Horlogère*, and I saw a crowd of people in front of the show window of a merchant. And like a true saunterer, I wanted to see what there was interesting, and I found that what attracted this crowd was a display of little aeroplanes in miniature, of biplanes and monoplanes, capable of flying 20 to 30 yards. A constant procession of great and small personages commented on the different models. On account of its timeliness, a miniature aeroplane at the present time is an excellent show piece. This is what impressed me as a result of this observation.

But how could a clockmaker happily interpret this idea? After having considered the undertaking, I arrived at the very simple Blériot clock of which I undertook the construction.

The miniature aeroplane, shown herewith, resembles, as closely as possible, the type of the Blériot machine No. 12. It has a spread of sails of 20 inches in a total length of 20 inches. The wings are four inches broad. The framework, in place of being rigid is jointed in several places, so that the tail can be bent if it is awkward.

In front a two-wheeled chassis, on two rubber-tired wheels, supports a movement with a circular escapement. The spindle work is provided at the back with a deep horizontal rudder, which supplements a vertical rudder for direction. One rubber-tired wheel, smaller than those in front, supports in the rear all the framework. I may state that in journals devoted particularly to aviation the addresses can be found where the rubber-tired wheels, the tubes, the wire, the aluminum parts, etc., in short, all the fittings for the construction of the miniature aeroplane can be obtained.



The movement, placed in front of the

A BLERIOT AEROPLANE CLOCK.

chassis, bears on the staff of the center wheel a propeller of aluminum. This propeller makes one revolution in an hour and carries two dials, each with a hand. One shows the hours, the other the minutes. The hour dial shows figures 1 to 12, the minute dial from 5 to 60.

Let us look first at the minute dial. The minute hand is simply attached to the end of a pin fixed on the propeller. But about the pin the dial is free, and preserves, in spite of the rotation of the propeller, the verticality of the figures, thanks to a coun-

AERONAUTIC CLOCK MADE BY M. DOUÉ, A FRENCH WATCHMAKER.

terpoise placed at the bottom of the dial (the center of this weight corresponds with a line drawn from the center of the dial to the figure 30).

In the case of the hour dial the arrangement is complicated by a motion work. A pin, also attached to the propeller, firmly receives the canon pinion; the dial, equipped with a weight as in the preceding instance, to preserve the verticality of the figures, is free on the canon pinion, but it carries with it the minute wheel and the canon wheel, on which is adjusted the hour hand. At each revolution of the propeller it advances one division and makes a complete turn for 12 revolutions of the propeller.

The better to grasp the mechanism, the clockmaker, in the construction of the propeller, can make use of a model quickly made. It suffices for this to take an old key-watch movement, divested of its barrel, its cylinder and its escape wheel. On the winding square firmly fasten a key, the extremity of which you equip with a strong copper wire under the catch or screw of a heart-shaped carrier; set the other end of the copper wire on a mandrel; then bend the copper wire in such a manner as to present the dial of your movement as it will be placed on the propeller, having the mandrel as center of rotation; cause the dial to turn in revolving the mandrel in the fingers and you will thus obtain a perfect model for the production of your propeller.

In the drawing that accompanies this device the propeller is equipped for turning in the ordinary direction of the hands of a watch. If the propeller turns in the opposite direction, the order of the figures on the dial should also be reversed. To bring the two dials into unison the propeller is placed vertically, the minute dial above. In this position the minute-hand records 60 and the hour hand should be found exactly on some figure, rather a little ahead of this figure than behind it, to avoid confusion in reading the hours.

To set the hour, the propeller has to be turned by hand.

THE AERONAUTIC CLOCK OF M. DOUÉ.

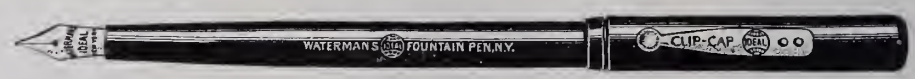
Here is an aeronautical clock by M. A. Doué, clockmaker of Vielsmaisons (Aisne). He combines an aeroplane with a dirigible balloon, the appearance being somewhat astonishing. The dirigible balloon accommodates an ordinary dial in connection with a striking clock movement. Its structure is of iron wire covered with colored paper or fabric; the aeroplane is constructed in the same manner. There is nothing complicated in the mechanism.

Mr. Doué has done away with the fly of the striking works of the clock, only retaining the wheels necessary for holding it; he has adjusted on the counting wheel or locking plate a grooved pulley, which, by means of a thread of silk, or a horse hair, transmits the rotary movement to the propeller of the dirigible which carries a similar pulley, perhaps a second pulley, which transmits the rotary movement to the propeller of the aeroplane.

In order that the propellers shall work often it is only necessary to equip the canon pinion with a number of pins for all the unlockings; the rotation movement will then be effected. It is necessary to equalize the notches in the counting wheel if we wish the propeller to revolve for the same space of time on each occasion.

M. Doué advises clockmakers who wish to utilize his system to use large pulleys, in order to avoid slip and obtain a good result.

The aeronautical clock contains nothing that is mysterious, but it tells the time in the show window and amuses the passer-by by the frequent revolution of its two propellers.



The D. Edward Kennedy Co., Cordele, Ga., has been incorporated with a capital of $10,000.

Somers Fisher, Schellburg, Pa., has purchased the business of Charles H. Dorn, of Hyndman.

The Dead-Stock Invoice.

Written expressly for The Jewelers' Circular-Weekly by Xeno W. Futnam.

ANNUAL inventory should be made as effectual in sifting out the year's dead stock as in determining that which may still be listed among the assets. This does not mean merely the separation of salable from unsalable goods. It means a general sifting out of dead policies, dead methods, dead accounts and deadheads of every sort.

The dead advertisement has cost enough already; it is time to cast it aside and look about for something better than the old one ever was. Throw out the meaningless stock cut also, that was never pertinent to the subject, and it represented only a low grade of wit. Let the set phrase go with it and the big display type that advertised nothing, while it cost a great deal. Get up entirely new copy and fill it with enthusiastic trade talk; something that will warm the reader up to the subject of better material and more artistic patterns.

Aim at neatness and give plenty of white background for effect, and use everything else for straight business sense. If you have a good cut of something that is good enough for a special ad., use it, providing it will tell more than a word picture can tell in the same space. The "comic" cut was never intended for people of refinement and cultivated taste, such as the high-class jeweler advertises to.

Dead stationery, while not so frequently seen in the jewelry store as elsewhere, is never attractive. Get it in smaller quantities and renew it frequently. Type faces change the same as other fashions, and people who are well informed can tell by the typography and paper stock how recently the letter-head or business card has been printed, even those who have no special knowledge of the subject realizing that it looks "old-fashioned." No one would look for elegance where shabby or out-of-date stationery is in use. Better discard it and get something neat and new.

The dead store space is worse than wasted, always, and there is never a foot of it to waste. Compact arrangement means neatness and it also means convenience, as well as superior display. Discard the cases that do not fit the space or stock and replace them with something that seems cut exactly to the pattern of the place. It will cost a little more in the beginning, but the wasted space and slovenly appearance of misfit cases will always cost more in the end.

Supporting posts, irregularities in the wall, must all be reckoned with and made an addition to the convenience of the place or to its attractiveness, instead of being conspicuous eyesores. Use the post for some elaborate display; the show window is not the only place where artistic designing counts. In this age of store decoration there should not be a foot of space that cannot be made good use of.

The dead window arrangement has, of course, been banished from every modern jewelry house, though it is seen frequently enough in other lines. Still it might be a good plan to take time for a mental invoice of the current window policy; is it as effective as it can be made or would more frequent changes add to its attractiveness? Anything that is out of place or out of joint in window management is dead and should be included in this list of discards.

The dead poster, too, should claim our attention, whether it is an advertising card, a calendar, or an artistic price-card. Today's stock is never well advertised by yesterday's dust, and anything that is worthy of use at all is worth renewal frequently enough to keep the place new and fresh in appearance.

The dead arrangement of stock sometimes becomes a matter for burial and resurrection. Stability is one thing and monotony is something wholly different. Sometimes the rearrangement of the articles in a case will give them the appearance to old customers of a new stock. People undoubtedly like to know where to find the watch department without hunting for it, but they do not always like to have the same peculiar watch blinking at them from year to year from exactly the same old hook. Freshen up the arrangement, case by case, occasionally, and see what a new cast it gives to the whole place.

The dead account had better be disposed of finally, in some way. It has bothered the bookkeeper long enough and has no possible use which entitled it to a place among the resources. It is rather a liability and had better be gotten rid of in some way. If it cannot be collected, or if circumstances do not seem to justify that, there is no use letting it add to the bookkeeper's row of figures any longer. Drop it out, but file away a memorandum of it, so that the correct figures may be readily obtained if the unexpected should ever happen and the account be paid. Do not, however, longer retain it as one of the assets of the firm. This cutting off may injure the annual showing of the firm's resources considerably, but there will be the satisfaction of knowing that what is left is genuine.

The out-of-date account system is no less a part of the dead stock. It cumbers up the bookkeeping department with much work and many figures. At the same time it discourages modern ways of doing business, because it has no adequate provision for those ways. Except by a discouraging amount of gleaning, no complete system of cost accounting is regarded in the old-fashioned method of keeping books. Let the old system go with the other dead stock, and replace it with something that is less cumbersome and more complete.

The dead timber in the retailer's own heart, too, should come in for its share of careful inspection. Many of the old trade ideas are dead. Competition now means competitive expansion and not ruinous warfare. Salesmanship includes a demonstration of the goods and is not limited to taking an order—and the money.

All modern business ideals are warped and crowded a little by each bit of dead and decayed commercial timber which the merchant permits in his own business policy. Dispense with some of these; with all of them, if possible. Close up the account with Colonel Grouch and open a new one in its place with General Good Will. Wind up the clock for the year 1910 and let the cares and grudges of the past go out with the old year's mistakes and worries.

Advice and Things.

(By J. C. Strauss, in *Business Philosopher.*)

COURTESY to customers is a commodity never cheapened by over supply.

An employe who is always looking at the clock rarely sees a bank account.

Excuses are the enemies of advancement.

Postponing duties until to-morrow postpones promotion much longer.

"I forgot" never fattens a pay envelope.

Original suggestions for Easter window displays will be published in this department Feb. 16.

Compare the Old With the New

About the only point of similarity between the electric lamp commonly in use and the new G. E. MAZDA Lamp is that they fit the same socket. That makes it easy to replace the old lamp with the new

MAZDA LAMPS

But the G. E. MAZDA Lamp gives nearly three times the light of the ordinary type electric lamp without requiring any more electric current.

In the sunshine glow of the G. E. MAZDA Lamp, gems flash and scintillate as they do in bright sunlight.

You can make your store as bright as day by installing these lamps that mark the greatest advance in electric lighting since Edison's invention.

All progressive lighting companies and electrical supply dealers handle a complete line of G. E. MAZDA Lamps.

To get the genuine G. E. MAZDA Lamp insist on seeing the famous G. E. monogram on each lamp you buy and on the carton containing it.

Promiscuous Mailing.

(W. Clement Moore, in the *Advertising World*.)

STOREKEEPERS make a very common error of mailing their literature to people who are not interested in their proposition at all. Without question, good, reliable mailing lists are a most valuable resource if compiled with the greatest possible care and forethought, but it is a losing proposition to mail advertising matter to persons who are not at all interested in what you are endeavoring to sell.

The best lists to work upon, of course, will be those names secured in answer to your own advertising. These will be exactly what you want. But, if this list is not large enough, then write to companies offering a proposition similar to yours and buy their lists of names.

Still another very good way to get names is to offer a commission on all goods sold to names suggested by your regular customers. For instance, if you are selling watches, write to one of your customers and ask him to send names of 10 friends who need watches and offer to pay him (say 10 per cent.) $1 or $2 for every one that buys a watch. This will lead him to suggest the best possible names and you will be securing cash returns at a very small outlay.

Perhaps every advertiser has already been advised many times to use the best stationery he can afford, but the importance of it cannot be too firmly impressed upon the advertiser's mind.

Aim directly at possible customers only. You would not waste breath in trying to talk gas lights and electric trains to a backwoodsman—then don't waste good circulars the same way.

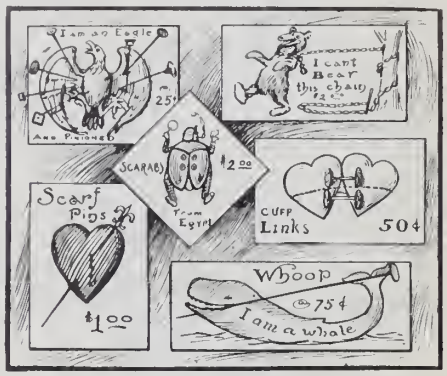
The Art of Window Dressing

With Numerous Timely and Original Suggestions

Prepared expressly for The Jewelers' Circular-Weekly

OFTEN dealers are at a loss for subjects to lend attractiveness to their window display. The following suggestions may serve as a basis around which the dealer may arrange various showings. As these are merely intended as hints, only meagre descriptions will be given, and the window dresser can elaborate the ideas to meet his own needs.

Photos, frequently changed, can be utilized to great advantage, but care must be taken to show unusual subjects, such as pictures of scenery, of natives, of houses taken in foreign lands which happen to be momentarily interesting, as, for instance, Nicaraugua at the present time, etc., etc.—so different from our own country—always are. Pictures of Africa will be especially interesting when Roosevelt returns.



Naval pictures are, to the dwellers in inland cities, particularly interesting; views of Bahama, Bermuda, Florida, Mexico and any other warm climates are sure to be attractive to inhabitants of our northern cities, while scenes showing skating, sledding, snowballing, ice palaces, etc., etc., will draw the attention of persons to whom these sports are unusual.

Pictures of new inventions, such as airships, submarines and other novelties, are good to use anywhere.

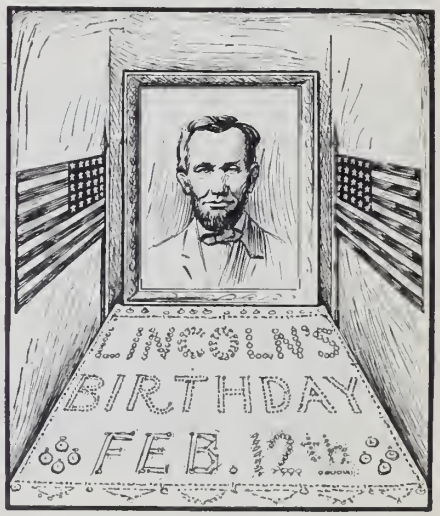
When yacht races are on, or automobile contests are being held, such pictures could be made use of.

Constructive windows, that is, displays showing the various stages of manufacture of some article, including specimens in the raw material and in its progressive forms, are always interesting.

Details enabling the public to be posted on current happenings and timely information not generally known to the public can be utilized as drawing cards.

PRICE CARDS FOR VALENTINE'S DAY.

Odd bits of ancient history or queer historical facts attract attention and interest when compiled from reliable sources.



Specimens of plants not usually seen in your locality make an interesting exhibit. The cotton plant, sugar cane, tobacco, etc., will illustrate what is meant. The growing plants will be watched with interest.

Fruit, nuts, etc., converted into likenesses of human faces are an odd showing. Oranges, for example, may be slit on either side and the peel flapped out for ears, a mouth with teeth showing may be made by removing part of the outer peel, and coffee beans inserted into two little holes will form eyes. Cocoanuts can be carved into semblances of queer faces; peanuts, by the aid of a few bits of toothpick and some ink, made up into funny pigmies, and so on—all simple stunts, but very attractive for a time.

Storekeeping Department.

make, mount a large picture of an auto race, a bicycle race or a trotting match on stiff cardboard. Then cut out from a similar picture one or more wheels and fit these on small shafts connected with clockwork or an electric motor. The turning wheels will give the picture a very realistic appearance.

Miniature stage pictures can be used to good advantage as a setting for a window. For instance, a garden is set with green base, a rustic fence, a few vines and small trees—all made of paper except the branches of trees.

A forest may be represented by similar scenery.

A drawing-room is made up by using on three stiff bits of cardboard a few small pieces of wallpaper.

A fireplace is easy to construct, so is a snow scene showing some cold weather sports.

Then the opposite idea can be utilized—giant articles, immense watches, big rings, jumbo alarm clocks, all constructed of cardboard and made many times the regular size—the "bigger the better"—for show purposes.

Poetry—of a sort—serves to impress facts in a way that might not otherwise attract people. Suppose it's alarm clocks or watches that one is featuring. Something like this wouldn't go bad on a large card:

> I'll stop being late these Wintry days,
> I'll be ON TIME and get a raise.

If rings are being featured, the following will suffice:

> I'll buy a diamond ring for Mary.
> She'll then forget to be contrary.

For silverware:

> New silverware I'll buy for ma,
> She's had her's since she married pa.

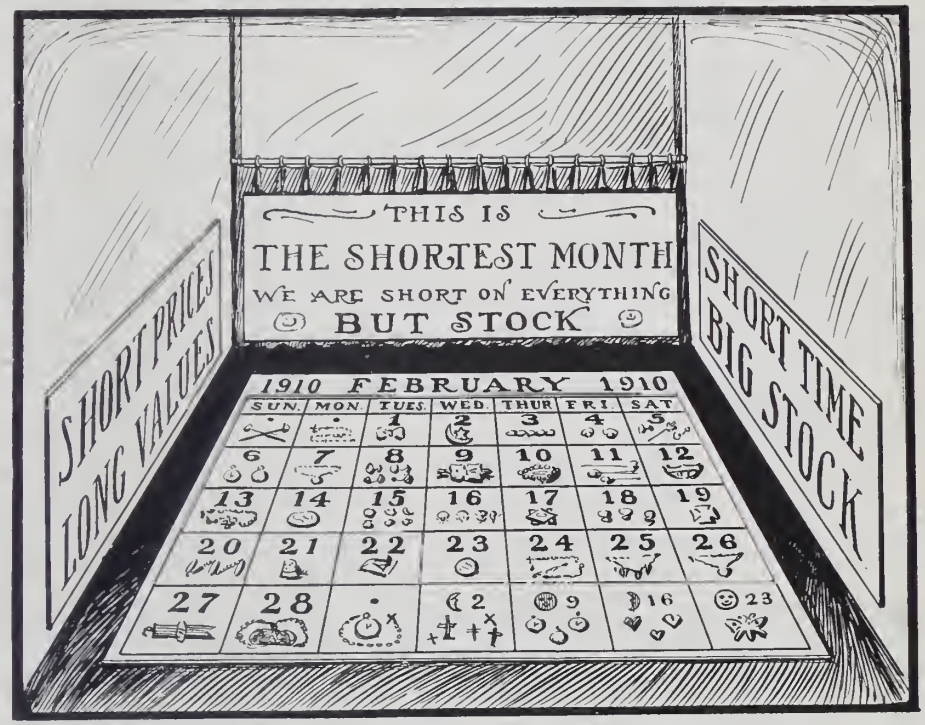
For watch chains:

> I'll buy at once a new watch chain,
> Then I'll not drop that watch again.

It is not necessarily the elaborately worked out novelties that sell goods; sometimes the simplest little things are equally effective.

Valentine's Day.

Cunning and comic valentines can be made by making funny animals out of paper or cardboard and using them as price and display cards for jewelry of every sort. As the variety is endless the number of "animal cards" made up is limited only by the size of window and the dealer's time and imagination.



If some thought be given to this display, a novel and trade drawing effect will be produced. The finished "valentines" can be nailed to back and sides of window, suspended by strings from ceiling or laid on the base of the window.

Make up your cards and have all ready before beginning to decorate the window.

In Honor of Washington and Lincoln

Form of large sheets of yellow cardboard gigantic watches, and so arrange your window at the rear that these appear suspended in the air by red, white and blue ribbon (each color a separate ribbon).

Have the ribbon tied at ends to two big spikes. Let the ribbons intertwine as loosely as possible, and drape festoons at the corners. Decorate two of these "watches" with pictures cut out of some magazine or paper of the country's two most illustrious Presidents, and decorate as many others as you care to use with the advertising best suited to the watches which you prefer to feature. The signs at the top and bottom of the display are subject to such changes as best suit the dealer's ideas.

AN EFFECTIVE AND SIMPLE METHOD OF DISPLAYING NOVELTIES, ETC.

If preferred, the dealer can lay out this show in the base of the window. In this case, however, the "watches" should be smaller.

Most merchants wish to utilize the base of their windows for a showing of small wares of various kinds.

At the rear of the window place a picture or bust of Lincoln. On either side drape with a flag stretched out smoothly, and on the base of the window arrange to spell out the words as shown in sketch with small articles, such as rings, watch chains, fobs or cuff buttons. If care be used to keep the display extremely simple a good effect can be obtained.

A Calendar Window

A novel "calendar window" may be arranged as illustrated above. It is bound to attract a great deal of attention on the part of passers-by owing to its unusualness.

It, moreover, affords excellent opportunity to the jeweler to display small articles to good advantage.

Block out the base of the window so it can be arranged as a calendar of large size. On this "calendar" display your specialties.

Getting the Employe's Best Co-operation.

NO merchant can attain large success by his unaided efforts. His apprentices, his workmen, his clerks supply the force which carries his business craft up the business hill.

Encourage them, therefore, in the work. Stimulate their ambition to become proficient in their duties. Take time to show them the little wrinkles you have learned, which save time and improve results. Be kindly and sympathetic.

Give ungrudging praise where they have done well. Avoid harsh words and humiliating language when you reprove.

Then permit them to see that you are interested in their welfare. Inquire after their families, give them a little present occasionally, let them feel that you will do your very best for them, and this will develop the spirit of reciprocity so they will do their best for you.

When you can develop the utmost capacities of all the people in your establishment, arouse their enthusiasm, generate in them an interest in the business and a desire to have it grow, then you have an organization whose concentrated efforts will prove irresistible.—*Harness World.*

Selling Schemes.

THE sales of Emanuel Gershuny, South River, N. J., have been increased by selling goods on 10 days' trial.

*

Exhibited in the store of C. P. Remillet, Newark, O., a short time ago, was the skin of a black diamond rattlesnake killed near Eustis, Fla., several weeks ago. The skin measures seven feet two inches long, and the reptile weighed about 78 pounds and contained 14 rattles. The display attracted a great many visitors.

Many a brother jeweler has made an additional dollar or two in his repair department by introducing a new joint, catch and pin for barrettes, to his lady customers, when the old fastenings failed to hold. Made of heavy unbreakable elastic stock.

Our Motto: The Best of Everything

The Law and the Retailer.

By Bernhard Raymond, LL.B.,
of the New York Bar.

INTRODUCTION.

IN order to avoid frequent and unnecessary litigation, to prevent loss of time and expense of legal suits, and, above all, to enlighten the jewelry merchant of the legal effect of the daily transactions in which he necessarily engages, whether he takes a partner or becomes one, sells or purchases goods, employs, or is employed as agent for another concern to sell goods, and, in fact, in any of the many commercial obligations he is called upon to assume, it is thought most beneficial to the trade in general to publish and expound the law governing the above mentioned commercial relations.

New tribunals of justice are constantly being created to cope with the mad rush of legal business, both civil and criminal, and yet the courts, with all the modern legal machinery at their command, taking testimony in shorthand at the rate of 15,000 words per hour, with all their presumptions and exclusion of evidence to prevent unnecessary prolongation of trials, is compelled to suffer cases to remain on the calendar for years, during which time plaintiffs die, defendants become bankrupt and witnesses hopelessly disappear.

In truth, a layman may well blame the courts, for if the courts had not adopted the long-recognized doctrine that ignorance of the law is no excuse the courts would be in a position to determine disputes summarily and thus curtail the present elasticity of trials by putting the parties to their proof.

But upon closer analysis it will be seen that the courts have adopted this well-established doctrine for its expediency in preventing the miscarriage of justice. The fault, then, for the congestion of the courts will shift to the shoulders that ought to bear it. It must be laid at the door of ignorance of the law, of its method of reasoning, construction and application.

Men having insufficient legal knowledge to draw a notice to a tenant to vacate premises for non-payment of rent; men, who, desirous of purchasing a straw hat or a leather belt, deliberate for a month will enter into a contract of co-partnership or matrimony or agency without the slightest deliberation, in a moment, little dreaming of the technical intricacies and legal complexities surrounding the transaction.

The writer has known men—illiterate men—whose understanding of the legal significance of their negotiations may well be described in a single word—"Darkness"; and yet such men readily and unhesitatingly sign mortgages, execute bonds, go into partnerships, employ agents, issue notes and draw checks, and, what is more remarkable, pretend (of course at the time and not afterwards) to fully appreciate the gravity of the transaction with the air of a Webster, a Blackstone or a Choate.

Thanks to men of such ready and accurate perception of legal matters, our courts are devoid of standing-room; the books are free from dust in the legal libraries, and lawyers are supplied with a more profitable place to keep their hands than in their own pockets.

For the above reasons space will be devoted to the exposition of the law affecting every-day transactions and of general service to the trade, such as checks, notes, bills, trade-marks, contracts, agency, co-partnership, etc., in a simple, comprehensive and instructive form.

The Law of Partnership.

The law governing the relation of co-partners between one another and that between a co-partnership and third persons dealing with it is one of the most interesting, important and engaging branches of commercial law.

A general acquaintance with the law of partnership is indispensable; first, for the reason that, while the partnership relation arises from the agreement of the parties, the law implies powers and attaches obligations to the relation, which they had not anticipated, and, in fact, could not provide against had they thought of it. For instance, if they agree upon an arrangement which is a partnership in fact, it will not avail them to call it something else, or that they even expressly declare that they are not to be partners. The law must declare what is the legal import of their agreement; the names go for nothing when the substance of the agreement shows them to be inapplicable. Poste vs. Kimberly, 9 Johns 470.

Second, knowledge of the law of partnership is important, for the reason that tradesmen will enter into an agreement intending to create a partnership and assume the relation of partners, yet, if they so frame the terms and provisions of the contract as to leave them without any community of interest in the business or profits, they will not be partners in fact nor in law.

A partner, therefore, is the legal relation founded upon the express or implied contract of two or more persons to combine their capital, skill, credit or labor for the purpose of sharing profits between them derived from the common business.

It contemplates the transaction of some lawful enterprise, trade or occupation, in which the parties are to have a community of interest.

Partnerships, therefore, for the purpose of carrying on an unlawful business, to stifle or to prevent competition, to hinder or delay creditors, to carry on business with a country at war with our own, or in violation of the provisions of custom regulations and the like, are void. 23 N. J. E. 257.

The members of an illegal partnership cannot invoke the assistance of the courts, and tribunals of justice will leave them where they are. The courts will not administer justice between rascals. It will not compel restitution, contribution or an accounting of their illegal dealings.

As a general rule, any person capable of entering into a contract is competent to enter into a co-partnership.

An infant may be a partner, but his contract is determinable at his option. Infancy is a valid defense against both a co-partner and a third person seeking to enforce a partnership liability. During the continuance of the partnership the infant has all the rights of an adult partner and is clothed with all the powers of an adult member of the firm.

He may collect and pay debts; take and give orders, and make contracts binding the co-partnership and the adult partners, though he may at his will repudiate the contract and thus escape liability. This peculiarity is not to be understood as a creature of the law of partnership, but rather as an illustration of the fatherly care and protection exercised by the courts over the infant, in an earnest desire to guard his interests.

His interest in his partnership assets remain answerable for the partnership liabilities. Yates vs. Lyon, 61 N. Y. 344.

The infant cannot voluntarily withdraw his property from the partnership after remaining in the business for some time unless he was induced to enter into the co-partnership and became a partner by fraud. Sparman vs. Kleim, 83 N. Y. 245.

The adult partner cannot escape liability on the contract of the infant by reason of the infant's incapacity to contract. If the adult partner has been induced to enter into the co-partnership by the fraudulent representations of the infant that he is of age the adult may institute an action for the dissolution of the partnership.

If the infant partner remains in business after he arrives at his majority a ratification of the prior partnership transactions may be inferred from his acts, and thus his liability becomes fixed. A married woman at common law was incapable of entering into a contract unless it be with reference to her separate estate. Such disability, however, is now removed by statute, and a married woman may enter into a contract of co-partnership. She may, now, enter into such an agreement even with her husband. Suan vs. Caffe, 122 N. Y. 308.

(To be continued.)

Weekly Meetings with Clerks.

THERE is no retail store in the country that cannot afford a half-hour each week to a discussion of store subjects and to instruction to the entire sales force, says the *Southern Merchant*. Such a period of discussion and instruction will bring out the latent qualities in many clerks and will impress upon all of them the fact that to sell goods is more than to be able to know what is on hand and offer it when asked for.

Not only can the force of clerks understand by such common meetings that instruction is not individual, but for the common use of all, and thereby avoid a misunderstanding, but also the power of team work that can be infused into the understanding of the whole force. To raise the power of the selling force of the store is one of the necessities of storekeeping now.

Humorous Signs Used to Ward Off Requests for Credit.

WHILE the modern tendency is to conduct retail stores as nearly as possible on a cash basis, there are still many localities where a limited amount of credit must be given to certain customers.

Many queer signs have been devised to ward off requests for the opening of accounts. These semi-humorous cards form a good-natured method of informing the general trade that cash transactions are preferred, and while all these sayings are not adaptable to every business, some of them fit in very nicely for the jewelry trade. At any rate, here they are:

OUR CREDIT DEPARTMENT IS ON A LIMITED SCALE

NOT HALF THE WORLD KNOWS HOW THE OTHER HALF OWES

CREDIT TO NOBODY

Then an old bill file forms the center of another sign, and from it are suspended numerous unpaid bills:

WHY WE DO NOT CREDIT

Bill File with Unpaid Bills

The following poetical effusion is almost too forcible:

TO TRUST IS TO BUST
TO BUST IS HELL:
NO TRUST—NO BUST,
NO BUST—NO HELL.

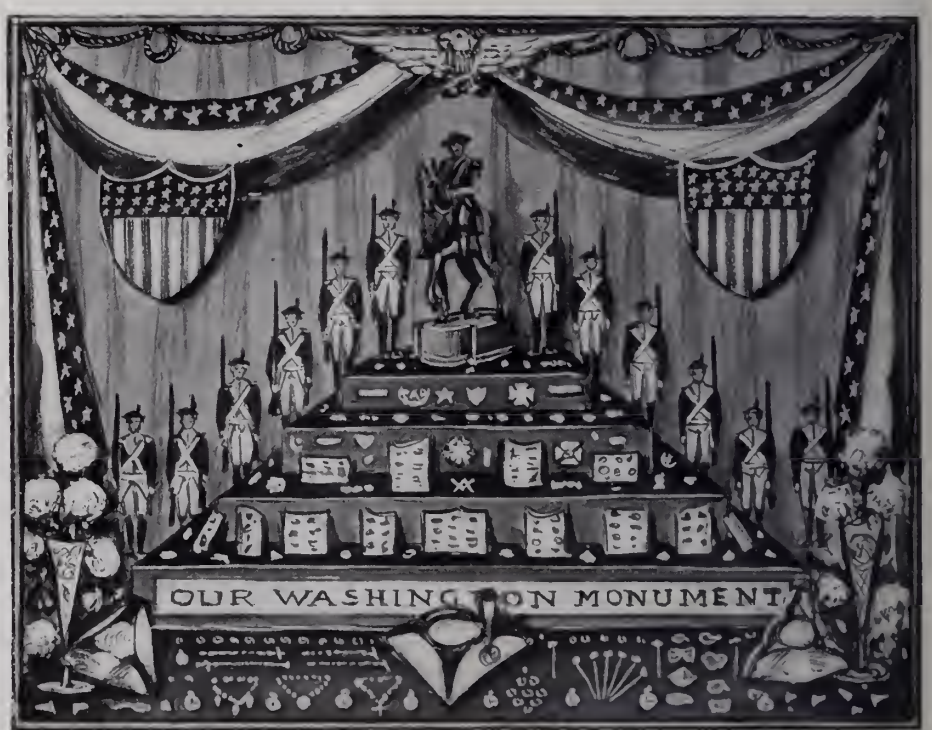
Simple but logical is this one:

WE BUY FOR AND SELL FOR CASH

This unique sign was posted on a show case. In the center was fastened a tiny pill box with a slit cut in:

Parties desiring credit will kindly file applications here

The same will be referred to our Credit Manager



This is a lugubrious one, but hits the right spot:

CREDIT'S DEAD—
CASH KILLED HIM

An Independence Day Display.

(Prepared expressly for THE JEWELERS' CIRCULAR-WEEKLY by R. F. NATTAN.)

THIS most attractive window can be made with a little work and is very inexpensive, crepe paper furnishing most of the decorative material.

A WASHINGTON MONUMENT DISPLAY FOR FEB. 22.

The "monument" is a series of platforms placed one on top of the other and covered with dark blue velvet. On the top one place a bronze statuette of Washington, preferably on horseback, but a bust will do if nothing else is at hand. A Continental soldier cut out of cardboard, or a wooden toy, is placed on each step. The background curtain is of a buff color.

The shields can be cut out of crepe paper and mounted on cardboard. The eagle is cut out of cardboard also, or another shield can be used. A wide crepe paper of stars and stripes is looped from the eagle to the corners of the window, then down to the base.

The twisted rope at the top of the window is of green crepe paper. At each side of the window a large cut glass vase filled with paper flowers can be used effectively, and a few crepe paper cocked hats can be appropriately placed in the foreground. Be careful not to interfere with the cardboard sign on the bottom platform.

The stock can be well displayed on this monument, and may be made up of patriotic, fraternal, Masonic and college emblems, badges, buttons, pins, etc., as a feature. Sufficient space will be left to show a good general line of stock.

Facilitating Business Relations With Those Who Do Not Speak English.

SOME merchants have found it to their advantage to employ help in some capacity in their stores, as salesmen, porters or general utility men, who are of the same nationalities that predominate in their immediate neighborhood. Foreigners soon recognize the advantage of dealing at stores where there is someone who can act as interpreter, if needed, and at such stores they are apt to become regular customers.

With or without foreign help, sampled shelf drawers are a great help in securing and holding this class of trade. Foreigners are not apt to know the English names of goods, any more than Americans would their names in Old World countries. But with goods lavishly sampled, foreigners can point out what they want without trouble and thus facilitate their buying.

The different classes of foreigners have varying temperaments. The mercurial Italian, the stolid Swede, the even-tempered German, for instance, all have their marked national peculiarities and manner of wanting to trade, especially when new in this country. To build up business with these people the merchant must be quick to learn their peculiarities and humor them.—*Iron Age-Hardware.*

"The Master Jewelry Salesman," an intensely interesting article written expressly for the Jewelers Circular-Weekly, will be published in a forthcoming issue.

Salesmanship and Its Development.

By Charles T. Evans

THE retail jeweler in the conduct of his business must necessarily play several widely diverging roles. Mechanical skill is necessary that he may properly do the work which is brought to him for repairs, or to supervise in a thorough manner the performance of this work by those in his employ. In addition, he must be familiar with bookkeeping, so that he can keep a systematic record of the transactions of his business; he must act as buyer of his stock (which calls for the services of a competent man); he must be a judge of what profit he must make on his goods, to cover all expenses and yet show a gain for time and money invested; he must be a window decorator of some ability, or a good judge of such work, so that he can tell when another has done the work skilfully, and, after all, he must be a salesman of his goods, which calls for all that a man can possess of cheerfulness, tact, diplomacy and patience, coupled with a knowledge of his goods.

The old saying "Salesmen are born" is certainly incorrect. True, there are men who are gifted with a flow of language which may so affect the uninitiated that they will be impressed with the seller's command of words and mistake that for knowledge. In the course of a year's business one naturally meets many customers of different kinds. As a result, the same kind of talk will not do for everybody. One must be in complete control of the situation at every stage of the game. One must know more about the goods than the customer does—and this is not always an easy matter. Many customers are well read on precious stones, and through visits to the great cities are possibly more familiar with prevailing styles than the average inland jeweler, who feels that he "knows it all."

We have all waited upon customers who have made us feel that we should become more familiar with our goods; that we should know more about how goods are made; why certain differences in styles made corresponding differences in price; why certain semi-precious stones cost more than others, and so on. In short, that we should begin to learn that part of our business which cannot be learned at the watchmaker's bench.

Knowledge of precious and semi-precious stones, where found, where cut; history of some of the famous stones; how fashion has decreed at some times that they should be worn, and at others that they are not stylish; all this knowledge gives you something to talk about when waiting on a customer. It is not enough to be able to say, "That's a very pretty brooch," and so on; one must be able to give information regarding the goods which the customer does not know. Then, again, the ability to converse intelligently regarding your goods will beget a confidence not otherwise obtainable and will make comparatively easy the retaining of that customer's trade and influence.

We should ask more questions when buying goods than we do; we should read the technical articles published in the trade papers; we should ask ourselves questions regarding the goods, such as we think we would be interested to know, and then be prepared to answer them. Take, for instance the term "gold-filled." What do you mean when you offer a customer an article as "gold-filled"? Do you make a distinction as to the several qualities of gold-filled? Do you offer explanations why one gold-filled neck chain costs one dollar and another of the same pattern costs three dollars? Do you explain differences in chain making; why one style link costs more; that one chain is soldered and the other is not; that the slide on one chain is solid gold and the other is not. In short, do you put your customer in possession of such information as will enable him to intelligently decide what he wishes to purchase?

Where price alone is considered a customer will naturally choose the lower-priced article. Different qualities of goods are made because there are people who are willing to pay for good quality goods, and there are others who will purchase anything, no matter how inferior, if the price is low. In between come a number of different qualities. Jewelers are generally faint-hearted; they lack nerve or force. They do not make enough effort to sell the better class of goods. The fact that throughout this country exist stores which cater to the best trade ought to teach us that there is a demand for fine goods. People do not go to the high grade stores merely to pay a high price for goods which could be purchased for less elsewhere. They go to these stores because they have confidence that they will be shown first class articles only, and the best of their kind, and they have the same confidence that the price will be right. In smaller cities people of the same mind enter the several stores in search of a suitable article for a gift. They have no knowledge of the goods, or what the best ought to cost. They rely on the jeweler, who perhaps is afraid to talk up the desirable qualities of his better goods, and shows them the cheaper grades, finally selling the customer an inferior article, and sowing the seeds of dissatisfaction, which will produce a harvest later on. The customer has gone away under the impression that he has bought a first class article, and even although the price was lower than he anticipated, still he will feel that the jeweler has taken an unfair advantage.

It seems to me that our own interests demand that we show our best goods to every customer, although often they will immediately reject them. We have done our duty, and at the same time have increased our chances of selling an exceptionally fine piece. There is an old saying that "you never can tell how far a frog can jump"; also that "appearances are deceitful." Many people of the middle and poorer classes buy the very best goods obtainable, because their jewelry purchases are few and they want what jewelry they do have to be good. Analyze your own experience and recall the many times you have sold expensive goods to customers to whom you either did not expect to sell anything at all, or, if you did, the very cheapest goods.

When you stop to consider the matter, does it not strike you forcibly that your sales of fine goods ought to be steadily on the increase? Argue for the finer watches, the 14-karat jewelry, the sterling silver flat ware, and so on. You can always drop to the lower qualities if necessary.

Of course, judgment is necessary in such matters, and it would be folly to orate on the beauties of an expensive bit of jewelry to a possible purchaser of a one-dollar brooch. There is one absolutely safe proposition: You can never hurt a customer's feelings by showing them expensive goods, while oftentimes you will flatter their sensibilities to such an extent that they will decide to go just a little bit more than they intended. Just consider for a moment your own experience when you go to purchase clothing or furniture. If you see a piece of goods which made into a suit is $35 and another one which you do not like so well is $25, which one do you purchase? Does the price enter into your purchases to such an extent that you buy something you do not like because it is cheap? Isn't your first great care to obtain something with which you are suited? As a general proposition, when you go to buy anything, doesn't it cost you a little more than you anticipated? Don't you learn a lesson from this?

When the retail jeweler awakens to the fact that there is more money made by selling jewelry than there is by repairing it, and begins to show more activity in displaying his wares, and in plans for disposing of his stock, retail jewelers will begin to assume their proper position in the ranks of business men. To-day jewelers are rated as poor business men. Many state that this fact is due to the mechanical training of the jeweler, which has curbed his mercantile education. Jewelers who shut themselves in their own stores, and who feel their own importance, are very liable to get into a rut. Because of the fact that they do not associate with their tradespeople either in their own town or elsewhere, they do not realize that others are doing so much more business than they are. They sit at the bench all day plugging away at watch work, while they mentally regret that they ever entered the retail jewelry business, and resolve that their sons will get into something else. Experience teaches us, however, that retail jewelers, who are business men first and repairers second, and who are careful buyers (which does not necessarily mean buying in such small quantities that the stock is never complete), are enabled to reap such profits from their business that they are able to purchase not only the absolute necessities of life, but many of the superfluities.

Goods well bought are half-sold. Goods well displayed at plainly marked prices are one-quarter sold. This leaves one-quarter of the work for the salesman to do. In showing goods, show a variety of articles at

different prices; notice just which class of goods the customer shows the most interest in. If he appears particularly interested in the medium class of goods, talk those goods to him, at the same time calling attention to the next more expensive goods. Do not let customers get you to give the same guarantee on low-priced goods that you do on the more expensive. Write out little descriptions of the goods, and learn what you have written.

By giving logical talks on your stock you will give the customer just the information they wish, and by the completeness of your descriptions render unnecessary the asking of a great many questions. Information volunteered is more satisfactory than when forced out by questioning. Have patience with your customers when they are slow in making their decision. Remember that as long as they remain in your store you have a chance to make the sale. Once they leave without purchasing your chances of making the sale are greatly lessened. Answer such questions as are asked cheerfully and carefully. Do not get impatient with customers because they are not as familiar with your business as you are. Remember the years you have spent learning what you do know about it. Be sure to show a complete variety of the goods called for.

In many cases sales will result through the efforts you have made to please. Study your customers all the while. If you feel that they need just a little urging do not be afraid to use all the persuasion within your power. Some people will deny themselves for years the ownership of an article they really want in order to retain the money, but if a real salesman gets hold of them they cannot resist. When the attractive features of the article are presented, and the reason why ownership is desirable is impressed upon the customer, those two things, coupled with the customer's own desire for the article, ought to bring about the sale.

Remember that a customer's presence in your store is a positive indication that he is thinking of making a purchase. Many jewelers and other storekeepers despise the "looker," but when we stop and think, we ought to be thankful for the lookers, who not only make purchases themselves, but incidentally do a great amount of advertising for us, for which they make no charge. Treat all comers courteously; send them away well satisfied with their call and with praises for your store and stock upon their tongues, and, like bread cast upon the water, the good results will return.

Let us resolve that we will make the year just commencing a record year in the sales department. Do not neglect the repair department; have a good man to assume the responsibility of seeing that the work is well and promptly done, and keep yourself free to handle your customers yourself. In cities which are small, and where the stores are not very large, customers know the proprietor and prefer that he serve them. Jewelers can do this better than their help—and that without making concessions which they will not allow their clerks to make.

Giving customers a square deal will result in a bigger business, a better business, and consequently larger profits.

Business and Personality.

(By Will B. Wilder, in *Fame.*)

THE most interesting thing in the world is humanity. There is so much of it lying around, and so much of what we see is, for one reason or another, repellant, that we come to think slightingly of it, or not to think of it at all. But in spite of its commonness and its frequent repulsiveness, it is, nevertheless, the one really important and interesting thing on the planet. The vogue of the novel proves how general is this appeal. Any kind of a book, so that it be a book about humans in their relations with each other, will be read by thousands, where the scientist counts his readers by tens and the philosopher by units.

But it isn't necessary to go to literature to prove it. Business is rather inclined to plume itself on being impersonal (since "Business is business!") and on being systematic (since "No man is indispensable.") But at the same time, business is a very sensitive index of the personality governing it. Take Wall Street. Stocks quiver like the magnetic needle when death threatens some man who stands behind the stocks. Nothing impersonal about business then!

A nation is but the enlarged figure of a man. The personality of a nation stamps itself upon the work it does in exactly the same way. The German nation is mentally characterized by painstaking thoroughness; witness the same quality in their clumsy but efficient manufactures and their studious commercial aggression. The French are mentally acute. Their literature is surpassing in logical keenness and verbal exactitude. Witness the delicacy of their workmanship in jewelry and all exact manufacture. .

The Japanese are fundamentally artistic and secondarily shrewd at adapting themselves to conditions. The two qualities are shown in the beautiful things they make for themselves and the atrocities they manufacture for export. The American is inventive, and experimental, and audacious. The other nations stand bewildered before the useful and useless things that he has invented and made indispensable for modern life. And the Patent Office is not the only record of his ingenuity and inventiveness.

The constant pressure of American business life is in the direction of "something new." In England, to make the point by contrast, a business house follows the fashion set by its founders with a deep sense of peace. Aggressive policy? New ideas? Go to! At least to America. The old conservative ways are good enough, as well as much easier. Why bid for a headache by trying to think up something different?

"Every institution," said Emerson, "is but the lengthened shadow of a man." So is every man's work, whatever it may be. It is not a disassociated and incidental thing, attached to him in some casual way. It owes its existence to him and is stamped with his personality in every atom of it.

(Incidentally, isn't this probably the explanation of the fact, exasperatingly verified by every employer of labor, that the average workman is inefficient in what is supposed to be his special line? He hasn't the personal qualities that result in efficiency; or, to put it the other way, efficiency is not the fruit of the qualities which are possessed by the average workman. If he is capable of efficiency he is also capable of an originality which lifts him off the plane of the average workman.)

The desire to perpetuate one's personality is a deep-seated and natural instinct. It is shown in the pride of continuing one's family line, and all ambition and fighting for fame bear witness to it. In a more trivial way, it is evidenced by the picture of the advertiser himself appearing in his advertisement. What does the public care whether Mr. Proprietor wears a beard or goes clean-shaven, is bald or cross-eyed or has a double chin? He flatters himself if he thinks it has the slightest interest in his personal appearance. No, it is for his own pleasure that he reproduces his phiz by the thousand. He wants to rescue that very interesting thing, his own personality, from the encroaching waves of oblivion. He need not worry. His business is just as much himself as his picture is. It is his lengthened shadow, instinct with his qualities, reproducing his personality, and extending his atmosphere. If it be colorless and ineffective, it is because he is so. If it be vital and full of snap and enthusiasm and service, no one will need to be told that he is not a dawdler himself.

The most convincing way to impress your personality upon your town is to put it into your business. Conversely, if you want to know what sort of a fellow you are, hold your business up like a hand-mirror and look into it. It will tell the story better than the fancy portrait.

Maxims of Modern Business.

NINE times out of 10 quality wins regardless of price, says *Store and Office*. The other time the purchaser loses because he put the question of price above that of quality.

The surest way to win over the opposition is to cease thumping the strings of discord and get in harmony by sounding the strings that blend with the other fellow's music.

Don't quarrel with inferiors. Save your wit to parry the thrusts of superior skill. Don't waste sound business logic on a poor prospect. You'll need your energy in convincing people who are worth while.

A sale made at a loss should be charged to the expense account. A bargain sale with goods selling below cost represents an expenditure for advertising purposes. So set about it with discrimination and a level head.

If, for any reason, a competitor can sell a certain line of goods cheaper than you can afford to sell it, have the nerve to admit it, at least to yourself, or set about to correct the deficiency in your business that creates the condition. Don't persist in allowing competition to make your prices, merely because you are pained at the prospect of losing sales.

Work hard, smile and have a purpose. Then you'll win.

Business Literature and Novelties Used Recently in Conjunction with Newspaper Advertising.

(Reviewed and described for THE JEWELERS' CIRCULAR-WEEKLY by ROBERT FRANCIS NATTAN.)

THE retail jewelers of every section of the country during the past holiday season made more generous use of booklets and newspaper advertising than they had done in some time, in anticipation of a large amount of business, and their anticipation was not in vain. A vigorous newspaper campaign supplemented by general business literature was conducted in almost every extensive territory, many full-page newspaper ads having been used. Some of the noteworthy efforts in the way of booklets issued by members of the retail jewelry trade are shown on the adjoining page.

REPRODUCTION OF AN ARTISTIC CALENDAR DISTRIBUTED BY THE WARREN JEWELRY CO., CALUMET, MICH., WITH CATCH-PHRASE SUGGESTED BY THE JEWELERS' CIRCULAR-WEEKLY.

The first booklet in the upper row of the group was used by the Merrill, Broer Co., Toledo, O. The cover page contained an illustration, in natural colors, of a holly branch. In the lower right-hand corner, in large type, embossed and printed in green, were the words "Xmas 1909." No mention of the firm was made on the front or back cover.

The 12 inside cover pages were printed in red and green and beautifully illustrated by half-tones depicting novelties and special pieces made by the concern, including the President's Cup which was presented by William Howard Taft to the Toledo Yacht Club last year. A comprehensive list of articles for men and women was also given.

The last few pages contained the usual text about birth stones and wedding anniversaries. The booklet measured 5¼ by 8¼ inches.

The booklet entitled "Christmas Shopping List" was one of a number of very clever advertising novelties used by J. E. Caldwell & Co., Philadelphia, Pa. The cover pages, which show up black in the illustration, are really red with a dark brown border. The text, containing the title and firm name, is embossed and printed in white. This little booklet, which also had a pocket in the back containing a miniature calendar bound in fancy leather, measured 3¼ inches by four inches, and was printed in three colors—olive green, light green and red.

There are numerous memorandum pages for the name of the friend, the value of the gift and the name or suggestion for a gift. With the list of articles mentioned a good range of prices is quoted.

Van Dusen & Stokes Co., Philadelphia, Pa., issued a booklet 4½ by eight inches, with a light gray cover, and printed in a darker shade of the same color. This booklet is generic in character, with suggestions for gifts in silverware, precious and semi-precious stones and a number of suggestions under the caption, "Oriental Oddities." Its selling and informative value would have been enhanced by the quotation of a range of prices.

A booklet with a particularly striking cover was sent out by that very enterprising jeweler, Eugene V. Haynes, Atlanta, Ga. The cover is printed in three colors—gold, green and red. The old-fashioned fireplace done in these colors, with a representation of real old homestead candlesticks on either end of the mantelpiece and a clock in the center, is strikingly suggestive of Yuletide in the country. There are 20 pages in the booklet, all of the illustrations of rings, brooches, lockets, emblems, link buttons, etc., being printed in the actual colors of the originals. The last page gives interesting information regarding the language of flowers. Bits of information about noted historic diamonds are also embodied in the book with any number of gift suggestions.

The foreword is as follows:

"The exchange of gifts is a time-honored Christmas custom. No one too old to enjoy it, no one can begin too young. To give a suitable gift requires consideration, for the giver places himself, as it were, in the constant presence of the recipient. To aid in the selection we offer in this booklet carefully compiled lists that we trust will help in the choice of such gifts as are desired with the least possible inconvenience to you. We hope that the listed pages as well as a number of selected items of timely knowledge will be of interest and will assist you in enjoying a Merry Christmas and a Happy New Year."

A distinct novelty in folders is one issued by Henry Birks & Sons, Montreal, Can., to feature fountain pens. The folder, when spread out, measures 10⅞ inches by six inches. The part containing illustrations of the pens, which were shown in actual size, comprised 7⅜ inches of this space, but folded together accordion-like into a space measuring only 1¼ inches in width, thus allowing the folder to be placed neatly in an envelope 3⅛ inches wide. The concern offered to give the purchaser a 30 days' trial. If the pen proved disappointing within that time it might be returned.

Ellis Bros., also Canadian jewelers (108 Yonge St., Toronto, Ont.), distributed a folder containing 16 pages, each 4⅛ by 9½ inches. Two of the inside pages are shown in the illustration immediately on the right of the Birks folder, in the center of the group. The cover pages are of a very light cream color, printed in photographic brown. The inside pages contain numerous clean-

ARTISTIC EFFECTS IN BOOKLETS, FOLDERS, ETC., USED RECENTLY BY RETAIL JEWELERS SUPPLEMETARY TO NEWSPAPER ADVERTISING.

Retail Advertising Department.

cut half-tones of a variegated line of stock, including novelties and diamond jewelry. The pages are printed in red and black.

A rather extensive catalogue of about 48 pages was sent out by the Eugene V. Haynes Co., Atlanta, Ga. The catalogue was profusely illustrated. Many of the illustrations were done in the actual colors of the jewelry. Beautiful half-tone illustrations printed in black portray the various departments of the establishment. The cover page, which was printed in cream, light brown and brown-black, is shown in the center of the group. It measured seven inches wide by 9¾ inches high.

"The Story of a Clock" made a catchy title for a booklet of three inches by six

A RICH LITTLE HOLIDAY BOOKLET.

inches, sent out by the J. H. Leyson Co., Salt Lake City, Utah. The cover pages were drab, the front cover being embellished by the design of a hall clock placed on the left of the title and printed in brown on a blue-gray background. The inside pages are printed in brown accompanied by half-tone illustrations in blue. The color combination, however, is not a pleasing one.

The text is written in the form of a story with a moral, and is calculated to show that a good clock should be purchased in the beginning. The purchaser should not expect to buy such a timepiece at the bargain counter of any store. It was written by one of the salesmen in the employ of the concern, and, as stated on the last cover page, was suggested by actual experience.

A three-leaf folder gotten out by L. A. Piaget & Co., Paterson, N. J., measures, when folded, 3½ by 6¼ inches, and is printed in red and green and entitled "Holiday Reminder." The color of the paper is light gray. A number of gifts are suggested for the different members of the household, and a large range of prices is quoted.

Just at the right of this booklet is a unique folder issued by Henry Birks & Sons, Montreal, to advertise a so-called Polo watch. The watch is advertised to sell at $15, and is offered in dull gray, martelé or hammered silver case. The folder is printed in black on India tone paper, and measures 2⅜ inches by 4½ inches.

Two pages from a handsome booklet issued by Brock & Feagans, Los Angeles, Cal., are shown in the lower left-hand corner of the group. The cover pages of the booklet are of hard iridescent paper, the firm name being highly embossed and printed in gold, as is also the firm's trade-mark in the lower right-hand corner. The background forming part of the shield in the trade-mark design is printed in red.

The pages, of which there are 32 in all, are of a fine quality of coated paper. The text is printed in photographic brown and the half-tones in black. Many of the half-tones are vignetted remarkably well, blending beautifully into the field of the text. The second inside page gives helpful suggestions for ordering by mail, and there is a scale by which to ascertain ring sizes. Prices are mentioned and a well-chosen line of stock is illustrated.

The W. F. Fischer & Bro. Co., Chattanooga, Tenn., is another firm which issued considerable business literature during the holiday season, including the small booklet, 3¼ by 4¼ inches, entitled "Christmas Gifts." The cover pages were printed in green and red. The inside pages, of which there were 12, were printed in green. An exhaustive list of gifts for women, men and children, articles suitable for the home, desk furnishings, fine leather goods, etc., are mentioned, but no prices are quoted. Four pages of the booklet were reserved on which to jot down memoranda.

R. Hemsley, Montreal, Que., whose now large business was established in 1870 on a very unpretentious scale, distributed a profusely illustrated booklet containing about 32 pages. All the articles were numbered and prices quoted. The size of the pages is 5½ by 8½ inches. The front cover page is shown in the lower right-hand corner of the group. The diamond's rays radiating toward the name of the concern make an effective illustration.

Hartdegen & Co., Newark, N. J., have always been staunch advocates of advertising, sparing neither effort nor expense in issuing business literature that is attractive and dignified in tone. Their little booklet, entitled "Shopping," the cover page of which is illustrated herewith, is exceptionally attractive. The cover pages are of a fine quality of parchment paper, with the title and name of the concern printed in red and highly embossed.

Just before a tersely written little essay on holiday shopping is a reproduction in color of an old pendant jewel in the British Museum. The jewel represents an example of high-class Munich work of the 16th century. Many of the pages that follow contain gift suggestions for men, women and children. Following these pages are suggestions for the dining table, desk accessories, etc. The booklet contains also memorandum pages in which to write down the name of the gift, its value and the recipient. The text is accompanied by fine half-tone illustrations representing an artistic line of stock. The booklet measures three inches by 4⅞ inches.

The same firm has issued a calendar consisting of separate pages bound together by a red silk cord. Each page contains a reproduction of the birthstone of the month, together with its name and significance.

A tersely written description or history of the gem appears on the back of each page. The stones are printed in their actual colors within a white heart-shaped border.

A booklet on diamonds, their occurrence, history, value and some interesting facts about the largest of them has been published by Frank Holt & Co., retail jewelers, of Newark, N. J. The booklet, which was written by Sidney T. Holt, a member of the firm, is in no sense an advertisement, but is intended to instruct those contemplating the purchase of diamonds.

A folder sent out by H. B. Crouch Co., Los Angeles, Cal., measured (envelope size) 3½ by 6¼ inches. It was printed in dark brown, orange and black. The

FOLDER PRINTED IN THREE COLORS.

open folder is illustrated above. The illustration seen at the top is pasted down on a panel with an orange-colored border. Very unique and attractive jewelry designs are featured.

A Neat Calendar.

A CALENDAR which will undoubtedly be preserved by those who receive it is that recently sent out by the Warren Jewelry Co., Calumet, Mich. The engaged are seated side by side, the youth gazing in fond admiration upon the prospective bride, who, in turn, is watching with manifest pleasure and much gratification the engagement ring which is being shown to her. The picture is beautifully done in colors and is high class in every respect. Beneath, in small type, is the inscription, "Diamonds Are Trumps."

In the upper left-hand corner is the firm name, and above this the phrase, "Warren Wisdom Is Worth While When Buying Gems That Are Worth While," which, by the way, was suggested to the concern by THE JEWELERS' CIRCULAR-WEEKLY as mentioned in the issue of April 7, 1909.

Advertise often and well and you will have no cause to complain of lack of business.—R: F. N.

Unique Forms of Newspaper Advertising.

Store News Served Up in Serio-Comic Fashion.

THE full-page announcement of the Ashby Jewelry Co., Colorado Springs, Colo., is made up to resemble a regular newspaper page with the different news headings of the day. This is really store the public not to be misled or deceived into the belief that the jeweler charges exorbitant prices simply because of handsome mahogany show cases and expensive furnishings.

news issued in serio-comic fashion. The apparent account of a "Wrecked Auto" is simply a means of calling attention to the jewelry firm's "week-end bag" containing toilet articles in convenient form.

"The Distracted Wife" episode recounts the extensive shopping tour of the better half, all without avail until she finally visits Ashby's. Under the caption "Luxurious Furnishings Create False Impression" is given some very good talk intended to teach

The caption "Vienna Suffers Loss" does not refer to the decapitation of any ruler nor to any terrific loss of life consequent upon an earthquake, but simply to a decreasing of Vienna's stock of art goods which now find a place on the shelves of Ashby & Co. An informative tone is given to the announcement by a description of Lalique designs. While this style of advertising should by no means be recommended as worthy of frequent adoption, it nevertheless has its advantages when used sparingly and wisely, as in the present case.

The personal element in advertising is exemplified in the advertisement of M. Greer, Atlanta, Ga., who used the accompanying advertisement about one week before Christmas in the Atlanta *Constitution* in a space of 18¾ inches, double column.

Although poetry, as a rule, is not to be advised as a means of advertising jewelry stock, the verses in the Greer ad. are rather exceptional. They suggest very much the genius of a southern poet of no small

One of the handsomest souvenirs ever given out by a retail jewelry store to its patrons is the one sent out this year by the Varney Jewelry Co., Wichita, Kans. It is a genuine seal leather card case and pocketbook, five inches wide, and contains compartments for cards, money, etc.

Your Business Departments are a fine and splendid feature of the Jewelers' Circular-Weekly.

T. J. WILKINSON, Philadelphia, Pa.

Planning an Advertising Campaign.

From *Practical Publicity*,*
By Truman A. DeWeese

THE first thing to be considered in planning an advertising campaign is the amount to be expended. If regarded simply as a part of the cost of production, this is not a difficult problem. * * * There is no other way of acquainting the public with the goods—except through personal talk and solicitation—and under modern economic and industrial conditions this is impossible. Even if it were possible, the expense would be prohibitive.

For an old firm manufacturing a well-known commodity intended for universal consumption the problem of advertising will generally adjust itself upon a fixed economic basis. For such a firm the advertising expense constitutes one of the items of annual cost of production. At the beginning of the year so much is set aside for raw material, so much for labor, so much for insurance, so much for selling, so much for advertising.

The expense of advertising, in most houses, is included in the general expense of selling and distribution. If it is a house doing business through wholesalers, jobbers or retailers there is no known method of tracing definite results from advertising. The advertising appropriation must go for general publicity. At the end of the year the house figures up the business of the year, the cost and profits. If the business shows an increase, the appropriation for advertising is renewed with the same regularity as the appropriation for raw material. The firm has learned that "keeping everlastingly at it" is what pays in advertising—that occasional, spasmodic publicity spurts do not pay.

It is the continuity of advertising that gradually builds up a market for a product, the constant dropping of water that wears away the stone. If the business shows a decrease from previous years, it is a question of radical change in advertising methods, in selling plans, and other departments, that require a reorganization to meet new conditions of trade and competition.

Perhaps it is not the fault of the advertising. Millions of dollars are thrown away annually in desultory advertising, where there is no selling organization to supply the demand created by advertising. The selling organization and the advertising must be co-ordinated upon a smooth-working and effective basis. There must be harmonious action between them. They cannot be dissociated in any successful scheme for marketing a product. They cannot work at cross purposes. The selling force must follow up the advertising campaign, and the advertising campaign must be planned and conducted with reference to trade conditions. In order to know these conditions the advertising director must keep in very close touch with the selling force in the field. If there is a lack of co-operation it is a vital weakness in the business organization that must be remedied if ultimate loss is to be averted.

If a decrease of business is shown at the end of the year it is therefore proper to inquire into other branches of the business organization as well as the publicity department. Perhaps the appropriation has been expended in the wrong mediums. The advertising department has not reached the right sort of people. If it is a safety razor, perhaps the advertising director has been going after the beardless portion of the human race. If it is a baby food, perhaps he has been using too much money in mediums that are seen principally in bachelors' clubs. The publicity department has been spending too much money for "waste circulation." This question of useless and unprofitable circulation presents one of the most interesting problems that confront the advertiser. It will be quite generally conceded by advertising men that a certain amount of useless circulation must be paid for by every advertiser in order to reach the people who may be interested in his product.

A manufacturer of automobiles advertises in the general magazines, and yet it is perfectly plain that only a small percentage of magazine readers can be classed as possible purchasers of automobiles. In the case of a food product that may be eaten by every member of the human race, of every age and in every clime, it is plainly obvious that the advertiser is paying for very little "waste circulation." The advertiser cannot always pick mediums that go exclusively to the people who have a use for his particular product.

Perhaps the advertising itself has been weak. The copy has been devoid of reason, argument or suggestion. It has not presented the vital elements of the selling argument effectively or convincingly. It has not shown an intimate knowledge of the product. It has no individuality of style. It is too much like all other advertising that is prepared for products of the same class. It has no selling force. It has been written by someone who has never made a study of the product or has never talked with the agents who have to put it on the dealers' shelves.

If it is a mail-order business which has shown a loss over the previous year's business, the problem is a comparatively simple one. It is easy to trace definite results from mail order advertising, and it is a simple problem in arithmetic to calculate with exactness the returns from each advertising investment. Upon this definitely-ascertained basis it is easy to plan a profitable and effective campaign for the next year.

But the publicity problem for a new product that is to be sold through dealers is one that must be solved without the aid of figures adduced from definite experience. It is a groping along a highway strewn with the countless wrecks of failure where the guide posts are few and uncertain. The advertising expert must be drawn upon for advice and suggestion, but even the most sagacious advertising man may fail to lay out a winning publicity campaign the first year, for the reason that a new product calls for new copy, new methods, new mediums and new ideas.

The principals that have been successfully applied in the marketing of one commodity may not sell another product even though there are points of similarity in their nature and uses. It is therefore a fact that experience is not always a safe guide in advertising. Cleverness in judging the class of people that may be interested in a particular product and in knowing how to reach them is worth more than the widest experience gained in the advertising of one product. It is not unusual for an advertising man to make millions of dollars in the manufacture of a particular commodity and then make a dismal failure in an attempt to create a demand for another product.

Suppose a firm with no experience in making or selling watches is about to put a new watch on the market, a watch that is to be sold through dealers to the consumers. Whether the watch is to be sold through wholesalers and jobbers or direct to retail jewelers is of little consequence so far as the problem of creating a demand for it is concerned. It is a product of universal use. It may be worn by every human being in the universe old enough to carry a watch, for it goes without saying that it will be made in all sizes and patterns. The advertiser, therefore, has the whole race to appeal to.

The first thing to be considered is the question of adopting a trade-mark. I am not an ardent believer in trade-marks. The name of the commodity is all the trade-mark I would ask for in planning a winning advertising campaign. A good name is in reality the best of all trade-marks. Only a commodity that has little selling argument behind it needs a trade-mark. Where an article gives little opportunity for talk or argument a trade-mark serves all the purposes of advertising and enables the advertiser to fix a commodity in the public mind and to keep it there.

In the absence of anything to say about the product, how it is made, why it is made in a particular way, why people should buy it, the advertiser can work the changes on the trade-mark from month to month in the magazines or from day to day in newspapers. But where a product gives opportunity for strong reason-why "talk," the constant repetition of the trade-mark has a tendency to make the reader miss the "talk" entirely. The first glance at the old-time trade-mark identifies the product in the mind of the reader and he turns over to the next page. The most cleverly constructed copy is lost on him. He is looking for something new.

If there is nothing to be said in favor of the watch, if it does not differ in any material point from any other watch, it is a good plan to pick a trade-mark for advertising purposes. If it is a watch with new and strong selling points the name of the watch is enough. Let the advertising be constructed so as to make the public familiar with the name and the points of superiority.

(To be continued.)

Retail Advertising Department.

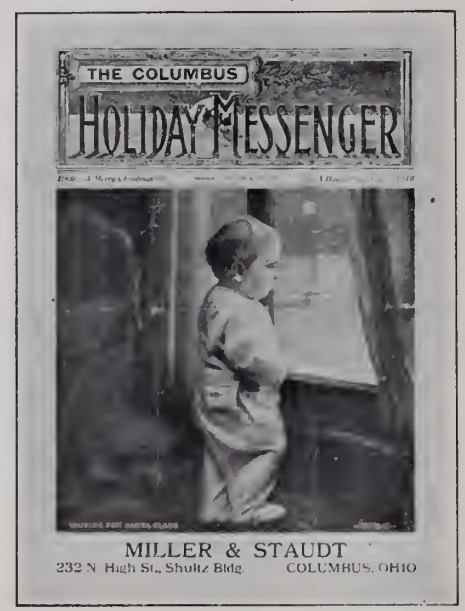
Sharp Competitive Advertising.

EMERSON once said "Commerce is a game of skill," and the statement seems to be verified more forcibly of late than ever before. The "intensive" advertising of two New York advertisers is illustrated by their two announcements which appeared in the same issue of a local paper.

The ads, however, were placed on different pages. One announcement occupied a space of 4¾ inches, single column, and the other a space of four inches, single column. At the outset the fact should be mentioned that a German silver bag, electroplated with sterling silver, was advertised. In view of this fact, a comparison of the catch phrases will be interesting and also the re-

WHEN "GREEK MEETS GREEK" IN ADVERTISING.

spective prices, the difference being only eight cents. The ad containing the illustration is undoubtedly the one which would attract the eye first, but if these two announcements were placed on the same page, in close proximity to each other, and if both were read by careful buyers, the chances are that the influence of that little four-inch announcement, advertising *silvered* mesh bags, at $1.90 each, would be very strong.



The strength of the unillustrated ad was impaired by its being placed on a page different from that of the other announcement. It requires no Munsterberg, who, by the way, has put his seal of approval on psychology in advertising, to discern the contemplated effect on the reader's mind of this very clever and ingeniously devised smaller announcement.—R. F. N.

A novel special sale has just been concluded by the W. L. Calkins Co., Waukesha, Wis. Twenty-five boxes were recently auctioned off, each box containing an article worth $1 to $5, and one box containing a diamond ring. J. P. Fisher secured the diamond ring.

Fargo & Harger, Ripon, Wis., have again enlarged their store. The growing trade of the firm made necessary larger quarters, and an unusually large stock is now being displayed. Among the improvements added to the store is a rest room, provided for the comfort of shoppers.

Retail Jewelers' Store Papers.

A NEAT house organ entitled "The Columbus Holiday Messenger," the front cover page of which is illustrated herewith, was sent out by Miller & Staudt, of 232 N. High St., Columbus, O. The paper

"ON THE LOOKOUT FOR SANTA CLAUS."
(Store paper sent out by Miller & Staudt, Columbus, O.)

was illustrated by many pictures, appealing forcibly to children as well as to grown-ups, and strongly suggestive of the Winter season with its pleasures and pastimes.

The paper measured 9½ inches wide by 12½ inches high.

Another attractive retail jeweler's holiday journal is entitled "Tanke's Tidings," published by T. C. Tanke, Buffalo, N. Y. It measures 9½ inches by 12⅝ inches and is filled with interesting reading matter. The illustrations are well chosen, those on the front page being taken from

COVER PAGE OF TANKE'S TIDINGS.

"The Quest of the Pearl," which is quoted from *Everybody's Magazine.*

The paper contains large half-tone plates illustrating an extensive line of miscellaneous jewelry, watches, silverware, clocks, etc. There are many interesting items which will do much to hold the attention of the reader. The prices of all the articles illustrated are quoted.

Sensible Advertising.

THE advertiser who expects returns immediately and quits if they are not forthcoming, would save money by avoiding the first expenditure. Some of the greatest successes of advertising effort were reached after periods of great discouragement, and when the advertiser was almost at the end of his financial resources.

In your case, returns will come quicker; indeed, the first few advertisements should bring you good returns, provided you have planned your ad well and have brought to the notice of the reading public a line of goods, rightly priced, that are wanted. It does no good to tell the readers of your circulars, advertisements in the daily papers or letters, that you "carry a large line of goods of every description," or that you "have this or that." If your establishment is on a prominent street it is known and no one expects you to carry other goods than what you have, nor do they need to be told what you have for sale.

It is not what you carry that is of importance to the general public. It is your prices that will draw trade. You cannot fool the shoppers of to-day with tales of bargains and sacrifice sales that are not confirmed by the prices. This is an age of excellent buying. The shopper knows prices and values. Therefore, in your advertising, you must count on this. With your good qualities, price right. When you talk bargains you should be prepared to meet the inquiry for them with real bargains.

People who read your advertising will soon form an unchangeable opinion of the merits of the goods advertised. If they have always found you right, with goods and prices, they will come to look upon your sales as really good bargain givers, and not to be missed. They will hold this opinion until you disappoint them. If, however, they find regular prices on goods advertised as on the "bargain counter," they will pay but little attention to your future efforts to draw trade.

Be square with your trade in your advertising, as you are in your face-to-face methods, and you will soon find that the people take your advertisements at face value and that the returns more than warrant the expenditures.—*Business Help.*

Prices are positive, direct, exact information.

If a merchant advertised a certain specialty, giving a full description without prices, I doubt very much if he would get any direct returns for his ad.

It is the price that puts the edge on the description and tells a person at once whether he can afford to buy.

A man isn't going to take the trouble to go down town to the store to find out what the price is.—*Apparel Retailer.*

Newspaper Advertising Arguments Used by Retail Jewelers.

SOLID silver—the royal wedding gift. Our silver department has been greatly enlarged and the selection of a wedding gift from this great showing insures not only a money saving, but the broadest possible range of choice We offer a most extraordinary value in sterling silver teaspoons, 925-1,000 fine—in the most beautiful patterns and in a superb quality, for much less than their regular prices : six sterling silver teaspoons, regular weight, $2 70; six sterling silver teaspoons, heavy-weight, $3.75; four handsome patterns to select from; silk case for six only 60c extra. Our patterns are all standard and we can at any time furnish knives, forks and all pieces to match. Cast-off patterns are never shown at the Crescent and there is never any difficulty in matching up sets. The Crescent, Memphis, Tenn.

Every pretty woman takes pride in keeping as correct time by her watch as her husband insists upon, which is why our

USED BY BAILER JEWELRY CO., MEMPHIS, TENN. REDUCED FROM FIVE INCHES, FOUR COLUMNS.

timepieces are so often sold to women. Every piece of our fine jewelry stock is guaranteed as new in design and precisely as represented. Good jewelry is as good as money in bank, because it never loses in weight and often rises in value by rare beauty of design. See our new stock before the handsome pieces are sold. D. A. Scurry, Carbondale, Pa.

Now is the time to buy diamond jewelry. Don't run risks! Invest your money in diamonds or diamond jewelry at our prices and your money is safe, and at the rate diamonds are increasing in value it's not only a safe, but a paying investment. Robert C. Green's Son, Pottsville, Pa.

Your patronage and that of the friends you will recommend is more the object of this invitation to visit our store than mere hope of an immediate sale. Once you visit us we feel confident that you will be satisfied to make our store your store in the future. Polite attention, reliable goods unusually well selected and low prices have made this complete jewelry store the favorite with so many. Glasses moderately priced. Aurnhammer, Newark, N. J.

Don't neglect your watch. It's a good time now while the year is young to let us look into your watch. The best watch should have a periodical cleaning and regulating to keep it always at its best. Repairing watches is one of our specialties. Our large business enables us to keep specialists for this particular branch of jewelry repairing. If you want your watch to be good the rest of the year, let them examine it and see what it needs. Hancher's, Wheeling, W. Va.

The loved one's picture is appropriately carried in one of these beautiful lockets. They are of exquisite design, some being set with diamonds or other stones. Others are of the Art Nouveau style without setting, but really charming pieces of jewelry. H. F. Phillips, Oyster Bay, N. Y.

Jewelry that proclaims the refinement, dignity and character of the wearer—it tells its own story in its own way. By the jewelry she wears the woman is judged. The choicest assortments of rich, fashionable jewelry—the dignified, elegant kind—are here—diamond bracelets and necklaces, brooches, rings, hair ornaments; everything the woman of taste admires. H. A. Connell, Scranton, Pa.

Our diamonds. Lukens offers to the trade one of the largest and finest diamond stocks in the State. Pure white, flawless and perfectly cut gems; also blue and canary stones, loose or mounted to order. Our reputation as reputable diamond merchants is an open book to all customers. We also make a specialty of matching gems you may already have and in resetting old family jewels. Lukens, Wheeling, W. Va.

Wedding presents. Never such a variety of gift articles shown in Knoxville—and prices are just as low or as high as you choose to spend. H. J. Cook Co., Knoxville, Tenn.

HALL CLOCKS

CLOCKS

CHIMING CLOCKS

WE ARE READY:—If you are interested we will be glad to show you—if you don't call we must put you on the list of the "non progressive" reactionary. Excuse this language; we have in mind clock mechanism and know that lots of good people try to sell clocks, but sell bad ones, because they don't know us. We will be glad to help them to do a good business—with good constructions, backed by our guarantee. To these people we extend a courteous invitation. Here is a little tale that talks to friends and others:

In less than three months of last Fall we delivered some 500 "Monastery" Hall clock chiming movements and clocks and still ran short. The people liked the price, the styles, and, above all, the musical tone qualities of our 1909 tubular bells. No other clocks equal the "Monastery" tubular "Westminster Chimes" of B. & D. At least try to find out if we are not too presumptuous.

And we introduce a new feature for 1910. If you are a progressive clock dealer come to see us or our salesmen; if you ignore our invitation it will be your loss, your competitor may not be so indifferent.

Place Your Import Orders Early

We offer for 1910 especially three new clocks:

1. The Westminster Hall Clock on tubular bells (our patent)
2. " " Mantle " for high-class trade
3. " " " " popular article

Interesting Discovery of Famous Old Wedgwood Dinner Service.

AS recently noted in THE JEWELERS' CIRCULAR-WEEKLY, Dr. George Charles Williamson announced the discovery of the famous dinner service made for the Empress Catherine of Russia by Josiah Wedgwood. Speaking of this discovery the *Pottery Gazette* of London says: "Probably no other man could have achieved such a result under the only conditions available. In addition to the remarkable energy and patience which he displayed, Dr. Williamson possesses a special ability for such a task. He is a fellow of the Royal Society of Literature and of the Royal Numismatic Society. He is an expert on Art generally, and on miniatures in particular. He has been an extensive writer on Art and has published the lives of many famous artists. He has devoted much time to the collection and examination of miniatures, the collection of books on the fine arts, and of catalogues of picture galleries and other art collections.

"While searching for ancient views of Hampstead, Dr. Williamson became aware that a number of such views were mentioned in a unique copy of a catalogue enumerating the subjects painted on a dinner service produced by Josiah Wedgwood for the Empress Catherine II. of Russia. It is well known that in 1774 Josiah Wedgwood did produce such a service, and that it was exhibited in London for two months before it was forwarded to the Empress. The service consisted of no fewer than 1,200 pieces, each decorated with a view of 18th century England, the whole series comprising about 2,000 pictures of castles, mansions, parks, bridges, landscapes, and monuments of every description.

"Dr. Williamson proceeded to make inquiries about this remarkable dinner service, but the only information he could obtain in the most likely quarters in this country, and from Russian officials, whom he questioned on the subject, was that all trace of the famous dinner service had been lost, and that probably it had long since been destroyed. He thereupon approached the Czar himself, who caused a thorough search to be made, with the result that 800 pieces, each decorated with views of 18th century England, were discovered stored away at the Peterhof Palace. With the Czar's permission, several of the pieces have been photographed, and Dr. Williamson has prevailed upon his Imperial Majesty to lend a large portion of the service for exhibition.

FIG. 1.—WEDGWOOD DISH WITH VIEW OF FURNESS ABBEY.

"This service has been described as the most celebrated set the great potter ever made in cream-colored ware. In recognition of the appreciation of the service by the Empress, Wedgwood named the body of which it was made 'Queen's Ware,' and that ware is one of the most popular productions of the Wedgwoods of to-day. The history of the service is familiar to students and collectors, who may be interested in learning that there is now one plate of the famous service in the Wedgwood Museum at the works at Etruria. Wedgwood's instructions were to make a large service for Her Majesty's use, and to paint in black enamel on every piece a different view of the palaces, seats of the nobility and other remarkable places in the British Kingdom. A large proportion of the 1,200 views depicted on the service were from original drawings, and the production of the service occupied nearly eight years.

"By special permission of the Czar, the majority of the views have been photographed for Dr. Williamson, and will be reproduced in the work he is about to publish on the subject. We are able, by courtesy of the *Illustrated London News*, to give reproductions of two of these historical pieces—two large dishes with oval centers. In Fig. 1 there is a view of Furness Abbey, and Fig. 2 shows St. James' Palace as seen from Pall Mall."

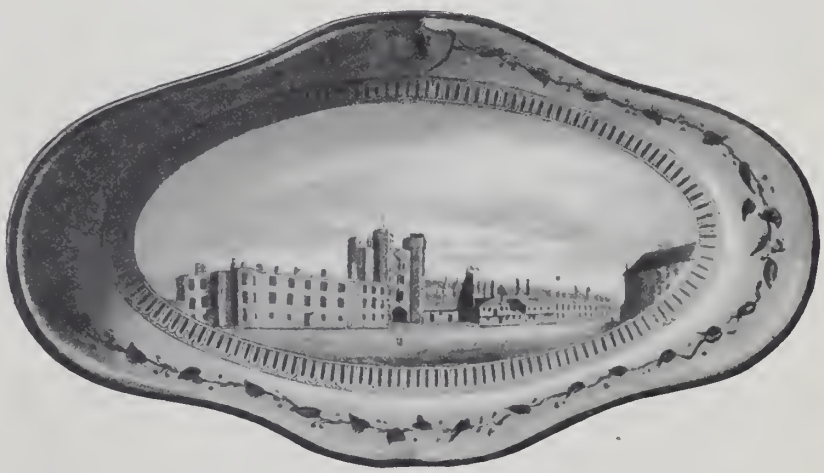

FIG. 2.—WEDGWOOD DISH WITH VIEW OF ST. JAMES PALACE.

Libbey

"THE WORLD'S BEST."

CUT GLASS

BUSINESS ESTABLISHED IN 1818

"It is the world's very best."

The purchaser of cut glass can have no higher assurance than that — applied literally to Libbey Cut Glass.

For it is the assurance that there exist no designs more distinguished or dignified; no cutting more skilfully done; no cut glass more beautiful.

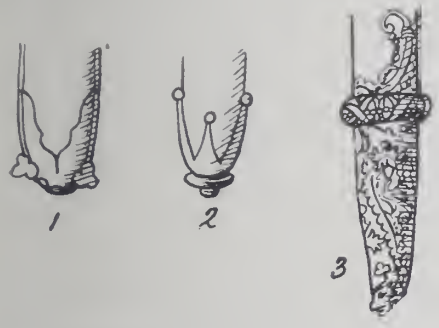
Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.



By Clement W. Coumbe.

(*Continued from issue of Jan. 26.*)

CHANTILLY (France). A ceramic factory was founded here by Ciquaire Cirou in 1725, assisted by Louis Henri, Prince of Condé. Its first aim was the manufacture of imitation Corean pottery, a fine collection of which was in the Prince's possession. The porcelain of *Chantilly* is, in fact, very remarkable. Upon a tin enamel, which deprives it a little of its translucency, giving it a dead whiteness analogous to that of the fine Corean pottery, are Oriental grotesques, creeping plants, etc. Later delicate Saxony reliefs and Sèvres designs full of grace were produced. Cirou retiring, Peyrard, Aran and Antheaume de Surval carried on the factory, but had to close it to avoid failure when the Revolution came. An Englishman named Potter, having establishments at Montereau and Forges, tried, in 1793, to restore the manufactory for the benefit of the numerous workmen out of employment. His generous efforts proved fruitless, for, having expended his fortune, he was obliged to give up the enterprise in 1808. M. Pigorry, Mayor of Chantilly, started another factory (1803) to make wares for common use. He was succeeded by Bougon and Chalet.

Antheaume, Batuex, Balidon and Corncille made *Chantilly* ware famous, then they migrated to Sèvres. Mark: A red huntsman's horn reproduced with care.

CHAPE. The metal tip of the scabbard. Often richly adorned. (See *crampit* and

CHAPES.
1 and 2, XIII. and XIV. century scabbard *chapes*. 3. *Chape* of a dagger sheath, Henry VIII. period.

botcroll.) The metal attachment of the mediæval girdle.

CHAPEAU (Fr.). A cap, hat or bonnet. (See *Cap of Maintenance.*)

CHAPELLE-DE-FER (Fr.). The iron flat-

CHAPELLE-DE-FER AFTER FAIRHOLT.

topped helmet worn by knights in the XII. century, and frequently depicted on their monumental effigies; it was the rudest form of helmet, and went out of use in the following century. Our cut represents the *chapelle-de-fer* on an effigy of the XII. century, in the Temple Church, London.

CHAPELLE, Antoine. Ceramist at Sinçeny, also at Rouen.

CHAPELLE, Jacques. Ceramist at Sceaux, middle of XVIII. century.

CHAPELLE, Paul. Ceramic artist at Rouen, XVIII. century.

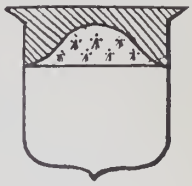
CHAPELLE, Pierre. A very clever XVIII. century faience maker working at Rouen, and first manager of the Sceaux factory.

CHAPELLE, Vincent Prosper. Ceramic artist at Rouen, XVIII. century.

CHAPELLE-DES-POTS, La. Near Saintes, France. "Is the place where Palissy found the potters who assisted him in his laborious experiments. They made here 'azurées' and marbled faiences, as in the rest of Saintonge."—Jacquemart.

CHAPLET (Fr.), *chapelet de chevalerie*, or *guirlande*. A garland, wreath of flowers, laurel, olive, oak or other foliage.

"This familiar term for a wreath of flowers was, in the Middle Ages, applied also to a circlet of gold, often set with jewels, in the form of flowers, to bandeaux of pearls and precious stones, and garlands of goldsmiths' work more or less elaborate. *Chaplets* of real flowers were worn by ladies over *coifs* or *cauls* of gold embroid-

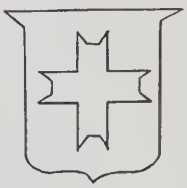


HEAD OF EFFIGY OF COMTE D'ESTAMPES (1300-1336).

ery. * * * *Chaplets* of jewels and of real flowers were worn by men as well as by women. Edward III. presented his own *chaplet* of fine pearls to Eustace de Ribeaumont, with whom he had fought beneath the walls of Calais (1348) in token of his admiration of the prowess of his antagonist. * * * The effigy of Charles Comte d'Estampes (1300-36) in the royal catacombs of St. Denis represents him (see cut) in complete mail, but with a *chaplet* of roses round his head, an indication of his rank, and which, therefore, would be of goldsmiths' work and probably jeweled."—Planché.

Chaplet of roses "in armory is always composed of four roses only, the other part of leaves."—Robson.

CHAPOURNET. In heraldry "a *chief*, divided by a curved line. This word, used crroneously by some English heralds, is a corruption of the French word *chaperonnet*, which signifies a little hood. The accom-



CHAPOURNET.

panying engraving reads: ar. on a chief vert, a *chapournet*."—Robson.

CHAPOURNET REVERSED, *in chief*, "merely reverses the curved line of the *chapournet*, making it issue from the upper instead of the lower part of the *chief*."—Robson.

CHAPPE. "A term used when the *field* is divided by two lines, issuing from the middle point in *chief* to the two *base* angles of the shield. The French have this bearing and call it *tierce en mantle*, the sections of the sides being of a different color from the other."—Robson.

CHAPPÉ CROSS. "A French term for a

CROSS CHAPPÉ.

cross double *fitchée* of all four."—Robson.

CHARBOKULL. An old English term for carbuncle.

CHARES. The Grecian sculptor of Lindos, who created the Colossus of Rhodes in bronze.

CHARGE. "(French, *charge meuble de blason, assiette, figure* or *picce*). The various figures and ordinaries depicted on the escutcheon, by which the bearers are distinguished from one another."—Robson.

CHARGED (French, *chargé* or *surmounté*). "A shield is said to be *charged* with the bearing drawn upon it, and the term is applicable to any of the *ordinaries* or *charges* bearing any other device upon them, which is then said to be *charged* with such minor device."—Robson.

CHARLOTTENBURG. "Two miles from Berlin this royal porcelain factory was founded in 1790. It produces an argillaceous porcelain. Mark, up to 1830, was an eagle burnt in color in the bottom. Later eagle impressed in white."—Marryat.

CHARPENTIER, François. A potter at Oiron in the XVI. century.

CHARRIER, André. A ceramic painter at Rouen in the XVIII. century.

CHARRON, Pierre le. An eminent enameler and goldsmith of Paris, 1416.

CHARVET, Claude. An eminent French goldsmith. Patronized by the Duke of Orleans, 1741.

CHASING. Indenting of metal for ornamentation.

CHASSE. A shrine for holding a saint's relics. Smaller caskets for holding religious relics were so called. Larger ecclesiastic

containers for such purposes were generally known as *shrines.* (See *feretory.*) A favored method of selecting the *motif* for a *chasse* was for the artist to reflect the outline of the sacred relic that it was to contain, thus we find them in the form of a foot or a head, etc., thus vividly calling the attention of the observer to a knowledge of which part of the saintly person was therein contained.

"The oldest and most wonderful of these works is the head, in embossed silver, of St. Mauritius, in the treasury of the Church of St. Maurice in Wallis, magnificently severe, like no later work; on the breast is the representation of the beheading of the saint in a style which belongs to the IX. century. From the early Romanesque period, probably the XI. century, originates the head in the monastery of Fischbeck on the Weser, and the head, just as antique, in the British Museum in London, which came from the minister at Basle. Later works of this kind are in the cathedral at Hildesheim, in St. Cunibert at Cologne, in the cathedral at Aix-la-Chapelle (the head of Charlemagne), and in the cathedral at Liege the head of St. Lambertus. We often find, in a similar manner, the arms of the saints represented, and sometimes, for more particular recognition, the attribute is given in the hand. Feet, single fingers or other parts of the body rarely occur."—Lübke.

Chastellain, Jean Pierre. A ceramic painter at Rouen in the XVIII. century.

Chastons. "Breeches of mail," XIII. to XIV. centuries.

Chateaudun (France). "The Duke of Chevreuse had obtained a privilege for the erection of a faience manufactory in this town. * * * In 1788 Gournay still mentions *Chateaudun,* whose products are yet to find."—Jacquemart.

Chatelet, near Bouffioux (France). Four potters named Bertrand settled here in 1593. The history of the career of its pottery is indissolubly mixed up with that of its neighbors of Bouffioux. The ware made by this factory has been included in the more general term Walloon ware (to which refer).

Chateronner (Fr.). "To surround the figures with a deep outline."—Jacquemart.

Chaudessole. A faience maker at Clermont-Ferrand, in the XVIII. century.

Chaton. A bezel.

Chaussé (Fr.), "in the common acceptation of the word, signifies shod; and in blazon denotes a section *in base.* This line is formed by proceeding from the extremity of the base and ascending to the sides of the escutcheon, which it meets about the *fesse* point."—Robson.

Chausons, or *trews.* Armor for the lower limbs above the knee. (See *chaussé, cuisse, cuish, cuissart.*)

Chaussetrap. Same as *caltrop* (to which refer.)

Chausses. Armor affording protection from the knees down, and covering the feet.

Cha-wan. The Japanese tea bowl used at the tea ceremonies (*cha-no-yu*). Made of porcelain or earthen ware. When of large size they are known as *temmoku.* They are purposely made very rudely and of various shapes, some shallow, resembling saucers, others nearly cylindrical. This ceremonial tea was made and drunk out of these bowls by the guests. Their decoration is so slight as to be scarcely fit to be called so.

Checkers (Her.). See *chequy.*

Checky, or *checkie* (Her.). See *chequy.*

Chef, or *chefe* (Her.). Same as *chief.*

Chef-boutonne (France). A Sieur Drillat Jeune made there, in 1778, common faience.

Cheironiptron, or *cheironips.* "A Greek wash hand-basin, but shape unknown."—Birch.

Chelidoniacus. "A broad-bladed sword with a double point like a swallow's tail."—Mollett.

Cheliform. Having the form of a claw or pincer.

Chelsea (England). The "Bee" and "Goat" milk jugs, marked Chelsea, 1745, "are the earliest pieces known of this place. Nicholas Sprimont and Charles Grouyn, of Flemish or French birth, owned the works here. The latter was formerly a silversmith. The exact location is unknown. Grouyn died previous to 1750, Sprimont separated from the *Chelsea* works 1769, and William Duesbury, of Derby, purchased the place, but closed the factory 1784 and moved the plant to his Derby works. Services of the early ware were in Chinese designs exquisitely colored and true imitations. Decoration was done in "flowers and fruit in detached groups with butterflies, insects and caterpillars." Some of these were painted on Oriental imported white china. A strong feature in the Chelsea factory's output was figures wonderfully modeled and charmingly colored, from shepherdesses with dogs to monkeys performing on musical instruments, while religious and classical subjects were not omitted. These figures and groups were not only in purely ornamental but also useful form as candlesticks. Scent bottles and snuff boxes also were produced by the *Chelsea* concern.

Characteristics: Prof. Church says, previous to 1757, "the porcelain was characterized by considerable translucency, much glassy frit being employed in the paste, the glaze being also very soft and gold sparingly used in decoration"; 1759 to 1769 the body "contained bone ash." Mrs. Hodgson says early characteristics are "unctuous appearance" and "thickness and heaviness of many of the pieces." Small discs looking like "grease spots" appear on holding up to the light. These spots are known as "moons"; they become fainter in later pieces, and finally disappear in the last period. Glaze extremely "glassy" and thick, and often considerably cracked. Thick flaws in glaze carefully concealed by painting. Tripod marks leave three blisters on glaze often at bottom. The figures usually have tripod "thumb marks."

Marks: Vary from an anchor in relief in embossed oval to "Chelsea" with an incised triangle; or very rarely the anchor in a brownish-red enamel on white. Also the anchor appears in gold, red, purple. The mark is smaller than the similar Venetian sign. The mark appears at times on the base or even in a fold of drapery, instead of on the bottom.

The likeness to Dresden ware fortifies the impression that German artists were present in the work. Much confusion naturally exists, caused by the likeness between *Chelsea* and Worcester ware. With the removal of the plant and models to Worcester, no doubt, many of the *Chelsea* artists followed. W. M. Binns says: "Chelsea must always remain especially distinguished among the early English potteries for the exceptional quality of its paste and glaze. We make this statement with one reservation, and that is the unfortunate crazing and cracking to which the glaze of the last period is sometimes subject." Body "milky-white," not very resonant. The *Chelsea* glaze is quite different to Worcester. It is recognized by being smoother, softer, thicker and more flowing. "No parallel in early English china to the wonderful crimson ground which formed so admirable a complement to the magnificent dark blue."—Binns. This dark blue (mazzarine) ground is a noteworthy feature. Some of the best *Chelsea* pieces are considered "the equal, and, in some cases, superior, to those of the royal factories of Europe."

Chelsea figures often have a rococo scrollwork for a foot. The product of the factory from 1769 to its close in 1784 is often called *"Chelsea-Derby."* This period discloses great change in style, "vases were modeled on classic lines and the decoration became more severe and restrained." These are the Duesbury (Derby) attributes.

Chemical Test. The action of acids upon porcelain in a finely powdered state would reveal the presence of phosphate of lime, which, in the form of bone ash, enters largely into the composition of soft porcelain, sometimes called *artificial porcelain* or *pâte tendre,* but the collector will hardly care to subject a rare specimen to the disintegrating process in order to decide the question."—Barber. (See file, foot, fire, fracture, color and other tests.)

Chenel, Jean Baptiste. A faience maker at Rouen, end of the XVIII. century.

Cheniscus. "An ornament placed at the bow and sometimes the stern of ships. In

CHENISCUS.

shape it resembled the neck of a swan or goose."—Mollett.

Chenuau, Jehan. An eminent goldsmith of Tours, France, 1470.

Chequé, *chequy, chequered* or *checkered* (French, *eschiquetté* or *echiqué*). "Terms used when the field or any charge is divided

(To be continued.)

The Pope's Tiara.

THE Pope's tiara consists of a very fine felt, covered with a silver fabric, made especially in Rome. On this felt the three golden crowns, made very light to reduce the weight, are displayed. Each crown consists of a band set with stones and edged with two rows of pearls. As each row contains 90 pearls, altogether 450 pearls are used.

The first crown contains the following stones: Two circles of Oriental pearls, 16 balas rubies, three emeralds, one hyacinth, one aquamarine, two balas rubies, one sapphire, eight golden flower designs with four emeralds, four sapphires, one ruby, eight gold points, with five garnets and two balas rubies.

The second crown contains two emeralds, three balas rubies, one chrysolite, two aquamarines, 16 small rubies, two *fils de perles* (pearl strings); in the center, three sapphires, 18 emeralds and five balas rubies.

The third crown has 16 small balas rubies, two sapphires, two balas rubies, one hyacinth, three aquamarines, one garnet, two *fils de perles*, eight flower designs of gold, with two emeralds, one balas ruby, two sapphires, one chrysolite, two hyacinths, eight gold points, each terminating in a garnet.

The tip of the tiara is covered with a golden leaf, in which eight rubies and eight emeralds are introduced. On this is the terrestrial globe of blue enameled gold, which bears a cross composed of 11 sparkling diamonds.—*Translated.*

Alexander H. Revell & Co., DAYTON AND EASTMAN STREETS, Chicago, Ill.

The Elements of Beauty and Design in Bronzes Which Appeal to the Average Buyer.

AMERICAN taste does not run to the classic in bronzes. As a nation we are iving very much in the present. There is omething, as it were, warm-blooded about ronze which adapts it to the artistic ex- ression of strenuous conceptions; which resent life and action of real people, often ery commonplace people, rather than of he old gods and goddesses. We leave my- hology for marble.

Yet there is one exception. If it is within he proprieties to give the devil his due, one hould surely give a "god" his due. Mer- ury, of all the mythological dignitaries, oes seem to enjoy some degree of popu- rity even in bronze. Of all the bewilder- ng galaxy of deities, he is the best known. Moreover, Mercury has such distinct char- cteristics you cannot mistake him. So he s known and measurably popular. The art lealers carry him. It is a safe classic piece, ven in these very unclassic United States.

The fact that we do not incline very trongly toward the classic in bronze statu- ry is not to say that we are lacking in ppreciation of what is artistically interest- ng. Many aspects of American life, par- icularly of life in the rough, are full of haracter and action. The skill of the artist an be exercised as fruitfully upon a west- rn cowboy as upon a gladiator, and an American Indian seems to us to cut quite s picturesque a figure as a Greek slave. Some very excellent bronze work has de- icted the Indian with his feathers and full egalia. The copper tone in the bronze pproaches the deep color of the red man's kin. Good pieces of this nature are appre- iated. It is a curious fact that some of ur best bronze Indians are the work of a European artist who never saw an Indian n is life!

We like types that we are familiar with, nd action that we are familiar with. A ne team of oxen swinging along with their pad smacks pleasantly of the forest and he country, and one almost fancies he can ear the driver calling "Gee" and "Haw." The sturdy wood-cutter with his axe forms n bronze a subject which in painting would ave suggested Millais. The hunter with is rifle poised is another subject of the ame general nature. These are merely llustrations of a popular class of pieces. The examples are too numerous to describe hem in detail.

It is not necessary that the subject should elong to our own precise period. All read- rs of Dumas, or, indeed, of French history r literature, are familiar with the dashing usketeers, with their rich costumes and owing feathers. They also constitute good ypes to be embodied in bronze. When so uch work of this kind is inspired in rance, it is not surprising that the artists f that country have due regard to the pic- uresqueness of the musketeers. And in heir pieces the figures reflect a sort of rol- icking dare-deviltry, equally ready for a uel, a carouse or a gallant love affair.

Anyone who has followed the bronze ieces imported in recent years must be impressed with their increasing beauty, and with the deepening and strengthening of their artistic message. While this state- ment is true in a broad sense, it is particu- larly applicable to electroliers. One can hardly omit them when considering bronzes. It would be interesting to trace the artistic development of electroliers from the earlier importations up to the present. Being some- what in the nature of fixtures, less portable than ordinary lamps, they are not neces- sarily limited as to size. At first the artists took advantage of this and rather exag- gerated their statuesque conceptions. The electroliers were, if anything, too large. They were somewhat lacking in refinement and delicacy. A figure which may be pretty in miniature becomes gross when magnified so many diameters. The result was that for a time electroliers were to be found mainly in cafés and in the foyers of thea- ters, but not so often in the homes of the people; but the decorative ideas embodied in them were too good not to be welcomed into private residences when certain modifi- cations and developments had taken place. The electrolier is really the union of two ideas—statuary and illumination. Both lend themselves to highly artistic effects, and such is the nature of the effects now being produced. In short, many of these illumi- nated pieces are superb. They are worthy of the connoisseur.

Developments along the line of the elec- troliers have gone so far that, perhaps, a new name will have to be invented, because some of the later creations are radically new and distinct. Of course, the primary object of an electrolier is to illuminate. On the last analysis it is a kind of lamp. Now the new pieces to which we refer limit and sometimes almost suppress the illuminative feature. They illuminate only the bronze, and only parts of the bronze, and only ap- propriate parts. The light is merely a deco- rative incident. Its appropriate placing is the secret of fine effect. It does not light a room. The piece is complete in itself. What is one to call these interesting products? They are more than ordinary bronzes, be- cause they introduce elements of illumina- tion. They are less than electroliers, because they are not illuminative enough. They are familiarly spoken of as "Show Bronzes." Also they have been given the lengthy name of "Spectacular Illuminated Bronzes." Whatever name you may give to such a line, the examples are remarkably handsome and should prove interesting and profitable.

In these goods, as well as in the strictly bronze statuary, the subjects are homely and familiar, but none the less fascinating. For example, one piece represents the black- smith heating his iron, and the only light is among the coals. In another, one sees the baker shoving his batch of bread into the oven, while there is only the light of the fire beneath and of the lantern overhead. A girl at the well looks down upon the limpid water which glows as if beneath the moon- beams—and so on. Enough has been said to indicate the nature and possibilities of this new outgrowth of the electrolier.

Bronze continues to be used in combina- tion with marble in statuary. It adds a re- lieving touch of warmth to a stone that is usually so cold and white. There are some evidences of a tendency to greater use of colored marbles to get away from the iciness of dead white. Where bronze is added, art- istic appropriateness is observed, as where helmet and tunic are of bronze, leaving the face of marble. Such combinations require nice discrimination to avoid hybrid and con- glomerate effects.

Of all the metals employed for purposes of beauty, bronze appears to be the favorite with men. It is a "genial" sort of metal. It makes a masculine appeal. The jeweler who conducts an art department may be ex- pected to feel something more than the bare commercial interest in the bronzes he dis- plays.

THE COMMENTATOR.

A Texcoco Pottery Maker and His Work.

IN a recent issue of *Simmons Magazine* appeared an article on Mexico of the present day, in which the author touched slightly upon the pottery of that country dating from ancient times, while among the illustrations some gave an idea of the pot- tery manufactured at Texcoco.

TEXCOCO POTTERY WORKER.

The cut herewith shows a pottery worker of Texcoco at his bench (in his shop), sur- rounded by examples of his artistic handi- work, which is in great demand among tourists as souvenirs.

The North Carolina State Board of Ex- aminers in Optometry, which convened in Raleigh recently, out of the 11 original applicants admitted only E. B. Churchwell, Wilson, and J. Douglass Watkins, Peters- burg. Several withdrew before the exam- ination commenced. The Board meets again at Charlotte June 19.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2410.—**Black Oxidize for Brass.**—*We have much brass scrap which we are working into small medals and ornaments. We want to give them a nice black oxidize, and ask you to give us information how to do this.* B. & O.

ANSWER:—To give brass a good oxidize, prepare the brass by cleaning in potash and dipping in a bright acid dip, then rinse in water and put in the following fluid from three to five minutes: Five parts carbonate of copper and 35 parts ammonia are put in a dark flask, stoppered and left to stand over night. The brass to be oxidized is, as mentioned above, put in from three to five minutes, when it will first become black, then brown, and last deep black. When at this point it must be removed; if left longer the fine black color will disappear. Dry in sawdust and give a good coat of lacquer. After using several times the oxidizing liquid becomes weak and useless.

QUESTION No. 2411.—**Cements for Glass and Metal, and Plaster Moulds.**—*Please give me a few formulas for making cements suitable for glass and metals; also how to make plaster mould for casting soft metal parts for repair jobs in a jewelry store.* C. F. G.

ANSWER:—Cements suitable for various purposes are prepared as follows: 1. *Gutta-percha cement, suitable for mending broken porcelain and ivory.*—Mix together in an iron bowl two parts of black pitch with one part of gutta-percha and pour the melted mass into cold water. The product soon becomes black, elastic and solid, and will soften at a temperature of about 50° C. It may be used in the paste or liquid state to unite metals, glass, porcelain and ivory, and works very well for cementing glass in windows and aquariums. 2. *Cement suitable for metal and wood.*—Use the best miners' glue, to which has been added a little glycerine. Before using the metal should be roughened with dilute sulphuric acid, and after wiping dry spread on the glue evenly and press the parts closely together with clamps or other means. 3. *Transparent cement for glass.*—Digest together for a week the following parts by weight: One part India rubber, 67 parts chloroform and 40 parts gum mastic. 4. *Plastic metal composition.*—A cement, or glue, suitable for fine metal articles which cannot be soldered in fire, and also for glass, porcelain and other substances. Copper oxide is reduced by means of hydrogen gas and of the copper powder obtained in this manner about 30 parts are thoroughly moistened in a cast-iron or porcelain mortar with sulphuric acid of 1.85 specific gravity; 70 parts by weight of mercury are then added to this paste, the whole being constantly stirred. When all the copper has been thoroughly amalgamated with the mercury the sulphuric acid is washed out again with boiling water, and in 12 hours, after it has become cold, the composition will be so hard that it can be polished. It is impervious to the action of dilute acids, alcohol, ether or boiling water. It maintains the same specific gravity alike in the soft and the hard condition. When needed for use, warm and stir the hard mass in an iron mortar to about 100° Réaumur, until it becomes soft as wax, in which state it must be used. *Plaster Moulds.* 1. Moulds suitable for casting lead, britannia or spelter may be made out of plaster of Paris, dried over a warm oven for a few days, then smoked over a gas jet. Warm the mould before pouring the metal. 2. *Plaster moulds for some of the harder metals,* which require a higher heat, such as silver and copper, may be made with a mixture of dental plaster and finely powdered asbestos, made into a paste with water. This mould should dry over a warm stove for several days, then be smoked over, when it is ready for pouring. 3. *A patented porous plaster mould,* suitable for brass, silver or any of the softer metals, is made by using calcined plaster of Paris and finely screened coal ashes. The screened ashes are mixed with water to the consistency of thick cream and the plaster of Paris is mixed the same way. The two plasters are then mixed together in about equal proportions. The ashes with the plaster will produce a mould that is very porous, enabling the castings to run far more readily than by any other method. After the moulds are finished they should be dried for seven or eight hours over a hot stove.

QUESTION No. 2412.—**Silver Solder.**—*How can I prepare small quantities of silver solder, suitable for repair jobs?* S. S.

ANSWER:—For repairs it is best to use a silver solder suitable for re-solder, or such as has previously been soldered. Small quantities may be made by cutting a well-hole in a sound piece of charcoal; sprinkle it well with powdered borax; put in two parts of fine silver, and with a blow-pipe melt the silver, then add one part of brass. When melted stir the mass well with a stick. The heating is now discontinued and a very small part of arsenic is added, stirred again, and, while the button is still soft, pressed flat with a hammer. When cold the solder can be hammered into a thin sheet, or, if there are jewelers' rolls, rolled into sheet. With a hand shears the sheet is cut into strips suitable for use. Larger quantities can be melted in a crucible. A new crucible should be used, or one not used for other metals. Rub the inside well with powdered borax before using.

QUESTION No. 2413.—**To Distinguish Genuine Ivory.**—*How can I distinguish genuine ivory from the imitation?* T. D.

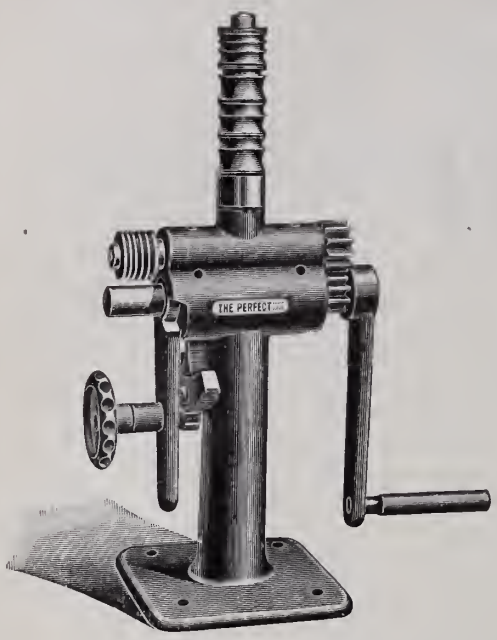
ANSWER:—To distinguish true ivory from the so-called vegetable, it is recommended by the *Apoteker Zeitung* to treat a sample for 12 to 15 minutes with concentrated sulphuric acid. Under these conditions true ivory retains its white appearance, while vegetable ivory assumes a rose color, which may be removed by washing with water.

QUESTION No. 2414.—**To Remove Bluing on Steel.**—*I want to remove the blue from steel clock hands. How can I do this?* T. R.

ANSWER:—To remove the blue from steel, so as to leave it as clean as before coloring, try acetic acid or solution of tin chloride (stannous chloride).

QUESTION No. 2415.—**Cleaning Filigree Silver Jewelry.**—*How can the original white color of silver filigree jewelry be restored when tarnished by wear or shop-worn?* C. F.

ANSWER:—To restore filigree silver, first wash the article in a solution consisting of one fluid ounce of liquid potash in 20 ounces of water; rinse, then immerse in a mixture of salt, one part; alum, one part, and saltpeter, two parts. Dissolve in four parts of water. Let articles remain for five minutes; wash in cold water, then rinse in hot water and dry with a chamois.



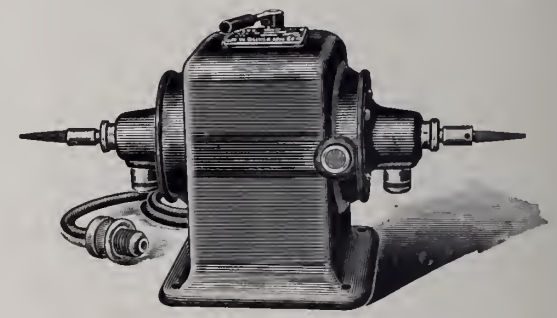
Workshop Ventilation and Industrial Diseases of Special Interest to Electroplaters and Those Similarly Employed.

(By PERCY S. BROWN, in *The Metal Industry.*)

THE question of factory ventilation has been widely discussed by experts in this line of engineering work, and yet, after all the attempts which have been made to improve the existing conditions, we are still far from a condition approaching the ideal. Both the city and State of New York have inspectors whose duty it is to go to factories and workshops and make determinations of the carbon dioxide in the air, but although they deserve credit for enforcing the law regarding ventilation to the extent of forcing offenders to pay fines until improvements in ventilation are made, they fail to give the proper attention to other conditions which they encounter.

One of the greatest sources of danger to electroplaters, silversmiths and others employed in similar work is the use of potassium of cyanide in large quantities. Potassium cyanide is employed in hot and cold solution, usually in an open crock or tank, protected in no way, not covered by hoods, not labeled and handled freely by everyone.

How many plating establishments have hoods with good exhausts over their hot copper cyanide plating tanks? How many protect their employes from the cyanide in its crude form before it is placed in solution? How many instruct their men in the dangers of handling the cyanide? I know



IF you could reduce your stock of rings by one-half and still be able to show your customers the same variety of styles and the same range of sizes, would you do so?

You can with an Oliver Quality Perfect Ring Stretcher. And it is an inexpensive tool built up to the Oliver Quality standard of strength, durability and accuracy.

There is but one entirely satisfactory method of polishing or buffing, and it requires the use of the electric motor polishing head.

There is but one electric motor head that will run day in and day out with the minimum amount of care and attention, that will use the smallest possible amount of current, and that will cost practically nothing for maintenance. The one head is the OLIVER QUALITY ELECTRIC MOTOR POLISHING HEAD.

Would our catalogue interest you? It is free.

f a case where a plater's helper was open-
ng a large case of cyanide and was break-
ng up the lumps by holding them in his
and and cracking them with a hammer.
Ie complained because the powder flew up
n his nose and made him sneeze. I cite
is merely as an instance of how ignorant
he men who work with this deadly poison
re regarding its properties.

In cases of serious illness caused by
yanide poisoning, what protection have the
mployes? They may be sick and lose
eir positions and there is no return. The
nployе is not held responsible and legal
roceedings are seldom resorted to. As an
stance of how dangerous can become
anide poisoning contracted through the
kin, I quote abstracts of an article from
e *Journal of Nervous and Mental Dis-
ases*, Vol. 35, No. 7, July, 1908. This ar-
cle, written by Joseph Collins, M.D., and
arrison S. Martland, M.D., is entitled
Disease of the Primary Motor Neurones
ausing the Clinical Picture of Acute An-
erior Poliomyelitis: The Result of Poison-
ng by Cyanide of Potaassium."

The abstracts are as follows:

" * * * We report herewith a case of
cute inflammation or degeneration of the
eripheral motor neurones, which consti-
ites clinically a peripheral motor neuritis,
ut which, however, can scarcely be dis-
nguished from an interior poliomyelitis.
n fact, so far as the reporters of the case
re concerned, it cannot be distinguished.

"The patient, an Italian, 38 years old,
as admitted to the City Hospital, Dec. 3,
906. A brief synopsis of the history of
is illness is as follows: Since coming to
his country, in 1904, he had been working
s a silver polisher in a hotel. The method
f keeping silver bright in such establish-
ents is to drop it into a solution of cyan-
le of potassium and then dry it. He says
hat his hands and forearms were in such
olution so much of the time that they
ok on a deep brownish red color and he
requently complained of a distressing itch-
ng sensation in them. In addition to this
he finger-nails were quite black. He does
ot know how strong the solution of cyan-
le of potassium was that he used, but he
ys that he had to be careful to keep his
ands away from his nose or his mouth, for
therwise he would get very dizzy. On Sept.
, 1906, he was seized with diarrhœa which
on became very severe, the passages con-
ining very large amounts of mucus, but
o blood. The following day he complained of
evere headache, of pain and stiffness in the
ack of the neck and of feeling ill. He was
hen taken to a hospital, and it is said that
or a few days he was mildly delirious and
ad such meningeal symptoms as stiffness
f the neck, retraction of the head and
ensitiveness on being handled. * * *

" * * * For upward of six months
here seemed to be no indication of recov-
ry. Then gradually the atrophied and par-
yzed muscles of the upper extremity began
o display slight functional capacity. In
he autumn of 1907 braces were put upon
is legs and now he is able to walk with
he aid of crutches. * * *"

This is merely one of many serious cases of cyanide poisoning. In some instances the poisoning is indicated merely by skin eruptions, serious in many cases, and in others the entire body is affected and general breakdown follows.

Another serious form of poisoning is due to nitrous fumes from rooms where metal is dipped in mixed acids, nitric acid causing the objectionable fumes. Serious poisoning, in some cases resulting fatally, have occurred, and unless good arrangements are made for exhausting the fumes the employes are in constant danger.

In buffing and polishing rooms there is always danger to the lungs if proper exhausts are not provided. Fortunately, the law protects those engaged in this kind of work by making it compulsory to have proper methods of exhausting the dust.

Our State labor laws are good, as far as they go, but can they be properly enforced? Is the organization back of these laws strong enough to enforce them throughout the State? Apparently it is not, as we all know that the evils still exist to a great extent. To show to what extent the law empowers the Commissioner of Labor to enforce proper conditions in factories I will quote Article 86 of the laws relating to labor and factories under the head of Ventilation:

> The owner, agent or lessee of a factory shall provide in each workroom thereof proper and sufficient means of ventilation, and shall maintain proper and sufficient ventilation; if excessive heat be created or if steam, gases, vapors, dust or other impurities that may be injurious to health be generated in the course of the manufacturing process carried on therein the room must be ventilated in such a manner as to render these harmless, so far as is practicable; in case of failure the commissioner of labor shall order such ventilation to be provided. Such owner, agent or lessee shall provide such ventilation within 20 days after the service upon him of such order, and in case of failure shall forfeit to the people of the State $10 for each day after the expiration of such 20 days, to be recovered by the commissioner of labor.

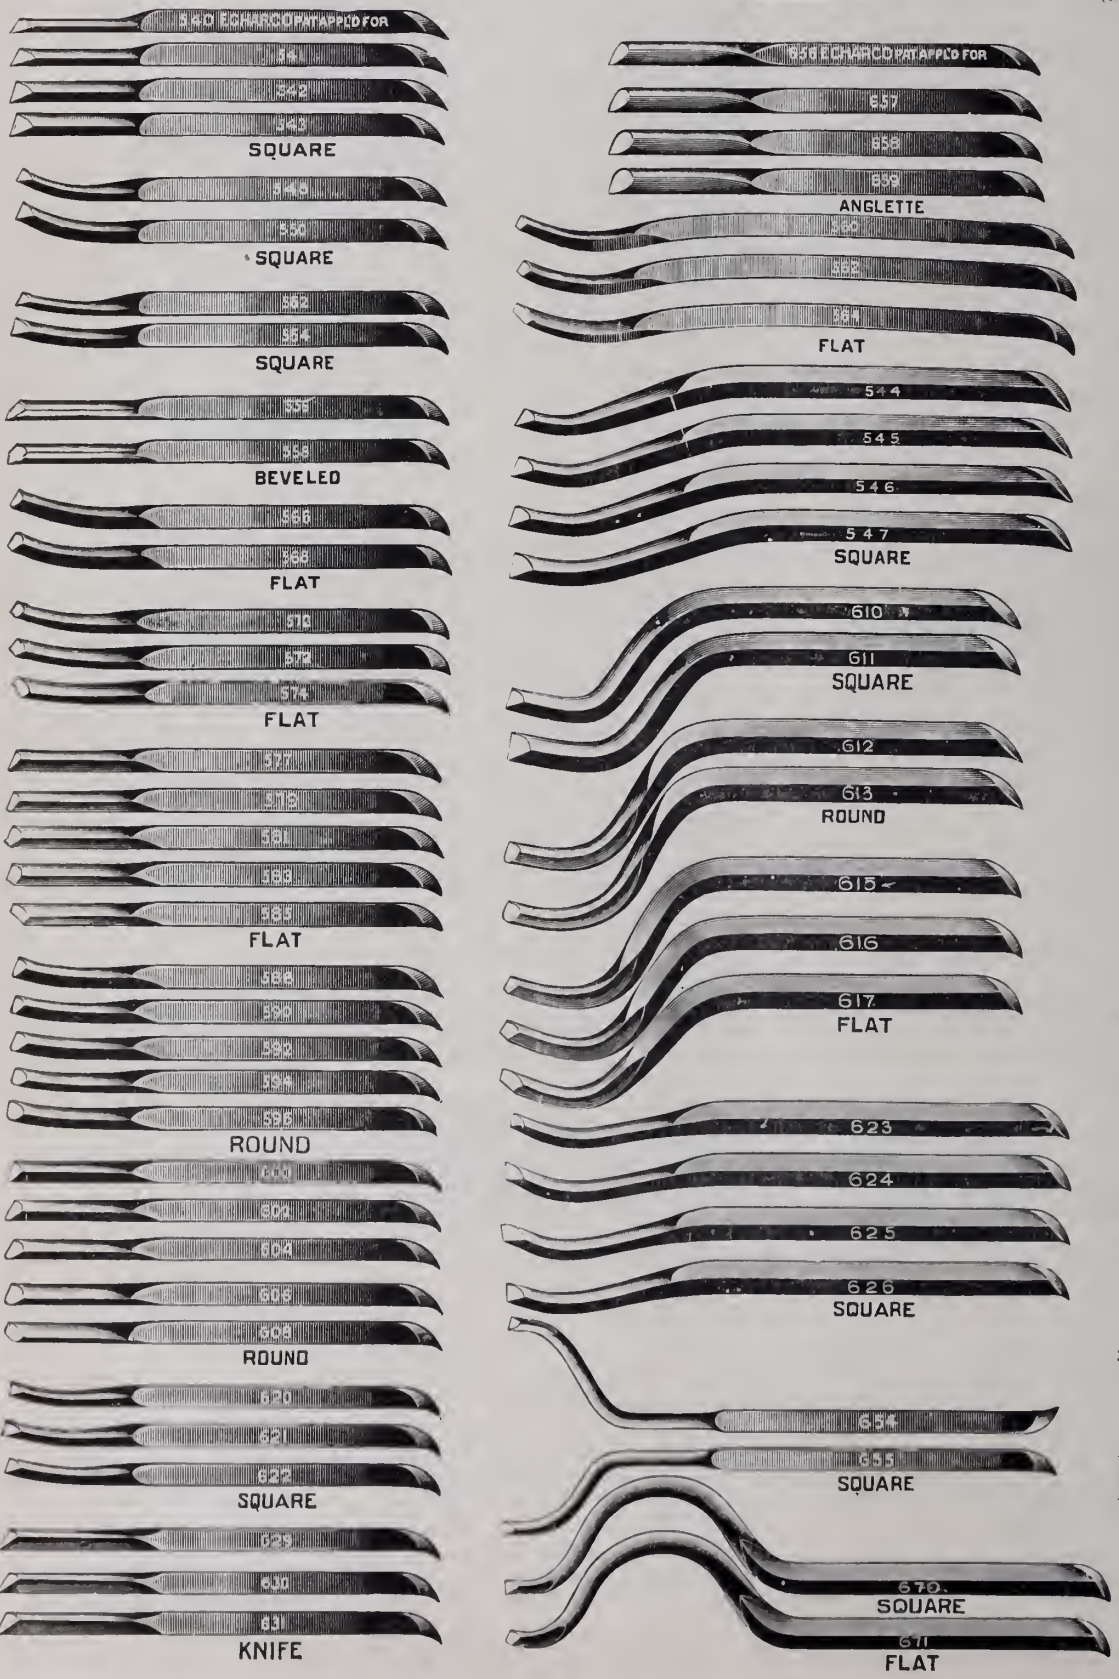
This article gives almost complete power to the Commissioner of Labor, and any recommendations for improvement in ventilation can be enforced under this section of the laws. The fault in the law is not in the fact that it fails to cover the necessary points, but that it is of such a character that it is difficult to enforce. Inspectors can determine the fact that the air has become vitiated by lack of ventilation, but they do not reach the evils found in many factories, where there may be a minimum of carbon dioxide, and yet large excesses of noxious gases. Unfortunately, carbon dioxide is tested for and other things neglected. Also when the inspector arrives in a shop or factory, his entrance in the different departments appears to be "anticipated" and all windows are found open. The result is that his tests show the carbon dioxide content to be within the legal limit.

Fortunately, there is a remedy which, by proper legislation, would prove both a protection to the employer and employe. This remedy consists in making the employer liable for specific cases of illness contracted by an employe, such cases of illness being contracted through fault of the employer in neglecting to assure proper protection for his employes' welfare, as required by law. An example of this form of protection is found in the recent reports of "The Departmental Committee on Compensation for Industrial Diseases" appointed by the King of England. The investigation of this committee was remarkably thorough and their findings should be on file in every municipality. The committee made their reports after exhausting study of industrial conditions pertaining to the health of workmen, interviewing physicians, workmen, capitalists, labor organizations, etc., in the most thorough manner.

We are gradually working toward improved conditions in workshops and factories, and must eventually arrive at the point where our laws will have to be brought up to date. What change could be better than to have a law by which the employer knows just what his responsibilities are toward his employes and by which the employe in turn knows that he need not fear losing his position through incapacity from work resulting directly from a specific cause covered by a compensation clause under the law. Many cases can be made specific causes for compensation, as shown by the English law. Those not coming under the law would be classed as accidents and would be dealt with as heretofore. The poor workman, as a rule, never claims damages, owing to his lack of knowledge of his rights, or if he does he is often bled by shyster lawyers, whether he win or lose his case, for, as a rule, he fails to take advantage of opportunities offered by legal aid societies. These societies would find their burden considerably lightened if a law built on the plan of the English law was to be put in effect, as accident cases alone would then require their attention.

I believe that I am not too emphatic when I repeat that there is no question but that the law can be made specific enough to differentiate between cases of accident and those of sickness resulting through carelessness of either employer or employe and if the various powerful associations throughout New York State would get together and appoint a committee to investigate the possibilities of new legislation I feel confident that great progress could be made. Suppose, for instance, that the American Brass Founders' Association and the National Electro-Platers' Association were to affiliate in this matter, they could no doubt in a short time interest some of the manufacturers' associations in the cause, and there is almost absolute certainty that by obtaining the support of the best labor organizations the Governor and Legislature could be interested enough to consider improving the labor laws on sane, modern lines.

The old clock stand at the southwest corner of Baltimore and Light Sts., Baltimore, Md., will soon be reduced to scrap iron, while the hole in the pavement will be cemented over, leaving no sign of the landmark, which has, since the conflagration of 1904, reminded those passing up and down Baltimore's busiest street of the changes since the old days when it was the sign of a jewelry store. When the fire came the jewelry store sought other quarters. Then Light street was widened, bringing the clock to front the corner property, instead of the center of the block. It has been declared by many to be an eyesore.



Echarco Graver Handle No. 800

THE NEW LINE OF

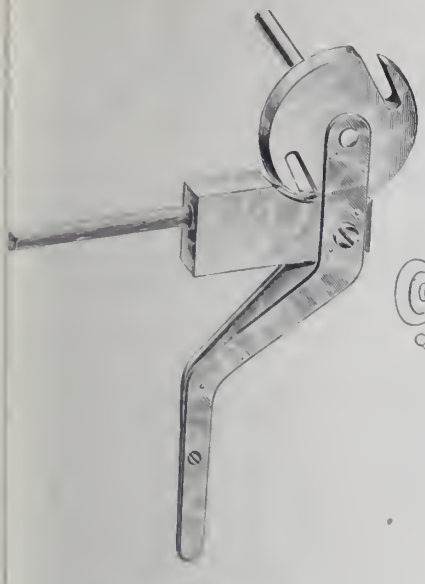
Echarco Gravers

AND HANDLES

(Pat. Applied for.)

Gravers are of highest grade hand forged Steel, have a special Graver temper, and are ground ready for use. The numerous shapes, designed by a practical Engraver, should meet the requirements of the most fastidious. The handle is of an entirely new construction, most pleasing to the hand. The locking device holds the gravers absolutely rigid, and permits an easy and quick change of one graver for another. The slightly bent ends of the gravers engage in the three notches in underside of handle, and permit the lengthening or shortening of the graver without removing same from the handles.

Price:

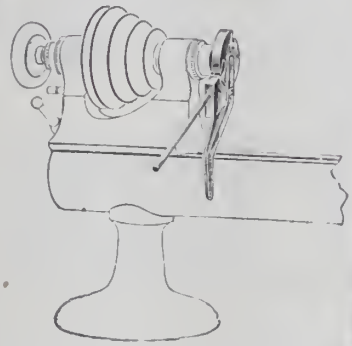


GRAVERS, - Each 35c.
Handles, No. 800 " 50c.

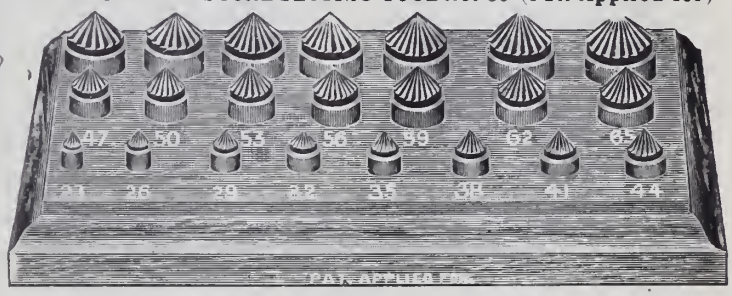
For Sale by all Jobbers in the United States and Canada.

Hammel, Riglander & Co.

47-49 Maiden Lane
New York

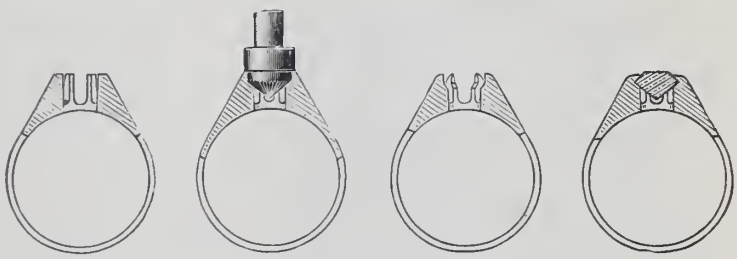


PEGWOOD SHARPENER No. 3



A new attachment, designed for use on a watchmaker's lathe, which sharpens pegwood to a hair point without breaking, and at the same time gives the point the proper concave shape. The tool is held in the lathe by an arbor fitting into a regular wire chuck as shown in the illustration, being steadied by the rest shown. The stick of pegwood is rotated by hand while the tool is revolved in the lathe, producing a fine, long, flexible point. With this tool the watchmaker can prepare enough pegwood for a day's or a week's work in a few moments, and have every piece uniformly and evenly sharpened.

The tool is mechanically perfect, made of the best material, is durable and cannot get out of order. For sharpening the cutters the use of a fine Arkansas oil stone slip is necessary. Coarser abrasives should not be used.

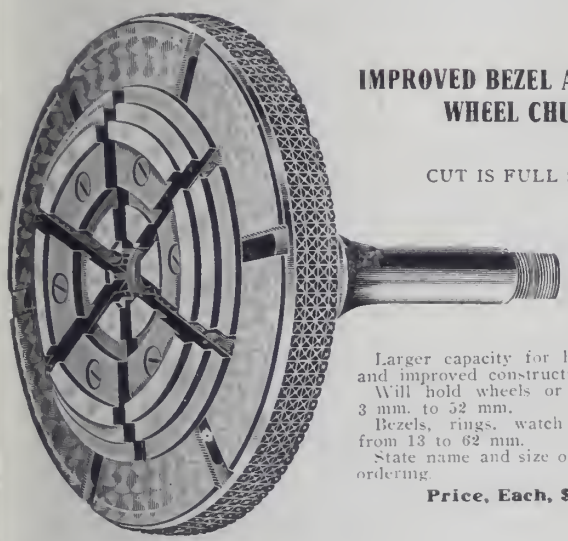


Price, each, $2.00

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, will do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1 16 to 2 carats.



Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 30 and 44.

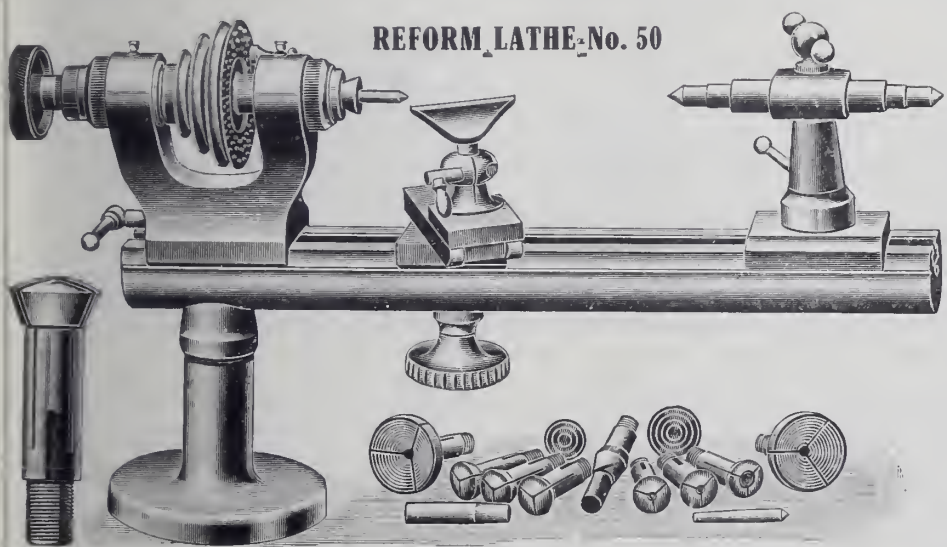
The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.

Price, Per Set, $5 50

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE

Larger capacity for holding work and improved construction.



Will hold wheels or plates from 3 mm. to 52 mm.

Bezels, rings, watch cases, etc., from 13 to 62 mm.

State name and size of lathe when ordering.

Price, Each, $9.00

REFORM LATHE No. 50

In presenting this new lathe to the trade, attention is respectfully called to the following advantages which it possesses:

1. It is built to standard size, all parts are interchangeable, and additional fixtures may be added at any time.
2. The headstock has a hard spindle and hard bearings, ground absolutely true. These parts are so finely ground that wearing of same is hardly possible. Any possible endshake can be taken up by means of the nut on the back of the chuck spindle.
3. The chucks are large and strong, the largest having a 5 m/m (No. 50) hole clear through the chuck.
4. The cone pulley has four indices, 4, 24, 28 and 30, for filing square, hexagon, etc., any article placed in the chucks.
5. All the parts and attachments, as far as the construction will permit, are finely polished and nickel plated.
6. The head and tailstocks have a new patent device for binding same firmly to the bed of lathe.

DIMENSIONS AND DESCRIPTION OF LATHE.

Length of Bed.....10¼ inches.
Height, from bed to center. 2 inches.
Swing ..... 4 inches.

Index pawl is attached to the headstock. Graver rest is of the "tip-over" or swinging pattern. Chucks are the same size as the W. W. chucks. For size see illustration at the side of lathe.

Price of Lathe, as shown in illustration, with 6 Wire, 2 Wheel, 1 Screw, and 1 Taper Chuck, with its taper; 4 Cement Brasses and 1 extra Steel Taper.

Price, $19.50

For Sale by all Jobbers in the United States and Canada.

OLIVER & DAVIS,
Successors to
RICHARD OLIVER & BLOOMFIELD,
Goldsmiths,
Importers of Diamonds and Precious Stones,
3a Maiden Lane.

NEW YORK, Feb. 28, 1905.

To Whom This May Concern:

We consider Mr. Dan I. Murray the finest and best jewelry auctioneer in America. He has proven these facts in conducting our sale which, perhaps, has been the most successful ever conducted in the City of New York, considering the difficulties under which Mr. Murray had to work.

Our stock consisted of only high-grade diamond and pearl jewelry. We did not even carry a piece of 10-kt. solid gold jewelry in our stock.

About one year ago Mr. Oliver died. This forced the closing of the business. We tried to sell the business at private sales, but the stock was so fine that no one would seem to take hold. After trying in vain to dispose of it at anything like a reasonable price, we found the only thing to do was to close it out at auction. The question then arose, where could we get an auctioneer that could sell fine diamond and pearl goods in the heart of the jewelry center of America without a loss?

We investigated, for several months, the records of many auctioneers, and we were told that if we could secure the service of Mr Dan I. Murray, that he would bring us out without a slaughter of the stock. We went so far as to call on customers where Mr. Murray had sold fine goods. These people told us that he was a most remarkable and wonderful salesman. We also called upon the Jewelers' Association and Board of Trade. They told us the same as all the others, that Mr. Murray was the man that would save us from terrible loss, if we could secure his services.

We finally went after him and found him very busy, but after waiting for about three months we were able to secure his services. To say that his sale has been satisfactory to us, is putting it mildly. He has realized thousands of dollars more for us than we had expected to get.

There is no word of praise too much for Mr. Murray's wonderful ability as a salesman, as he pulled us through this, perhaps one of the most difficult sales ever attempted in this city, and virtually without a loss. We found Mr. Murray, as well as a magnetic salesman, a splendid business man. By his advice to break up the large pieces we were able to convert them into money at a profit. We found him a perfect gentleman in every sense of the word, strictly honest and upright, and we recommend him without limit. Yours respectfully,

OLIVER & DAVIS,
Per R. M. Davis, Surviving Partner.

JEWELRY AUCTIONEER AND PRICE GETTER

NOTICE

TO THE RETAIL JEWELERS OF AMERICA

You want to make money; I can help you do it. You are overstocked with goods; I can sell them for you

I don't bother you with booklets or ancient history. What you want to know is what I can do for you.

I can give you lots of references from firms, corporations and banks for whom I have done business. They all recommend me. What I have done for others I can do for you.

I Have No Record to Make. I Have Made It. I Have Earned the Reputation I Am Proud to Possess by Faithful Work and Honest Dealings

"THE WIZARD OF THE HAMMER"

No auctioneer in America has conducted more successful sales than I have in the past 20 years.

If you are considering a sale, advise me immediately before completing details, as I can offer valuable suggestions. Tell me the size of your store, amount of stock, and if you ever had an auction. If so, when?

LEADING

Jewelers' Auctioneer

2515 Erin Avenue

CLEVELAND, OHIO

Established 18 Years

In my experience of 18 years, as auctioneer, I have never had a failure. I sell what the jewelers want sold to clean up surplus stock at a profit. A few of my recent sales are:

Townsend Jewelry Co. BAINBRIDGE, GA.

Fred G. B. Weihe OCALA, FLA.

I am at present closing a $65,000 stock for **BISKIND BROS., Cleveland, Ohio.** Write me for reference which will be cheerfully sent, also for date.

WHAT WOULD BE YOUR OPINION

?

Of a physician who sent a piano tuner to diagnose your physical ailments? Naturally you would resent it — first, on the theory that the doctor was a fraud, and secondly, as a reflection on your intelligence, to say nothing of your scruples about letting a piano tuner tinker with an organism as delicately constituted as your anatomy.

THE PARALLEL— WHAT WOULD YOU THINK

Of the auctioneer who, in his correspondence, when negotiating for your sale, either inferentially or specifically stated that he, personally, would conduct your sale and then palmed off a substitute on you?

NATURALLY, YOU'D FEEL PEEVISH

About it and classify him with the quack doctor, for the simple reason that you thought you were negotiating for the services of a full-fledged auctioneer and not those of a light-weight, immature and inexperienced makeshift.

THE SUBSTITUTE IS A COUNTERFEIT

And is just about as valueless for your purposes as a spurious coin is in the transaction of business. The auctioneer sending a substitute to represent him is a dangerous humbug to be avoided, and the only way to avoid him is to investigate fully the standing of the man you employ to conduct your sale.

YOUR ATTENTION IS DIRECTED

To my record: For twenty-two years I have been conducting sales under all sorts of conditions in all parts of the country. I have been unusually successful for the reason that my methods are conservative and businesslike, furthermore, every detail of every sale has my personal attention, nothing of consequence is entrusted to assistants, nevertheless I have as an assistant one of the best and most proficient auctioneers in the country. Your interests are scrupulously regarded and protected. Write, wire or 'phone me.

ALVIN SILVER

Morning Glory Pattern

925/1000 FINE

One of our new patterns of Sterling table ware, of medium weight and moderate price.

The Morning Glory Pattern is another example of Alvin Superiority—it is a most attractive and artistic pattern, full of character, in French gray finish, cut in high relief, as ornate on the back of each piece as on the front, in fact, the excellency of the die work cannot be surpassed. The execution of the flower together with the other details of the pattern, make it a pattern possessing exclusive qualities. Made in full line of fancy pieces, ounce goods and cutlery.

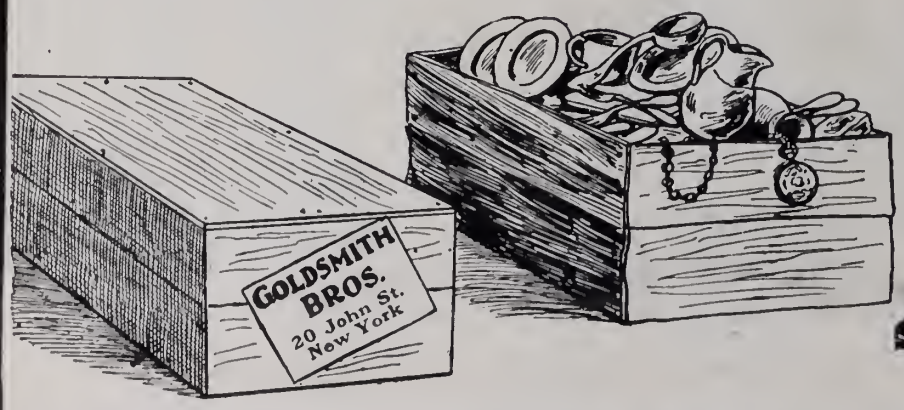
bring out the weak points of your store. They disclose the actual number of shop-worn pieces that have collected during the year, or years.

You discover many out-of-fashion jewelry novelties, old gold and silver pieces, and such unsalable stuff mixed promiscuously through your stock.

Dead stock that no doubt you've been carrying from month to month, hoping to realize the metal value of a part at least from some easy-going customers.

You are not making any profits doing this. Such goods are honestly losing you money every day, for they detract from the pleasing ensemble of your wares.



All old pieces are really worth more to you in our smelters than collecting dust on your shelves.

Box them up and start our way along with scraps, filings and your sweepings.

We pay the very highest prices and make returns for old gold and silver immediately on receipt. Returns for sweepings within five days of receipt.

All shipments are kept intact, and if our offer is not thoroughly satisfactory, the consignment will be returned to you at once, and we bear all expense. Could anything be fairer?

We have bought tons of sweepings from the United States mints. The government sells only to the highest and best bidder. Therefore, it's a sane and wise conclusion that the highest bidders are always

ATLANTA, Ga., Jan. 3, 1910.
(Copy of original letter.)
ARNSTINE BROS. CO.,
Cleveland, Ohio.

Gentlemen: — In answer to yours of Dec. 31st beg to say that we will be glad to have one of your souvenir books as soon as they are finished.

We take pleasure in stating that our increase for the month of December was about five thousand dollars over last December, which is a gain of about fifteen per cent. We attribute this largely to the use of your catalogs, which in our opinion is a paying investment.

Wishing you the compliments of the season, we beg to remain,
Yours very truly,
EUGENE V. HAYNES CO.

The Catalogs sent out by this firm since 1907 were made by The Arnstine Bros. Company

Running the Rapids of Life

A GOOD PILOT

The Wadsworth 25-Year "PILOT" Case

BIG JOHN was a good Pilot. In a comparatively small boat he conducted parties safely through the foaming torrent of the famous Lachine Rapids. Like his boat, he had strength and endurance. However rough the trip, he always weathered it. In this he was like the

WADSWORTH 25-YEAR "PILOT"

This case is built for a twenty-five year trip down the river of Time. Sometimes things go quietly; sometimes the pace is swift and strenuous. The case is not always handled with gloves or kept in chamois. But it weathers the trip safe and sound, like a good Pilot. Recommend it.

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two million have mesh bags. **We** must supply the other forty-eight million with machine-made mesh bags.

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than used on hand-made bags, and machines harden it still more in working, making wire **stiff and strong,** no **rough joints to catch,** and wear the dress. Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** other **so-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

Our New Selling Plan Is a Success

When we announced that we proposed to eliminate from our business the high salaried, expensive traveling salesmen, and deal with you direct by mail, we realized we were opposing a time honored custom of the trade. But we had confidence in the business judgment of the local jewelers, we believed you would readily appreciate our arguments that all the railroad and traveling expenses of these men, while in no way affecting the value of the goods, necessarily added to their cost to you.

YOU PROVED US RIGHT

The heavy response to our announcements, the universal commendation of our plan more than fulfil our expectations.

This is an age of keenest competition and scientific business methods must prevail. We must eliminate all manufacturing and selling wastes. You must buy on the most economical basis. Our selling-by-mail plan is a great stride in this direction. It enables you to obtain the same Woodside Quality Sterling and Deposit Ware you have been familiar with for years, but we are able to reduce the price 15% to 20%. This permits you to

CHOOSE More Goods for the Same the Same Goods for Less **MONEY**

STRIKING PARISIAN IDEAS

MEDALLION NECK PENDANTS

CARTIER is well known to be one of the foremost jewelry creators on the famous Rue de la Paix. This house is the first to embody his conceptions in artificial jewelry. The newest conceit is Cartier Medallion Neck Pendants. Medallions include characteristic bar and web effects. In some a black velvet background emphasizes decoration, carrying out the idea of velvet and diamonds. Cartier beaded settings and platinum mountings approximated. Braided Pearl Bands add further brightness. Worthy of any jeweler's show case. Can be retailed at from $6.00 to $18.00 each.

Compare the Old With the New

About the only point of similarity between the electric lamp commonly in use and the new G. E. MAZDA Lamp is that they fit the same socket. That makes it easy to replace the old lamp with the new

MAZDA LAMPS

But the G. E. MAZDA Lamp gives nearly three times the light of the ordinary type electric lamp without requiring any more electric current.

In the sunshine glow of the G. E. MAZDA Lamp, gems flash and scintillate as they do in bright sunlight.

You can make your store as bright as day by installing these lamps that mark the greatest advance in electric lighting since Edison's invention.

All progressive lighting companies and electrical supply dealers handle a complete line of G. E. MAZDA Lamps.

To get the genuine G. E. MAZDA Lamp insist on seeing the famous G. E. monogram on each lamp you buy and on the carton containing it.

Beautiful Gold Cup Presented to Henry J. Heinz by His Employes.

AS noted in the Pittsburg column a few weeks ago, Henry J. Heinz, of that city, was recently presented with a beautiful gold cup as an expression of affection, regard and esteem by the thousands of employes of the company of which Mr. Heinz is the head. The cup, which was made by Tiffany & Co., New York, is regarded as a fine specimen of the jeweler's art, and is said to have cost in the neighborhood of $2,000.

BEAUTIFUL GOLD CUP PRESENTED TO HENRY J. HEINZ.

The cup stands upon a base (not shown in the illustration) of the wood of the apple tree, typical of the fruitful bounty of the temperate zone, whence is chiefly supplied the material which furnishes a foundation for the business of the Heinz concern. In fashioning it, the employes were ever mindful of the sentiment which should attach to it. Classic in mould, as becomes an object made not for the day and hour, it bears upon its surface, rising from the base, 40 flutes representing the period (in years) of business history which its presentation to Mr. Heinz commemorates; the panels above aim to present an allegorical interpretation of his life's activities.

Illustrative of its commercial aspect, there is depicted on one panel the receipt of the bounties of the earth and their distribution to the nations of the world. The other portrays the personal attribute of broad-minded charity that to the distinguished honor of the arts and trades represents. Surmounting these are emblazoned upon a shield the scepter and laurel branch, emblematic of commanding business success. The handles by which the cup is lifted typify in their decoration ivy leaves, the spirit of warm friendship which actuated those who tendered it.

The cup weighs 22½ pounds troy, and is 29 inches high from the bottom to the top of the handles.

Fine Old Church Pieces.

THE treasure of the old Cathedral at Ueberlingen embraces several interesting specimens of ecclesiastical silver work, some of which are shown in the illustration on the front page of this issue. The reliquaries at the right and left are of the late Gothic style, while the piece in the center belongs to the late Renaissance period.

The centerpiece represents a beautifully wrought pax in ebony and silver repoussé by the Augsburg goldsmith, Matthäus Wallbaum. Another very similar piece is a little house altar owned by W. Metzler, in Frankfurt-on-the-Main. Other articles made by him are in Gotha, Dresden, and in the Castle of Heiligenberg. His share in the work in the rich chapel in Munich cannot be underrated. Wallbaum is best known as the maker of the Parnassus group which surmounts the Pomeranian art cabinet in the industrial art museum at Berlin. M. Rosenberg says of this artist:

"Exceedingly delicate in the modeling of the figure work and tasteful in ornamentation, Wallbaum's productions always appear as a well-rounded whole. The execution, as regards the repoussé work, displays wonderful softness, the castings are exceptionally sharp. He combines gilding and white silver to obtain, in the whole, that sunny brilliance that causes delight in his works; he places large, smooth surfaces by the side of sharply outlined rosettes to obtain at once the impression of richness and repose. In the enamel work he can compare with any of his contemporaries." His work can be quickly recognized on account of its distinct character.

Vawz, Vaze or Vase?

Maria broke a handsome vase,
The mistress said, "Your fired,"
And wept a quart of tears, because
Maria made her tired.
Maria's temper did outblaze,
She said, "I'll look another place,
I'm glad I broke the ugly vase—
Your bloomin', bally, cheap old vase."
—*Canadian Pottery and Glass Gazette.*

An attractive copyrighted card replete with "birthstone sentiment" has just been issued by King & Eisele, Buffalo, N. Y., and promises to be very popular in the trade. On one side of the card is the picture of a band ring in which appears the portrait of a child. About the center are pictures of 12 rings in natural colors, showing the birthstones of the 12 months of the year. At the base of this side of the card is a scroll on which may appear the jeweler's name and business announcement. On the opposite side of the card is a table showing the month and the various "birthstone sentiments."

SATISFACTION

The Larter Automatic Vest Buttons are one of the most satisfactory articles of men's jewelry ever put on the market. They are absolutely automatic in action; hence they can be inserted or removed in an instant without soiling the vest—No tugging or pulling backs into position.

They are equipped with strong unbreakable coil springs, which make them absolutely secure and reliable. They have nothing to take apart and lose.

Larter Automatic Vest Buttons are made in the largest assortment of patterns in the market. No matter what style or color the vest may be, we make the vest buttons to match. Every Larter Vest Button is guaranteed to give perfect satisfaction and Larter & Sons will cheerfully give in exchange, a new button in case of accident of any kind.

Reg. U. S. Pat. Office

Birmingham, the Manufacturing Jewelry Center of England.

By W. Augustus Steward.

PROBABLY no jewelry manufacturing center is so well known as the English city of Birmingham, in the County of Warwickshire. Its reputation—good and bad—has spread to every quarter of the globe. "Brummagen" is a word which for many years signified "cheap and nasty," and any metal goods of a flimsy nature, no matter where they might have been produced, were designated "Brummagen." And so

COUNCIL HOUSE, BIRMINGHAM.

the misdoings of those who catered for a shoddy trade have been visited upon the manufacturers of Birmingham for many a long year.

Fortunately many of the manufacturers, during the last 20 years, have striven to improve both the artistic and technical qualities of the goods produced, whether in the precious metals or in the inferior metals such as brass and copper—styled "art metal" goods. The Birmingham Art School has become one of the strongest educational forces in Great Britain, while the Vittoria St. Technical School—known popularly as the "Jewelers' School"— is the pioneer among British jewelry schools.

FREDERICK ST., WITH S. BLANKENSEE'S OFFICE IN FOREGROUND.

The object of my remarks, however, is not so much to give an historical survey of Birmingham, but rather a short description of the city to-day and to show by means of photographs what comparatively old-fashioned business premises constitute the "jewelers' quarter," for Birmingham does not live by jewels alone. The "toy" trade—the manufacture of small steel parts—and the gun trade go to make up the most important economic assets of "Jewelopolis." The Birmingham "small arms" factory is infinitely better known than the Birmingham Mint or the Assay Office.

Birmingham, like Rome, is built upon seven hills and the "jewelers' quarter" is mainly situated upon the summit of one. Vyse St., one of the most important of the jewelers' streets, runs on the edge of the top of one, and a number of small jewelers' business premises—all merely converted residential houses—look out across the cemetery and the valley beyond to the rising hills in the smoky distance capped with tall chimneys belching forth interminable smoke. Birmingham has been called a city of chimneys, and certainly this is the first impression made upon a visitor entering into the city by way of the London and North Western Railway.

VYSE ST., A CONTINUATION OF FREDERICK ST.

CORPORATION ST., BIRMINGHAM.

As far back as the time of Charles II. Birmingham was noted for the making of jewelry and, for that time, a considerable trade was done in metallic ornaments of all kinds for personal decoration, but it was not until the end of the 18th century that the city began seriously to make a specialty

of the production of jewelry and kindred wares.

THE CHAMBERLAIN CLOCK IN FRONT OF THE OFFICES OF THE BIRMINGHAM WHOLESALE JEWELERS AND SILVERSMITHS' ASSOCIATION.

Incidentally, we may recall the fact that the famous Watt, to whom mechanical science owes such a debt, was the partner of the versatile Matthew Boulton, and that it is only about a century ago since they were, at the Soho factory, carrying out their experiments, producing their stampings and medals and laying the foundation of a trade which, with the assistance of a man like Joseph Moore, the medalist, has extended to extraordinary proportions. We may recall also that it was in Birmingham that electroplating was first put to commercial use, and also that in Messrs. Elkington's factory Morel Ladeuil produced the first silverware of the Victorian era.

As will be seen from most of the illustrations accompanying this, the streets, although given over entirely to business purposes, bear the general aspect of residential quarters. As a matter of fact, 25 years ago a large number of manufacturing jewelers still actually lived in these houses and worked—with their men—in the small and ill-built workshops in the rear. Nowadays it is not often that one finds even a caretaker residing in the building, for every room is used as either an office or a workroom. "Shopping to let" may frequently be seen in the window of a small house which was once the residence of a small maker or workman.

Space is now becoming too valuable for residence, and both employers and employed are steadily flocking outside the city to the outskirts of Aston, to Handsworth or to Erdington, where greater breathing space may be obtained and also a glimpse of trees and flowers. Only the lower laboring classes remain herded in the courts which are numbered off and lie—with their stuffy little box-like houses—hidden away from the sight of the visitor who might make sarcastic remarks upon the state of a city which proudly proclaims its motto as "Forward" and boasts of the public spirit of its citizens and elected councillors! Nowadays Birmingham and Wolverhampton practically meet, and one runs along the 12 miles on the electric car wondering how long it will be before the entire lovely Forest of Arden, which Shakespeare described so beautifully, will be swallowed up in the "Black Country" and, what little is left, covered with houses.

Frederick St. and its continuation, Vyse St., and the thoroughfare which divides the two at right angles and is named Warstone Lane, are the chief streets in the jewelry quarter, and at the junction of these streets are situated the headquarters and offices of the Birmingham Wholesale Jewelers and Silversmiths' Association, while in the center of the cross-roads is an ugly cast-iron clock, erected by the jewelry and allied trades in honor of the Rt. Hon. Joseph Chamberlain, leader of the Protectionists in Great Britain.

NORTHAMPTON ST. FROM JUNCTION WITH WARSTONE LANE.

If we proceed in the direction the boys are going—as seen in the illustration which shows the Chamberlain clock—we shall find on our left Northampton St., a narrow thoroughfare crowded with large and small manufacturers, while on the right and practically facing we shall note Vittoria St., and a few paces down on the right hand side the Jewelers' School (once a jeweler's factory), as shown in the illustration. Proceeding down Northampton St. we shall find ourselves in Hockley

THE "JEWELERS' SCHOOL" ON VITTORIA ST.

NEW IDEAS FOR THE SPRING SEASON
MEMORANDUM ORDERS FILLED AT ONCE

170 Broadway, corner Maiden Lane - - - NEW YORK

St., another typical street of the jewelers' quarter, or we may retrace our steps and return to Warstone Lane by means of Augusta St., Branston St. or Spencer St., and then after visiting narrow, winding Regent Place make our way to the fine, wide thoroughfare, Newhall St. and Newhall Hill, where the Assay Office and the Elkington factory are situated. Continuing up the hill, we may pass the Mint, fearful in its bastile-like character, and after a little "slumming" find ourselves in the neighborhood of the Tenby Sts. and back through Warstone Lane into Vyse St.

Turning to our left and proceeding down the street we pass through the old quarter into its extensions, for Great Hampton St—the great main road into Birmingham—is now practically filled with silversmiths, jewelers and E.P. workers' factories or offices, while the continuation, Hockley Hill, will, with its fine new factories, soon put the old houses in the shade. If we pass down the hill and over the brook and enter Handsworth we shall find that the tentacles of business have spread even into the heart of this residential neighborhood, and discover, first of all, the fine new factory of the Dennison Watch Case Co. and further on the old-established works of Evans, the clockmaker.

Handsworth is (if Birmingham can get its way) to be swallowed up in the city. Handsworth, with its quaint little houses with sweet old-fashioned gardens and the newer houses of the middle-class manufacturers, will at the present rate of progress in Birmingham be turned into a business district long ere half the middle-aged members of the trade have passed away, for, pushing forward with the manufacture of high-class jewelry and adding to this staple industry that of small silversmithing, there can be little doubt as to the future, providing quality is kept in view.

Birmingham manufacturers grumble, and trade may be bad, but it does not stop the building of new shops for old or the conversion of old houses into factories, neither does it stop the spread of a city which lives up to its motto and marches forward, annexing every available house and space which may be used for the purpose of its industrial and commercial success.

M. A. Lesser, Fort Worth, Tex., a Voluntary Bankrupt.

FORT WORTH, Tex., Feb. 2.—M. A. Lesser, who conducted a retail jewelry business at 611 Main St., has filed a petition in bankruptcy in the United States Court.

Lesser has been in business here for nearly 12 years, and for a time he was located at Chicago, and from there went to Omaha, where he was employed by the Hayden Bros., after which he engaged in business of his own. He came to Fort Worth from Omaha in 1898 and for a while conducted business at 1200 Main St. before moving to his present address.

Mrs. John D. Bodfors, wife of the well-known Minneapolis jeweler, and who has been seriously ill with nervous prostration, is now much improved, being able to leave the sanitarium, where she has been undergoing treatment.

Annual Report of the Treasurer of the Assurance League of America.

Members of the Assurance League of America (formerly known as the Jewelers' League) are in receipt of the annual report of the national treasurer. This was mailed to all members as no annual meeting of the League was held last month. The report reads:

F. A. MARSELLUS, National Treasurer.

REPORT OF THE EXAMINING FINANCE COMMITTEE.

NEW YORK, Jan. 21, 1910.

We, the undersigned, have examined the books of the Assurance League of America, and find the balances correctly set forth in the national treasurer's report. We also find that the bonds as specified are deposited in the vaults of the Maiden Lane Safe Deposit Co. as the property of the Assurance League of America.

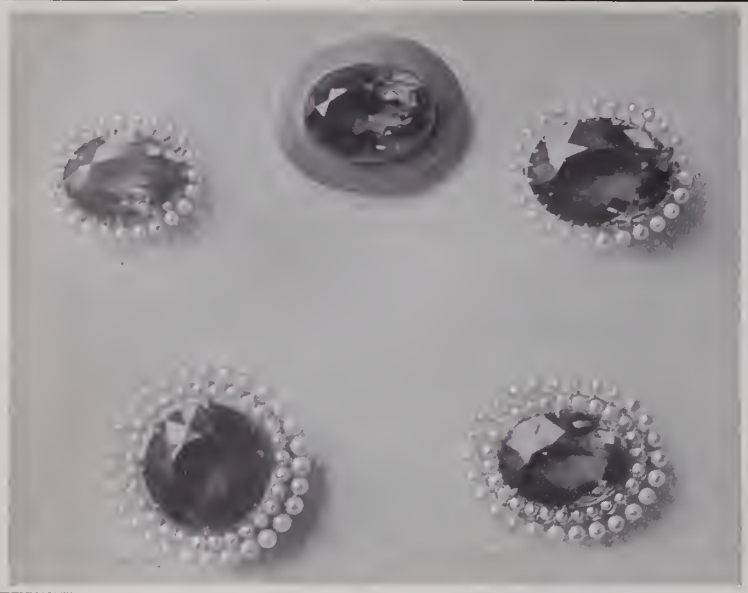
JNO. R. GREASON, JR.,
IRA CADMUS,
Examining Finance Committee.



Death of Charles Smith.

ELYRIA, O., Feb. 2.—Chas. Smith, one of the prominent merchants of this town who died early last Wednesday morning, was widely known in the jewelry trade as head of the jewelry firm of Smith Bros. It was largely due to his efforts and industry that the firm had attained its present position in the jewelry trade. His death was due to heart strain, which was caused five months ago while he was cranking his automobile, and since that time his condition was precarious. His demise was therefore not unexpected, though it proved a great shock to his relatives and friends.

Mr. Smith was but 44 years old and was the son of C. W. Smith, who established the jewelry business many years ago. After receiving his education he entered his father's store at the age of 14, and learned the jewelry business in all its branches. Associated with him in his father's employ was his brother Frank, and when the elder Smith retired in 1897 they succeeded to the business which has since been run under the style of Smith Bros.

Deceased was married in 1890 to Miss Hattie Rublin, and is survived by his widow and a son and daughter, as well as by his father and three brothers and a sister.

Mr. Smith will be greatly missed in business and fraternal circles, in both of which he is prominent and held in high esteem. He was a member of both the Masonic and Odd Fellow lodges in this city.

AMETHYST JEWELRY

We offer very fine amethyst jewelry in selected amethysts, in combination with pearls and pearls and diamonds, at moderate prices.

DIAMONDS

We have a large stock of carefully selected Loose Diamonds of all sizes and grades, which we are offering at the old prices.

American Diamond Cutters Obtain Advance of 12½ Per Cent. in Wages.

The Diamond Cutters' Protective Union of America, with headquarters in New York, was granted, last week, an advance of 12½ per cent. in wages by the Diamond Cutters' Association, an organization of the employers. This advance in the cost of labor places the schedule of wages on a little higher basis than they were previous to the financial panic, when the diamond-cutting business in this city was practically at a standstill.

There are at present in this city about 350 diamond workers, and the wages are paid according to an established scale, which now varies from about $35 to $75 a week. Practically all the workmen are now employed.

The Diamond Cutters' Protective Union controls very closely the number of its members, and such additions are made only as are necessary to meet the requirements of the employers, and it is because of this strict censorship of the membership in the organization and the fact that it requires from three to five years for a man to become skilled as a diamond cutter, and that few men comparatively even then qualify, that the wage scale is maintained at its high average. A short time ago the Diamond Cutters' Association asked the union to sign an agreement whereby no further demand for an increase in wages would be made for two years, but this was not complied with.

An addition of 10 per cent. to the membership of the cutters' union will be made within a short time. The apprentices will be selected from sons of members, and if the required number is not thus supplied the employers will fill the extra places by appointment from other sources. The union now has a considerable membership of American-born diamond cutters.

Henry Fera, of Fera & Kadison, 65 Nassau St., said last week that the increase in the wages of the diamond cutters would mean an advance of about $1.50 a carat on the larger sizes and of $2 on the smaller stones in the cost of manufacture. Mr. Fera explained that there had been a previous advance of 12½ per cent. in the wages on Aug. 1, 1909. He said that it is at present very difficult to obtain diamonds from the Syndicate because of the fact that the surplus stock of rough goods on hand has been exhausted, and the mines are now producing less than the demand calls for. Mr. Fera looks for an advance of about five per cent. in the price of rough goods within a short time.

Members of the Albany, N. Y., Retail Jewelers' Association Elect Officers for the Ensuing Year.

ALBANY, N. Y., Feb. 4.—A meeting of the Albany Retail Jewelers' Association, which was held yesterday, was well attended and showed that the members are enthusiastic about the work of the association and satisfied with what has already been obtained through organization. The members showed that they were unanimous on all questions affecting the welfare of retail jewelry business, and have arranged to entertain the State Executive Committee, when that body will meet in this city in the near future. A delegation of four members was appointed to go to Utica, Feb. 7, to attend the meeting of the State Executive Committee.

The following officers were elected: President, E. D. Mix; vice-president, E. Wentworth; corresponding secretary, F. P. D. Jennings; financial secretary, J. Fuhrman; sergeant-at-arms, E. H. Miller.

The association was organized last May and its members already number about 20. Reports show that there is a comfortable balance in the hands of the treasurer, and that affairs are progressing very favorably. It was decided that the fiscal year of the association begin the first Thursday in February.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Feb. 2.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

Algoa Bay: 61 cases clocks, $1,036; 6 cases plated ware, $284; 1 case scopes and views, $1,182.

Antwerp: 100,821 pounds nickel, $38,850; 1 case silverware, $200.

Auckland: 25 cases clocks, $546.

Berlin: 3 cases clocks, $195.

Bremen: 3 cases watches, $2,645; 5 cases plated ware, $363; 1 case jewelry, $500.

Buenos Aires: 28 cases plated ware, $3,520; 5 cases optical goods, $1,183; 27 cases clocks, $433; 1 case jewelry, $514; 3 cases plated ware, $336; 2 cases watches, $1,174; 101 cases clocks, $1,602.

Calcutta: 304 cases clocks, $2,565; 69 cases clocks, $1,243.

Callao: 1 case optical goods, $128.

Cienfuegos: 3 cases plated ware, $116.

Colombo: 6 cases clocks, $183.

Colon: 1 case plated ware, $102; 2 cases plated ware, $111.

Guayaquil: 3 cases clocks, $100.

Hamburg: 14 cases jewelers' sweepings, $15,000; 1 case plated ware, $265; 2 cases optical goods, $253.

Havana: 7 cases clocks, $159; 2 cases jewelry, $514; 2 cases optical goods, $170; 1 case watches, $168.

Havre: 2 cases clocks, $140; 1 case jewelry, $250.

Liverpool: 1 case precious stones, $1,715; 4 cases jewelry, $585; 2 cases optical goods, $100; 1 case thermometers, $125; 11 cases watches, $4,500; 24 cases clocks, $516; 1 case silverware, $128.

London: 9 cases clocks, $1,087; 10 cases watches, $408; 275 cases optical goods, $8,381; 3 cases thermometers, $175; 168 cases clocks, $1,159; 8 cases optical goods, $704; 1 case silverware, $1,000; 1 case watches, $150; 21 cases clocks, $1,496; 12 cases optical goods, $3,574; 15 cases clocks, $467.

Manchester: 32 cases clocks, $298.

Manila: 2 cases plated ware, $113; 4 cases watches, $275; 39 cases clocks, $753.

Melbourne: 27 cases clocks, $705.

Mollendo: 36 cases clocks, $817.

Montevideo: 4 cases plated ware, $519; 2 cases optical goods, $380; 7 cases jewelry, $2,371; 122 cases clocks, $2,118.

Nassau: 3 cases plated ware, $233.

Para: 24 cases clocks, $473.

Punta Arenas: 20 cases clocks, $413.

Rangoon: 1 case watches, $300.

Rio de Janeiro: 11 cases jewelry, $1,045.

Rotterdam: 10,001 pieces nickel plate, $172,600.

Savanilla: 16 cases clocks, $716.

Sheffield: 4 cases jewelers' sweepings, $4,500.

Southampton: 1 case jewelry and effects, $500.

Tampico: 7 cases clocks, $113.

Trinidad: 2 cases watches, $101; 6 cases plated ware, $543.

Tumaco: 5 cases plated ware, $321.

Valparaiso: 10 cases plated ware, $1,608.

Yokohama: 2 cases nickel, $270; 1 case plated ware, $140; 118 cases clocks, $1,904.

Scarcity of Rough and Increase in Demand Causes High Prices in Amsterdam Diamond Market.

AMSTERDAM, Feb. 1.—Business, as a rule, is not brisk during the first four or six weeks of the year, and if one takes this into consideration the present conditions of the Amsterdam market may be called very satisfactory. The demand is not so unusually large as in the last two months of 1909, but there is a considerable quantity of goods sold every week.

The cutters here know very well that the present conditions are due to natural causes, and that when the big buyers arrive here within a few weeks they feel positive of selling their goods easily. In view of this they continue to purchase all the rough which can be bought in London, and, with the exception of some undesirable qualities and assortments, the Syndicate has practically no rough in stock. Every shipment shown is sold at sight. Besides the Syndicate is continually giving a poorer assortment, and thus the price is raised. Consequently the prices of the polished are going higher proportionately.

Buyers here really have a very hard time. It is always difficult for a merchant to pay more for the new goods than for what the old goods were sold; however, they will have to get accustomed to the high prices. There is no reason why the prices should not be high. Rough material (with the exception of mêlée) is very scarce, the London Syndicate is more powerful than ever before, and the demand all over the world is increasing. As long as the prospects remain as they are, one may expect the prices to go even higher.

Among the buyers here at present are representatives of the following firms: Backes & Strauss, London; Ryrie Bros., Toronto, Can.; Carrau & Green, San Francisco, Cal.; R. Citroen, Paris; L. & M. Kahn & Co., New York; Y. Bellack, Vienna; E. Neubauer, Antwerp; A. Cooper, Birmingham; Y. & S. Ginsberg, Berlin; Ad. Cohen & Son, Birmingham; Goldberg Frères, Antwerp; A. Eisenberg & Co., San Francisco, Cal.; W. E. Oakley & Co., Birmingham; L. Weintraub, Vienna; Wm. S. Rosenfeld, New York. Some others are expected here this week.

Sprague Bros., Jewelers and Druggists, Ada, Okla., Go to the Wall.

ADA, Okla., Feb. 2.—Sprague Bros., composed of Harry and Charles Sprague, who conducted a jewelry and drug business in this town, have taken advantage of the bankruptcy law, filing a voluntary petition in the United States Court to wipe out their debts.

Both partners have been well regarded in the community where they have been in business about 10 years. It is reported that an attempt will be made to arrange for a settlement, so that they can resume at an early date.

At Hendricks, Minn., K. H. Dixon has bought out his partner, and the business is now conducted under his name.

L. A. Martin, Superior, Wis., has purchased for $15,000 the two-story frame building at 701 Tower Ave., of which his store occupies a portion of the first floor.

The Japanese Cultured Pearl

IT IS NOT an artificial pearl.

IT IS A REAL ORIENTAL PEARL produced by the pearl oyster in much the same manner that all the other species of pearls are produced.

It is the product of a long, unceasing process of cultivation, consuming a period of not a day, a week or month—but FULL SEVEN YEARS and over, a process so characteristic of Nature's painstaking, patient, careful work in making her most favored gems.

Only a small part of all the oysters cultivated in the Bay of Ago mature, and of these, but a percentage yield the gem which, however, once produced, is well worth the labor, skill and patience spent.

It is as beautiful as the process is fascinating—although difficult.

You cannot afford not to have this pearl in your line.

Its merits adequately represented—its demand's assured.

THE NEWS FROM ENGLAND.

The General Election Disturbs Business Imports and Exports Increasing—Silverplate and Cutlery Lines in Sheffield Fairly Busy—Exhibits at Arts and Crafts Society—Mappin & Webb's Centennial Celebration—The Japanese-British Exhibition—American Firms' Travelers Convene and Welcome New Year.

LONDON, Feb. 1.—The general election has thoroughly dislocated trade throughout the country and the issue, as yet undecided, promises another general election within a year, for the parties are so nearly equal that nothing short of a miracle will enable the victors to retain power for long. The issue of Protection *vs.* Free Trade has been less to the fore than outsiders would imagine, although it has played an important part. The real factors determining the election are the power of the brewer and publican and the objection of liberty-loving men to the puritanical views and efforts of a section of the Liberal party.

* * *

So far as the Board of Trade returns show, we are still on the up-grade. The latest available—those for December—show an increase in exports of considerably over £4,250,000 sterling, while re-exports increased by £1,448,395. Imports also show an increase, viz., £3,959,899. The total exports for 1909 were officially valued at £378,379,444. To this must be added a sum of £837,137 for manufactured goods sent abroad by parcels post. These figures, although they do not show any substantial improvement in trade are nevertheless reassuring and indicate that we have reached the bottom and are climbing up the trade ladder again. The fall in the bank rate to 3½ per cent. is another.

* * *

Sheffield electro-plate workers are fairly busy and had a good time during December. They have managed to secure an increased interest in their productions from Canadian buyers, which will naturally help the trade. Despite the high tariff, Sheffield slightly increased her cutlery exports to the United States of America during the past year. The U. S. A. are still among our best customers in this respect, but a long way behind Canada. The statistics for December show that, while we exported £69,662 worth of cutlery to the U. S. A., Canada took from us cutlery to the value of £88,037.

* * *

I was present on Jan. 22 at the Arts and Crafts Society's conversazione, where about 500 people interested in the fine and applied arts gathered for the last time in the New Gallery in Regent St. The chief exhibits were of furniture, jewelry, silverware and art metal work, and certainly some remarkable work was exhibited. Alexander Fisher, the well known enameler, makes a show of silverware which is interesting and affords considerable food for reflection. As an artistic enameler Fisher stands easily first in Great Britain, but as a silversmith he does not shine. While he sticks to simple mountings for his enamels he is safe, but when he endeavors to make large pieces in silver he fails. The *tour de force* of his exhibits at the Arts and Crafts Exhibition is a table fountain which has comparatively little *silversmithing* in it. Apart from the castings the smithing could be easily done by an apprentice. The whole scheme is surmounted by a silver female figure, badly modeled and impossibly posed, the lines of which are very distracting, for the figure looks as though it might be of sugar covered with silver and has suffered from heat. Columns of crystal, which form part of the central structure upon which the figure is posed, would undoubtedly give a splendid effect with the fountain playing in the center of a well lighted dining table. Chief among the exhibits I should place a splendid casket carved out of a section of a splendid ivory tusk, and a table mirror, in the back of which—framed in a large mount of white sharkskin—is a beautifully carved ivory female figure in low relief, both by Richard Garbe. Cecil Thomas, the seal engraver and medalist, whose work you have previously illustrated, has a characteristic exhibition of seals. Walter Stoye, E. Bonnor and Albert Wilkins, also old students of the Central School of Arts and Crafts (and now engaged as teachers), all show some very good specimens of artistic modern jewelry, while a number of present-day students are also represented. There is, however, in every class of exhibit several monstrosities, among which should be noted a large gilt cup made for the Pewterer's Co. It is so ridiculously gingerbread and lacking in proportion and any pretense to technical excellence that one almost wonders whether the pewterers had dined too well when they accepted the design, or that those who chose the works sent in for exhibition were in a fog at the time they selected such a piece as this.

* * *

These notes would be incomplete were I not to mention the celebration of the centenary of Messrs. Mappin and Webb, the most important of Sheffield E. P. and silverplate workers, who have branches all over the world. The firm was founded in 1810, but prior to this date a member of the family was in business in Sheffield as an engraver. At the celebration 300 of the workpeople were entertained to tea, concert and dance at the Royal Works in Norfolk St., Sheffield. At this function a feature was the centenary cake, weighing half a hundredweight.

* * *

The Japan-British Exhibition bids fair to be a great success, and considerable interest is taken in everything which relates to the work of organization. The chief Japanese commissioner, Count Hirokichi Mutsu, in lecturing before the Society of Arts, just recently, explained that Japan was making a supreme effort to show what she could do and what she had done, while the Mikado and nobles were lending their best treasures to show what beautiful work Old Japan produced. American visitors to London this year can, I know, be sure of seeing a remarkable collection of Japan's finest art work. I have to-day visited the exhibition, and everything looks in a very forward condition despite bad weather. The Japs are busy with their beautiful garden.

* * *

Following the three days' conference of the travelers of Robt. H. Ingersoll & Bro. the whole of the traveling staff, numbering 22, together with the heads of departments, foregathered at the famous West End banqueting rooms, the Trocadero, on New Year's eve. This was the most unique public banquet it has ever been my privilege to attend as a guest, for, after the extensive menu, which incorporated the names of the various lines sold by the firm, a lengthy toast list was gone through. The chief toasts and speeches totaled 12 and included "The Salesmen," "The Firm and Office," "The Business" and "Our Guests," the first being proposed by the European manager, E. S. Daniells; the second by H. E. Sherwin, the third by F. R. Jones, the right-hand man in the London office, and that of the "Guests" by Mr. Daniells and responded to by W. Augustus Steward. Then followed a series of short speeches which one might term serious talks in a light vein, dealing with "Publicity," "Salesmen and Samples," 'Orders and Salesmen"—this by a lady—"Credits, Terms and Collections"—this also by a lady, maidens who made their maiden speeches—"Cash," "Exchanges"—both by ladies—"Despatching" and "Repairs" by gentlemen, but probably the most interesting were the series of speeches set down to the names of the various travelers, who included not only the British representatives but also the Indian and German. The Sydney representative would have been present but for the fact that his ship was a few hours late. The assets of salesmanship as set down in the toast list included "Originality," "Reason," "Cheerfulness," "Earnestness," "Knowledge," "Judgment," "Observation," "Intuition," "Economy," "Enthusiasm," "Nerve," "Concentration," "Perseverance," "Culture," "Bluff and Tact," "Ambition," "Courage," "Honesty," "Optimism," "Thoughtfulness," truly a strong foundation if travelers could possess the whole lot. But what particularly struck me was the smartness of the ladies, who, dealing with severely business subjects, gave the mere men a number of very good hints and also humorously but strongly chastized them for certain carelessnesses in sending in orders. The proceedings, which started at seven, did not terminate until the early hours of the morning. The New Year was welcomed in in a clever manner. Within a few moments of 12 an unobtrusive screen was pulled on one side displaying a six-foot dial representing the face of an Ingersoll watch; the lights were turned out and only one little electric star light shone over the dial. Just as the hour of 12 struck a little fairy girl, representing 1910, jumped through the dial bearing in her hands boxes of cosaques. Another notable feature of the evening was the presentation of special awards to travelers for special work done, but the most pleasing and thoughtful of all was the gift of an inscribed Ingersoll to the guests who were invited to partake of the evening's pleasures.

Death of Jacob Myers.

BOSTON, Mass., Feb. 3.—Jacob Myers, one f the oldest jewelers in Boston, formerly ell known in the trade from coast to coast roughout the United States, died Feb. 1, at is residence in the Dorchester district.

Mr. Myers was 85 years of age last eptember. He was born in London, and ame to this country about 60 years ago, orming a partnership with his brother, ho had preceded him by a few years in rriving here, and the firm of S. & J. Myrs, from 1855 to 1885, became one of the oremost jobbing and material houses in

THE LATE JACOB MYERS.

oston. They were succeeded a few years o by M. Myers, son of S. Myers, who ill carries on the business.

The brothers traveled far and wide. S. yers, who died about three years ago, reined his love of the life of the road nger than his brother, and went on transntinental trips in his son's interest long ter the old firm was dissolved. Jacob yers was known to customers and acaintances everywhere as "Uncle Jake," d liked the term for the friendly intimacy hich it implied.

The concern was located originally on anover St., which, prior to 1865, was e jewelry center of the period. Later e partners moved to 90 Washington St., d at the time of the conflagration in 1872 ey came through unscathed, although the e was close to them on three sides. The siness was a profitable one and Mr. Mys was regarded prior to his retirement as man of means.

For two-score years deceased resided at Dedham St., corner of Washington St., en the most fashionable section of the y. He gave large sums annually to char-, and it is related of him that he placed a goodly amount each Winter at the disposal of the police officials of the nearest station, with the proviso that it should be used to furnish fuel to needy persons worthy of aid.

Mr. Myers was a member of several Jewish benevolent and fraternal organizations, a Mason and an Odd Fellow. Big in physique, hale and hearty in his fellowships and dearly loving to hear or relate a good story, he was a man of marked individuality, who will not soon be forgotten by friends and acquaintances. The funeral this afternoon was attended by many friends.

Plans Completed for the Fourth Annual Convention of Nebraska Retail Jewelers' Association.

OMAHA, Nebr., Feb. 5.—The Nebraska Retail Jewelers' Association will hold its fourth annual convention at the Lincoln Hotel Lincoln, Nebr., Feb. 16 and 17. It is hoped that a large crowd will be in attendance. T. L. Combs, of this city, and president of the association, has sent out a letter to all members and non-members, urging their presence at the meeting. An interesting programme has been arranged, including speeches, short talks and a demonstration by C. T. Higginbotham, with the South Bend Watch Co.

The programme is as follows:

WEONESOAY, FEB. 16, 1910.

Joint banquet by Commercial Club, 6:00 P. M. sharp. Hon. Richard O'Neill, toastmaster.

Theatre party by J. L. Teeters & Co., 8:15 o'clock.

THURSOAY MORNING SESSION.

8:30—Registration at headquarters, Lincoln Hotel. Filing applications and paying dues to secretary-treasurer.

9:50—Calling convention to order. Address of Welcome by Mayor Don L. Love. Response, S. W. Lindsay, Omaha. Appointment of committees. President's report.

10:00—"What the National Association is Doing," Claud Wheeler, secretary American National Retail Jewelers' Association, Columbia, Mo.

10:30—"Bad Oil," C. S. Hayes, Norfork.

11:00—"What is the Jewelry Biz?" open discussion, five minutes limit.

11:30—"The Jobber's View," J. L. Teeters, Lincoln.

12:00 Lunch.

THURSOAY AFTERNOON SESSION.

1:00—Secretary's report. New business.

1:40—"What About the Outlook?" Jos. Mazer, first vice-president American Nation Retail Jewelers' Association, McAlester, Okla.

2:00—"How the Jewelry Business Looks to a New One," M. C. Steele, Auburn.

2:20—"The Pioneer Jeweler," F. E. Hallett, Lincoln.

2:40—"Does the 'Watch Inspection' Pay?" J. G. Preston, Oxford.

3:00—"Legal Aspect of Lottery and Chance Sales," O. P. Zinn, Hastings.

3:20—"Is It Worth While?" Mack A. Hurlbut, past president American National Retail Jewelers' Association, Ft. Dodge, Iowa.

3:40—Election of officers and delegates to Detroit convention.

4:30—Resolutions and committee reports. Question Box. "Bring Your Grist to Mill."

5:00—Selecting next place of meeting.

5:30—Adjournment.

THURSOAY EVENING SESSION.

8:00—C. T. Higginbotham, consulting superintendent of South Bend Watch Co., will give practical demonstrations and his famouns lecture on "Mechanical Construction." 'Free to all jewelers, watchmakers and ladies.

After the session is over
And this work is out of the way,
Let's sing, shake hands and congratulate,
And return to our business "fray."

Traveling Man's Ransacked Trunk Found in San Jose, Cal.

SAN FRANCISCO, Cal., Feb. 6.—After a month of investigation at the hands of the San Francisco police and the Southern Pacific Railroad detectives, the mystery of the missing trunk containing the jewelry samples of Harry Adams has been solved, but as yet no arrests have been made of the parties implicated in the clever robbery. The trunk was found by Special Agent P. A. Kelley in the baggage room at San Jose, Cal., and as there was still some jewelry left in it an agent of Albert Fink & Co., the Los Angeles wholesalers owning the trunk, has come up from the south to check off the goods recovered with the idea of ascertaining the loss to the house. The plot was one of the cleverest that has ever been worked on the Coast, and there is a possibility that the culprits may yet escape, although a good description of them has been secured.

On Dec. 29, Harry Adams, traveling representative of Albert Fink & Co., Los Angeles, engaged an expressman to haul a trunk of jewelry from the firm's headquarters to the Arcade depot, of that city. The trunk was checked at the depot with Adams close by, and check number 725983 was given to him. Upon his arrival in San Francisco he presented his baggage check and was handed an old valise filled with a working man's clothes. Upon investigating the method by which the trick was turned, it appears that after Adams had his trunk checked, the old valise was presented and checked by the baggage master. While his back was turned the checks were cleverly changed and the thieves boarded the same train that Adams did and came on to San Francisco. That one of the plotters was a woman has been determined, for when the trunk arrived here it was sent to the Golden West Hotel and the express charges were paid by a woman. Safe within her room, the woman leisurely opened the trunk with a key, picked out the valuable jewelry and left cheap gems worth $3,000. The trunk was then corded, but not locked, taken to a railroad depot and sent to San Jose.

At the local hotel the woman registered under the name of Mrs. Schultz. She has left, presumably for southern California, and detectives are now on the lookout for her and declare that she will be taken into custody within a short time. It developed since the finding of the trunk that Fink & Co. carried heavy insurance on the trunk, but it is stated that this does not nearly cover the loss.

Deutsch Jewelry Co., Cleveland, O., Makes a General Assignment.

CLEVELAND, O., Feb. 5.—The Deutsch Jewelry Co., operating two stores, one in the Colonial and the other in the Euclid Ave Arcades, under the style of S. Deutsch & Son, have made a general assignment under State laws. The firm, consisting of Sam and Claude Deutsch, has been in business in this city for the past five years.

The partners claim liabilities of nearly $20,000 and assets of about $12,000.

Both stores are well located, but are close to strong competitors and, as no other cause is advanced for the failure, local merchants attribute it to this.

nnual Convention of Indiana Retail Jewelers' Association Opens in Indianapolis, Ind.

INDIANAPOLIS, Ind., Feb. 7.—The annual nvention of the Indiana Retail Jewelers' ssociation began at the Grand Hotel in iis city to-day with a fair attendance of welers from all parts of the State. It was xpected that the attendance would increase nsiderably before the convention closes -morrow night.

President H. H. Bishop, of this city, is esiding, and proposed legislation will be nong the principal topics discussed. There considerable agitation in favor of a law iat will permit jewelers and watchmakers sell uncalled for repairs. It is also probble that a resolution will be adopted conemning the corporation tax law.

As a closing feature, a banquet will be ven to the visiting jewelers to-morrow ght by the Baldwin- Miller Co., and Chas. . Lauer & Co., of this city. The program r the convention is as follows:

MONDAY.

9 A. M.

Reading of minutes.
Applications for membership.
Address of President Bishop.

2 P. M.

Reports of officers and committees.
Unfinished business.
Discussion, "Shall We Try to Secure a Law hat Will Enable Us to Dispose of Uncalled for epairs?"
Lecture, "Watch Springs." Charles L. Higginotham, of the South Bend Watch Co.

TUESDAY.

9 A. M.

New business.
Discussion, "Shall We Try Again to Secure the alse Advertisement Law?"
Address, J. P Archibald. president National Asociation.

2 P. M.

Address, "Pioneer and Promoter," A. L. Sackett, ales manager, Rockford Watch Co.
Election of officers.
Installation of officers.

7 P. M

Banquet, Denison Hotel.

New England Manufacturers Making Arrangements for Dinner—Objections to Corporation Tax Law.

PROVIDENCE, R. I., Feb. 5.—A largely attended meeting of the Advisory Council of he New England Manufacturing Jewelers' nd Silversmiths' Association was held in he rooms of the association in the Wilcox uilding, 42 Weybosset St., this city, Thursday afternoon. In the absence of the resident of the Council, Everett L. Spencer, who is on a vacation trip in the south, he meeting was presided over by the first ice-president, Alfred K. Potter.

The executive committee reported that verything in connection with the coming nid-Winter banquet of the association was progressing satisfactorily. President Taft s to be the guest of honor. The demand for tickets has far exceeded the capacity of any hall that the committee can procure in this city. Just what plan will be evolved n assigning tickets has not been fully decided. Several novelties will be introduced in connection with the dinner and a unique scheme of seating is being worked out.

The most of the session was given up to a discussion of the Federal corporation tax. The special phase that was given the most consideration was the arbitrary date fixed by the law for the taking of the inventories. Dec. 31 is considered an inconvenient time for the manufacturing jewelers to make up the returns of their corporations, because at that time they are busy arranging new lines or getting out goods.

No definite action was taken, but it was voted to refer the question of drafting suitable resolutions to the special committee on legislation, of which John M. Buffinton is chairman.

Receiver Appointed for the Samuel Graubart Co., Schenectady, N. Y., in Bankruptcy Proceedings Begun by Creditors.

UTICA, N. Y., Feb. 4.—A creditors' petition in involuntary bankruptcy was filed in the United States District Court here today against the Samuel Graubart Co., doing a jewelry and pawnbroker business at Schenectady, N. Y., and Judge Ray appointed George W. Vanbranken, a local attorney, as receiver, under a bond for $10,000 and George A. Schiefflin, A. H. Jones and George W. Donovan were appointed as appraisers and directed to make a speedy appraisal of the assets. The subpoena is returnable before Judge Ray at Norwich on Feb. 16.

The creditors who filed the petition, represented by W. D. Loucks, who secured the appointment of a receiver from Judge Ray, are Alexander Sabsevitz, $350; Abe Miller, $215, and Meyer Sabsevitz, $135; all of New York. In their petition for a receiver, it is alleged that the company is insolvent, that within the past four months it gave a chattel mortgage covering the stock and the fixtures to Hulda Graubart, the wife of one of the principal stockholders of the company, for the purpose of defrauding the general creditors of the alleged bankrupt. It is also alleged that there is a stock valued at about $5,000 now on hand, but that it is being depleted as fast as possible, that some of the stock has been removed from the store and that portions have been sold to pawnbrokers and others at prices below cost. The stock consists of diamonds, watches, stickpins and other jewelry and silverware, and it is charged that the appointment of a receiver is absolutely necessary for the preservation of the assets for the protection of the creditors.

There was also granted by Judge Ray an order restraining the prosecution of any suit in the State courts against the company pending the adjudication in bankruptcy and the receiver is also directed to take immediate possession of the store.

SCHENECTADY, N. Y., Feb. 5.—An involuntary petition in bankruptcy has been filed by creditors of the S. Graubart Co., a corporation doing a retail jewelry and pawn broking business at 249 State St.

Samuel Graubart, head of the concern, which is a corporation capitalized at $10,000, has been in the jewelry business for a number of years. He became associated with Jos. Field in 1902, as a member of the firm of Graubart & Field, which dissolved in 1906, both partners continuing. He for a while ran the Mohawk Loan & Jewelry Co., and incorporated his business about a year ago, at which time he and his wife held 99 of 100 shares of the company.

Philadelphia Police Discredit Story of Jeweler That His Safe Was Robbed of $10,000 Worth of Stock.

PHILADELPHIA, Pa., Feb. 25.—The police authorities are disposed to discredit the reported $10,000 jewelry robbery which is supposed to have occurred last Tuesday in the jewelry store of Max Mayer, 609 Market St. Assistant Superintendent O'Leary sent for Mayer Friday, and after a long conference with him came to the conclusion that the interview was most unsatisfactory.

Mayer reported Wednesday that diamonds, jewelry and watches valued at more than $10,000 were taken from his safe. The store was entered and an opening drilled in the back of the safe while a special watchman and a night patrolman stood on the corner a few paces distant. Twelve holes were drilled through the steel plate in the back of the safe, and the metal was cut from hole to hole. The metal was a quarter of an inch thick, and six inches of solid concrete were knocked in before the precious stones and jewelry could be reached. The entire stock of jewelry and precious stones was in the safe, according to Mayer. All were taken except a dozen cheap watches. Through a hole of 12 x 14 inches every tray and box of valuables from the top to the bottom of the safe was taken. The partitions on the inside were broken and removed with the goods.

Mr. O'Leary declares that Mayer is unable to give the names of the firms from whom he had purchased the stock; this announcement alone has aroused suspicion. Mr. O'Leary said it was peculiar that a man who had been a jeweler as long as Mayer could not produce a list of timepiece numbers and jewelry marks. It is the opinion of the detectives who have been working on the case that it would be impossible for a person standing behind the safe to reach through the hole and cut in the partition where the safe stood.

Mr. O'Leary finally produced extracts from the dockets of the City Hall Police Court to show that Mayer had been arrested on Jan. 7 and Jan. 14, 1909, and held under bail each time on charges of obtaining money under false pretenses while conducting a so-called auction shop on Market and 9th Sts.

Death of Carl Hadenfeldt.

SAN FRANCISCO, Cal., Feb. 5.—Another sad death has been that of young Carl Hadenfeldt, a member of the firm of Rothschild & Hadenfeldt. Mr. Hadenfeldt had been troubled for some time with appendicitis and recently began to prepare for an operation, but while at Sacramento became suddenly worse and was operated upon.

The operation, however, did not save him and in spite of the fact that the best medical attendance possible was procured, he succumbed. At the time of his death, he was but 27 years of age, and leaves a sorrowing mother and several sisters. Since the fire he has acted as traveling man for the firm, of which his father was one of the founders, and was very successful.

A. B. Hayden has purchased the jewelry store of M. G. Shaw, Wellesley, Mass.

LETTERS TO THE EDITOR.

An Explanation from Wm. L. Sexton.

NEW YORK, Feb. 7, 1910

Editor THE JEWELERS' CIRCULAR-WEEKLY:

I have become aware of the erroneous impression which prevails to some extent in the trade, and which has arisen from the peculiar wording of an article in reference to me which was published in your issue of Jan. 19.

While I realize that you are entirely innocent in the matter, it is only fair to myself to correct the impression which still prevails with those who failed to notice the item which you published on the following week, also concerning myself.

The article I refer to stated that I had retired from the "active management of William L. Sexton & Co," and has given the impression that I had retired from the jewelry business.

Without going into lengthy details about affairs which may not interest your readers, I merely beg to state that I have had nothing to do with the active management of the aforesaid corporation for two years or more, and I disclaim any responsibility for its recent management.

In declining to be any longer an active participant in the corporation, although still an unwilling stockholder, I have taken the only course that seemed best for my personal interest.

I have organized the firm of William L. Sexton & Son, and have commenced business in the Silversmiths' building, 17 Maiden Lane, with a factory in the immediate vicinity fully equipped and ready to do specially ordered work at short notice, as will be seen in the advertising columns of your esteemed journal.

Yours truly,
WILLIAM L. SEXTON.

Gorham Plant Shuts Down a Week for Inventory—Much Work on Hand in All Departments.

PROVIDENCE, R. I., Feb. 5.—The extensive plant of the Gorham Mfg. Co., at Elmwood, with the exception of the foundries, has been shut down this week to allow an inventory of stock to be taken. For many years it has been the custom to close down the first two weeks in February, but there is so much work on hand in every department that it was found impracticable to close down more than one week this year, and even at this reduction it was not expedient to close the foundries. The plant will open again in full force Monday.

Speaking of business conditions, Secretary John F. P. Lawton said that the outlook never was better. The company has an unusually long list of important work on hand, especially in the bronze foundry, where many large pieces are in course of casting and finishing. In the silver department the company is at present engaged upon the services for the battleships *Delaware* and *South Carolina*.

The *Delaware* service will include a 10-gallon punch bowl, with plateau and ladle, centerpiece, weighing 560 ounces; two candelabra of seven lights each, 280 ounces; one large waiter, 29½ inches in diameter; water pitcher and tray; four compotiers, one fish dish, 28 inches long; one meat dish, 30 inches, and one entree dish, 16 inches in length; sauce boat and tray, coffee urn, one small waiter, 16½ inches long; one sugar bowl, one creamer, one black coffee pot and one fruit dish. The value of this service is $10,000.

In the bronze department, among some of the important pieces of work that are now being handled are the following: Equestrian statue of General Custer (E. C. Potter, sculptor), to be erected at Monroe, Mich.

Equestrian statue of General Pulaski, by the Polish sculptor, Kazimierz Chodzinski, which is to be erected in Washington, D. C. Mr. Chodzinski has been at the foundry the past week preparing his model for casting in bronze. The sculptor has represented his heroic countryman in the Polish Hussar uniform, of which he was so fond that he wore it even in command of regiments otherwise uniformed. The sculptor has endeavored to present in his figure the characteristic traits of Pulaski, the undaunted courage of the battlefield, the proud and dignified bearing of the Polish nobleman in peace and the martial dignity of the soldier who held the commander-in-chief of the Polish army from the time he was 20 years of age. The total height of the horse and rider is 15 feet. The pedestal was designed by A. R. Ross, the New York architect.

South African memorial, by W. S. Allward, sculptor, consisting of a figure of Canada and two soldiers.

Two statutes and panel for Graham Bell memorial, to be erected at Bradford, Ont.

Equstrian statue of General McClellan, by J. C. Potter, sculptor, to be erected at Philadelphia.

Soldiers' and Sailors' Monument, by Bela L. Pratt, sculptor, to be erected at Malden, Mass.

Statue of Abraham Lincoln (a standing figure), by F. E. Elwell, sculptor, to be erected at Orange, N. J.

Other notable pieces are a figure of Peace, portrait statues of Baldwin and La Fontaine, and a statue of Dr. Magill, to be erected at Galveston, Tex.

Philadelphia Lapidary and Companion Suffocated by Coal Gas.

PHILADELPHIA, Pa., Feb. 5.—M. Bohrer, a well-known lapidary in this city, and Anita Havermuhl, whose dead bodies were recently discovered in Bohrer's home, 623 Sansom St., died from coal gas poisoning. This fact was established by the coroner's physician after an autopsy, though it was at first believed that they had met with foul play or committed suicide.

Bohrer has been in business as a lapidary for many years, and was widely known in the trade. He lived alone, cooked his own meals, and led a secluded life; this, and the fact that he frequently went away from home for days at a time, caused his apparent absence recently to pass without remark.

When the bodies were discovered Thursday afternoon it was seen that they had been dead a long time, and it is believed that their death occurred sometime after Jan. 2, as a paper of that date had been found in the room. It is believed that Bohrer and the woman had been drinking and were smothered with coal gas while under the effects of liquor, although the position of the bodies indicated that Bohrer had attempted to open the window before collapsing.

Police Capture Thief Who Robbed Atlanta, Ga., Jewelers.

ATLANTA, Ga., Feb. 4.—The mystery of the burglary here about two weeks ago of about $300 worth of jewelry from the firm of Maier & Edelman, 34 Marietta St., was solved here this week when Fred H. Cain, whose people reside in Atlanta, was arrested on the charge of burglary, and a lot of the jewelry in his possession was identified by Maier & Edelman.

Cain, who is only 18 years of age, admitted, when arrested, that he is a professional burglar and that he has been a member of a "band" of robbers and that it was his part mostly to keep and store the booty. He was taken early Tuesday morning by policemen in a dry goods store.

Nothing could be learned from Cain until his mother visited him at jail. When she returned home she was shadowed and the identity of Cain became known. About $1,000 worth of miscellaneous goods was found at the home.

At a preliminary hearing the prisoner was bound over to the higher court.

Stanley Grow, formerly at Souris, N. Dak., left there Feb. 1, to locate in Dunkirk, Mont., where he will continue in the jewelry business.

G. J. Dietrich, Dubuque, Ia., is reported to have given a bill of sale. Mr. Dietrich was formerly employed by J. P. Buechele & Co., and started for himself in January, 1908, and has carried a very small stock.

I. Lind has begun business at International Falls, Minn.

A new jewelry store has been opened at Oceanside, Cal., by Edwin H. Hansen.

Mr. Richardell recently began business as a watch repairer at 24 N. Main St., Mahanoy City, Pa.

W. L. Embry has resumed business in Augusta, Ga., where he is now located at 814 Broad St.

S. Jette Shepard has opened a watch repairing shop at 915 State Life building, Indianapolis, Ind.

Leo Gandert has rented quarters in Yoakum, Tex., where he will engage in the jewelry business.

J. H. G. Hopman van den Berg & Sons, diamond merchants, have opened for business at 132 St. James St., Montreal.

The Pacific Novelty Co. is the name of a new concern started in Los Angeles, Cal., to manufacture material for window displays, jewel boxes, etc.

James F. Quine is about to open a watch and jewelry repair shop in Telluride, Colo., under the management of A. Ottersen, formerly of Denver.

The Rubien-Manning Co. is the name of a new concern at 151 Pine St., Providence, R. I. The concern wil engage in the jewelry manufacturing business.

Thatcher Bros. & Co. have begun business in Mansfield, Mass. The establishment is located on Willow St. The members of the concern consist of Louis F., George T. and Harry P. Thatcher.

Market Prices for Silver Bars.

The following are the quotations of silver bars in London and New York, as reported last week:

		London.	*New York selling price, .999 Basis.*
Feb.	1	23 3-4d.	$0.53⅝
"	2	23 7-8d.	.53⅞
"	3	23 7-8d.	.53⅞
"	4	23 5-8d.	.53⅜
"	5	23 3-4d.	.53¾
"	7	23 3-4d.	.53⅜

In the case against Mr. Schiffman, a jeweler of Greensboro, N. C., charged with using the mails for a lottery scheme, the defendant's attorney has waived examination for his client and the defendant has been bound over to the June term of the Federal Court in $500 bail, which has been given. Mr. Schiffman advertised some time ago that with each purchase a certain number would be given and at Christmas the holders of certain numbers would receive handsome presents. This was held, by the postal authorities, to be a lottery and proceedings were instituted on that ground. The case is of interest to all merchants, as it was one of the first times an innocent business scheme involving the lottery principle has been the subject of prosecution.

John Stone Commits Suicide.

PROVIDENCE, R. I., Feb. 5.—John Stone, who for several years conducted a jewelry enameling establishment in this city but for a number of years past has been in the employ of S. S. Wild Co., 181 Eddy St., committed suicide early this morning by cutting his throat with a razor.

The man was 54 years of age and was considered one of the most expert workmen in his line in this city. He had been drinking heavily of late and was heard to go to his room at his boarding house, 164 Elm St., about 11.30 o'clock last night. His body was found this morning by a fellow boarder.

Errand Boy Returns Lost Money.

PROVIDENCE, R. I., Feb. 5.—Thanks to the honesty of an errand boy in the manufacturing jewelry establishment of Thomas C. Hudson & Co., Mario Espinoza, Bristol, today got back the $126 roll he lost recently. The boy is Frank Morrisey of Pallas St., this city. He found the money in the street where the owner had dropped it. The lad, not knowing who was the owner, took the money to his employers.

Early last evening Mr. Hudson, of the firm, notified the police of the find and in a short time the Bristol man was called to the police headquarters and received his money.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended Feb. 5, 1910.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin	$502 875 38

" 5	20 [illegible] 11
Total	$502 [illegible] 38

It was reported last week that Dave Blum, who conducts a jewelry and clothing business at Cripple Creek, Colo., had gone into bankruptcy. Mr. Blum had been a member of the firm of Blum & Robertson, which he succeeded in 1897.

Mysterious Explosion Does Great Damage to Store of Frank Herschede Co., Cincinnati, O.

INCINNATI, O., Feb. 5.—As yet the case of the mysterious explosion at the Frank Herschede Co. store at E. 4th St., at about 8 P. M., Jan. 31, has not been discovered. Clew after clew has been run down by the police and private detective force, but to no avail. At the time it occurred George McGuire, night watchman at the store, noticed considerable smoke in the rear, and called to a woman cleaning the store not to ascend to the balcony, as it was about to do. She obeyed and he then went to the back of the store to get a revolver, and as he started an investigation he was felled to the floor by the shock of the explosion. The woman was also knocked down.

The force of the explosion, the police say, was upward, but what the explosive was no one as yet has been able to determine. It is thought to have landed on a skylight covering the balcony in the rear of the Herschede store, and an adjoining building in an alley separating the jewelry store and the Fourth National Bank. The alley was covered with a sea of glass, as nearly all the windows facing the alley in these buildings were shattered. The shock was felt all over the downtown district.

After the shock was over great crowds gathered in front of the Herschede store and the Sinton Hotel. The former received the most of the damage, which amounts to over $2,000. For such an explosion the damage is considered light. The air current caused by the explosion swept through the store upsetting and damaging fragile goods in its path. When it reached the front end of the store it blew out the transoms.

The falling glass, together with the heat and a gas which came from the explosion, played havoc with two fine window displays. One display was of fine clocks, which can be done over, and the other of fine sterling pieces. The latter was ruined and is good only for remelting. Some of these pieces as well as some pieces on the shelves were perforated as though shot with large bullets and also covered with a whitish powder like saltpeter.

The Cincinnati police have been investigating the safe blowing at Hamilton, O., which followed so closely the Herschede explosion. They think it possible that some yeggman may have dropped the explosive in the alley, but whether accidentally or to get rid of it may never be known. The theory that the intention was to blow up the Herschede safe or the Fourth National Bank has been exploded as the culprits were operating too early in the evening to accomplish this.

Bankruptcy Proceedings Begun Against the Wurn Optical Co., Omaha, Nebr.

OMAHA, Nebr., Feb. 4.—An involuntary petition in bankruptcy has been filed against the Wurn Optical Co., of this city, in the United States District Court.

The concern is controlled by Benjamin Wurn, who started in business in this city in 1907. He was reported to have incorporated his company later and sold half of the capital stock to one Matthai, an expert optician, who came to this city from Berlin. However, Wurn denied that the corporation contemplated was ever consummated, and has represented himself as sole owner of the business.

His financial troubles are no surprise to the trade or his creditors, as he has been hard pressed for some time and judgment was recently taken against him.

Another Suspect Arrested for Robbery of Buffalo Jewelry Store Last October.

BUFFALO, N. Y., Feb. 5.—Frank Jones, alias "Frank Edwards," who is also known as "Buffalo Blackie," was brought to Buffalo from Rochester, yesterday, by Detective Elsaesser, of this city. It is charged that he is one of the three men who smashed the window of Frisch Bros.' jewelry store, 443 Genesee St., on the night of Oct. 13, and stole a tray of diamonds valued at $3,000. Mrs. Carrie Brennan, wife of Edward Brennan, saloonkeeper at No. 149 Ellicott St., Buffalo, was also arrested later in the day charged with having received the stolen jewelry.

Detective Sergeants O'Connor and Schuh, of this city, worked up the case against Jones. Yesterday when he was discharged from the workhouse in Rochester after a 60-day term he was caught on a bench warrant. Jones was brought to Buffalo and quizzed by Chief of Detectives Taylor. He said he had sold six of the diamond rings to Mrs. Brennan a few days after the robbery.

Mrs. Brennan claims Jones went to her with a hard-luck story and she bought the gems, not knowing they were stolen. Four rings and four pawn tickets were recovered by the police. Arthur Hill, alias "Cowboy Johnson," was arrested in Cleveland after the robbery. He put up a fight and was shot by Policeman Goodrich, who finally caught him. While Hill was in the hospital Walter Brand, the third man, tried to rescue him, but Brand was caught crawling into the hospital. When Hill was arrested he had four rings and $300 in cash. Hill is now here in the county jail awaiting trial.

These three men were together in a Mansfield (O.) reformatory and were released together on parole. Brand has been sent back there to serve 14 years.

Receiver in Possession of the Store of Buhn Bros., Sedro-Woolley, Wash.

SEDRO-WOOLLEY, Wash., Feb. 5.—Buhn Bros., retail jewelers, of this town, have been adjudicated bankrupts on an involuntary petition filed by creditors, and a receiver has been appointed by the court and is in possession of the store.

Under a writ of attachment the sheriff recently took possession of the store. The business, which is now owned by George O. Buhn, Sr., and is managed by George O. Buhn, Jr., was started by the present manager and his brother, E. H. Buhn, who conducted stores at Sedro-Woolley, Everson and Bellingham, Wash. Buhn Bros. got into financial difficulties in 1908 and made a settlement with their creditors at 60 per cent., after which they gave up their store at Bellingham and sold out the business at Everson, opening a second store at Blaine. They were then succeeded by the father, George O. Buhn, Sr.

Death of John W. Putts.

BALTIMORE, Md., Feb. 6.—John W. Putts, founder of the J. W. Putts Co., Park Ave. and Lexington St., died suddenly last night at his home, 2002 Eutaw Pl., of heart trouble. He had been confined to his home for about 10 days, but no serious results had been expected. He was 58 years old and was born at Buckeytown, Va., but had been a resident of Baltimore practically all his life. He started to work when 12 years old, entering the employ of B. B. Swayne, on Charkes St. near Lexington, and began laying the foundations for a self-made-man career. The Swayne establishment was the only exclusive fancy goods store in the city, and he gradually worked his way from utility boy through all the various departments and positions until he became manager, and later a junior partner, under the firm name of Swayne & Putts.

In 1884 Mr. Putts bought out Mr. Swayne's interests and became the sole owner. He built what was popularly known as the "Glass Palace," at the corner of Fayette and Charkes Sts., which was destroyed in the great fire of 1904. After the fire he built a similar structure at the corner of Park Ave. and Lexington St., and has always carried a very exclusive line of jewelry, cut glass, pottery, bric-a-brac, fancy goods and household furnishings.

Mr. Putts had few other interests. He was active in charity work and was one of the heartiest supporters of the Children's Fresh Air Society, of which he was one of the incorporators. He was a member of the Royal Arcanum for 30 years and an active church worker at the Grace Methodist Episcopal Church. He is survived by a widow, two daughters and the following sons, Albert C., Dr. B. Swain and William E. Putts.

Death of Zebulon B. Robbins.

ST. LOUIS, Mo., Feb. 7.—The funeral of Zebulon Baird Robbins, proprietor of the Robbins Jewelry Co., with offices in the Holland building, was held from the family residence at 3939 Sullivan Ave., to St. Matthew's Church, at 8.30 A. M., Feb. 4. Mr. Robbins died at Llano, Tex., Jan. 31, where he had gone with the hope of regaining his health.

Mr. Robbins had been sick for the past six months, and it was on the advice of his physicians that he sought the southern climate. The body was buried in Calvary cemetery in St. Louis.

Mrs. Annette Robbins, who conducted the business during her husband's illness, will continue it. Mr. Robbins came to St. Louis two years ago and established a jewelry business that has shown steady growth. Mr. Robbins was the son of R. L. Robbins, and a brother of Mrs. Laura Thomas and Mrs. J. B. Cottingham, of New Jersey, and brother-in-law of the Rev. William V. Roche.

S. W. Fellows, Lawrence, Mass., is now located in more commodious quarters at 213 Essex St.

Keystone and Allied Companies Sued for Heavy Damages.

Dueber Watch Case Mfg. Co. Brings Suit in United States Court at Cincinnati Charging Conspiracy Under Sherman Anti-Trust Law and Asks Damages of $375,000.

CINCINNATI, O., Feb. 5.—As a result of s new policy in dealing with the jobbers, nounced by the Keystone Watch Case o., of Philadelphia, which is practically to ie effect that the concern will not sell any f the lines of watches, movements and atch cases which it controls to jobbers ndling watch cases of other manufactur- s, the United States Courts have been lled on to test the validity of the com- any's action. A suit, based on what is own as the Sherman Anti-Trust law, has en commenced in the United States Court this city by the Dueber Watch Case Mfg. o. of Canton, O., which names as de- ndants the Keystone Watch Case Co., the ew York Standard Watch Co., the Cres- nt Watch Case Co., the E. Howard Watch o., the Philadelphia Watch Case Co., T. rbrugg and Chas. M. Fogg, the last two ng the president and secretary, respec- vely, of the Keystone Watch Case Co. and ne of the other concerns.

Mr. Fogg, who has been in Cincinnati for me time on business, left this city last ening and was served about 6 P. M., just fore he departed, by Deputy United tates Marshals Sanderson and Maguire ith the complaint in this action.

The complaint of the Dueber Watch se Mfg. Co., which was brought through s attorneys, ex-Senator J. B Foraker, s. Sagmaster, of this city, and Roscoe cCullough, Canton, asks for damages to e amount of $375,000, and in effect arges that the defendants have conspired ruin the trade and general business of e plaintiff company.

The complaint begins by reciting that the ueber concern is a corporation under the ws of Ohio, doing business throughout is country and in foreign countries, and rticularly in Canada, and then goes on to cite the fact that the other defendants are rporations of various States, giving their igin and stating that they are practically combination: that Mr. Zurbrugg and Mr. gg are officers or representatives of the eystone company, and that they have been tive officially and individually in the crea- on of this combination, and in the prose- ution of what is alleged to have been its legal and wrongful purposes, and that with hers unknown to the complainant, these o defendants have participated in and have en a party to all the acts herein com- ained of: that Mr. Fogg, the secretary, is present in the State of Ohio as official presentative of his company and actively gaged while here in carrying on the siness of said company in the prosecution the wrongful purposes alleged.

The complaint then goes on to say that e several defendant corporations, al- ough organized, as stated, under laws of her States, and citizens of such other tates, respectively, are engaged in business the State of Ohio, and that all of them cept the E. Howard Watch Co., maintain fices and agencies in this State, and that e Howard company is carrying on busi- ness in Ohio through the co-defendant combinations.

Then the petition goes on to tell of the large amount of money which the Dueber company has expended to build up its business, with the result that it manufactures and sells about 250,000 watch cases annually, exclusive of the electroplated and silverine watch cases, of which at times, when in demand, it has manufactured in varying quantities from 100,000 to 200,000 annually. It tells of the money which the company has expended in building up a market for its products, and, referring to the acts of the defendants, the complainant alleges that these corporations and individuals have combined with each other not only for the purpose of monopolizing the trade in watch cases, but also for the purpose of destroying competition in such trade, and controlling the prices on watch cases throughout the United States, and with foreign nations and particularly the Dominion of Canada. It is further alleged that they are now engaged in such a combination in pursuance of a conspiracy in an attempt to monopolize and restrict such trade; and that the direct and necessary effect of their combination is to stifle and directly and substantially restrict competition in the sale and transportation of watches in interstate and foreign commerce.

The plaintiff alleges that the combination so formed controls the manufacture and sale of about 60 per cent. of the watch cases made in the United States, and sold both in this country and to some foreign nations and in Canada; that in pursuance of the conspiracy between the Keystone Watch Case Co. and its co-defendant corporations, they will not permit jobbers to sell the goods of any of the defendant corporations if they sell them in competition with the products of any manufacturer and especially if they sell the products of the complainant.

The complaint charges that the Keystone Watch Case Co. has circularized the jobbing trade in a letter (a copy of which was published in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, page 129), and then the concern quotes from this letter, singling out two paragraphs as most important and as bearing on the allegations made in the petition.

The court is asked to declare the combination illegal and in restraint of trade, and to award the plaintiff the damages asked for, which amount to $125,000, but the triple penalty provided for by law is demanded, making the amount $375,000.

No answer to the complaint has as yet been filed.

BOSTON, Mass., Feb. 5.—E. E. Hardy, of D. C. Percival & Co., the leading Boston wholesale watch and jewelry house, which has been cut off its list by the watch case combination, denied to-day the rumor that his concern had begun an action against the Keystone company or its associates. He says the concern has not as yet decided what action to take relative to the shut-out to which it has been subjected, but has under consideration the matter of bringing suit for damages under the Federal laws applicable to a monopoly in restraint of trade.

"For a number of years," says Mr. Hardy, "as is well known to the trade, we have built up a business in these and other watch cases without discriminating against any line. We have been fair to all the manufacturers and fair to our customers.

"If we lose any of the trade thus acquired, through unfair and unjust action on the part of the manufacturers, we believe we should be able to obtain redress in the courts. We shall take steps to determine our legal status in the matter, but are not ready at present to say what action, if any, will be taken. The report that we have already brought suit is not true."

William Kleinschmidt, Former Gem Importer, Commits Suicide at His Home.

Former associates of William Kleinschmidt, until a few years ago a well-known gem importer of New York, learned, Friday afternoon, that he had committed suicide the previous evening at his home, 462 E. 12th St., Brooklyn, by shooting himself in the right temple with a revolver. At the time that he killed himself his wife and a maid were in the house with him. He reached home about 8.30 o'clock, and after greeting his wife went upstairs. Soon after he was discovered dead with the revolver clasped in his hand. Dr. F. E. Stafford was summoned and said that Mr. Kleinschmidt had died instantly.

William Kleinschmidt was associated with the Maiden Lane, New York, diamond trade for many years. He was born about 52 years ago on Seventh Ave., New York, and when a young man became an employe of the old firm of Buckingham, Cole & Hall, which firm became Buckingham, Cole & Saunders and was succeeded by John F. Saunders. Mr. Kleinschmidt started in business on his own account in August, 1895, and later, in January, 1896, he formed a partnership with George H. Howland under the style of Kleinschmidt & Howland. In 1899 Fred W. Ehrhard became a partner, the firm style becoming Kleinschmidt, Howland & Co. Mr. Ehrhard retired in January, 1905. About two years ago the firm met with financial reverses and went out of business. They were located at 170 Broadway. Since that time Mr. Kleinschmidt has been engaged in real estate transactions. Mr. Howland died in May of last year.

The deceased is survived by his widow, who is a lineal descendant of the brother of George Washington, and two daughters.

Charles W. Crankshaw, with quarters in the Atlanta National Bank building, Atlanta, Ga., announces that he will temporarily suspend business after March 31, on account of the necessity of finding new quarters and being unable to secure quarters before that time. He has been an occupant of his present stand since the erection of the bank building several years ago, and his removal is due to the bank having to enlarge its quarters. He is offering his stock at daily auction.

Eastern Jewelry Salesman and Two Women Killed in Fatal Automobile Accident at Denver

DENVER, Colo., Feb. 2.—As a result of one of the most horrible automobile accidents that has ever happened in the city of Denver, James A. Baker, of the firm of Henkes-Baker Jewelry Co., Vincennes, Ind., and a salesman employed by F. M. Whiting & Co., North Attleboro, Mass.; Mrs. Marie H. T. Keating, daughter of J. A. Hamilton, of the W. W. Hamilton Jewelry Co., and Miss Virgil Cain are dead, and Russell Talbot, salesman for the Alvin Mfg. Co., of New York, and Morris Mayer, son of Sam Mayer, a jeweler, of this city, are in the hospital, badly injured. Mr. Baker and Miss Cain were killed outright; Mrs. Keating died a short time after the accident; Mr. Talbot's injuries are painful, while those of Mr. Mayer are slight.

The accident occurred Monday night while Mr. Mayer, who was driving the machine, was racing at great speed beside a south-bound Englewood car. At Arizona St. he attempted to cross in front of the car, when a north-bound car approached rapidly. He attempted to get out of the way, but a second car and the automobile came together with a terrific smash, the machine being dragged 100 feet by the car.

Mr. Baker was thrown directly in front of the car and was dead when discovered; Miss Cain was also dead when picked out of the wreckage, and Mrs. Keating was caught in the running gear of the automobile and was dragged for a considerable distance; she was breathing when extricated and died a few moments later. Mr. Talbot was thrown under the car, but not dragged, while Mr. Mayer, the driver, was thrown to the side and so painfully injured that he wandered off in a dazed condition.

The accident was the culmination of a frolic planned a few days ago by Mr. Mayer for the entertainment of his friends, Mr. Baker and Mr. Talbot. The start was made from the Mozart Cafe at 7.50 in Mr. Mayer's machine. There was to be another member of the party, John J. Brehmer, but at the last moment he was unable to join them in the ill-fated ride.

While in certain quarters there is some blame attached to the motormen of the cars, the police are inclined to put the responsibility on the shoulders of Mr. Mayer and the fast speed at which he was going.

Mr. Mayer is in the hospital with a mass of cuts and bruises, which have required, it is said, 100 stitches to be taken, but no bones are reported to be broken.

The fact that he disappeared after the accident is attributed to the excruciating pain which he suffered.

DEATH OF JAMES BAKER CAUSES GREAT SORROW IN CINCINNATI.

CINCINNATI, O., Feb. 5.—The death of James Baker has cast a deep gloom over the entire jewelry trade of Cincinnati. The tragic accident to Mr. Baker in Denver, Colo., was a terrible shock to his many friends here in the trade, as well as throughout this community, where he was so well and favorably known.

Jan. 2 Mr. Baker, representing Frank M. Whiting & Co., left on his business trip, going west to be gone until early in June. Jan. 31 he was killed in an automobile accident at Denver, Colo., as noted elsewhere in this issue.

In honor of Mr. Baker and Mr. Talbot, Morris Mayer, their host, invited his fiancee, Miss Virgil Cain, and also Mrs. William J. Keating, whose husband would join the party at the theater. The crowd, after dining at about 6 P. M. at one of the restaurants, found they still had some time before the theater opened, and accepted Mr. Mayer's invitation to take a spin in

THE LATE JAMES A. BAKER.

his touring car. They were soon off, with Messrs. Talbot and Mayer on the front seat and Mr. Baker and the ladies in the back of the automobile.

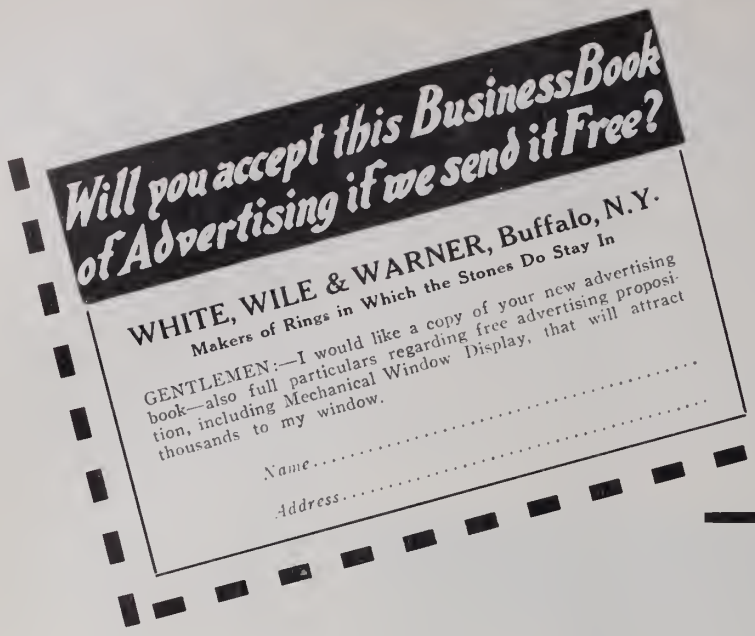
It is said they were going at 40 miles an hour when they proceeded to cross some traction tracks. In trying to avoid a going car one coming struck them and threw Talbot and Mayer some 40 feet, but Mr. Baker and the ladies were instantly killed.

Deceased, who was 37 years old, started out for himself 22 years ago as a newsboy and was successful, thus winning a place in the hearts of those who watched him daily, as he showed determination to succeed in his work. Among his patrons was Judge Taft, our present President, who cheered him on and gave him good fatherly advice, thus instilling in him many of the manly qualities he showed in later years.

As time went on it developed that A. G. Schwab & Bro., then located on 5th St., sought this lad for an errand boy at $3 a week. "Jimmy," tickled at the prospects, was not long in accepting the position, and tried to do his best. Robert Vaupel, of the concern, became quite attached to the lad and acted as sort of a guardian in coaching him in learning the jewelry business. "Jimmy" was very apt and finally worked himself up to the position of traveling salesman for the Schwabs. He acted in this capacity for about 16 years, when F. M. Whiting & Co. sought his services.

Mr. Baker was with the Whiting concern about four years. His trips extended from coast to coast, and he carried seven trunks. It is said of him that he was considered one of the most popular traveling salesmen on the road, and that few men, aside from politicians, had the extensive acquaintance he had with people in every walk of life.

About four years ago Mr. Baker and J. H. Henkes formed a partnership in the retail jewelry business at Vincennes, Ind., under the firm name of Henkes & Baker, where the latter spent his holidays, assisting in the rush at that time. Mr. Henkes will continue the business as heretofore.



The news of Mr. Baker's death was received early on the morning following the accident by his parents, of this city. Officials of the Cincinnati lodge No. 5, B. P. O. E., of which the deceased was an active member, were at once notified, and through them all arrangements were made for the funeral, which took place at the Elks' Temple, Elm St., yesterday, at 2.30 P. M. The attendance was unusually large, every jewelry house in Cincinnati being represented. The great quantity of flowers testified to the extent he was beloved by his many friends.

Among the firms represented at the funeral services were: F. M. Whiting & Co.; Tindolph & Wagner and J. H. Henkes, Vincennes, Ind.; the A. E. Brown Co., St. Paul, Minn.; Clemens, Oskamp Co., J. C. Miller and the Thoma Bros. Co. Others present were A. E. Motteram, Mr. Unger, Cornelius Young, with Whiteside & Blank; Harry Barkman, with F. H. Cutler & Co.; Sandy McPherson, with McPherson & Rowbaum; R. I. Seeley, George Taylor, with Wilcox & Wagoner; S. C. Dickson, with the Adelphi Silver Co.; James Morrow, with the American Watch Case Co.; Harry Meyer, with I. N. Deitsch & Bro.; Henry Meyer, with the William B. Kerr Co.; C. W. Lucius and J. Fred Kramer, with the Frank Herschede Co., and a delegation from the Cincinnati Lodge of Ku Kus.

The services were conducted according to the Elks ritual, the pallbearers being J. Fred Kramer, Fred Thoma, Joseph Pilon and Dr. Hussey.

The remains were cremated at the Clifton crematory, this having been the wish of the deceased.

Mr. Talbot, the injured silverware salesman, travels from the New York headquarters of the Alvin Mfg. Co., covering the territory as far west as Denver. When it was learned that he had met with an accident Louis Flemming, another representative of the concern, was notified, and he went immediately to the hospital to which Mr. Talbot had been taken, and will remain with him until such time as he is able to be removed. While Mr. Talbot was seriously shaken up and greatly shocked by the accident, he was not seriously injured, and it is expected that he will be about again in a short time. He has been with the Alvin Mfg. Co. for 15 years, having become an employe of that concern upon leaving school.

a bigger business
a better income

You Are Engaged in a Business Struggle for Supremacy

You cannot afford to overlook or neglect any possible advantage to be gained. The value to you in your business of our permanently-insured rings is greater than can easily be estimated. It is a public notice that your store is a quality headquarters.

The announcement that you sell W. W. W. rings means something more than simply that you sell a ring that carries with it a written insurance. It means that your store is the standard of excellence.

Insured Rings Mean Much to the Jewelers Who Sell Them

Selling W. W. W. insured rings helps every other department in your store. It establishes the character of your store. This is one of the things you cannot afford to miss. It is an advantage you have over all others in your community. It is the strongest force in the jewelry business to-day.

The Unparalleled Guarantee

The remarkable feature of the W. W. W. ring is that it relieves you of all risk and uncertainty in your ring buying. We shoulder the entire responsibility. With every W. W. W. ring you get a certificate of guarantee—the strongest, the most liberal guarantee known—which tells your customer that if the sets should come out or if the ring proves unsatisfactory in any way, regardless of how long it is worn, we either repair it absolutely free or give your customer a new ring.

Note the Reasons Why We Can Give You a Guaranteed Ring

They are made in the Light-of-Heaven factory. This factory of ours has every modern convenience and every known attraction to the highly skilled workman. Consequently, every seat in this Light-of-Heaven factory is occupied by a man who knows what he is doing, because he is a man (not a boy) who is classed as an expert in his line. Each man holds his place because he is the very best man at that work. Suppose you were a good stone setter or ring maker, would you prefer to work in a factory such as ours or in a dark, dingy one? W. W. W. rings are made so well that they can be guaranteed.

Place Them Side by Side

A ring with a certificate of insurance next to one without such a written guarantee. Both at the same price. If you went to a jewelry store to buy a ring, which one would you buy? Of course, the insured one! Consequently, is it not natural that your customers would do likewise? Is it not reasonable and logical that the insured ring is the only one for the live and progressive jeweler to buy? Since W. W. W. rings are the only permanently-insured rings in all the world, is it not to your interest to begin selling them now if you are not already doing so?

Not Expensive Rings

W. W. W. insured rings are not costly. They are cheaper than most rings. Not higher than any others. Our broad and startling guarantee may mislead you. There are no rings in the market that give nearly so much for the money. We have the strongest line of rings in the world that you can retail profitably from $2.00 to $7.50. Each one bears our name of W. W. W. Each one can be sold with the signed guarantee of stone staying in. If you want to see why W. W. W. rings are so pre-eminent, why the stones stay in, why in every other way they give your customers satisfaction, study the stone setting. The excellence of our rings is not merely in what we say about them—it's in the rings!

This Will Be a Revelation to the Business World

We do more than merely make and sell good rings. We help you sell them. What we are doing for the jewelers who buy W. W. W. rings will be talked about from coast to coast. We give you absolutely free a mechanical window display—a display that will attract, not hundreds, but thousands, to your windows, a display that will sell more rings for you in a month than you have ever sold before in six months—a display that will be the envy of your competitors, for in most towns and cities we sell but one man.

Delays Pay No Dividends

Every day you delay in learning about this book of ours, combined with our free advertising, including the mechanical window display, is an opportunity lost. Do we need to say more to you—you whose very success and progress this coming year is dependent on the kind of methods you secure, dependent on getting just such help as our advertising gives you? Surely you will not deny yourself the privilege of securing all this advertising—the privilege of selling the only permanently-insured ring in the world—when it involves the expenditure of only a penny or two?

Makers of Rings in Which the Stones Do Stay In

Buffalo, New York

Death of Seth E. Thomas.

Seth E. Thomas, treasurer of the Seth homas Clock Co. and without question e most important figure in the clock in- stry of this country, died at the Hotel ville, New York City, Sunday, Feb. 6, at 45 P.M., following an illness of several onths. Notwithstanding the fact that he d been ill for some time, his death was great shock to the trade, in which he as known in all parts of the country. He as a man of sterling qualities, strict siness integrity, and had done much to ild up the clock industry. Seth E. homas was born in 1842 at Plymouth ollow, Conn., now Thomaston, and was grandson of the original founder of Seth Thomas Clock Co. His early

THE LATE SETH E. THOMAS.

e was spent at Plymouth Hollow, and hen a young man he became associated th the business. He has been treasurer the company for the past 50 years.

The Seth Thomas Clock Co. was organ- d in 1813 at Plymouth Hollow, and be- re that time clocks had been made at ymouth.

Mr. Thomas was a director of the Wash- gton Trust Co., a member of the Cham- r of Commerce, the Union League Club. e Jewelers Board of Trade and other ganizations, in which he took an active rt. He was also interested in church ork, and for many years was treasurer the West Presbyterian Church on 42d ., New York. Of late years he has ade his home in Princeton, N. J., and in ew York.

Deceased is survived by a widow, one n, Seth E. Thomas, and six daughters. he funeral was held from the Hotel Se- le, Tuesday morning, the burial being ivate at Woodlawn Cemetery.

Death of Charles O. Hunter.

DENVER, Colo., Feb. 3.—Word has been ceived in this city of the death of harles O. Hunter, who has been for many ars a prominent jeweler of Fort Collins. hile seated at a table writing a letter r. Hunter was stricken with neuralgia of e heart and passed away a short time er. He is survived by a widow and a ughter by his former marriage. The funeral services were held last Thursday afternoon.

Mr. Hunter was about 65 years old and formerly worked as a journeyman jeweler for S. C. Arscott, of this city. He started in business for himself about 11 years ago, and after conducting a store for about four years went east and then returned to Denver, where he was burned out. He finally settled again in Fort Collins and continued there until his death.

W. F. Van Arsdel, Anniston, Ala., Goes Into Voluntary Bankruptcy.

ANNISTON, Ala., Feb. 7.—A petition in voluntary bankruptcy was filed, last week, by W. F. Van Arsdel, one of the oldest jewelers in the city. The petition was filed with Referee H. D. McCarty by Tate & Walker, attorneys for the bankrupt, and the liabilities are given at about $11,500, with $2,000 of this amount secured. The assets are only the stock in trade, this amounting to about $15,000. C. H. Young was appointed receiver.

Mr. Van Arsdel has for a number of years enjoyed the reputation of having one of the prettiest jewelry stores in the State, and has always carried the banner stock of the city. While nothing official has been given out regarding the future of the store, it is pretty well understood that arrangements will soon be made whereby the indebtedness will be liquidated and the store again opened up under the old management.

The bankrupt has been in financial difficulties for some time, resulting from poor business in this section and a lack of capital. Owing to his trouble a number of his creditors had given him until this month to settle his liabilities, but as he could not do so he was forced to file a bankruptcy petition.

Mr. Van Arsdel has been located in Anniston since 1906, when he succeeded J. T. Chrisman. He had previously had considerable experience in the jewelry trade, having been in business in Huron, S. Dak., Athens, Tenn., and at Springfield, Tenn.

Executive Committee of New York State Retail Jewelers' Association Meets at Utica.

UTICA, N. Y., Feb. 7.—The executive committee of the New York State Retail Jewelers' Association met here to-day, President Charles T. Evans presiding. Arrangements were considered for the annual convention, which will be held in Rochester in May, and there was also a consideration of the replies which have been received from jobbers who will agree not to compete with the retail jewelers.

Delegations of jewelers from Syracuse, Rochester, Binghamton, Elmira and other places were present, in addition to the executive committee, as the guest of the local association. The jewelers were entertained about the city in the afternoon and at the Shubert Theater in the evening.

D. Wolkowisky has moved from Albuquerque, N. Mex., to Los Angeles, Cal.

J. F. Sullivan, of Sullivan & Dade, Blackduck, Minn., has bought out his partner's interest and is continuing the business under his own name.

Edwin Bennett Pottery Co.'s Plant, Baltimore, Md., Destroyed by Fire.

BALTIMORE, Feb. 5.—A fire that started in the stables of the Edwin Bennett Pottery Co. on Tuesday morning of last week destroyed the plant along with the large lumber yard of Eisenhauer, MacLea & Co. The fire was one of the largest in this city for a year, and with the large quantity of packing and lumber was very spectacular. A heroic fight was made to prevent it spreading to the Standard Oil distributing plant, just across the street.

The Bennett plant is one of the largest in this country and has been temporarily crippled, the firm issuing a statement to the trade to the effect that they have been compelled to shut down temporarily, but will rebuild immediately on a much larger scale. The kilns and some parts of the machinery escaped serious damage, and as soon as the insurance can be adjusted they expect to go ahead with about two-thirds of their normal capacity. Their temporary office is located at 700 South Eden St., which is near the destroyed plant.

Over 300 employes of the plant were at work when the fire started, about a block away, not realizing that in a few minutes they would be fleeing from the flames. It reached there rapidly, however, being driven by the high winds and the inflammable material in its path, and caused a small panic. Some of the cooler heads prevented disaster. Many were unable to secure their coats and wraps, so rapidly did the flames advance.

The firm succeeded in getting out their most important papers, but some were lost. The damage to the Bennett plant is given as follows: Loss on stock, $50,000; on building, $20,000; on machinery, $30,000. The insurance is given as on the building, $30,000; on stock, $25,000; on machinery, $17,000.

Association Notes.

The annual meeting of the Railway Watch Inspectors' Association of the United States and Canada will be held at Hotel Harris, Washington, D. C., Tuesday, Feb. 22, at 2 P. M. The regular business of the association will be transacted and officers and directors for the ensuing year elected. Railway watch inspectors who desire any information about the association can communicate with the secretary-treasurer, Robert W. Little, Cumberland, Md., or Milton Kohler, Hagerstown, Md.

The semi-annual meeting of the South Dakota Retail Jewelers' Association, which was to have been held early this year, has been abandoned on account of the extremely uncertain traffic conditions in that section. The officers and members have decided to redouble their efforts to make the annual meeting in June one of the most interesting in the history of the association. D. S. Sharp, Brookings, S. Dak., secretary of the association, is anxious to get into communication with all jewelers of the State who have not become members and have them join before the annual meeting is held.

Frederick Witherstine, Herkimer, N. Y., has sold his business to Frank R. Zoller, and will move to Peoria, Ill., about May 1.

Three-Ply All Gold and Permanent Watch Cases

MR. DEALER:—

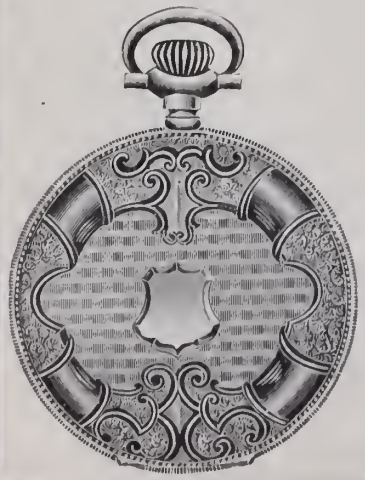
Some reasons why you should stock our Cases:

Every factory claims to make the best on earth, a trial order will convince you we do.

Every factory claims to put more gold into a case for the money than any other. Assay them. If ours does not prove the best value we will pay the loss of making the assay.

Because of the method of construction of our case it will outwear all others.

We have never sold Mail Order Houses. We have turned down every overture made us by Mail Order Houses.



If we are giving your customers good value—

If we are giving you a good profit—

If we are refusing to sell Mail Order Houses and other unfair competitors of yours—

Are we not entitled to a share of your business?

Send for a Catalogue and let us have a trial order.

Pennsylvania Watch Case Company

YORK, PENNSYLVANIA

REPOUSSÉ WORK AND CHASING

ILLUSTRATED AND DEMONSTRATED BY AN EXPERIENCED ARTISAN

(*Continued from issue of Jan. 5.*)

THE small portable clock as we know it to-day was first made in the early 16th century, when the invention of Peter Henlein, a Nuremberg clockmaker, first made this possible. His invention consisted of a steel ribbon wound round a central spindle (now known as the mainspring), and was a great improvement on the heavy driving weights suspended on cords or chains which provided the motive power before.

The chief difference between the portable clocks of the 16th century and those of to-day is that whereas most modern clocks are perpendicular, the early clocks were chiefly horizontal, i.e., with their faces on top. Sixteenth century clocks were only provided with one hand, viz., the hour hand, and the minute hand did not come into general use until the end of the 17th or the beginning of the 18th century, and in England it was even later before it came into use.

Some of these early clocks were soon made small enough to be carried on the person, and these are known as "clock-watches," but, of course, they are very cumbersome when compared with the modern watch. The cases of these clock-watches were generally perforated in order that the bell with which they were often provided might be more readily heard. In early clocks the dial was never protected by glass, but some of them had a perforated metal cap through which the figures on the dial could be seen.

As with silver plate, so with clocks; Augsburg and Nuremberg became the most important centers of manufacture, and the great majority of 16th and 17th century clocks still in existence came from this district. The Germans speedily introduced the same features into their clocks as those which characterized their silverware of this period, introducing figures which moved automatically generally with the striking of the hour, and this type of clock became very popular.

The clocks with very long cases, generally known as "grandfather clocks," were first introduced about the middle of the 17th century, the earliest examples being comparatively small.

It should be noted that as with silver plate and furniture, so with clock cases, the dominating style of the period was always used in their decoration. This can be very clearly traced in the collection of clocks and watches at the British Museum, dating from the end of the 16th century down to the present time.

British clock and watch makers have from the earliest period held an important place in the history of horological invention, the early British clocks being particularly good, both from a technical and artistic point of view. One of the most famous of the early British clockmakers was Bartholomew Newsum, who worked in London about the middle of the 16th century, and was clock and watch maker to Queen Elizabeth. The sketch of a clock case shown here is very similar to the type of clock case made by him, and he, as far as we know, was one of the first of the English makers to introduce

DESIGN FOR CLOCK CASE—FRONT ELEVATION.

the small portable table clock as we know it to-day.

The clock case, of which the front elevation is here shown, is about 8⅝ inches high, not including the small pedestal and group, five inches wide and about 4¼ inches deep.

The body of the case, *i.e.*, the perfectly straight part, not including the shaped top or base, can be made out of one piece of metal measuring 18½ inches by 7⅛ inches. When cut out to this size the piece of metal can be taken lengthways and divided into four, namely the front and back each measuring five inches across and the two sides, each measuring 4¼ inches, making a total of 18½ inches. When scored through and bent up this will give the body of the case to the sizes already given. It should be noted, however, that before scoring and bending up any embossing which is required by way of decoration on the front, sides or back of the case should be done, as it is, of course, a much easier matter to emboss decoration on a pitch-block than to drive it up by means of a snarling iron, which, of course, would be necessary when once the body has been bent up and soldered together.

The decoration intended for the front of the case, as indicated in the sketch, is very slight, and if carried out should be left very low in relief, but this applies equally well to any other scheme of decoration which is decided upon.

On examination it will be seen that most of the old clockmakers recognized that the decoration must not in any way interfere or detract from the dial, which, after all, is the important thing, and the decoration in the early clocks generally consists either of engraving or flat chasing or very low relief, but never high or bold relief. The moulding round the dial may be made an exception, and be made to stand out fairly strongly, as this is necessary in order to effectually separate the dial from the rest of the case. It will, therefore, probably be found an advantage to make this separately and solder or pin it on to the body of the case, as this will tend to make the front of the case much more rigid, a great advantage when fitting the dial and hands of the clock.

W. S.

(*To be continued.*)

National Monthly Import and Export Statistics.

WASHINGTON, D. C., Feb. 7, 1910.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade, for December, 1908, and for the 12 months ended December, 1909:

	Dec., 1908.	Dec., 1909.	12 Months Ending—Dec., 1908.	12 Months Ending—Dec., 1909.

Andrew J. Smith, who recently resigned is position with the R. Wallace & Sons Mfg. Co., Wallingford, after 44 years of ontinuous service, celebrated his 85th birthay, last week. Mr. Smith was born in ristol.

Word was received on Wednesday, in Vinstead, of the death in Newark, N. J., f John Griffith, who, for over 25 years had een employed by the Wm. L. Gilbert Clock o. The remains were brought to Winsted or interment.

At the annual meeting of the Waterbury lock Co., held recently in Waterbury, the fficers elected were: President, H. L. 'ade; secretary and treasurer, I. H. Chase. he directors are: H. L. Wade, Irving H. hase and Henry H. Chase.

The funeral of Daniel W. Mulvey, for erly employed for some time by the New aven Clock Co., New Haven, and who ed, recently, at his home, 37 Worcester t., in New Haven, was held from his late sidence, Wednesday morning.

The International Silver Co. has just warded the contract for the erection of wo new additions to factory "P," on Hall ve., in Wallingford. The proposed new ructures include a four-story building 40 y 104 feet, and a power house 30 by 66 et, one story high.

At the annual meeting of the Bradley & ubbard Mfg. Co., Meriden, held last week, . Hubbard was elected president. N. L. radley, who has been treasurer of the ompany, was elected vice-president, and C. . Bradley, his son, was elected to succeed s father in the latter's former position as easurer.

The Wallingford Co., manufacturing silr plated hollow ware, was recently incorrated. The following directors were ected: Clifford W. Leavenworth, F. L. Vallace, H. L. Wallace, C. D. Morris and . F. Norton. The officers elected were: resident, Clifford W. Leavenworth; secetary and treasurer, Charles D. Morris; anager, Henry Norton, Jr.

Baltimore.

Gen. J. Stuart MacDonald, Baltimore, d, a leading jeweler and business man d surveyor of customs, is at the Johns opkins Hospital, recovering from an opation for appendicitis. The fact that he d been operated on was not announced ntil the crisis had passed and he was on e road to recovery. He has been at the spital for about two weeks, and his eedy recovery is expected. He was taken at his desk at the Customs House, Jan. , and was removed the next day from s home to the hospital. It was thought first that he was suffering from acute digestion.

The efforts of the Old Town Merchants d Manufacturers' Association, backed by any of our merchants who have come to alize the far-reaching effect of the growg trading-stamp evil, have taken up the atter of regulating this business by means a new law which they hope to have ssed by the legislature. The bill has been awn and was brought before the legisture last week. The Merchants and Manufacturers' Association have also joined the efforts to regulate the giving of stamps. The consensus of opinion of the merchants is to the effect that they would gladly discontinue the practice if all would do so, but this line of action seems impossible, as there would surely be some who would refuse. Some of the leading men of the legislature in expressing their views on the subject state they are opposed to the practice, but that such a measure must be decided on its merits.

Harrisburg, Pa.

R. Stanley Goodhart, for four years with Rudisill Bros., Altoona, and well known in this city, has taken a position as watchmaker and optician with the Walton & Acklin Co., Tyrone.

The case of Myer Baturin, 422 Market St., charged by Harry Garfinkle, of Philadelphia, a creditor to the amount of $800, with violation of the fraud act of 1903, has been continued until the March term of court.

Joseph Claster has been chosen vice-president, and L. Kamsky a director of the Hebrew Charity Association, of this city and vicinity, which ended its first year of existence last week. The association extended aid to 1,064 Hebrews last year.

Following the closing of his store by the sheriff, Deputy United States Marshal Laurish last week took charge of the establishment of Abram Baturin, 418 Walnut St., under bankruptcy proceedings. Account of stock has been taken and an order from Judge Archbold for the sale of the stock is expected soon.

Optician R. D. Platt was awakened at his home, 257 Forster St., one morning last week by a noise in his parlor, and, upon investigating, saw a man making a dash for the back door. The man had opened the front window with a "jimmy" and in passing through the parlor had overturned a table. The intruder secured no plunder.

Harrisburg friends of John P. Messmer, of Stewart's jewelry establishment, in Huntingdon, were pleased to learn that the operation performed on that gentleman for facial neuralgia, at Philadelphia, by Dr. De Costa, was successful. A nerve was removed from the left side of Mr. Messmer's face, extending from the jaw to the forehead.

There passed through this city last week on his return to his home in Jacksonville, Fla., a man whose one experience with northern Winters has thoroughly satisfied him. He is George Gibson, a jeweler, who appeared in Altoona recently clad in the thinnest white canvas ducks, thin oxfords and a straw hat, and secured a job with Mr. Berman. After three days he was discharged, and applied for help at Salvation Army headquarters. His mother was communicated with and forwarded the necessary transportation, and Gibson departed for the warmer southland. Gibson insisted that he cannot remember how he came to travel north to Altoona.

William Sandberg, formerly of Virgina, Minn., but recently in business at Hibbing, has returned to Virginia and re-engaged in business there.

Comments on the Anniversary Issue.

NEW YORK, Feb. 5, 1910.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

The writer wishes to compliment you on your very interesting Anniversary Number of THE JEWELERS' CIRCULAR-WEEKLY under date of Feb. 2. It is one of the most interesting numbers ever issued, and I extend my heartiest congratulations.

Yours very truly,
JOSEPH D. LITTLE.

WATERTOWN, N. Y., Feb. 4, 1910.

Editor, THE JEWELERS' CIRCULAR-WEEKLY:

I wish to congratulate you on your 41st Anniversary Number. It is a fine sample of your CIRCULAR.

SILAS L. GEORGE.

WALLINGFORD, Conn., Feb. 4, 1910.

Editor, THE JEWELERS' CIRCULAR-WEEKLY:

The copy of the Anniversary Number is by far the best and handsomest you have yet gotten out; the cover is much better and the printing is good.

SIMPSON, HALL, MILLER & Co.
F. B. Northrop.

PHILADELPHIA, Pa., Feb. 3, 1910.

Editor, THE JEWELERS' CIRCULAR-WEEKLY:

Permit us to extend to you our heartiest congratulations on the 41st Anniversary Number. It is a complete success both from an artistic and a trade viewpoint.

MAXWELL & BERLET, INC.

What the Newspapers Say.

THE JEWELERS' CIRCULAR-WEEKLY celebrates its 41st anniversary in a bulky and attractive issue of nearly 300 pages for its Feb. 2 number. On the front page a decorative border has within it the picture of a woman wearing adornment, in which gems vie in color with flower blooms. Beside technical and other news of value, the journal has special articles, such as "Gold and Silversmith Work at the Louvre Museum," and "The Trend of Fashion in Jewelry," both of them amply and beautifully illustrated. All sorts of odd, out-of-the-ordinary and brief special articles carry pretty illustrations. The issue is a work of art in itself.—*Brooklyn Eagle.*

A Magnificent Number.

The anniversary number of THE JEWELERS' CIRCULAR-WEEKLY is always received with delight by all interested in the jewelry industry, which is so admirably served by this energetic and progressive trade paper. The 41st anniversary number, issued this week, is even superior to the many excellent editions in other years. It contains not only a wealth of special articles of interest to jewelers, but also gives all the news items throughout the country. The book itself has an unusually attractive cover and every one of its 274 pages indicates the best quality of printing.—*North Attleboro Chronicle.*

The J. M. Boner Jewelry Co., Evansville, Ind., has sustained a loss by fire.

A small blaze started recently in the store of W. P. Reichert, Canton, Ill., but was extinguished before doing any serious damage.

GORHAM SILVER

EVERYBODY KNOWS

the Gorham trade mark  as being the symbol not only of Sterling quality, but all that is excellent in design, finish and manufacture for silverware. A dealer offering goods bearing this mark is not only offering the best goods that can be manufactured, but the best known goods as well, and, therefore, the Gorham trade mark  assists him in making sales. Every dealer can have this advantage and without cost, as the prices are no higher than asked for goods less well known and often-times of inferior quality.

Large Gem Imports During January.

NOTWITHSTANDING the unusually large gem importations in the last months of 1909, records continue to be broken in the jewel department of the Appraiser Stores at New York. The amount imported during January is greater than the first month of any previous year, and almost double the normal importations.

According to the figures given out by Appraiser Wanamaker, last week, the total value of the precious stones and pearls brought into New York up to Jan. 31 was $4,541,606.69, of which the cut precious stones were valued at $3,262,792.25 and the uncut precious stones at $1,278,814.44. The former were nearly double the amount of the importations of the previous January and over $600,000 more than the highest figures previously recorded, which was in 1907. The rough figures were about $1,000,000 more than in January last year and nearly $200,000 above the previous record figures of January, which was made in 1905.

How well the importations of last month compare with the figures of January since 1902 will be seen from the following table:

Jan.	Cut.	Uncut.	Total.
1910....	$3,262,792.25	$1,278,814.44	$4,541,606.69
1909....	1,686,494.26	272,469.02	1,958,963.28
1908....	207,230.25	106,226.32	313,456.57
1907....	2,650,393.00	935,707.00	3,586,100.00
1906....	2,023,269.87	683,727.27	2,706,997.14
1905....	1,740,174.80	1,091,038.72	2,831,212.80
1904....	803,262.47	498,032.42	1,302,194.89
1903....	1,350,725.51	672,528.88	2,023,254.39
1902....	1,486,176.68	866,521.73	2,352,698.41

Agitation in the Watch Case Trade.

THERE have been few announcements in the watch trade that have caused more discussion and agitation among manufacturers, jobbers and retail jewelers and general comment by the newspapers than the recent announcement of the Keystone Watch Case Co. as to its policy with jobbers, which was published in full in THE JEWELERS' CIRCULAR-WEEKLY last week. This in its essence is to the effect that the company hereafter will seek to confine the various lines of watch cases and movements which it controls within the hands of certain jobbers, who, among other things, will agree to handle no watch cases made by other manufacturers. In this connection the words "watch cases" are generally inferred to mean filled watch cases, though the announcement does not say so.

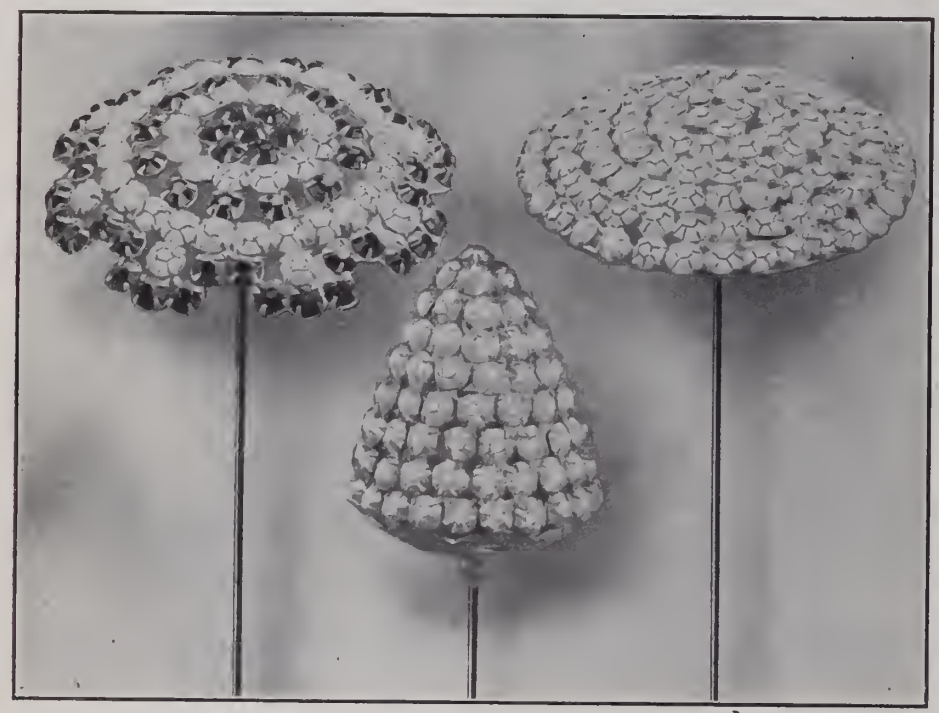
While many jobbers have acquiesced in and agreed to the Keystone company's proposition, a number of others are strenuously opposing it as clearly un-American in principle and against the spirit of the times. Already it looks as if considerable litigation will result in the announcement of the policy, one action against the Keystone company having already been commenced at Cincinnati under the Sherman Anti-Trust Law, while it is reported that another case is threatened by a Boston jobbing house. The newspapers have already begun to give publicity to the situation, publishing stories more or less accurate.

Unfortunately, there seems to be a tendency among certain of the newspapers and even with some people in the trade to associate the names of two of the largest watch companies with that of the Keystone concern in the latter's announcement of its policy. As those conversant with the situation understood thoroughly, such a supposition is entirely erroneous and absolutely unfounded in fact. The announcement of the Keystone Watch Case Co. applies only to itself, and relates to the various lines of watch cases and movements which it controls, and with this policy no other company has anything to do; the Keystone company is acting for itself alone, without any understanding or working agreement with any other manufacturers.

The mere fact that the jobbers handling the products of the two watch companies are in no sense identical with those that handle and will handle the Keystone products is sufficient refutation of the rumors for which the accounts in the daily papers have been in great part responsible.

Advertising should not be regarded as an expense but as a business investment. Rightly done, it will produce good results.

A Suggestion to Exporters.



THE various ways in which the consular service of the United States gives assistance to the business interests of American manufacturers have frequently been set forth, but the manner in which exporters may, in turn, render effective aid to consuls is explained by Vice-Consul Paul Knabenshue, of Belfast, who, in writing from that Irish city, says:

"The American producer or dealer is in position to understand thoroughly all the intricate details of his particular kind of business; he knows the general conditions which affect the marketing of the goods which he handles, and he alone knows what his own personal and particular interests require. Consequently when requesting commercial information he should assist the consul by being explicit as to the exact information he may desire. This can best be done by expressing his request in the form of a series of specific questions, such as he would ask were he on the spot himself. In making his investigation the consul would undoubtedly obtain additional information of value relative to the foreign methods, conditions, etc., in vogue in his district.

"To cite a case in point: A letter was received at this consulate from an American manufacturer of cattle food products requesting the names of dealers in cattle foods and information as to the market here for same. The subject was thoroughly investigated and an exhaustive report forwarded. In answer to this report he acknowledged that it contained considerable information of value to him, but certain additional details were requested, such as his own personal interests required. This second request was put in the form of about 15 specific questions, and the information was obtained without difficulty. If all re-

quests were made in the form of a series of specific questions pertinent to the detailed information desired, such procedure would undoubtedly prove of great assistance to consuls and result in more practical information being given to exporters."

As the Government, through the Consular Bureau, is doing its utmost to help the manufacturing interests of the country, the least the latter can do is to co-operate by acting as this consul suggests.

Lancaster, Pa.

Lester Parke has gone to Charleston, S. C., for a few weeks.

Henry R. Compass, Cleveland, stopped over here a few days last week, en route to New York on a business trip.

John Reitschey, with T. Wilson Dubbs, is so seriously ill that for several days recently he was not expected to live.

Marshall Fuller, St. Louis, a one-time resident of Lancaster, has been spending a week in Lancaster with his wife's relatives.

E. Seiple, formerly watchmaker for G W. Cameron & Co., Poplar Bluffs, Mo., has taken a position with Furtwangler & Rhea, Greensburg, Pa.

Walter D. Bussy, Denver, Colo., who went to that city 10 years ago for his health, found it, and remained there, is visiting his old home here. His bride of a few weeks accompanies him.

Lawrence Bryson, late of the firm of Manson & Bryson, New York, who has taken a position with the Flory-Royall Co., Newport News, Va., has been spending a couple of weeks with friends in Lancaster.

Among those who came to Lancaster, Feb. 1, on the excursion of the Merchants and Manufacturers' Association of Philadelphia, making a three days' tour of eastern Pennsylvania, was R. L. Coates, of L. P. White.

Alonzo J. Newbery, Detroit, spent several days last week on business in Lancaster and Marietta, going from here to New York, from which city he sailed for England, his old home, where he will remain several months. It is his first visit to York, his birthplace, in 20 years.

Mr. Zeltmacher, with J. B. Bowden & Co., made his initial trip to this place last week and Frank G. Mildeberger made his first trip here as the representative of Robert S. Gatter & Co., though he had previously visited Lancaster.

Joshua Bartlett, in business for years in Hartford, Conn., has taken a position with S. Kurtz Zook as general manager. Following the example of the jewelers of the large cities, Mr. Zook has put his handsome store in holiday trim for the valentine season, and his window displays attract much attention.

The following have just enrolled as students at the Ezra F. Bowman Technical School: W. E. Jenness, Punxsutawney, Pa., in engraving; James A. McKinley, Clintonville, Pa., in watchmaking and engraving; Guy F. and Charles Stover, Shrewsbury, Pa., in engraving and watchmaking; Arthur B. Thomas, Frostburg, Md., in engraving; Daniel K. Shockey, Waynesboro, Pa., in watchmaking; Clarence E. Shoemaker, Bedford Springs, Pa., in engraving.

New York Notes.

E. S. Rose, of S. Rose, 47 Maiden Lane, sailed, yesterday, for Amsterdam and London.

The firm of Whitelaw & Zagon, 243 Grand St., has been succeeded by Whitelaw Bros. & Zagon.

Sam Ader has just started in business as watchmaker and jeweler at 851 Prospect Ave., the Bronx.

Herbert Mason, of the Mason, Howard Co., 180 Broadway, is spending a few days at the Attleboro factory.

Samuel and Louis A. Jaskow, of Bodenheimer & Jaskow, returned from Europe, last week, on the *Amerika*.

H. Schwartz, Chicago, sailed from this city, Saturday, for Europe on the *President Grant* to visit the diamond markets.

Fred Levy will represent Korones Bros., 46 Maiden Lane, in Pennsylvania, Maryland, Delaware and New Jersey during this year

Among the new members who have recently joined the Merchants' Association are Freudenheim Bros. & Levy and Jonas Koch.

Edward Berger, who has been conducting the Elite Diamond Antique and Jewelry Shop, at 1341 Broadway, has sold out at auction.

William Gow, traveler for the Geo. N. Steere Co., Pawtuxet, R. I., has been spending a few days in town, renewing old friendships.

W. P. Hitchcock, Syracuse, N. Y., visited this city a short time, last week. On Thursday evening he started for a short vacation in the south.

The local branch of the Wholesale Jewelers' Association held a meeting yesterday for the discussion of matters of interest to the organization.

Jac. E. Judels, of Henri E. & Jos. E. Judels, 37 Maiden Lane, is on a business trip for the concern, visiting Pittsburg, Columbus and Cincinnati.

C. N. Gray, who has been in charge of the collection department of the Jewelers Board of Trade, has been appointed secretary pro tem of the Board.

Irene Stall, of Brooklyn, and John T. McCarthy, of Richmond Hill, are among the directors of the Antwerp Jewelry Mfg. Co., organized with a capital of $10,000.

Mrs. Cora L. Magnus, diamond broker at 37 Nassau St., has been appointed a school inspector by Borough President McAneny for the 18th district for a term of five years.

Mrs. Ira Burrows, wife of the head of the H. F Barrows Co., was one of the matronesses at a benefit of the Stony Wold Sanitarium given last week at the Globe Theater

Mr. Bayer, of the Bayer & Pretzfelder Co., 5 E. 17th St., starts, this week, south on a trip for the concern, and Mr. Pretzfelder, of the same concern, on a trip to the Pacific Coast.

S. Pian, St. Louis, Mo., returned to this city, Friday, on the *Mauretania*. While abroad he visited diamond markets of Antwerp and Amsterdam, where his principal purchases were made.

E. M. Gattle, of E. M. Gattle & Co., 420 Fifth Ave., was on the committee of the second panel of the sheriff's jury which celebrated its annual dinner at the Hotel Knickerbocker, Thursday evening.

Max Bauman, of M. Bauman & Co., 87 Nassau St., was married, recently, in San Francisco, Cal., to Miss Helen Seligsohn, of that city. The wedding was attended by Arthur and Herbert Reichman, of Reichman Bros

Samuel Lepkowsky, importer and jobber in diamonds and precious stones, 74 Stanton St., will return, Feb. 15, on the *Lapland*, after a five weeks' purchasing trip to the diamond markets of Antwerp and Amsterdam.

The assets of P. Eisenstein & Co., formerly in business at 51 Maiden Lane, against whom bankruptcy proceedings were instituted some time ago, were sold, last week, at public auction. The goods consisted of unset stones, machinery, fixtures, etc.

Reports that appeared in the daily papers last week stated that Joseph Fahys & Co. were considering moving the watch case factory at Sag Harbor, L. I., to Lancaster, Pa. This statement was denied by a representative of the concern last week.

A fireproof store and office building is to be erected at the southwest corner of Fifth Ave. and 48th St., for the use of Black, Starr & Frost, jewelers at 438 Fifth Ave. No building contract has as yet been issued. A firm of architects have been commissioned to prepare plans for the building.

According to Mr. Arnold, of Frank, Lequin & Arnold, attorneys at 320 Broadway, no offer of settlement has as yet been made by Lyon Bros., the Chicago firm which went into bankruptcy a short time ago. It was said that negotiations are under way and it is hoped that a settlement will be reached in a short time.

Charles H. Dorflinger, of C. Dorflinger & Sons, manufacturers of cut glass, 36 Murray St., returned, last week, from Germany, where he found a market for cut glass. Two years ago Germany was considered a poor market for cut glass, but conditions have so changed that they now demand the richest qualities of the ware turned out.

A second cabin passenger by the North German Lloyd liner *Koenig Albert*, from the Mediterranean, last week paid duty on goods of foreign origin that he brought with him in his trunk, but argued about the amount of the duty with an appraiser and an inspector. He protested overmuch and was searched. Eleven eight-day watches were found and seized.

The city no longer has an official clock winder. He was dispensed with last week by Borough President McAneny. For years the city has contracted for the winding of clocks in public buildings and the contractor got $650 a year, but the borough president has refused to renew the contract and sent notices to the janitors that they must wind their own clocks.

Chas. W. Schumann's Sons have leased the property at 716 Fifth Ave., together with 2 W. 56th St., forming an L around the southwest corner of Fifth Ave. and 56th St. The lease is for a term of 21 years. The jewelry firm has been at 937 Broadway for the past 18 years. The Schumanns will raze the building on Fifth Ave. and replace it with a two-story building for their own occupancy. The store and basement of the 56th St. house will be connected with the new buildings. The upper floors will be used for apartments.

Among the out-of-town visitors in this city, last week, were: Herbert Richards, buyer for E. V. Roddin & Co., Chicago; E. L. Brent, Altoona, Pa.; S. L. Kent, of B. & H. B. Kent, Toronto, Can.; S. Alexander, American Jewelry Co., Minneapolis; A. W. Lansing, of W. B. McLean, Troy, N. Y.; A. R. Shaw, Columbus, O.; Aug. Loch, Pittsburg, Pa.; Mr. Bitterman, of Bitterman Bros., Evansville, Ind.; J. S. Wheeler, of Wheeler & Son, Salem, N. J.; Frank Huber, of Huber Bros., Dillon, Mont.; Chas. Wendell, of Jules Wendell & Son, Oswego, N. Y.

On the complaint of David J. Larkin, a private detective employed by the Whiting Mfg. Co., 17 Maiden Lane, three women and two men were arrested last week in connection with an alleged robbery of silverware valued at $250. The robberies are alleged to have occurred between Dec. 20 last and Jan. 10. John F. Smith, 20 years old, of 20 Gansevoort St., was charged with the theft of the silver. Mrs. Helen McMahon, Wm. McMahon and Miss Mary Wells were charged with receiving stolen property. Smith was arrested, the detective says, while he was coming from a pawnshop in Seventh Ave., where he had disposed of one dozen silver forks, and when the detective went to Smith's rooms and searched them several pieces of silverware, consisting of knives, spoons and forks were found.

George A. Baker, who was until last September a hotel clerk in Havana, and who placed an order with the Gorham Co., silversmiths, for goods valued at about $65,000 for that hotel last September, was arrested at the Red Star Line pier a few minutes before the *Finland* sailed, Feb. 1. Baker, or Becker, as he now says his name is, came to New York last September and registered at the Hotel St. Regis, where he was regarded as a Cuban representing large interests in that country. He announced that he had commission with the Havana hotel proprietors to buy certain supplies for the Hotel Savilla, and was furnished with the best information concerning the business houses for his purpose in the city. He placed an order with the Gorham Co., silversmiths, for goods valued at about $65,000 for this hotel. The goods, however, were not sent. He did, nevertheless, secure a number of articles of no great value, for which he paid with his own personal check. Before leaving the St. Regis he paid up his bill by check, saying that he had to go to Atlantic City for the week. In the meantime inquiries had been made of the Havana bankers upon whom the check was drawn, and it was learned that they held no funds to Baker's credit. The hotel proprietors also cabled that he was no longer in their employ and had no authority to represent them. David J. Larkin, a detective in the employ of the Gorham Co., learned that the man's baggage had been taken to the North German Lloyd Line docks, but before he reached there the *Kronprinzessin Cecilie* had sailed for Europe. Cable messages were sent to the police of European

(*Continued from page 77.*)

orts, but the man escaped identification n the other side. He remained in Europe or some time, but returned to the United tates, it is thought, through Montreal, and as next heard of in Allentown, Pa. Since hat time he has traveled considerably, but as always managed to keep ahead of the olice. He was sent by Inspector McCafferty to the Yorkville Police Court, where e was held for examination.

M Goodfriend, of Goodfriend Bros., ailed, recently, for Europe on the *Kronrinz Wilhelm*.

Michael M. Goldberg, 11 Maiden Lane, ailed yesterday on the *Kaiser Wilhelm der rosse* for Europe.

Frank Jeanne, of Wm. S. Hedges & Co., ailed for Europe on the *Kaiser Wilhelm er Grosse* yesterday.

The Chopard Frères Co. has moved from 3 Maiden Lane to the Mohawk building, ifth Ave and 21st St.

The American Swiss Watch Co. is about o move from 1 Maiden Lane to the Everett uilding, 15 E. 17th St.

Wm J McQuillin, vice-president of Mount & Woodhull, returned from Europe, is week, on the *Lauren tic*.

The engagement is announced of Jos. Leudan, of A. R Katz & Leudan Co., 87 Nassau St., to Miss Evelyn Schiff, of this ity.

Philip M. Mintz, formerly with Albert Lorsch & Co., 37 Maiden Lane, is now with Guntzberger & Son, 11 John St., as a alesman, in New York and Newark

Leo. Ritter, the son of Leopold Ritter, he Hoboken jeweler, dropped dead Saturlay as he was about to enter a train at the Hoboken terminal of the Hudson tunnel.

Among the Brooklyn business men who re interested in the organization of a Bedford Business Men's Association or Board of Trade is J. A. Piccard, a jeweler of 1233 Fulton St. A meeting was held last night.

H. Henri Sinquese, a manufacturer of high grade platinum mountings, has moved from 104 Fulton St. to 108 Fulton St., where he has rooms on the 10th floor which afford him better light and more space for carrying on his business.

Henry Silberfeld, 1395 Broadway, sails today on the *Mauretania* with his wife for Europe. He will visit London, Paris, Antwerp and Amsterdam, and while abroad will attend the wedding of his brother, Ernest Silberfeld, to Miss Caroline Halporn, n Antwerp on Feb. 24. He expects to return in about five weeks.

The police of the Liberty Ave. station, East New York, say that Irving Friedman, 11 years of age, under arrest for stealing a watch from a flat in the building in which he lives, was the youngest housebreaker ever brought to the station. The lad admitted stealing the watch, and said that he had sold it to Henry Knickman, a jeweler, of 159 Alabama Ave., East New York. The jeweler was arrested on a charge of receiving stolen property. He denies that he knew the watch had been stolen.

J. Edward Boeck, soldier of fortune, and at present a convict serving six years at Sing Sing for a $200,000 jewelry swindle, was given considerable publicity, last week, by the daily papers when it was announced that Boeck hopes to secure a pardon from Governor Hughes by acting as a decoy to trap the wardens of the prison into taking bribes It has been learned, according to the papers, that Boeck has succeeded in having a number of good behavior marks placed on his record since he started out to trap the keepers. The allegations are made that Boeck enjoys more freedom than any of the other prisoners, but Warden Frost denies that he has any more privileges than any other prisoner.

Because of the fact that in the past certain glass cutters have been putting on the market figured blanks without finishing them properly, two of the largest manufacturers are now selling their product under a contract which requires that the cutters in the future finish the blanks in better style. It is said that in the past some of the cutters have been selling glass with little work on it, and this has hurt the sale of fine cut glass. The figured blanks are sold by the manufacturers to the cutters, who cut and polish them ready for use. The step taken by the manufacturers of figured blanks means that if the contracts are lived up to in the future the public will be offered only cut glass which has been properly finished.

Michael Kelly went into the jewelry store of Isidor Lande at 941 Third Ave. last Thursday and asked to see some watches. The jeweler placed a tray on the counter for Kelly's inspection. The visitor pointed to a watch, and as the jeweler was about to remove the tray, Kelly made a grab with both hands. He got a gold watch and watch case, and was making for the door when Lande ordered him to stop, saying he would shoot. Kelly turned about and saw that the jeweler was pointing a revolver at him. He stopped in his flight, and Lande sent one of his clerks for a policeman. Patrolman Croaton found Kelly looking into the revolver barrel. The watch and case were lying on the floor. When Kelly was placed in the "lineup" at Police Headquarters, Lieut. Dunn picked him out as a man who had been twice convicted of petty larceny, under the names of Michael Gannon and Michael Gilgannon.

Schedules in bankruptcy of Lazar Peisachow, formerly in business at 1872 Third Ave., show liabilities of $13,777 and assets of $2,854. Among the creditors whose claims are unsecured are: A. Luria & Son, $175; Henry Shade, $147; Rosenzweig Bros., $108; Manhattan Jewelry Co., $400; Laubheim Bros., $432; H. J. Meyers, $207; Henry Lederer & Bro., $145; Diamond Point Pen Co., $111; A. Suderow, $311; J. H. Myles, $297; M. Balatin, $443; Nathan Blume, $794; S. Brand, $150; Henry D. Clark & Son, $110; Chas. Schleigh, $137; H. & J. Edelstein, $121; Metropolitan Jewelry Co., $350; Joe Lallow, $2,000; Reitt & Shapiro, $350; M. Trutzky, $295; Simon Spiro, $600; Max Blitz, $350; J. Stein, $225; Louis Peisachow, $400; Elias Peisachow, $150; Jack Diamond, $200; Joe Meliken, $300.

Recent Decisions by General Appraisers on Gems, Jewelry and Kindred Lines.

The Board of United States General Appraisers, New York, last week handed down a number of rulings on matters of interest to the jewelry trade.

The protests of Albert Lorsch & Co. on pieces of onyx and jasper intended for use as settings for jewelry, on pieces of imitation gold stone not decorated and less than one inch in two dimensions, and on pieces of agate suitable for use as scale bearings and for fishing-rod guides, were included in the protests decided upon. The onyx, jasper and agate were assessed with a duty of 50 per cent. under Par. 115, Act of 1897, and the imitation gold stone at 45 per cent. under Par. 112, of the same act.

In regard to the first and second contention the Board sustained the contention of the importers that the goods are, in the first instance, dutiable at 10 per cent. under Par. 435 and the latter at 20 per cent. under the same paragraph, to which extent only the decision of the collector is reversed.

In the protest of Veit, Son & Co., *et al.*, New York, these cases were submitted on the official samples based upon which the Board found, first, that the merchandise under protest, marked "A" on the invoices for identification, consisted of imitation pearl hat-pin tops and imitation pearl beads strung, all of which are composed in chief value of wax; second, imitation pearl beads strung, chief value of glass, ornaments, trimmings and other articles composed in chief articles of beads and spangles and articles commercially called jewelry. The Board sustained the claim in the protest that the merchandise in the first finding is dutiable at 25 per cent. ad valorem under Par. 448, Tariff Act of 1897. The collector's decision in assessing duty at 60 per cent. ad valorem under Par. 438 or 434 of the same act on the goods covered by the second finding and in all other respects, as handed down, is affirmed.

Another protest which was settled last week was that of the American Bead Co. against the assessment of duty on necklace snaps set with imitation stones. The Board found them to be jewelry or parts of jewelry and the collector's decision of the duty at 60 per cent. was affirmed by the Board.

The protest of Henry Zimmern & Co., New York, on the duty imposed on back combs mounted with gold-plated metal and on nickel-plated watch chains has been overruled by the Board and the collector's decision of a duty of 60 per cent. affirmed.

The protest of E. Cuomo, *et al.*, New York, on pieces of coral cut in various forms suitable for use as settings in jewelry, was decided by the Board in favor of the importers. The protest claimed the goods were dutiable at 10 per cent. ad valorem under Par. 435, the collector's decision in assessing the duty at 50 per cent. ad valorem under Par. 115 being reversed.

The branch store of Oscar Holmes, Rush City, Minn., has been purchased by the Whitney Jewelry Co. This is a new firm composed of E. F. Whitney, who formerly managed the Rush City store for Mr. Holmes, and Theodore E. Lindstrom, a real estate dealer.

C. I. Bierdeman, for many years associated with his father, C. O. Bierdeman, retail jewelry, Oneonta, has decided to open a store at Richmondville, N. Y. He is buying stock.

Steck Bros., Washington, Ia., have purchased a jewelry store at Owosso, Mich., which will be under the personal management of John H. Steck, who has left for that place.

H. Roebuck & Son, New Bedford, Mass., will discontinue their store at the North End and consolidate the two establishments at their Purchase St. store.

Mrs. Ida E. East, who has been conducting the jewelry store at 657 Penn St., Reading, Pa., will close out the business in April next. The store at this location has been conducted by the East family for 13 years.

The Fred Frick Clock Co., Chicago, has the contract to install 45 clocks in the Washington and Jefferson school buildings, at Hibbing, Minn. They will be operated by a central electrical system, located in the Washington building.

The jewelry store conducted for many years by Quintard Bros., Poughkeepsie, N. Y., will be closed out and the stock and real estate sold as soon as possible to close the estates of the two Quintard brothers, who died recently within a few days of each other.

Ernest Anke, aged 81 years, a jewelry peddler who often traveled in company with Leopold Ermann, the Philadelphia jeweler who was murdered by George Schaffer near Allentown, Pa., died at the County Home, in Lehigh County, Pa., last week. His body was interred at Macungie, Pa.

E. A. Whipple & Sons, Springfield, Mass., have just opened their new store at 126 State St., the location being the same one in which the business was started by E. A. Whipple, 65 years ago. There will be no formal opening of the establishment until April 1, as the concern will be unable to secure the permanent fixtures before that time.

E. H. McKee & Co., Oconomowoc, Wis., have enlarged their jewelry store by the acquisition of adjoining quarters, formerly occupied by A. A. McKee, who was engaged in the ladies' furnishings business. The new quarters are being equipped with new show cases and fixtures.

Benjamin Jeweler Rice, Tulsa, Okla., is one jeweler who writes his business in the middle of his name instead of after it. When Benjamin's parents named him they did not think he needed a middle name. When he grew up and went into the jewelry business he concluded that the brevity of his name was not commensurate with the dignity of his business status. So he gave himself a middle name, and is widely known in the trade as Benjamin Jeweler Rice.

A. G. Bedford, Ionia, Mich., has leased the corner building at 2d St., opposite the Grand Trunk station, for a long term of years. He is putting up a new front and generally improving the property, and his store will be one of the finest there. The Bedford jewelry store has been one of the landmarks of Ionia since its establishment in 1867 by Allison & Bedford, the latter being the father of the present proprietor, who succeeded in 1895. Mr. Bedford expects to be in his new store some time in April.

T. Frank Bailey, who is proprietor of a general store in Newtown Sq., West Chester, Pa., had an exciting experience with a would-be burglar in his place of business very early one morning last week. Mr. Bailey has been sleeping in his store since the first robbery, last Fall. While sleeping on the night in question he was aroused by a noise. Afraid to move lest the squeak of the couch he was using as a bed might alarm the intruder, Bailey lay still while the man forced open the window. Then as the burglar stepped into the shop Bailey covered him with a revolver and called on him to surrender. Instead of halting or even turning to run, the man sprang forward as if to grapple with Bailey. The latter, who is a small man, promptly opened fire. The first shot went through the fleshy part of the man's right arm. Then calling in John Piersoll, a neighbor, the two kept guard over the man until he was taken before Squire Dutton and bound over for court. The prisoner gave his name as John Broughton, but he is also known as John Brock. He originally came from Philadelphia, but has been working as a farm hand.

With a great crash an immense section of the west wall of the building occupied by the A. F. Smith Co., 1513 Harney St., Omaha, Nebr., fell at five o'clock Friday afternoon, owing to the pressure of the cement being forced down a caisson of the City National Bank building. The damage has not been estimated, but will probably be about $2,000. As additional support for the bank's new skyscraper, now being constructed, hollow pillars have been thrust far into the earth, directly alongside the Smith building. These pillars have but three sides, the brick wall of the Smith building forming the fourth side. The cement which was poured into one of these caissons Friday afternoon, however, proved too heavy for the brick wall of the Smith building, and it broke through. A. F. Smith, proprietor, and Mr. Brunner, manager, together with several employes of the firm, were in the rear of the store when the accident occurred, or no doubt they would have been killed. The brick wall, together with large quantities of the cement and mortar were thrown clear across the room, crushing several display tables, which fortunately had no goods on them. The big safes in which the company's stock is kept were open at the time, and the force of the collapse filled them full of mortar, requiring the aid of an expert to repair them so that they could be locked. The workmen who were pouring the cement into the caisson could not understand for some time why the hole could not be filled up, until Mr. Smith dashed into the street and called to them, since every deposit they made was falling directly into his store. The foreman of the bank's gang of workmen immediately put a large force at work to bolster up the shattered wall and sweep out the jewelry store, which took until midnight. The Smith Co. has been asked to turn in its bill for damages in full for payment.

Washington, D. C.

J. L. Narramore, who called on opticians as the representative of the Eastman Kodak Co., has taken over the photographic supply department of the H. D. Feast Optical Co., 1213 F St., N. W.

The Sax Optical Co. has almost completed arrangements to move into its new store at 708 7th St., N. W. This new store will be much more suitable for the business of this company than is the present place at 525 7th St.

By virtue of a deed of trust given him June 6, 1905, Clinton R. Linfoot, Feb. 4, took over the stock and fixtures of B. Turoff, who was located at 14th and R Sts., N. W. It is understood that Mr. Linfoot will offer the goods for sale at a public auction at an early date.

The sale of tickets covering articles pawned by F. Warren Johnson, who recently committed suicide, by his agents, took place on Feb. 2. It is estimated that between $1,500 and $2,000 was realized from the sale, which amount, no doubt, will go to the creditors' fund. The sale of fixtures and unredeemed pledges took place on the 8th inst.

Trans-Atlantic Voyagers.

TO EUROPE.

Henry Silberfeld sails on the *Mauretania* to-day, as does Burton Fox, of Fox Bros. & Co., Cincinnati.

Frank Jeanne, with Wm. S. Hedges & Co., New York, sailed on the *Kaiser Wilhelm der Grosse* yesterday.

A Letter of Appreciation from President Kaiser of the Jewelers' 24-Karat Club.

NEW YORK, Jan. 31, 1910.

Editor, THE JEWELERS' CIRCULAR-WEEKLY:

The Jewelers' 24-Karat Club of New York City wishes to congratulate you upon the most excellent account of their banquet, and likewise begs to tender its sincere thanks for the valuable space given by you in your journal in your most elaborate account of the affair.

DAVIS KAISER,
President 24-Karat Club.

We supply our product to a limited number of the best wholesale watch houses in the country. They push the sale of Illinois movements — not because of the superior quality alone — but because of the established selling prices, which insure a satisfactory profit to them as well as to their customers.

Vol. LX. CHICAGO, WEDNESDAY, FEBRUARY 9, 1910. No. 2.

Chicago Notes.

A. Judson, of A. Judson & Co., is making a trip to nearby towns.

Mr. Asp has succeeded Chas. Levy as silverware buyer for A. Pick & Co.

J. V. St. Clair, representative of S. Sternan & Co., left last week for a coast trip.

S. H. Clausin, of S. H. Clausin & Co., Minneapolis, was a recent visitor in Chicago.

Lew H. Moser, salesman for Groffe & Stanek, is now making his territory through Illinois.

Geo. H Thomas, who is making a trip to Kansas City, has decided to go on to Denver.

Ed. Baumgartner, traveler for M. F. Barger & Co., has just returned from a northwest trip.

Reuben W. Cohen, representing Geo. H. Cahoone & Co., starts on a middle west trip this week.

Harry Beach, formerly with Otto Young & Co., is now calling on the city trade for Geo. Thomas.

A. Abrams, representative of the Val Bergen Cut Glass Co., visited the trade here last week.

A. Wachter, of the Wachter Mfg. Co., Hartford, Conn., was a recent visitor to Chicago and Elgin.

T. Morris, Crookston, Minn., was a visitor to this city recently in attendance at the Masonic Grand Lodge.

Geo. C. Mendell, traveler for Leary & Penfold, is making a trip to St. Paul and other northwest points.

G. A. Stockder, buyer for the Seller & Co. stores, at Portland and Seattle, was a recent visitor in Chicago.

J. S. Kennedy, traveling for Roseville Pottery Co., Zanesville, O., recently visited friends in the trade here.

C. L. Rost, Indianapolis, was in Chicago recently, looking at new fixtures. He was accompanied by Mrs. Rost.

Miss Bessie Neve, head saleslady for Fred. Brodegaard & Co., Omaha, Neb., is visiting relatives in Chicago.

J. A. Hardy, of the Towle Mfg. Co., Newburyport, is visiting the Chicago office and assisting in the annual inventory.

L. Hertz, traveler for the Chicago office of the Alvin Mfg. Co., leaves this week for his territory in Illinois and Kentucky.

Hugh E. King, representative of the Queen City Silver Co., and Fessenden Co., is now on a two months' trip to the Pacific Coast.

Chas. J. Jacobs, secretary of the Knickerbocker Silver Co., has just returned from a month's trip to the factory and eastern points.

Geo. C. Gubbins and L. A. Eppenstein, with the Illinois Watch Case Co., returns this week from a trip to Cleveland and Cincinnati.

Wm. G. Grimes, representative of the Omega Watch Co., in Chicago, and now located at room 501, Heyworth building, is on a Michigan trip.

"Tom" Stanek, of Graffe & Stanek, is making a visit to Texas, in company of a few other Chicagoans, who are all interested in land holdings there.

T. S. Braude, representative here of the Keller Jewelry Mfg. Co., is making a trip to Milwaukee, Minn., and nearby points, returning to Chicago this week.

D. L. Shutts, president of Shutts, Dewey & Sterling Co., Kalamazoo, Mich., recently visted the Chicago office, which is under the management of W. S. Redfield.

The taking of inventory on the Lapp & Flershen stock is proceeding and tentative offers of settlement are suggested, though without much chance of acceptance.

Heinz Bros., cut glass manufacturers, represented in Chicago by G. R. Spinney and F. F. O'Neill, have removed to larger quarters in room 511, Heyworth building.

Walter H. Thompson, is now representing the Michigan Cut Glass Co., Lansing, Mich. Mr. Thompson formerly represented the Rockford Silver Plate Co., who are thinking of withdrawing their line here.

G. A. Jewett, Chicago manager for Hamilton & Hamilton, Jr., leaves this week for a Kansas City and St. Louis trip. A. V. Hammerberg, of the same office, leaves this week for a Wisconsin trip and adds Kansas, Nebraska and Missouri to his territory this season.

In the matter of S. Fuerstein, in bankruptcy, while the schedules have not yet been filed, it is estimated that the liabilities will aggregate $8,000. A sale of stock will take place Feb. 10. The best offer that has been made thus far is $400 for the stock, which is probably very low. The fixtures cost in the neighborhood of $2,000.

In the matter of G. Frangiamore, who was recently sentenced in New Orleans to 14 years in the penitentiary, his representative here is being prevailed upon to have Frangiamore make a confession in bankruptcy to save the cost of court proceedings. The stock has been placed in a storage warehouse to conserve the estate all possible. It is estimated to be worth about $600, while his liabilities are said to be nearly $3,000

Minneapolis.

John Crandall has succeeded Albert Hoover as watchmaker for Rentz Bros.

E. Reiner, formerly foreman for S. Jacobs & Co., 524 Nicollet Ave., has left the employ of that firm.

W. A. Lawhead, secretary of the firm of J. B. Hudson & Son, has returned from a visit to French Lick Springs, Ind.

S. H. Clausin, of S. H. Clausin & Co., has left on a months' trip. He will visit Chicago, Cincinnati, St. Louis and the South.

Cohen Bros., 412 Nicollet Ave., are enlarging their watch repairing department, preparatory to adding another watchmaker to their force.

Kirchner & Renich, 17 S. 7th St., have increased their equipment since moving into their new quarters, adding a power roll and a large screw press.

Several traveling representatives visited the trade in the Twin Cities during the past week. Included in the number were: B. S. Cohen, Michigan Optical Co.; Mr. Stevens, Bay State Optical Co.; S. J. Summer, Providence Mfg. Co.; G. W. Cureton, Newall Mfg. Co.; E. J. Hiller, Sussfeld, Lorsch & Co.; L. J. Finch, R. F. Simmons Co.

The prize for which participants in the Northwestern Ski tournament contested in a brilliant meet held here recently, was donated by T. V. Thomsen, jeweler, 275 Cedar Ave. It consisted of a silver loving cup two feet high, mounted on an ebony base. The cup was artistically carved and when on exhibition in the window of Mr. Thomsen's store attracted much attention.

The following jewelers visited Minneapolis during the past week: Martin Swedlund, Swedlund Bros., Williston, N. Dak.; A. G. Scherf, Red Wing, Minn.; E. A. Moe, Oaks, N. Dak.; H. L. Waldron, Staples, Minn.; J. E. Kipp, Edgeley, N. Dak.; M. O. Loken, Petersburg, N. Dak.; Thomas Morris, Crookston, Minn.; A. W. Scharping, Arlington, Minn.; C. L. Burnett, Brainerd, Minn.; Frank Walters, Duluth.

Cincinnati.

L. Thoma, Piqua, O., was here, the past week, attending the grand opera.

C. M. Fogg, of the Keystone Watch Case Co., was here, last week, on a business trip.

E. B. Jacobs, of the D. Jacobs Sons' Co., has started on a business trip among the Ohio trade.

William H. Fink, 1424 Main St., left, last week, on a month's pleasure trip south, including Florida and Cuba.

Burton Fox, of Fox Bros. & Co., sailed, Feb 9, on the *Mauretania* for Europe, where he will remain about two months on business.

Adolph Weibel, 1730 Vine St., last week, was bitten by a small dog which proved to have the rabies. It has since been shot and Mr. Weibel is taking a course of treatment at a Cincinnati hospital. He is reported as doing well.

Richard Donahue, an aged diamond cutter, is in the Cincinnati hospital in a critical condition. He fell, one evening last week, from a street car while returning to his home on Price Hill, and was badly injured about the head.

J. H. Henkes, of the Henkes-Baker Jewelry Co.; J. C. Wagner, Vincennes, Ind.; Fred Howard, manager of F. M. Whiting & Co., and a large number of traveling salesmen were here attending the funeral of James Baker, of the Henkes-Baker Jewelry Co., and also of F. M. Whiting & Co.

Out-of-town jewelers here the past week, buying stock, included: O. E. McWaters, Danville, Ky.; C. W. Hammond, Vanceburg, Ky.; J. W. Campbell, Bowling Green, Ky.; O. C. Tyson, Carrollton, Ky.; N. E. Sapp, Dayton, O.; George Greyer, Anderson, Ind.; J. Krohme, Clarksburg, W. Va.; H. A. Rohs, Cynthiana, Ky., and W. L. Fredeking, Hinton, W. Va.

Traveling representatives who called on the Cincinnati trade during the past week included: D. Zimmern, Zimmern, Rees & Co.; Mr. Sherrill, Sinnock & Sherrill; S. Cohen, Michigan Optical Co.; E. E. Kahn, Adams & Kahn; Will Alger, North American Watch Case Co.; Mr. Weidig, Joseph Fahys & Co.; R. L. Seeley, La Pierre Mfg. Co.; G. Glenn Steel, Rogers, Lunt & Bowden Co.; William J. Anton, Durand & Co.; J. P. Fagan, Unger Bros.; E. H. Eckfeldt, Eckfeldt & Ackley; Harry Goodison, E. G. Webster & Son; H. D. Cretcher, Hayden W. Wheeler & Co.; Louis Berger, Ehrlich & Sinnock; W. B. Eliot, Meriden Cut Glass Co.; F. A. Perry, John Russell Cutlery Co.; H. H. Meyer, William B. Kerr Co.

C. C. Testerman, Matewan, W. Va., was brought here, last week, by detectives to answer a charge of theft of $3,900, preferred by Lindenberg, Strauss & Co. A midnight call was made at the office of the Governor of West Virginia to obtain the requisition papers that permitted the removal of the prisoner. He was up for trial Feb. 1, but as the prosecution announced itself not ready to proceed he was placed in the jail, as he could not furnish $5,000 bond. Testerman is accused by Lindenberg, Strauss & Co., it is alleged, of having gotten $3,900 worth of diamonds on memorandum, disposing of them, but not paying for them. Testerman claims he was held up by three masked men and robbed of the jewelry and $3,000 in cash. He claims he can identify the robbers.

It is expected that during the coming week there will be an order given in reference to the claims of the Duhme Jewelry Co. creditors. These creditors have lately asked to have their claims settled from the proceeds of the receiver's sale of the Duhme Jewelry Co. stock, thus claiming priority. This arrangement is wanted for the reason that the creditors of the Keck company are alleged to be insisting that the Duhme funds shall be made part of the Keck company's assets and that the Duhme creditors shall be treated as general creditors of the Keck concern without any rights to prior payment. The claims of the Duhme creditors amount to about $25,000, and the assets are sufficient to cover these claims, should they not be mixed with the Keck creditors. However, Judge Sater refused to allow an intervening petition on behalf of these creditors. The judge says that the late Judge Thompson had about closed this bankruptcy case, and as Receiver Carroll was an officer appointed by the judge he could see nothing wrong in the receiver having charge of the money. Judge Sater, successor of Judge Thompson, is making a careful study of the case.

An adventurer, playing as the clever representative of a Cincinnati diamond house in Amsterdam and securing $12,500 worth of diamonds from a firm of jewelers there, is better acquainted with Cincinnati's diamond dealers than they are with him. It appears this individual, as yet unknown here, called at an Amsterdam diamond house and represented himself as sent from Fox Bros. & Co., of this place, as they do a great deal of buying in that place and have their agents there. He produced a passbook of the First National Bank of this city and various other papers, all in his name and apparently in good order. As a result he was thought to be trustworthy and received considerable attention. He made a purchase of 84 stones, weighing together 74 carats, and paid for them in two checks, one for $5,000 and the other for $2,500, drawn on a London bank and apparently signed by the Cincinnati firm and himself. The Amsterdam bank, not having been advised beforehand, deferred the cashing of these checks, and wrote to London for information. No reply came when expected and the American was about to return to London. The diamond dealer visited him at his hotel and explained the situation. The stranger said if they distrusted him he would give up the stones. The dealer, fearing his customer would go elsewhere to buy, and thinking that maybe he was all right, let him go. The checks proved to be bogus. Nothing has been heard of the man since. The First National Bank of Cincinnati and also Fox. Bros. & Co. claim they have not been notified as to the occurrence.

H. F. Hart, Webster, S. Dak., has disposed of his jewelry store to A. L. Bloomquist.

The retail jewelry store of R. K. Moore, Taylorsville, N. C., was entered by burglars recently through a window in the rear and about 40 watches and a large number of rings, pins and several pairs of gold spectacles were stolen. There is no clue.

Omaha.

Douglas Melchior is making a western business trip for L. E. Griffith.

Mr. Wilson and son, Hebron, Nebr., have purchased the stock of Eugene A. Elder.

Harry Holmes, with Fred Brodegaard & Co., spent several days of last week at Blair, Nebr., on business.

C. C. McLeese, president of the State Board of Optometry, visited friends in the city during the past week.

Mr. Sorensen, Viborg, S. Dak., expects to move shortly to Kimballton, Ia. He and his wife are planning to spend the Summer abroad.

G. E. Stillwell, Arlington, Nebr., who disappeared mysteriously from that city seven or eight months ago, was recently heard from at Iona, Wash.

Announcement was made in Omaha and New York, last week, of the engagement of Sidney Mandelberg, son of A. Mandelberg, this city, to Miss Evelyn Franck, New York.

A. Urbahns, Minden, Ia.; L. L. Moore, Tekannah, Nebr.; W. L. Smith, Malvern, Ia., and H. C. Madsen, Kimballton, Ia., were in the city, purchasing stock, last week.

The Commercial Club of Lincoln will entertain the State jewelers and opticians at a joint banquet, Wednesday, Feb. 16, at the Lincoln Hotel, Lincoln. This will be followed by a theater party given by J. L. Teeters & Co.

The following traveling representatives visited Omaha, last week: Mr. Kneeland, G. T. Sutterley & Co.; Otto A. Schultz, Oscar Tritsch Co.; P. H. Winterberg, Louis Manheimer & Bros.; Mr. Tinker, William B. Durgin Co.; J. H. Donnelly, Sproehnle & Co.; Max Huss, S. Borgzinner Co.; S. J. Sumner, Providence Mfg. Co.; Alex. M. Thanhauser, Wolfsheim & Sachs; J. W. Parks, Parks Bros. & Rogers; H. G. Schramm, Stein & Ellbogen Co.; Mr. Fleming, Alvin Mfg. Co.; Albert E. Levy, Marchand Frères; Mr. Rogers, C. H. Cooke Co.; Mr. Levy, Fox Mfg. Co.; B. S. Vhen, Michigan Optical Co.; J. Mills Dillaway, Barbour Silver Co.; Chas. E. Howes, E. L. Logee & Co.; Lawrence C. May, Moskowitz Bros.; D. N. Weil, Electric City Box Co.; S. C. Powell, S. C. Powell & Co.; Norman L. Strauss, Strauss & Strauss; J. P. Fagan, Unger Bros.; Geo. D. Lawrence, Reed & Barton; Joseph Rifkin, L. Keller & Son.; J. M. Torbert, Simeon L. & Geo. H. Rogers Co.; Robert J. Kelly, Warner Mfg. Co.; Jno. O. Slemmons, J. B. Bowden & Co.; Frank Thompson, International Silver Co.; G. W. Cureton, Newall Mfg. Co.; Alexander Fraser, Rochester Cut Glass Co.; Bruno Lasche, G. A. Webster; Geo. W. Birnbaum, J. Wodiska; De Lancey Stone, Shafer & Douglas; R. Hirschfield, Tager & Habace; L. H. Green, Manchester-Smith Co.; W. Barker, R. Wallace & Sons Mfg. Co.; N. E. Treat, Gorham Co.; G. W. Wall, American Ring Co.

George L. Van Nort, Scranton, Pa., has rented new quarters in Binghamton, N. Y., where he will soon open a store.

John A. Leith, a jeweler of Bay City, Mich., is the plaintiff in a $20,000 damage suit brought against G. H. Mouthrop, a lumber man, alleging slander.

Los Angeles.

Arthur Van Ness is here visiting the trade.

C. S. Douglas, with Brock & Feagans, is enjoying the luxury of a new automobile.

Fred. Germne, representing R. Wallace & Sons Mfg. Co., has been in this city recently. He reports that he is having a very successful trip.

I. Ackermann, representing Philipp Zelenka & Son, New York, is now here with his wife. Mr. Ackermann is here for pleasure as well as business.

Thos. G. Sanders, formerly of Nashville, Tenn., has recently taken a position as watchmaker with Brandenburg & Graham, in the Broadway Central building.

Mr. Lawton, of the Whitley Jewelry Co., was one of the three official timers at the Marathon races held between this city and Pomence, on Sunday afternoon, Feb. 6.

G. Heitkemper, one of the leading jewelers of Portland, Ore., has been in this city recently. Mr. Heitkemper is traveling through southern California on a pleasure trip.

The Pashgian Oriental Emporium, 544 Broadway, is exhibiting in its window a fine display of Florentine mosaics, which were shown at the Seattle Exposition last summer.

The jewelry department of the Central Department Store, which has been holding a cut-rate sale for some time past, has at last closed out its stock and moved from the premises.

Brigden & Pederson have closed their auction sale and given up the store on Spring St They may hereafter be found on the second floor of the Broadway Central building.

Wm. M. Kinney, formerly located at 607 S. Spring St., moved Feb. 2, to his new store at 615 S. Broadway, part of the premises recently occupied by the Central Department Store.

Ed. Turuer, traveling representative of the F. W. Reynolds Co., is now making one of his regular trips in Arizona. His brother, Arthur, representing the same company, is absent on a short trip in the north.

J. C. Fleming, 531 S. Broadway, recently purchased a new automobile, and a few days ago Mr. and Mrs. Fleming and a party of friends made a trip to Riverside in the new machine. This is the fourth automobile that Mr. Fleming has owned.

Samuel Schepps, who recently came here from New York, has entered into partnership with the Suk Bros., under the title of the Pacific Novelty Co. The company manufactures high-grade material for window displays, jewel boxes, etc. Mr. Schepps will act as traveling representative of the company.

The following traveling representatives have been in this city recently: Hiram New, Sammel Riglander & Co.; M. Sandsfelder, C. F. Briggs & Co.; Al. Bullion, Horton Engel Co. et al.; F. Sheridan, Arnold Keere Co. et al.; L. Wilkins, Ostby & Barton; Geo. H. Remington, Maintien Bros. & Elliott; A. Richmond, Zare White; F. J. Smith, Reed & Barton.

The S. S. Schepps Co., Los Angeles, Cal., is displaying in a window a handsome diamond necklace which they are offering for sale on a plan somewhat novel here. The price of $2,150 was set on the necklace, and it is offered each day for $5 less than the preceding day, this reduction to continue until the piece is sold. The necklace contains 136 comparatively small, blue-white stones. It is attracting considerable attention.

Cleveland.

Albert Dueber and Mr. Lomitz, of the Deuber Watch Case Mfg. Co., passed through here on their way east, after instituting the suit against the watch case companies in Cincinnati, Friday.

Since W. A. Cawood and Essey & Bernstein became tenants the Republic building, on Euclid Ave., gains the distinction of having more jewelry concerns located in it than any other building in the city. The Garfield building comes next with three big retail stores and several smaller concerns.

The following out-of-town jewelers were in Cleveland, last week: Ralph Moore, Cuyahoga Falls; C. F. Gardner, Newton Falls; A. P. Humphreys, Bellefontaine; Andrew Paule, Mansfield; J. L. Miller, Middlefield; W. B. McCullow, Greenwich; W. C. Fisher, Lorain; C. F. Hill, Akron; E. D. Davis, Kent; Geo. A. Clark, Lorain, and F. N. Prevey, Akron, O.

The following is a partial list of the travelers who called on the trade, last week: Sig. Stern, Stern Bros. & Co.; C. M. Fogg, Keystone Watch Case Co.; J. C. Becker, Philadelphia Watch Case Co.; W. S. Wilson, Brainaird-Wilson Corporation; Lew Fleming and John Hall, Jos. Fahys & Co.; J. O. Otis, Harvey & Otis; H. W. Hedges, New York Standard Watch Co.; F. R. Truell, W. H. Saart & Co.; C. W. Edwards, Leach & Miller Co.; Max L. Jacoby, Manchester Mfg. Co.; H. W. Shirrill, Sinnock & Sherrill; Harry Kennion, Parks Bros. & Rogers; J. F. Galloway, Wm. A. Rogers, Ltd.; J. H. Cragin, Oneida Community, Ltd.

Another exclusive wholesale jewelry house commenced operations in Cleveland, this month. The firm is Essey & Bernstein, and is located in the Republic building. The partners will do an exclusive wholesale jobbing business, dealing in moderate-priced jewelry, and will have a corps of salesmen thoroughly cover this and surrounding States. For the present Mr. Essey will cover Pennsylvania, Mr. Bernstein part of Ohio and Michigan, and Mr. Shrier also part of Ohio and West Virginia. Harry Bernstein was formerly with the Jewelry Mfg. Co., of this city, and previous to that with the Arstine Bros. Co. S. Essey came here from Pittsburg, Pa.

Columbus, O.

Solomon Block, formerly a commercial traveler, is now a partner in the wholesale firm of J. Kohl & Co., 46 W. Spring St.

Meyer J. Daniels, a jeweler and pawnbroker at 183 N. High St., made an assignment yesterday under State laws. Jacob Hassell is the assignee.

A supposed thief, prowling around on the roof of the Hofman Jewelry Co., created considerable excitement on High St. last Saturday night during shopping hours. He escaped, supposedly through a hatchway in the roof of some adjoining building.

Indianapolis.

F. L. Bryant has returned from a visit to Pittsburg, Pa.

A business trip to Chicago was made, last week, by E. M. Craft, of the A. P. Craft Co.

Joseph Kernel, of Davis & Kernel, has gone to Colorado for a few weeks because of ill health.

Ralph B. Clark, Anderson, recently addressed the Retail Merchants' Association of Terre Haute.

Jacob C. Sipe has received a diamond weighing 10¾ carats, perfect in color and valued at something more than $3,000

Frank Reber, formerly with the A. P. Craft Co., is now with Max C. Lang, a manufacturing jeweler, in the Claypool building.

Jefferson H. Reed is a candidate for director on Independent Ticket No. 1, of the Commercial Club. The election will be held Feb. 14, and jewelers are backing Mr. Reed's candidacy.

Oren S. Hack, special administrator for the estate of George Rhodius, a millionaire who died recently, has employed J. P. Mullally to appraise the diamonds and jewelry owned by the estate.

A trade watch repair shop has been established at 915 State Life building, by S. Jette Shepard, who has taken quarters with H. O. Cobb, who is doing engraving, enamel cutting and chasing.

H. A. Winn has just completed his semi-annual examination of watches belonging to employes of the New York Central Railroad, making their headquarters in this city. He examined about 700 watches.

J. C. Sipe has just completed a platinum la valliere, the pendant of which is of a heart and bow knot design, set with 26 cut diamonds. The chain is 16 inches long, one ounce of platinum being used in the piece.

Carl L. Rost has returned from a business trip to Chicago, where he purchased new fixtures for the store he will open a few doors north of his present location in N. Illinois St. The fixtures are to be of mahogany.

Among out-of-town jewelers in this city, last week, were: George L. Spahr, Lebanon; H. A. Pauley, Bloomington; John W. Hudson, Fortville; J. F. Harding, Brownsburg; J. A. Pickett, Newcastle; J. F. Kiser, Muncie, and Mr. Cooper, of Cooper & Robbins, Mooresville.

The Indianapolis Automobile Trade Association, of which F. B. Willis, of the Willis-Holcomb Co., is secretary, has appropriated $500 to be used in purchasing silver trophies for the annual automobile show, which will be held here during the week of March 28.

A jewel casket of unusual interest is being displayed by J. H. Reed. It is made of ebony, white holly, red vermillion, black walnut and mahogany, together with several veneers, and contains 5,240 pieces of wood. The casket is lined with green plush, and a local cabinetmaker spent one month in making it.

Knowlton & Rider, Malone, N. Y., have dissolved and the business will be continued by E. W. Knowlton.

Imitation is the Sincerest Flattery

Many have copied my advertisements and booklets and have endeavored to borrow my methods of salesmanship. I have brought the making of Jewelry Auctions to a degree of perfection not heretofore known. A man may put his picture in the paper and pay for the privilege of calling himself a leading man and still be only a footlight instead of a world famed star. Years ago a would-be jewelry auctioneer advertised that he had never made a failure, he told the truth—he had never made a sale. It is equally absurd for a man to call himself a leader, when in five years he has only obtained as many references and all from firms who had failed or gone out of business. I have honest credentials from going concerns in the principal cities, from coast to coast, where I have sold again and again—over 200 references proving as many successful Jewelry Auctions. I will give $10,000 to charity if I cannot prove that I have made more sales, and sales aggregating more in receipts than has any other man engaged in the calling.

SALES MADE DURING THE PAST 4 MONTHS

A. Kurtzeborn & Sons, St. Louis, Mo.

A stock consisting of over $125,000 of the very highest grade diamonds, watches, sterling silver and only 14-kt. gold jewelry. Mr. Kurtzeborn has been in active business in St. Louis for over fifty-two years. The patrons of this sale were the best known families; each session was like a social event; by handling in a refined manner I succeeded in selling out the entire stock. Kindly write this firm as to results.

Benjamin Rice, Tulsa, Okla.

A year ago I made a great sale in this progressive little city for the Pillman Jewelry Co., and in returning repeated my former success.

Switzer Bros., Mt. Clemens, Mich.

Closed out for the above firm the Kent stock, selling every piece of goods in the store, giving the above firm entire satisfaction. Write them.

Kingsbacher Bros., Pittsburgh, Pa.

Have just recently sold for this old established jewelry house, 505 Market street. It was a winner, too.

The M. Scooler & Co's Stock

This stock consisting of 1,647 pieces of the highest grade Diamond-mounted jewelry, Patek, Philippe watches, etc., amounting to more than $100,000, I sold successfully to the trade in four days at 185 Wabash avenue, Chicago—my third sale for this firm.

I am now making the $250,000 Sale of CHAS. U. CRANKSHAW at Atlanta, Ga.

Send for booklet on Auctions

Correspondence Confidential

HERMAN G. BRIGGS

5132 Kimbark Avenue
Chicago, Ill.

Tel., Hyde Park, 4745

Milwaukee.

Charles Kuesel and Harry Pietzner, of the traveling sales force of the Kuesel Bros. Co., are again on the road calling on the trade.

Jacob Van der Zanden, Green Bay, Wis., was a recent visitor. Mr. Van der Zanden will erect a modern residence this Spring, plans having already been prepared.

Milwaukee jewelers have received news that Horace Morse, Kilbourn, Wis., who recently purchased the business of E. E. Sear., Tomahawk, Wis., is now in charge of his newly acquired store.

Louis Vahl, of G. C. Vahl Music Co., has filed a petition in involuntary bankruptcy. The exact amount of his liabilities and assets has not been made public as yet, although the petition states that his debts exceed $1,000

Several out-of-town jewelers were in Milwaukee, Wis., last week, purchasing new stocks in anticipation of a lively Spring trade. Among the number were: C. H. Wales, Tomahawk; Howard Williams, Delavan; Henry Bayer, Whitewater; F. P. Beswick, Racine, and Henry Fischer, Jefferson.

Among the well known Milwaukeeans who assembled for a "groundhog banquet" at the Blatz Hotel, Feb. 2, were two of the leading jewelers of the city, Louis Bunde, of the Bunde & Upmeyer Co., and Richard Seidel. The one qualification for presence at this unique table function was a birthday on Feb. 2 and payment of the plate price.

Residents and jewelers at Superior, Wis., living in the vicinity of the Nelson Dewey School have been meeting with considerable inconvenience of late as the result of the cold weather "freezing up" a large tower clock on the school building. Timepieces in the neighborhood are always set according to the tower clock and during the time that the clock has been out of commission the jewelers have been finding themselves busy giving out the correct time. Efforts are being made to install some system of heating in the tower.

News has been received here of several business changes among the jewelers of the State. Marlow, Schernich & Madel, Clintonville, Wis., have sold their branch store at Tigerton, Wis., to Otto Meyer, a watchmaker who has been in their employ for some time. William Madel, who has been in charge of the Tigerton store, will now be located at Clintonville. August G. Anderson, jeweler and optician, Black River Falls, Wis., has purchased the store of E. A. Moe, Oakes, N. Dak. Mr. Anderson has been connected with the North Dakota store for three months. Mr. Moe has left for a trip south.

Franklin Thomson, secretary of the Wisconsin Retail Jewelers' Association, announces that July 12, 13 and 14 have been decided upon as the dates for the coming annual convention of the organization. The headquarters of the gathering will be at the Hotel Blatz, as it was impossible to secure the St. Charles Hotel on the dates suitable for the convention. Plans are under way for making this year's gathering one of the most successful in the history of the State association. The matter of exhibits by wholesalers and manufacturers will fill an important part in the convention and efforts will be made to establish a system of marketing by which retailers and exhibitors may be brought closer together.

Toledo.

Jay Auten has improved the general appearance of his store by an increase of stock, new fixtures and interior decorations.

J. George Kapp is receiving numerous congratulations on the successes scored by his son, Frank A. Kapp, who is a student at the University of Michigan. Mr. Kapp, Jr., has proven a most successful business manager of student affairs, and during the past year has successfully given the students' operatic production, the students' outdoor circus and several other students' enterprises.

Waterville, a small village about 20 miles south of Toledo, received a wholesale burglary raid, last week, when nearly every store in the town was raided, despite the fact that at one store they were greeted with several shots from citizens who had been awakened. The combination store of William Wittee suffered most, where a number of watches, razors, pocket knives and minor jewelry articles were stolen. Mr. Wittee had the obliging notice on his safe stating that "This safe is not locked," and for their pains in opening it the robbers obtained a few coins of small denomination.

Local traveling jewelry salesmen, who cover southern Michigan, report extensive improvements on the part of many jewelers in that State. Among those reported are A. G. Bedford, Ionia, who will shortly move into an entirely new building, more than doubling his floor space; Edward Wixom, Owosso, who has just moved into a new store room; E. C. Stock, of the same city, who has purchased the store of C. Christen, the latter retiring from business; George H. Chapel, Howell, who has moved into larger quarters; John Ryan, who has entered the business in Flint, and who has one of the finest jewelry stores in that city, and Carl Heglund, who has increased his floor space at Jackson. Reports from traveling salesmen are that buying is more liberal and far more expensive wares are sold than a year ago this time.

When Arthur Downing, aged 41, was shot to death early last week in the Bull Dog Café in this city by George Seymour, the career of a man considered by the police to be a daring and accomplished diamond thief came to an end. Seymour and Downing had been "pals" in former days, but had had an altercation regarding financial matters and a feud had existed ever since. Upon meeting in a downtown café during the noon lunch hour a few words were spoken and a clash of arms resulted. Downing fired the first shot at Seymour's feet with a small gun loaded with pepper and used for blinding victims during daylight robberies, while Seymour replied with a heavy caliber gun, one shot penetrating the brain of Downing. Seymour is being held until the coroner has finished his inquest. One of the biggest jobs charged to the dead man happened some few years ago when he and three confederates robbed a traveling jewelry salesman in Paris of $60,000 worth of diamonds. For four months the victim was trailed, and finally an exchange of grips was effected in Paris, the grip exchanged being an exact duplicate of the real grip. He is also given the credit of having "pulled off" the job in Cleveland a number of years ago when an aged Jew, who kept a small jewelry shop, was robbed of a tray of diamonds in broad daylight.

The Toledo police are looking for two smooth swindlers who succeeded in swindling Sam Ruben, a suburban tailor, out of $600 cash and two watches valued at $65, this total amount having been paid to the two men for alleged diamonds which proved to be paste. The first crook, who bore the marks of being a Russian, entered the tailor's shop and represented himself as being a jeweler and looking for a place to open a store. While discussing this feature a second man entered, who represented himself as being in hard luck and wanting to pawn a quantity of diamonds for enough money to get to New York City. He first wanted to pawn two watches for enough money to pay his fare, but the first confederate, who reminded the victim of his being a jeweler, told him that the watches were not worth that amount and that all he would advance on them would not exceed $4 apiece. This won the tailor over to the first accomplice's side by his apparent honesty, and when later the second one offered a quantity of diamonds the first man immediately valued them at several thousand dollars. Believing that he had a big bargain in sight the tailor arranged to go to the bank and draw out all the money he had, $600, to which purchase price was to be added his own and his wife's watches. This was done, and as soon as the transfer had been made the second man asked for someone to direct him to the railroad station, whereupon the first volunteered to go along. Some time after the tailor became suspicious and called in a real jeweler, who immediately pronounced the diamonds to be valueless. A good description of the two men has been secured, and the police in adjacent cities have been asked to be on the outlook for the pair.

Pacific Coast Notes.

F. E. Jenkins, Santa Paula, Cal., will soon open a branch store at Fillmore, Cal.

Ernest Mueller, Eureka, Cal., has secured an interest in a mine in Mexico and may go there in a short time.

A. H. Witman, Pomona, Cal., assisted by his sons, A. H. Witman, Jr., and George Witman, has just finished the installation of a fine large town clock on the State bank building, at that place.

Y. H. Boudreau, Hanford, Cal., has sold his jewelry establishment to W. D. James and Arthur Duncan, who will continue the business under the firm name of James & Duncan. Mr. Duncan was formerly manager of the Hanford Jewelry Co.

The San Diego Gem Co. has just moved into its new building at 1233 Fifth St., San Diego, Cal., and has installed a complete plant for cutting gems and manufacturing jewelry. The retail end of the business is under the direct management of Howard Neale, formerly with J. Jessop & Sons. Mr. Wilson is president of the gem company.

San Francisco.

W. H. Hovey has left for the South with his sample line.

Mr. Mayer, of Mayer & Weinshenk, is planning to go east in a short time.

F. L. Presbrey, representing the Bassett Jewelry Co., has left on a trip through the Northwest.

J. C. Ryan, representing Unger Bros., Newark, N. J., has gone East to be absent about a month.

L. S. Myers, of the R. & L. Myers Co., has returned from a trip through eastern California and Nevada.

Phil H. Doll, who has been located at 255 Kearny St. for some time, has decided to move to larger quarters and will give up the jewelry end of the business, devoting all of his attention to watchmaking.

Among the out of town visitors in San Francisco during the past week have been: Walter E. King, Stockton, Cal.; D. L. McCarthy, Fresno, Cal.; C. E. Wyatt, Winters; O. S. Bedell, Santa Cruz, and S. F. Horne, New York.

Chas. E. Morrell died here Jan. 26, of heart trouble. His first enterprise here was a store under the old Palace Hotel and he soon became a prominent figure in the trade. He was 49 years of age at the time of his death and leaves a widow, but no children.

Burglars recently broke into the art goods store of G. T. Marsh & Co., Post and Powell Sts., and made away with jewelry and jade ornaments to the value of more than $1,000. Entrance to the store was effected by cutting through the wall from an adjoining vacant store. The thieves understood the value of jewelry and took only the best.

Detectives are searching the city for a well dressed young man who has been circulating worthless checks here and who has been attempting to pass them off on a number of jewelers. Recently he visited the store of A. Englehardt, 22 Montgomery St., and purchased a diamond ring for $60. He offered to pay with a check, but the retailer became suspicious and notified the police. It was then found that a number of bogus checks upon the bank of Vallejo had been circulated here by the young man.

August J. Clapham, formerly in the employ of Nordman Bros. Co., has been arrested at the instance of R. F. Allen, president of the wholesale house, on the charge of having stolen goods to the value of $5,000 while in the employ of that concern. It is claimed that Clapham took small lots of jewelry at a time, that he had smelting devices at his home where the loot was melted and that he had safe deposit boxes in a number of banks, where, under assumed names, he deposited the jewelry. It is further claimed that last year Clapham took a lot of jewelry to Chicago, made valuable presents to friends and sold enough to enable him to go into the moving picture business.

Lee Barr, North Bend, Ore., has filed a voluntary petition in bankruptcy, and his schedules show liabilities of $2,400, while his assets are composed of his stock of jewelry only.

Kansas City.

W. H. Meyer, Lawson, Mo., was a visitor to the city last week.

W. T. Peters, Eureka, Kans., has purchased a high-class automobile.

Among the visitors to this city last week was Mrs. Rupp, Atchison, Kans.

Amos Plank, Hutchinson, Kans., is in the city on a business and pleasure trip.

Mr. Quinn, watchmaker for Frank G. Ward, Anadarko, Okla., and his wife, were in this city last week.

Mr. Richard Miller and wife, McPherson, Kans., are planning a European trip, the second in 10 years. They expect to start June 1.

Mr. Louis Meyer, of the Meyer Jewelry Co., has been detained at home for several days, owing to the illness of his daughter and son.

Mr. and Mrs. Andrew Wilson, Winfield, Kans., and F. D. Beddow, Huntsville, Mo., were in town calling on the jobbing trade last week.

W. H. Storey, recently in business at Cleveland, Okla., was in town last week, en route for Oregon City, Ore., where he proposes to locate.

A fire broke out Monday night in a photograph gallery, over the room occupied by Oppenstein Bros., 1017 Main St. The jewelry firm suffered nominal damages mainly from smoke and the inconvenience caused by the fire.

Notice has been sent out by L. R. Manchester, receiver for M. D. Binkowitz, against whom an involuntary petition in bankruptcy was recently filed, that the stock, furniture and fixtures of the bankrupt would be disposed of last Monday, Feb. 7. The sale was scheduled to be held at two o'clock in the afternoon at 119 E. 8th St.

The following traveling men called on the trade here last week: Geo. H. Thomas, S. C. Powell & Co.; Albert E. Levet, Marchand Frères; A. W. Levy, Louis Strasberger's Son & Co.; B. Hyman, B. Hyman & Co.; H. L. Straus, Nathan Wallach; A. Rutherford, Taylor & Co.; Mr. Wakefield, Burstow, Kollmar & Co.; S. C. Powell, S. C. Powell & Co.

E. H. Snow, whose territory includes southern Kansas, Oklahoma, Texas and southern Colorado; Geo. Taylor, who covers a portion of Kansas; P. E. Firstenberger, who covers Nebraska; C. L. Palda, who travels in Iowa, and Otto Knaul, with territory in Missouri and Arkansas, all representing the Woodstock-Hoefer Watch & Jewelry Co., will soon start out on their Spring trips. Mr. Knaul, who was called to Afton, Ia., to attend the funeral of a relative, will return in a day or two.

David Lampord, Denver, Colo., recently attempted to commit suicide by taking poison. He was taken to a local hospital.

The mystery of the recent disappearance of pearls valued at $125 from the store of Fred Berg, Eau Claire, Wis., has been solved by Mr. Berg himself with the aid of a local detective. The pearls were found in the possession of a local bicycle repairer, who claimed, when found with the goods on his person, that he had taken them from Mr. Berg's store as a joke.

Canada Notes.

J. E. Nelson, St. Thomas, Ont., has been succeeded by Porter & Nelson.

Mr. Brooks, traveling representative of O. E. Weidlich & Co., Cincinnati, O., was in Toronto, Ont., last week.

E. C. Fitz, Jr., manager of the Montreal branch of the Robbins & Appleton Co., was in Toronto, Ont., last week.

The capital stock of Thomas J. Porte & Markle, Ltd., Winnipeg, Man., has been increased from $80,000 to $100,000.

C. G. Kearns, Dundalk, Ont., was burned out, Friday, Jan. 30, but succeeded in removing his stock, which was covered by insurance.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: R. H. Jupp, Orillia; L. A. Jeannerette, Elmira, and W. A. Young, London, all Ontario.

The Austin Co., Ltd., has been incorporated under the laws of Ontario with $100,000 capital to take over the business of Austin & Co., Toronto, Ont. The provisional directors are Thomas Urquhart, Daniel Urquhart, Harry W. Page, Wm. P. Crowe and L. A. Orr.

Henry Birks & Sons, Montreal, have had occasion to complain to the civic authorities of a breach of the building by-laws through the construction of wooden additions, to be used as kitchens, to restaurants which adjoin the Birks building on St. Philip's Sq., and which sustained serious damage through fire some time ago. The City Fire Committee at once took action on Messrs. Birks' letter, and brick kitchens will be erected.

The Montreal police have in their possession upwards of $10,000 worth of jewelry, the proceeds of a series of burglaries that have been committed in that city and district during the Winter months. Complaints have been made to the police by storekeepers whose premises have been robbed from time to time, and a special lookout has been maintained by the detective department. On Saturday, Feb. 5, detectives succeeded in arresting four men on suspicion of jewelry thefts. A quantity of the stolen goods was found in the houses where the prisoners were staying, and Police Magistrate Leet, on Saturday morning, remanded them for a week on the charge of robbery. In the meantime the police are making further inquiries regarding the jewelry burglaries. It is thought by the detectives that "crooks" from the United States have been operating with the prisoners.

R. L. Brewer, Jr., of the firm of R. L. Brewer & Son, Suffolk, Va., is now being called "Colonel" by his friends, Mr. Brewer having been recently appointed Colonel on the staff of Governor-elect Mann.

Price & Tompkins, Roodhouse, Ill., were recently subjected to considerable loss through a robbery on the Chicago & Alton Railroad. The house sent a shipment of goods, valued at about $769, from its branch store in Mattoon to Roodhouse, and while in transit the car in which it was shipped was broken into and nearly all the articles taken. It is said that at least a part of the loss will be covered by the railroad, but the jewelry firm has been put to annoyance by the fact that it needed the goods

Pittsburg.

John M. Roberts, of the John M. Roberts & Son Co., is home from the east.

F. F. Lang, of Gillespie Bros., leaves this week for Cambridge Springs to take a needed rest.

Steele F Roberts is remaining at home treating a cold which he contracted several weeks ago.

A Katzenmeyer, Burgettstown, and F. B. McKinley, Washington, were among the out-of-town jewelers in Pittsburg last week.

H B Hayes, of the Hardy & Hayes Co., has been confined to his home at Sewickley for several days, suffering from a severe cold.

A. M. Andrews, formerly engaged in Pittsburg, but who went from here to Seattle several years ago, is again back in Pittsburg.

August Loch, the North Side jeweler who has been spending a short vacation in New York and at Atlantic City, has returned to Pittsburg.

William Heeren arrived in San Francisco last week on his way home from a trip around the world. His brother, Otto Heeren, is at present in the Isle of Pines.

John W. Wightman, of J. R. Reed & Co., has finished inspecting the watches of the employes of the Pittsburg & Lake Erie Railroad, which is a part of the New York Central system.

E. W. Hill, of Goddard, Hill & Co., has entirely recovered from his recent indisposition. He had considerable trouble with one of his ears, a severe cold having settled in the right ear.

The Pittsburg Watch & Metal Co., to deal in watches and precious metals at wholesale and retail, will apply for a charter Feb. 23. J. L. Hersfield, Jacob Roe and Martin Fluck, will make the application.

A voluntary petition in bankruptcy was recently filed by Morris Weinthal, 6333 Frankstown Ave. He has been in this city nearly 20 years and originally worked for Kaufmann Bros., but started for himself about 1904.

The will of the late Maj. Albert P. Burchfield, vice-president of the Jos. Horne Co., was filed for probate last week. Maj. Burchfield is said to have left $1,000,000 to his widow and four children. He gave liberally to charity while living.

The jewelry which the Pittsburg police secured recently when they arrested a negro by the name of Parker turns out to be the property of Stanley North, 3912 Tioga St., Philadelphia, which was stolen Jan. 18, with other valuables amounting to $2,000.

W. Warren Wattles left a week ago last Saturday on the steamer *Queen City* for New Orleans to attend the Mardi Gras, going all the way from Pittsburgh by water, down the Ohio and the Mississippi Rivers. The boat arrived at New Orleans Saturday.

The members of the Jewelers' Duckpin Bowling League rolled some good games at the last weekly meet of the club. The Diamonds took three from the Vilsacks and the Jacks three from Wattles, and the Terheyens three out of four games from the Roberts.

P C. Malone, manager of the Geo. B. Barrett Co., who recently came here from New York and who was married several months ago, moved last Thursday into a permanent Pittsburg home. Mr. and Mrs. Malone had been living at the Hotel Schenley.

Warren W. Mather, of the Marsh-Brown-Mather Co., who has been ill with typhoid fever for a number of weeks, was able to visit his store a few days ago for the first time, but is not strong enough to resume his duties with the firm. His house is reported to have done the best January business in its history.

S. & B. C. Weinhaus have leased the properties at 720 and 722 Penn Ave. for a term of years, the rental totaling $45,000. as already stated, the firm will erect a building in the rear of 720 Penn Ave., adjoining their present establishment, and will sublet the front of that store, using the front at 722 Penn Ave., which it now occupies. The Weinhaus firm have been in their present location for five years.

The following traveling representaives visited the trade here last week: H. B. Rogers, Rogers & Co.; J. F. Dean, Reed & Barton; J. M. Curtis, Meriden Silver Plate Co.; Harry B. Kennion, Parks Bros. & Rogers; W. R. Shute, Day, Clark & Co.; H. A. Bliss, Wordley, Allsopp & Bliss Co.; C. G. Megrue, Gorham Co.; J. W. Sherwood, Solidarity Watch Case Co.; R. C. Wilde, Le Secla, Fried & Co.

Fire which broke out at Tyrone, Pa., about 7 A. M., Monday, in the building owned by Charles De Ferrie spread to the store of Robert R. Garman, a retail jeweler, and also to the W. F. Hiller block. Mr. Garman had time to place most of his valuable stock in his safes. The total loss is estimated at $30,000, partly covered by insurance, though the Hiller block was a total loss. The firemen had a hard time, with the weather at zero, to check the flames.

On account of the agitation of the merchants in Smithfield St. to have the city authorities and the street car company change the traffic rules governing vehicle traffic in that thoroughfare, it is reported that orders are to be issued reversing the present order of things. The inbound traffic will use Wood St., and the outbound Smithfield St. At present the inbound cars and wagons use Smithfield St. and merchants complain because shoppers with bundles desire to take the cars as they leave the stores. The order has not yet been made, but it probably will be shortly.

The lawyers' court of compulsory arbitration, or court of assistance (a local tribunal that has attracted the attention of President Taft, and which was put in working here some time ago by the Allegheny County Bar Association), was explained to the members of the Pittsburg Association of Credit Men at its meeting held here last week. F. C. Osburn, president of the bar association, and other well-known attorneys made addresses, what they said making food for thought for the business men of the city. Small claims are arbitrated by the lawyers' court, instead of going to trial.

An answer has been filed in the United States District Court at Pittsburg to the bankruptcy petition against Cohen Bros., who conduct general stores at Meyersdale and Somerset, announced two weeks ago in THE JEWELERS' CIRCULAR-WEEKLY. The answer says that neither of the members of the firm, Morris and Frederick Cohen, are insolvent within the meaning of the bankruptcy act. An inventory made of the goods in the store at Somerset show them to be worth $9,180.07, while the goods in the Meyersdale store show a value of $7,744.63, a total value of $16,924.70 in both stores. The liabilities are not known, but are believed to be large. J. A. Berkey is the receiver.

The police a few days ago arrested a negro who gave the name of Marshall Parker and on searching a grip they say belonged to him it was found to contain jewelry valued at $1,000. Some of the stuff, and particularly some topaz rings, were engraved E. C. B. N. Among the articles were a pearl brooch, jeweled breast pin, one-half carat solitaire diamond ring, stick pins, eyeglasses and other articles. The police have sent a description of the goods found, as well as that of the negro to other cities, in the hope that more may be learned regarding the man. It has not as yet been ascertained how Parker came into possession of the jewelry. He is being held awaiting further investigation.

While in a fit of jealous rage, Harry Fried, a jewelry salesman, last week, struck his wife in front of a restaurant in Fifth Ave. and a few minutes later was locked in a cell at Central Police Station. Fried was not captured until he had been chased several blocks and fired at by the detective who arrested him. At the hearing Wednesday morning before Magistrate J. J. Brady Fried pleaded to be let off easy, but the magistrate imposed a fine of $25. At the hearing Fried falsely said that he was employed by S. & B. C. Weinhaus, and also stated that he had been in the employ of Gordon, Morrison & Co. and Hausmann & Alter, of Chicago. Samuel Weinhaus, when seen by THE JEWELERS' CIRCULAR-WEEKLY correspondent, denied that Fried worked for his house. He says that if Fried is making such representations and he can find him he will prosecute him.

The W. J. Johnston Co., which occupies the fifth floor of the Union Bank building, Fourth Ave., last Friday took possession of 1,500 additional square feet of floor space, giving the company a total of 4,500 square feet and 14 of the 16 offices of this floor. The company will spend $10,000 in making the establishment the finest of its kind in America. Mr. Johnston, in speaking of the plan or rearrangement, said that a 30-foot lobby of Italian marble and plate glass will be built and that his establishment will unquestionably be superior to anything of its character anywhere. He is also installing three additional safes to take care of his increased line of goods. The company has had possession of some of the additional office rooms for several months, but secured possession of the remainder a few days ago, and workmen are now engaged in remodeling the place.

Prompt action on the part of a policeman prevented a serious fire in W. F. Sellers & Co.'s store, Altoona, Pa., Jan. 24. The fire was located in the cellar between the plastering over the furnace and the concrete floor. No damage was done to the stock.

Philadelphia.

George Smedley, watchmaker for the trade, is ill at his home with grippe.

John Kirschnek, Media, Pa., entertained a party of jewelers at his home, last week.

F. W. Osgood, sales manager for the Art Metal Works, Newark, N. J., was here, last week.

James Blisard, representing John F. Blisard & Co., is in New York on business for this house.

Charles Faul, engraver, 735 Sansom St., is recovering from the effects of an operation on his ear.

George Hurlburt, of H. O. Hurlburt & Sons, has started on his trip through western Pennsylvania.

E. M. Bracker, formerly in the retail jewelry business in this city, is representing Henry Lederer & Bro., Inc., Providence, R. I.

A clearance sale of jewelry was held, Monday, Jan. 31, on the premises formerly occupied by John Slowik, retail jeweler, 972 N. 2d St.

Atlas & Fisher, wholesale diamond dealers, 122 S. 7th St., have purchased the property occupied by R. M. Cooper & Son, 721 Sansom St.

C. E. Righter, Jr., of B. F. Williams Co., has started on an automobile trip with a party of friends through Reading, Pottstown and Allentown.

Frank White, a retail jeweler, Weatherly, Pa., made a special trip to town, last week, to enter his son Howard at the Philadelphia College of Horology.

L. Ostereicher and T. C. Heign, representing the New York Standard Watch Works, Jersey City, N. J., were recent visitors in the interests of their firm.

O. George Bohlson, Phoenixville, Pa., has just returned from a visit to his old home in Wisconsin. Mr. Bohlson during his absence has become a benedict.

In the case of Cohen Bros., alleged bankrupts, who conducted jewelry and clothing stores at Somerset and Meyersdale, Pa., J. A. Berkey has been appointed receiver.

The National Association of American Homing Pigeon Fanciers has awarded the contract for the repairing and casing of 2,000 watch movements to William S. Norton, of this city.

William Price, jeweler with H. J. Andrews & Co., 108 S. 8th St., has the sympathy of the trade, owing to the death of his wife. Mrs. Price is survived by an infant five days old.

The many friends of Henry Harper, one of the oldest and best known jewelers of this city, will be glad to know that he is still hale and hearty, and has recently celebrated his 80th birthday.

The paintings and statuary of the late Joseph Harrison, Jr., and belonging to the estate of Mrs. Sarah Harrison, deceased, will be sold at the Philadelphia Art Galleries, 15th and Chestnut Sts., on Feb. 23, 24 and 25, at 3 P. M.

Injunction proceedings to restrain the Philadelphia *Record* from operating an electrical bulletin board, on the grounds that noisy crowds gather before the board during the baseball and football seasons, has been begun in Common Pleas Court by the merchants between 9th and 10th Sts. J. E. Caldwell & Co. are interested in this complaint, their store being directly across the street.

Just as she was about to wait on a customer, Mrs. Brown, sales clerk in the jewelry section of Gimbel Bros.' store, was confronted by her husband, who, in a fit of anger, slashed her face repeatedly with a razor. The woman was rushed to the hospital, and during the excitement the husband made his escape.

Among the 100 Philadelphia merchants, members of the trade expansion excursion that toured the State for three days under the auspices of the Merchants and Manufacturers' Association, the jewelers and opticians were well represented by Robert L. Coates, representing L. P. White; D. V. Brown; Mr. Podeska, with D. V. Brown, and Mr. Brown, of MacIntyre, Magee & Brown. The visitors started on their trip Tuesday morning, returning Thursday night. Receptions were held at the various points visited.

The following jewelers were visitors to this city during the week: E. K. Bean, Lansdale, Pa.; E. E. W. Carter, Glassboro, N. J.; J. T. Ogden, Woodstown, N. J.; B. D. Bubb, Montgomery, Pa.; C. Solliday, Lambertville, Pa.; J. E. Webb, West Chester, Pa.; L. Harper, Salisbury, Md.; H. Bolte, Jr., Atlantic City, N. J.; D. H. Krause, North Wales, Pa.; H. B. McFarlan, Downingtown, Pa.; A. Gutowitz, Lewis, Del.; Lewis Thomas, Phoenixville, Pa.; J. T. Ogden, Woodstown, N. J., and Horace Thoman, Woodbury, N. J.

Boston.

Walter Roby, formerly of the Washington building, is with George E. Homer.

Walter B. Snow, of the Jewelers' building, has been drawn for the Federal Grand Jury.

Edward E. Hardy and Arthur Kelly, of D. C. Percival & Co., are in New York on a business trip this week.

Buyers in town during the week included Frank P. Plummer, Dover, N. H., and C. A. Senter, Brockton, Mass.

Frank C. Beckwith, representing the Hamilton Watch Co., was in Boston visiting the trade during the past week.

O. C. Dow, of the Jewelers' building, who was ill last week with an attack of gastritis, is able to be at his place of business again

M. N. Smith and H. W. Patterson went to Montreal, this week, to attend the annual meeting of the company's Canadian corporation in that city.

E. C. Fitch, Jr., of the Boston office of Robbins, Appleton & Co., has been at the Montreal office of the Waltham Watch Co. during the past week.

Allen Fish, for a number of years with A. Paul & Co. in their material department, has severed his connection with the house to become a partner in the firm of Derby & Co., West Somerville, retail jewelers.

The Shreve, Crump & Low Co. has a handsome Lincoln window display this week, three superb bronze busts of the famous President and bronze tablets of his Gettysburg speech, with a background of flags, being the principal features of the exhibit.

The E. Howard Clock Co. has shipped to Portland, Ore., a double-dial illuminated post clock to be set up in front of the jewelry establishment of Gaus, Randall & Cramer, of that city, and has installed a tower timepiece, with illuminated dial, in the town hall at Proctor, Vt.

E. W. Martin, of the Martin-Copeland Co., was in the city, last week, accompanied by his son Wesley, whom he introduced to the members of the trade to take his place as salesman for the concern while Mr. Martin senior is absent on a European trip which he is to take in the very near future.

The Studio Jewelers have vacated their quarters in the Studio building, which are being remodeled for other occupants, and have taken temporarily room 407 in the Paddock building, pending the reconstruction of the store to which they will remove, at the corner of Tremont St. and Temple Pl.

Augustus Childs, who has been with the Thomas Long Co. upward of 10 years, and was buyer in the department of silverware and cut glass, has gone into partnership with Remick Bros., who have several men's furnishings stores in the city and suburbs. He is succeeded in the department by Clinton Aldrich. Fred E. Carter, formerly with the Tiffany Decorating Co., is now with the Thomas Long Co.

The Smith Patterson Co. Benefit Association, composed of employes of the concern, held its annual dance, Thursday evening, in Howe Hall, in this city, upward of 200 couples participating. Edwin Lyons was floor manager, with F. F. Tabb as assistant, and the following aids: Misses Gertrude McPherson, Eliza Buckman, Flossie Steele, Nellie Crowley, Agnes Burns, Mabel Papineau and Agnes Guyer, and Messrs. A. P. McMullin, H. E. Tabb, Warren A. Smith, Leroy Nichols, Merton Lovell, Fred R. Furbush and Byron Miller. James Kingman is president. Among the guests were M. N. Smith, H. W. Patterson and F. E. Chick, of the company, and their wives. For the benefit fund $425 was raised by the affair, which was also an enjoyable social event.

The Shreve, Crump & Low Co.'s salesmen had their annual dinner, Friday evening, at Young's Hotel, upward of a score participating. An excellent menu was followed by an entertaining after-dinner programme under the direction of W. S. Wittenauer, who was chairman of the committee of arrangements and toastmaster of the occasion. Music was a special feature, the quartet "by our newlyweds," C. R Fowler, Gowdy, W. B. Morris and O. Housman being appreciated by everybody, and all joined heartily in the chorus. There were vocal solos, duets and readings by several of the diners, a programme of 20 numbers including the speeches, being presented. Mr. Wittenauer gave some piano solos. The speakers included R. S. Sanderson, C. S. Patten, W. S. Green, F. Sample, J. Lynch, A. Geddus, F. Braure, G. Cath, H. Coleman, C. Walker and M. Arnow. Others present were Curtis Pierce, A. S. Stroke, H. Dayton, J. Gore, B. Dolan and F. Parr. The event surpassed all previous affairs of the kind given by the employes of the company.

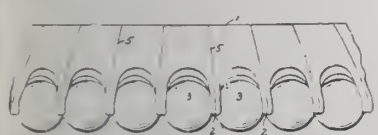
WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN. THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF FEB 1, 1910.

7,879. RING-GAGE. George G. Worstall, [illegible] River, N. J. Filed March 17, 1908. Serial No. 421,754.



A ring-gage comprising a substantially cylindrical [illegible] stationary post having a longitudinal [illegible] formed therein, a rectangular guide of [illegible] with [illegible] the post secured to the base of [illegible], said guide having an opening formed in it [illegible] with registering with the opening in the post, [illegible] band having one end thereof disposed [illegible] and permanently secured to the per[illegible], said end of the band, in con-

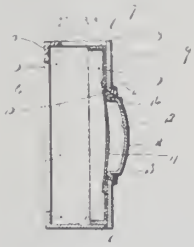
[illegible] the edge of the guide, forming an [illegible]icator, there being an opening formed in the [illegible]nd and registering with the perforation in the [illegible]ide, said band being bent to form a loop having [illegible] free end extended through the guide beneath [illegible] end of the band secured therein and thence [illegible]tended within the loop and curved to conform [illegible] and arranged to bear against the major portion [illegible] the interior wall of said loop, a clamping screw [illegible]readed in the opening in the post and having its [illegible]readed end extending through the openings in [illegible]e guide and secured end of the band for clamp[illegible]g the loose end of said band in engagement with [illegible]e guide, the exterior face of the resilient band [illegible]ng devoid of surface projections and provided [illegible]th graduations adapted to register with the in[illegible]cator for determining the size of the loop.

47,897. JEWEL-BAR. Henry W. Fishel, New York, assignor to Henry W. Fishel and Theodore H. Fishel, New York. Filed Jan. 27, 1909. Serial No. 474,492.

A jewel-bar comprising a metal body, a plurality [illegible] rounded jewels mounted in a row on the body [illegible]d in substantially contiguous positions, and [illegible]eans for securing the jewels in place comprising [illegible]ngers, each finger being located between two of [illegible]e jewels and formed and arranged to engage [illegible]th of said jewels at one side of their proximate

[illegible]ints and outwardly beyond their proximate points, [illegible]e fingers having no substantial projection at the [illegible]de of the bar beyond the jewels, and the jewels, [illegible]xcept for that part covered by said fingers, being [illegible]xposed at the side of the bar and being clamped [illegible]ely by said fingers.

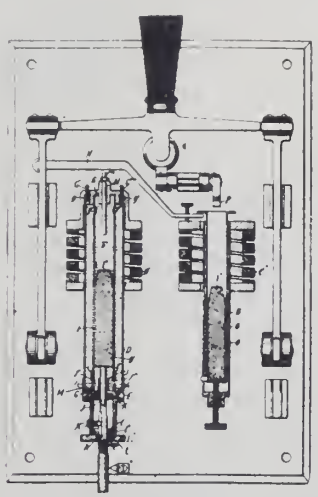
47,936. WATCH-HOLDING CASE. Wilson E. Porter, New Haven, Conn., assignor to the New Haven Clock Co., New Haven, Conn. Filed June 26, 1909. Serial No. 504,449.



In a watch-holding case, the combination with [illegible] rectangular sheet-metal flanged case-body having [illegible] central opening formed in its front face, of a [illegible]ctangular sheet-metal cover having a centrally [illegible]ranged circular opening in its flat back and formed with a flange fitting within the rear portion of the flange of the case-body and provided with a shoulder abutting against the rear edge of the said flange of the case-body, and a yielding

centering-plate located within the said cover for extension into the central opening therein and assisting in centering the watch in place.

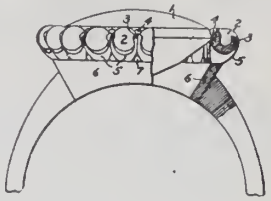
947,937. WATCH-HOLDING CASE. Wilson E. Porter, New Haven, Conn., assignor to the New Haven Clock Co., New Haven, Conn. Filed June 26, 1909. Serial No. 504,450.



In a watch-holding case, the combination with a main body having a central opening, of a cover formed with a central opening, a medallion per-

manently mounted in the said opening in the cover and comprising an inwardly opening cup, and a fastening ring, and a cushion located within the cover and extending over the medallion into the cup of which its central portion is pushed by the watch.

947,981. ELECTRICAL TIME-LIMIT SWITCH. Philip K. Stern, New York, assignor to the General Electric Co. Filed March 18, 1902. Serial No. 98,762.



The combination with an electric circuit, of a freely movable member for opening said circuit, actuating means for said member responsive to predetermined current in said circuit and normally

so related to said member that said actuating means is unable to move said member, and means responsive to other predetermined current conditions whereby the relative position of said actuating means and said member is varied to enable said actuating means to move the said member.

948,044. JEWELRY. Henry W. Fishel, New York, assignor to Henry W. Fishel and Theodore H. Fishel, New York. Filed April 1, 1909. Serial No. 487,118.

An article of jewelry comprising a metal body provided with a mounting, and a plurality of jewels mounted thereon in substantially contiguous positions, said mounting including a jewel-securing finger located in the angular space between adjacent jewelers and having a rounded upset head

overhanging and engaging a plurality of said jewels.

490,850. ORE CONCENTRATOR. Geo. Johnston, San Francisco, Cal.

490,862. FOUNTAIN-PEN. Francis C. Brown, New York.

490,911. ORE SEPARATOR. Wilhelm Krug, Kries Siegen, Germany.

Design granted Jan. 28, 1896, for 14 years.

25,092. BOX PLATE FOR CUFF BUTTONS. Emmons D. Guild, Attleboro, Mass.

Design granted Feb. 3, 1903, for 7 years.

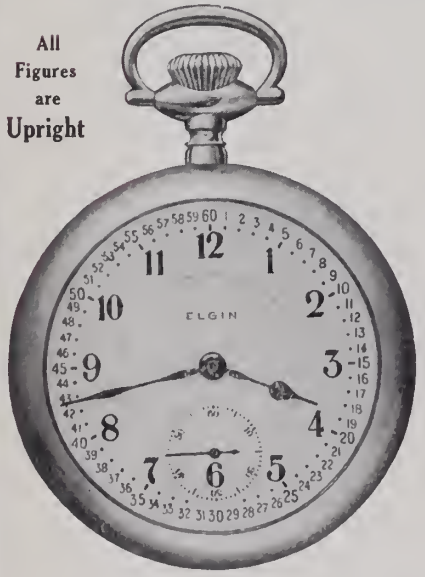
36,241. METAL OR SIMILAR ARTICLE. Samuel R. Earnest, Colorado Springs, Colo.

Note.—Owing to the fact the official records have not been received from England we are unable to publish the usual list of British patents, but hope to resume this service in the near future. Editor.

A record price was paid by Jeweler M. Berman, Altoona, Pa., recently, for lot No. 1327 Eleventh Ave. The price was $30,000 for a 25-foot lot, containing a small building occupied by a barber shop and S. Silverman's jewelry store. Mr. Berman does not expect to improve the ground just yet, but ultimately will build a large business block on the site, making the purchase at this time in order to be prepared for the contingencies of the future.

This New Minute Numeral Dial

(MONTGOMERY PATENT)



With Upright Figures

was designed by the chief watch inspector of a large railway system, for railroad men's use and is now supplied on any of the

Railroad Models of the Elgin Watch

All Figures are Upright

Each minute is numbered with clear, sharp, upright figures. The figures of the even five numbers in the minute circle are printed in red. This dial is so well designed that the complete time is read at a glance, doing away with even the momentary calculation necessary with old style dials. Railroad men want Elgins with this dial. The complete line of Elgin Railroad Watches with this dial will be well advertised in railroad men's publications. Be prepared to furnish them to your trade.

Write your jobber or this company direct.

THE HOROLOGICAL REVIEW

Some Applications of Theory to Practice.

Written expressly for The Jewelers' Circular-Weekly by E. James, Professor of Theory at the Horological School of Geneva.

(Continued from issue of Jan. 26.)

(7) *What pulley should be used in order to turn easily, and how should the lathe rest be placed?*

Let us consider a pulley of the radius b upon which there acts a force F (Fig. 7), whether applied by bow or in a foot lathe. The article to be turned has a radius of a and its resistance to turning is R. The

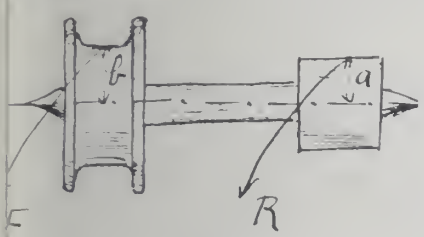

Fig. 7.

principle of the moments allows us to set the equation $F\,b = R\,a$, whence $F = \frac{R\,a}{b}$.

In order that F may be small, b must be large. R and a are not discussed, being the object to be turned. We conclude that it is necessary to employ a pulley as much larger as possible than the object to be turned (Fig. 8).

Now let us see what position the rest should occupy. The rest constitutes the fulcrum of a lever which is really the turning chisel or graver.

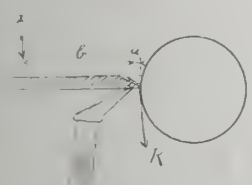

Fig. 8.

The principle of the moments gives $b = a\,R$. It is necessary that the force x be small, consequently a should be small and b large. R is not discussed because it depends on the nature of the article to be turned. It is necessary, therefore, to set the rest as close as possible to the article to be turned and to employ a long-handled graver.

(8) *To fix a pulley on a shaft we employ a key, a small wedge, which is driven into a key-way cut in the pulley and sometimes also on the shaft.*

Let us apply the working principle. We know that work is effort multiplied by the distance traveled. The force F traverses the distance b; work is $F\,b$. The force x traverses the distance h; work is $x\,h$. The equation of equilibrium is $F\,b = x\,h$, whence $x = \frac{F\,b}{h}$ (Fig. 9).

It is necessary that the force x should be large, and it is essential, therefore, that $F\,b$ should be large and h small. It is concluded that the key should be slightly wedge-shaped. Care must be taken not to strike too hard a blow with the hammer when seating the key in place, because the strain is very great and the pulley may be split.

(9) *Chucks.*—In all modern lathes the arbor or shaft is perforated from one end to the other. One of the ends of the hole is conical and receives the chucks, a sort of pincers, split in three divisions. A runner fitting the other end of the arbor holds the chuck, which accommodates the piece introduced into it. To be well equipped we must have a numerous assortment of chucks. The formula that gives the force of the grip is

$$X = \frac{2\,\Pi\,F\,R\,\text{cotg.}\,a}{p}$$

(Fig. 10).

It has been practically decided that to insure tight grip we require a large disk, R, a screw of close pitch and a very slight inclination of the cone; without exaggeration, however, for the reaction on a shaft may cause it to split. 24° has been adopted.

(10) *The holding pincers.*—The most practical holding pincers are shown in Fig. 11. The handle is bored through from end to end to allow of a long rod or arbor being held. The gripping force is considerable, which permits the holding of an object which we wish to tap with a die. These holding pincers are made in all sizes, even a small specimen for finishing pivots, etc. The formula that gives the power of this tool is

$$X = \frac{2\,\Pi\,F\,R\,b\,k}{p\,h\,a}$$

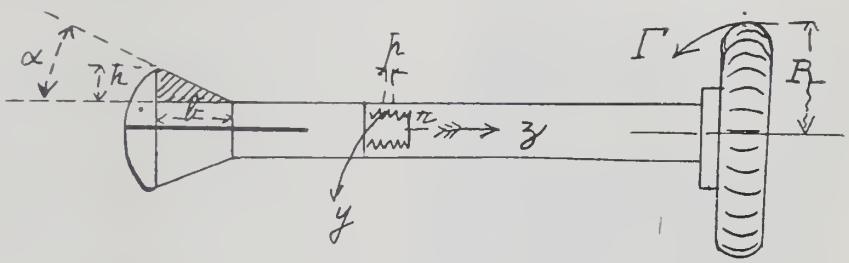

Fig. 10.

To insure tight gripping we require a large handle, R, a long and easily sloped cone, a close-pitched thread, the lever K long and the lever a short.

(11) *Clutch for a drilling tool.*—These clutches are used to hold an object on the platen of a drill or of a lathe, for holding the matrice of a balance, etc. The formula that gives the gripping force is

$$X = \frac{2\,\Pi\,F\,R\,b}{a\,p}$$

(Fig. 12).

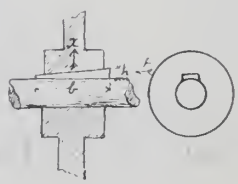

Fig. 9.

To obtain great force we can see that it requires a large lever, R, a large arm, b, a close-pitched screw and a short arm a.

(12) *Clutch for the tail stock of a lathe.*—To attach the tail stock of a lathe or drill to the bench nothing is more solid than the clutch shown in Fig. 13. The bench has a groove at T; in turning in the screw the piece A is pushed and causes the

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver Finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these goods for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

WALTHAM WATCH COMPANY
WALTHAM, MASS.

de B to ascend, which effects the lock-
g (Fig. 13).
The formula giving the gripping force is

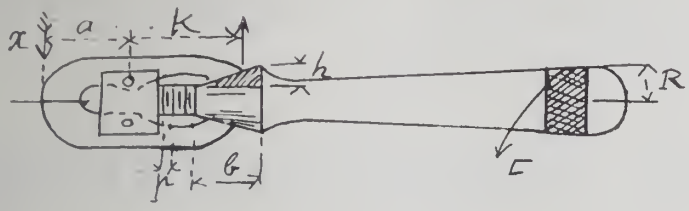

Fig. 11.

$$x = \frac{2\,\Pi\,F\,R\,\text{cotg.}\,a}{p}$$

To insure that x is large we require a
ge pulley, R, a close thread and an easy
cline to the inclined plane A. It is not
cessary to exaggerate this slight inclina-
n, because the mechanism cannot unlock
itself.
Practice shows that an incline of 40°
orks very well.
(13) *Precision scales.*—Watchmakers, as

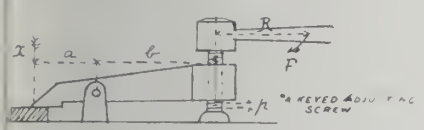

Fig. 12.

rule, buy a scales for weighing gold cases,
wels, etc., without knowing the require-
ents these instruments should meet.
Mathematical analysis reveals these con-
tions to us:
The formula of the balance is

$$\text{tang.}\,a = \frac{p\,L}{P\,d}$$

To insure a balance being sensitive, it is

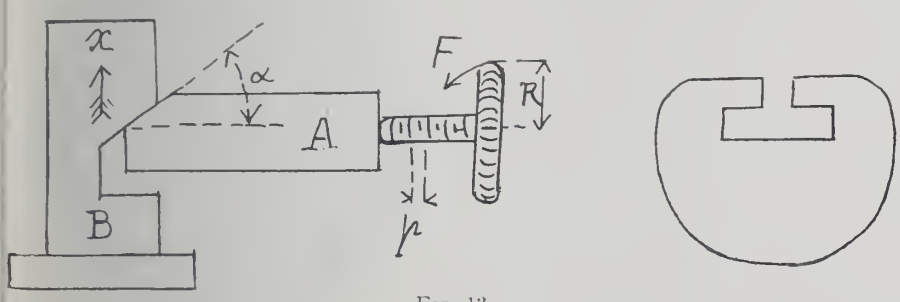

Fig. 13.

ecessary that the balance beam should
wing at a wide angle, X, under the effect
r action of a very small weight, p. P is

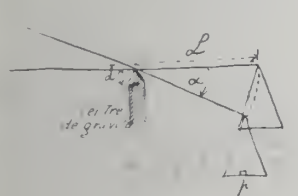

Fig. 14.

he total weight of the beam and the pans,
nd d is the distance from the center of
ravity of the beam X (Fig. 14).
It is necessary, therefore, that the angle X should be large, that L should be large, P small and d small; in other words, we require a large beam, that the beam should be light, and that its center of gravity should be at a very little distance below the pivoting point. An aluminum beam works very well.

Time and Its Measurement at the Pole.

THE discussion regarding the reaching—not the discovery, as it is erroneously called by certain papers, of the North Pole we leave to the press. Meanwhile a highly interesting question presents itself—what is the actual condition of things with regard to the measurement of time at the pole? And as the utterances of the daily press on this subject are for the most part not very intelligible, we believe that it will not be too late in the day to endeavor to put the matter in a somewhat clearer light.

We start by reminding the reader of two facts. The one relates to the position of the earth's axis, which is not perpendicular to the plane of its orbit round the sun, but inclined at an angle of 23½° to this orbit. A good idea of the situation will be obtained by imagining an ordinary pegtop set spinning on a sidewalk and the earth. The earth revolves round its describing circles with a slight inclined axis. The other fact is the rotation of the earth's axis once in 24 hours. Consequently every point at the equator moves with a velocity of 465 meters a second. This velocity decreases on approaching the pole, amounts to about 300 meters per second in our latitudes and of course becomes zero at the mathematical point of the porth pole.

At the equator, where the earth receives the sun's rays most uniformly, day and night are equally long in summer and winter. When, however, we travel towards the north—we are speaking of the north pole only, and of course, the phenomena in question would be met with in the southern hemisphere also but in the reverse sense—the difference in the length of day and night increases continually, because the effect of the obliquity of the earth's axis, which in Summer brings the northern portion of its surface opposite to the sun for months together, becomes daily more marked.

The length of the day increases therefore as we travel north, and when we enter the polar circle (66½°) a new phenomenon occurs. The nights have grown constantly shorter during the early part of the year, and in the polar circle a summer's day at length arrives in which the sun at midnight descends to the horizon, but does not disappear beneath it. This is the phenomenon known as the "midnight sun" concerning which travelers in arctic regions speak so enthusiastically. The number of days on which the sun remains above the horizon even at night increases as we approach the pole, and long before the actual pole is reached we have a day of about six months followed by a night of the same duration.

Within the polar circle the sun appears above the horizon on the 20th of March, and passes around it in shallow spirals, sinking below it at longer intervals as the pole is approached. The sun attains its highest elevation at the time of the summer solstice, circles down again toward the horizon in the same manner, and disappears below it on the 23rd of September, repeating the same motions below the horizon. Then the south pole has its half year day. Thus the daily alternation of day and night is transformed in the neighborhood of the pole into a single day and a single night which together comprise the duration of a year; the effect of the earth's rotation around its axis vanishes, and only the effect of its revolution around the sun is seen.

But though in the vicinity of the pole the day finally attains a length of six months, yet the alternation of day and night can be perceived from the circumstance that, owing to the rotation of the earth about its axis, the sun rises continually for 12 hours and then sinks for the same period; it passes around the horizon therefore not in uniform spirals, but in undulating lines. The sun is at its highest and lowest points at noon and midnight respectively, but in each case is above the horizon. As we approach the pole these undulating lines become gradually flatter and more difficult to perceive. At the actual pole the sun rises in an entirely uniform spiral from March to June and then descends in the same manner till September. The observer who has succeeded in establishing the fact that the sun has neither risen nor fallen during the course of 24 hours has thereby proved that he has reached the pole.

It has been asserted in many journals lately that there is no time at the pole; this is, of course, absolute nonsense. At the pole, as elsewhere, events can only be perceived in succession and it is just this capacity for distinguishing events in succession from which originates the idea to which we give the name of time. What, however, is quite different at the pole is the method of measuring time.

We cannot at the pole refer local time to any definite meridian, since there, all meridians are concurrent. We have all local times simultaneously and consequently no single time. This circumstance has given rise to various jokes in the papers,

for instance:—a man who runs once ound the pole has passed through 24 lurs in one moment; anybody going ound the pole repeatedly in the same ection rapidly grows older or younger cording to the direction in which he is oving, etc.

Joking apart, a little reflection will show t since the rotation of the earth ceases the pole, time-reckoning can be based ly on the annual revolution of the earth ound the sun. In place of the ordinary ernation of day and night, we have to e a single day of a year's duration as our t of measurement and to divide it up. e only definite points here are the rise l setting of the sun in March and Sep- iber respectively and its highest eleva- n in June.

A clock at the pole would have to be pro- ed with one dial for the months, another the days and a third similar to the dial d by us; agreement between polar and inary time would be restored in this nner

According to the *Deutsche Uhrmacher-Zitung*, another excellent polar clock ild be constructed at the pole, to which ody has apparently yet drawn attention. hough the mathematical pole itself does share the rotation of the earth, yet polar cap, the portion of the earth im- diately surrounding the pole, must, of rse, take part in this rotation. Now, us have recourse to Foucault's pen- um. The experiment with this appara- , which is so difficult to conduct in our tudes, is mere child's play at the pole.

f a pendulum be suspended exactly over pole and set in motion, it will maintain plane of oscillation without any dis- ance whatever. All we then have to do to draw radii coinciding with the ordi- y meridians from the polar point as a ter, and with their help to construct a l; the polar cap thus utilized as a dial l make one complete revolution under vibrating pendulum in 24 hours. By ans of the lower point of the pendulum can then read off the 24 hours' time. this way the pendulum may be made to duty as a hand. The plain of oscilla- might be made to coincide with the idian of Greenwich at 12 o'clock, Green- h time, and a suitable mechanism con- acted to keep the pendulum in vibra- n.

An escapement would be superfluous and would have at last at the pole an ideal k, without hands, without an escape- nt, and without wheels. Unfortunately pole, and with it our ideal clock, is in water.

Standardization of Screw Threads.

(Report on the proposition made by M. MAURICE PICARD.)

THE horological industry makes use as much in the manufacture of clocks and of various chronometers as in that of pocket watches of a considerable number of little screws, often of minute dimensions, the construction elements of which are not yet uniformly determined.

We find, as a matter of fact, in use among horologists for these special screws quite a large number of series, coming from different factories, and which have remained concurrently in use in spite of the efforts already made to establish uniformity among them.[1]

These efforts have been many times repeated, and we may recall that particularly in 1878 at the earnest instigation of Professor Thury a system of screw threads in metric dimensions applicable to screws of less diameter than six millimeters won many advocates and might have been looked upon as adopted, at least in principle, under the title of the Thury, or Swiss series.[2]

This system was accepted in 1884 by the British Society for the Advancement of Science, and in 1893, with some slight changes, by the Physico-Technical Imperial Institute in Berlin as a result of the decisions of the German Engineers' Society and of a conference held at Zurich. Its application had even been extended to a caliber of 10 millimeters.

It might have been for this reason considered as adopted in general practice, for at the time of the studies incited in France in 1894 by the Society for the Encouragement of the National Industry, in view of the adoption of a uniform system of screw threads for mechanical screws of all diameters, it was believed possible to limit these studies to screws of a greater diameter than six millimeters, allowing that for screws of less than this size use could simply be made of the Thury series.

But, as a matter of fact, the experiments made for the application of this series had not been crowned with success, which was due to the fact that the rules formulated were not conducive to the adoption of dimensions readily expressible in fractions of millimeters, and did not establish simple relations between the numbers of the screws and their diameters, and finally, because the form given to the profile, established with a view to the use of strained threads, departed too widely from the form of the equilateral triangle, which had been adopted gradually because of its great simplicity and because of the increase in the use of cut threads, which permitted tthe creation of threads with a sharper angle.

From this situation has proceeded the fact that since the year 1904 thte Society of Encouragement for National Industry, on the request addressed to it by M. E. Sartiaun, in the name of the syndicate of electrical industries, has been induced to occupy itself with the proposition of extending to screws of a less diameter than six millimeters the rules already accepted for the standardization of mechanical screws of a diameter above this limit, and which constitutes the system of screw threads, known as international, adopted by the Congress of Zurich, held in 1898.[3]

The solution accepted and which was immediately applied in France in various government services and also by the leading houses engaged in the construction of electrical apparatus, provided for the addition to the international system of eight new screws, the diameters of which varied, decreasing by half millimeters from 5.5 mm. to 2 mm., inclusive, to which have been also added four screws, of which the diameters ranged in quarter millimeters from 1.75 mm. to 1 mm., inclusive.

For all these screws the pitch indicated varied only from one to two diameters; that is to say that the consecutive screws have in pairs the same pitch, so that in case of the wear of a threaded hole in metal relatively soft and intended to receive a screw of the least diameter of each pair we could replace a screw that had begun to work loose by a screw of the immediately greater diameter without a new tapping of the aperture. As a fact, the five smallest screws of the series thus established were capable of duplicate use with those of the series of minute screws, which belong particularly to the ordinary series; that is of horological screws, a series which remained in use without their standardization having been successfully effected, as has been stated at the commencement of this article.

Propositions having for their object the accomplishment of this standardization have been addressed to the Society of the Encouragement by M. Maurice Picard, of the firm of Henri Picard's Sons & Co., manufacturers of tools and supplies for watchmakers, and these propositions, modified and complete, as we shall find, indicated later, according to the observations made successively in the course of the discussion, appear capable of furnishing a satisfactory solution to the question proposed.

According to the documents which M. Maurice Picard has helped us to collect the screws actually in use in the horological industry belong to the series which are usually known under the name of the house that makes them, or at least originally created them.

The most ancient of these series originated in the employment as the unit of measurement of the "line" or twelfth of an inch (Swiss), a unit still in use in horology for the designation of some of the dimensions of the elements of a watch, but the value of which varies unfortunately according to the instance.

(To be continued.)

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

A Mountain Scene in the Show Window.

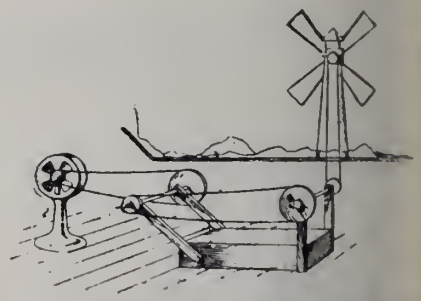
With Wind-Mill and Other Mechanical Effects.

THE ingeniously constructed display illustrated below, although used recently by a concern outside of the jewelry trade (J. J. Hockinjos Co., Newark, N. J.), will undoubtedly interest many retail jewelers. The display, which was described in *Iron Age-Hardware,* represented a bit of picturesque mountain scenery in Winter. Aside from the general attractiveness of the display, it has an added interest owing to the mechanical attachments by which the wind-mill, saw-mill and railroad train are kept in motion.

A MOUNTAIN SCENE IN THE SHOW WINDOW.

The whole display is constructed upon a rough framework of boards. Two small tables support the mills. This framework is completely covered with heavy packing paper painted with raw umber and kalko to give the appearance of rock. The houses are made of cardboard, bent into shape, glued together, painted and sprinkled with sand to represent stone. Red glass is placed in the windows, and at night electric lights burn within.

The trees are real young cedars, and are simply stuck through the paper. A few lower branches on the under side of the paper keep the trees upright. The telegraph poles are rough branches with the bark removed. The wires are ordinary copper wire. The whole display was sprinkled with plaster of paris and frosting to represent snow.



HOW MOTION WAS OBTAINED.

The wind-mill was run with a gearing, the construction of which is illustrated in the accompanying drawing. An ordinary electric fan was turned into a motor by removing the fan and substituting a wheel. The gearing was arranged to reduce the speed so that the wind-mill turned with a fairly slow motion. The device was made of rough pieces of wood; bolts for shaftings and wooden wheels with grooves, in which ran the round leather belting.

The wheel of the saw-mill was actually run by water. This was supplied through a ½-in. rubber hose connected to the main pipe in the cellar under the floor. The water ran down a sheet lead trough into a tank 14 by 24 by 4 inches, which was completely concealed. From the tank it ran into a waste pipe. A little moss was arranged here and there along the edge of the trough. The effect was that of a mountain stream emptying into a pool. Near the mill was a rustic bridge.

The toy train ran by a storage battery. This little train came around the mountain and shot into the dark tunnel only to reappear again.

The display drew large crowds both in the daytime and in the evening. At night the snow sparkled in the red lights which shone from the mountain houses.

HOW THE MOTOR POWER IS OBTAINED FOR THE DISPLAY.

Commerce a Game of Skill.

COMMERCE is a game of skill, which every man cannot play, which few men can play well. The right merchant is one who has the just average of faculties we call common sense—a man of strong affinity for facts, who makes up his decision on what he has been. He is thoroughly persuaded of the truths of arithmetic. There is always a reason in the man for his good or bad fortune, and so in making money. Men talk as if there were some magic about this, and believe in magic in all parts of life. He knows that all goes on the old road, pound for pound, cent for cent, for every effect a perfect cause, and that good luck is another name for tenacity of purpose.—*Ralph Waldo Emerson.*

James W. Kalbach, Reading, Pa., is about to move to his new store at 13 N. 9th St., having recently purchased the premises for $7,600.

The store of Morgan Bros., Ankeny, Ia., was the scene of a burglary recently, when thieves escaped with $100 worth of stock. Thus far no clue has been obtained.

Storekeeping Department.

How to Make Good.

LIFE is a struggle—a struggle in which many are vanquished and few survive. Of 1,000 buds that break forth in the spring of the year only a few, a very few, become blossoms, and of the blossoms only a few become finished and perfect fruit. This is a natural law, you say, and you are right. But behind all we choose to call law resides what we are fast learning to realize—a cause.

Very few people realize the importance of knowing themselves. They have a faint idea about life and their connection with it, but their conception of their possibilities and the importance of developing those possibilities is so imperfect that if they were asked just what their aim in life is they would not be able to give an intelligent answer, though they be at the moment working away at a job or filling a position of responsibility.

The trouble with these individuals is they do not use the opportunity they have and do not deserve to see a thousand-and-one avenues opened to them to make good. It is one of the paradoxes of civilization that the more opportunities are utilized, the more new ones are thereby created. The man who has a place, an opportunity to do, who persistently drags, who will not wring success out of what is given him, has given no evidence of fitness to improve or develop larger opportunities were they thrust upon him.

The world is full of latent power lying everywhere waiting for the observant eye to discover it. The only eyes who have been observant eyes are those of men and women who have made a success out of what they are doing—the ones who make good where they are. Man should not be blinded to whatsoever merit exists in the opportunity which he hath in hand, remembering that a thousand promises for the future should weigh as naught against the possession of a single piece of silver.

Wherever you are, unfold your hands, use the opportunity afforded by your present position and make good. Make good as Napoleon did in a hundred "impossible" situations. Make good as all leaders of men, in war and in peace, have done by the use of the opportunity at hand. Make good as every man must who would accomplish anything worth the name. Golden opportunities are nothing to the indolent, but industry makes the commonest chances golden.

Start to-day! Use the opportunity you have within your grasp, and you will stretch out your hand and hold the plus-entity, being what you have it within you to be.—*Business Philosopher.*

Burglars recently broke into the retail jewelry store of Pfister Bros., New Iberia, La., and escaped with a small amount of cash. The jewelry and diamonds had been placed in the safe, which was unmolested. The thieves entered by removing the glass from the front door. The concern had just moved into its new brick building on Main St.

The Law and the Retailer.

By Bernhard Raymond, LL.B., of the New York Bar

[EDITOR'S NOTE.—The articles published under the above caption have been written expressly for THE JEWELERS' CIRCULAR-WEEKLY and with the especial needs of the retail jeweler in mind. Considerable legal matter of a generic nature has been published in various journals, but the purpose of this series of articles is to give only what is believed to be particularly valuable and helpful to the jeweler.]

(*Continued from issue of Feb. 2.*)

Partnership Relation Distinguished.

A clear conception of the rights and duties of co-partners in the co-partnership is well afforded when compared with the legal standing of a stockholder in a business corporation.

A partnership differs in many characteristic respects from a corporation.

First—A partnership is a voluntary association of two or more persons whose legal relation is founded upon their express or implied agreement and is not deriving its power from special or general statutory authority to carry out the purposes of its creation. A corporation is created by virtue of a general or special act of the Legislature.

Second—The partners continue to act as individuals; that is, their individuality is readily identified.

The individuality of the incorporator or stockholder of the business corporation is lost.

Third—The partners among themselves may agree that each has a particular interest in the firm, its business and property.

The individual stockholder does not own any part of the corporate assets.

Fourth—The contract of any partner binds the co-partnership, as well as each of the partners of the firm.

The individual stockholder cannot by his contract bind the corporation.

Fifth—The co-partners sue and are sued in their individual names.

The corporation cannot sue and be sued in the name of its stockholders.

Sixth—Each co-partner, in so far as third persons are concerned in their personal dealings with the firm, except in the case of a limited partnership, of which we shall speak later, is responsible for all the firm's debts.

A stockholder is only answerable to the extent of his stock.

Seventh—The death of one partner usually dissolves the relation of partners and terminates the partnership; that is, in absence of an agreement to the contrary.

The death of a stockholder does not in the least affect the existence of the corporation.

Eighth—The transfer by one partner of his share in the business to another does not operate to make the transferee a partner in the firm. And that for the reason that a partnership depends upon the agreement of the parties, and in the absence of an agreement to receive the transferee into the partnership as a partner he is only entitled to the share which the retiring partners would have upon the dissolution of the firm.

A transfer by a stockholder of his shares of stock entitles the transferee to all the rights of the original holder, and the transfer in no way affects the corporation.

Any attempt to frame a satisfactory definition of a partnership is regarded as a hazardous undertaking. This is partly due to the difficulty inhering in any attempt at definition, but it is chiefly attributed to the fact that the legal conception of partnership has not always been clear and definite, and that the legal test for determining the existence of the relation has varied from time to time.

(*To be continued.*)

Brightness.

WHEN selling goods it is most essential that they retain their newness of appearance, and especially is this true of ornamental goods, for whether the customer is buying for himself or purchasing for presentation he desires above all things to be assured that the ware is clean and new. Bright, new-looking articles provoke no questions when shown to the trade; hence the importance of keeping goods in first-class order. Have everything where it can be seen by people desiring to purchase and where there is no difficulty in reaching articles, whether for cleaning or exhibition purposes.

Bright, clean, attractive windows are also important. Indeed, especial care should be exercised here, as many people will be influenced to enter a place where the windows emphasize the proprietor's manner of keeping stock in proper condition. As a matter of experiment, one large retailer, prior to the holidays, kept the window lights burning several hours after the store had been closed, arrangements having been made with a watchman to switch off the lights at a certain time. This bit of "brightness" brought big returns, as it enabled many people who passed the spot after business hours to examine goods leisurely. The result was they made their selections from the display shown in the windows and were ready to place orders when entering the store. If this kind of advertising paid prior to holidays, why would it not pay at other times?

The experiment is worth a trial. A good way to test it is to make special night shows. Most jewelers remove the more valuable part of their display each evening before closing. Let some special articles be shown when the store is closed, and keep tabs on the sales made of these night specials. Perhaps this style of "brightness" might be a silent salesman of value. OTTO JONAS.

A thief recently broke the show window in the store of W. C. Bowers, Dayton, O., and made off with a tray of diamonds worth $500. A stone weighing 15 pounds was hurled through the window.

Old English Pottery and Porcelain.

IN speaking of a recent exhibition of china and pottery by Stoner & Evans, London, Eng., a contributor to the *Pottery Gazette*, of that city, says that the collection shown has been a center of attraction to hundreds of lovers of artistic china in general and of old English porcelain in particular.

The firm collected from many sources some of the finest examples of early English porcelain that have ever been accessible to public view. Such an exhibition was only rendered possible by the dispersion of several important private collections, and it is not likely that so many of the best specimens of the early products of the oldest factories can ever be seen together again. The exhibits were acquired by Stoner & Evans from many sources, and the disposal of them will see them scattered far and wide, some of them probably never to appear in public again.

"It is a matter of common knowledge that really fine specimens of early English china are becoming very rare," says this writer "The best of them have found a permanent home in our public museums, so that when a few pieces find their way into the market the competition for them by English and transatlantic collectors is always keen. Lovers of old china have found the recent exhibition not only interesting but instructive. It has shown that British porcelains of certain early periods are of a higher standard of excellence than they have been credited with. Specimens produced in the earliest periods of Bow, Chelsea and Worcester will always command appreciation because of the date of their production. There are, however, productions of those early dates that have better claims to notice than mere rarity. The present collection included examples of Bow, Chelsea, Worcester, Nantgarw, Coalport (Coalbrookdale), Swansea, Derby, Bristol, Pinxton, Lowestoft, Plymouth and Longton Hall. Some of these are beautifully fine porcelain, but gay in colors, and not perfect as models. There are, however, many others that combine the perfections of form and ornamentation.

"Of the latter the Worcester patterns in case J are beautiful examples of the period 1751-1783. There is a notable dessert service. The centers, decorated with circular medallions, painted with small groups of fruit and leaves, and framed with borders of golden rays. Fine purple scrolls entwined with festoons of green foliage with red berries radiate outwards on to the scalloped flange. The latter enriched with a trellis design in rose color, upon a lighter shade, and further decorated with reserves painted with single blossoms on a white ground, powdered with red, and framed with golden scrolls.

"Altogether Stoner & Evans presented a very remarkable collection of the rare early English china which is held in such esteem by collectors, displayed in graceful cabinets

"The most interesting feature of the exhibition is undoubtedly the set of three

CHELSEA GROUP—SUMMER AND AUTUMN.

groups of figures by Roubiliac, shown in a case with electric light inside. This magnificent and marvelously beautiful set of 'Old Chelsea,' representing pastoral idylls in the style of Watteau, is described in the artistic souvenir of the exhibition as unique. The central group represents a delightful variation of the 'Music Lesson.' Seated under a bower of white jasmine in full blossom, a damsel with a youthful musician turning the handle of a hurdy-gurdy resting on his knees, watch a small dog dressed in man's attire as he dances on his hind legs upon a marble stool. At her feet another dog in the dress of a lady of the period, also on its hind legs, watches its companion. The damsel is in a white gown, richly brocaded with gold and colors. The musician, in a white jacket, also strikingly figured in gold and colors—green cap and breeches and blue shoes.

"A pair of groups form part of the same set—one group on each side—each consisting of two standing figures representing the four seasons—one group Winter and Spring, and the other Summer and Autumn. Summer is represented by the figure carrying a sickle and some corn, her left hand resting on the shoulder of her companion, at her feet two birds nestling among some foliage. She wears a dress of a brilliant rose crimson enriched with gold and a blue bodice. At her side, leaning against an apple tree, Autumn gazes at her admiringly. His cap in his left hand, he wears a pink coat figured with blue and gold, red breeches and shoes, and holds up a blue apron loaded with fruit.

"These three Chelsea groups are the most exquisite productions in the collection. There is a small collection of Bow, Derby and Chelsea figures of birds and their nests, and another of Chelsea busts and statuettes of historical interest. Our correspondents who took part in the discussion in our pages on 'Lowestoft' some time ago may be interested to know that Stoner & Evans show among other examples of Lowestoft an octagon-shaped plate, powdered blue ground, decorated with circular and fan-shaped white reserves, painted with river scenes and flowers in the old Chinese style. The mark on this piece is an imitation of a Chinese mark in blue."

Ivory Hidden in the Arctic Ice.

THOSE who have been following the stories anent the scarcity and increasing price of ivory will be interested in the paper read by Dr. Gath Whitley at the Victoria Institute, London, Eng., the other day, in which he described the islands of ivory which are hidden among the Arctic ice lying north of Siberia.

These islands were discovered by Russian explorers at the end of the 18th century and have been exploited by traders in fossil ivory ever since. As recently as 1898 about 80,000 pounds of fossil ivory was offered for sale at the fair of Yakutsk. To the earlier explorers it seemed that one islet, known as Laikoff's Island, was "actually composed of the bones and tusks of elephants, cemented together by icy sand. The horns of buffaloes, or rather of musk oxen, and rhinoceroses were also wonderfully abundant. The sandy shores and slopes were full of mammoths' tusks."

In 1886 a German, Dr. Bunge, explored Liakoff's Island. "The sand and gravel," said the lecturer, "were found to rest in

blocks of ice, and the alluvial beds were full of the bones of mammoths, rhinoceroses and musk oxen"—this after hundreds of years of visits from ivory hunters. Trawling showed that the bottom of the sea near the islands was strewn with tusks and bones.

These extraordinary discoveries are explained by the following theory. In prehistoric times Siberia enjoyed a comparatively mild climate, and a great tract of country now under ice stood at a considerable level above the sea. Vast herds of mammoths, rhinoceroses and buffaloes roamed over these plains. A great catastrophe at last overtook them. The land subsided, the sea rose and the animals congregated in great numbers on the mountain tops. Even these were at last submerged and the destruction was complete. After a time the waters subsided slowly and the islands which had formed mountains in the land rose above the sea.

Why the climate changed after these upheavals is still a problem to be solved.—*Music Trade Review.*

Imitation Pearls.

THE art of making false pearls is several hundred years old. It seems not to have been known before the 17th century, but the Chinese, thousands of years ago, understood how to produce artificial pearl, though not by imitation.

It is well known that pearls consist of a deposit of mother-of-pearl, following an injury to the shell of the pearl-oyster, or the introduction of some foreign substance, such as a grain of sand. The Asiatics put substances into the shells, even small leaden images, to get them covered with pearl. But the process has never been very successful elsewhere.

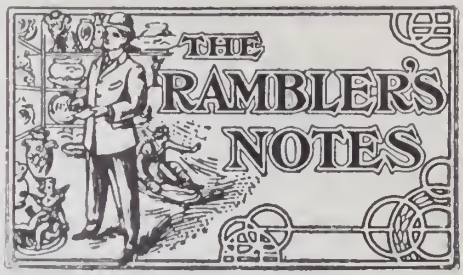
Near the end of the 17th century a maker of rosaries in Venice, named Jacquin, invented, or discovered, the so-called essence of pearl, with which he covered the inside of glass beads to make them look like pearls. Before this invention the glass beads had been filled with wax or mercury, but the imitation was not perfect, as it now became. The process is still in use, and consists of coating the inner side of thin, white glass beads with the pearl essence and filling them with wax, except for the little opening. The pearl essence is made by steeping in ammonia the silvery scales of a fish belonging to the perch tribe.

At the present day imitation pearls are produced in wonderful perfection, and what large proportion the industry has assumed may be seen from the fact that Paris alone sends annually to other countries artificial pearls to the value of more than one-half million francs. The prices vary, of course, with the size and beauty of the stones.—*Deutsche Goldschmiede Zeitung.*

The store of Maxwell Bros., Bowman, Ga., was recently destroyed by fire. The concern carried a line of jewelry and groceries.

John Guersten, Waterloo, Ia., has moved into a newly furnished store at 221 W. 4th St. Mr. Guersten recently purchased the business of Dexter Phelps.

Pottery at University City, St. Louis, Mo.



THE noted French expert, M. Taxile Doat, formerly of the manufactory of Sèvres, has arrived at University City, St. Louis, Mo., and is organizing the new pottery, which will be one of the most interesting features of the People's University, founded by E. G. Lewis, of the Lewis Publishing Co. With the assistance of E. Diffloth, formerly director of art of the La Louviere Pottery, Belgium, of Mrs. Robineau, the editor of *Keramic Studio*, and of Fred H. Rhead, both porcelain and low-fired ware will be produced in the new pottery, but attention will be mostly given to the making of fine porcelains, such as have made Mr. Doat's reputation, and such as have been made in this country by Mrs. Robineau during the last five or six years. Mrs. Kathryn E. Cherry, St. Louis, has been engaged by Mr. Lewis to take charge of the lessons. She will also conduct a class in Ceramic design. Mrs. Cherry is a pupil of the St. Louis School of Art, Paul Connoyer, Dawson Watson, Arthur Dow, Marshal Fry, Bischoff and Aulich.

It may be announced in connection with this that the Correspondence Schools of University City are being as rapidly organized as possible. All crafts will be taught there, both by correspondence and in the school. The lessons on china painting, by Miss Jetta Ehlers, will, we hope, be finished in a few weeks, and the lessons on pottery, by Fred. H. Rhead, are ready now. The instruction is free to members of the American Woman's League, but some arrangement will probably be made by which these lessons or text-books can be purchased by outsiders for a moderate sum.

"The Pottery Lessons," by Mr. Rhead, will be found to be a practical book of elementary instruction, such as there is none on the market, very thorough and clear, illustrated with over 400 drawings of tools, utensils, etc., a number of these illustrations showing, as much as possible, the ware in the process of making. This textbook gives complete and clear instruction for building, casting, pressing, throwing, modeling and carving, glazing, placing and firing, also for the making of tiles. The series of formulas for glazes will be of special interest to students as well as advanced workers, as many of these formulas are little known. There are glazes maturing at different temperatures from Cone 010 to Cone 3, mat and bright glazes, colorless and colored, all the mat greens of various textures, alligator skin and others, a mat white very similar in character to the celebrated vellum glaze of Rookwood, a crimson crystalline glaze maturing at Cone 010, etc.

A whole lesson is devoted to porcelain work for Cone 9 firing, with simple instructions for the mixture of a good porcelain body and the preparation of glazes developing at the same temperature at which the body is fired.—*Keramic Studio.*

The store of A. G. Stone, Montpelier, Vt., which was closed during the past few days on account of the death of Mr. Stone, has been reopened for business under the management of W. M. Reed.

BRASS GOODS OF EGYPTIAN STYLE

MANY jewelers carry a line of brass and copper novelties to help increase the attractiveness of their stocks and also to supply a demand among customers who are on the lookout for unique and pleasing articles in which beauty is combined with utility. To jewelers who are interested in this kind of ware "Karnak" brass, a product modeled after pieces of antique ware, will strongly appeal. The originals from which these styles are taken were found in the ruins of the Egyptian Temple of Karnak, built by Seti the First, over 15 centuries ago, on the banks of the River Nile, near Thebes, the ancient capital of Egypt. In both form and decoration each piece of "Karnak" brass expresses some ideal feature of ancient Egyptian art, embodying a sacred meaning. Smokers' sets, combining a tray, match and ash receiver and cigar holder, are among the articles offered in this ware. For the den or art corner they are most appropriate. Clocks, vases, jewel boxes, fern dishes and many other articles are made of this brass, in all of which some ornamental feature of ancient Egyptian art is prominent. The decorations on some of the pieces are the lotus, the sacred lily of Egypt; on others is the scarabeus, the sacred beetle, the symbol of creative power and immortality. The Sphinx and Isis, Goddess of the Nile, are also prominent in the decorative schemes used. A display of this ware is at present being made at the New York office of the Benedict Mfg. Co., 409 Broadway.

*

NEW DECORATIONS IN COALPORT CHINA

A NEW china decoration seen at the salesrooms of John Davison, 12 Barclay St., New York who imports coalport ware, shows heavy acid gold bands enclosing one of deep purple. The center of the plates so ornamented is free of decoration, the contrast thus produced being most pleasing. Another service plate has a border in acid gold, while running around the shoulder of the plate is a dainty leaf and vine pattern in heavy raised gold. The center is clear. Because of the simplicity and attractiveness of design this plate at once catches the eye and makes a favorable impression. The same pattern is shown against blue and red backgrounds, but with not such good effect. A plate decorated with sprays in turquoise blue alternated with heavy gold pattern designs makes a pleasing offering, the blue being applied by hand. As in the other instances the center is free of decorative effect. Where medallion decoration is used the patterns are smaller and more dainty in design.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION NO. 2116—**Dull Black on Trophy Cup Bases.**—*How is the dull black finish produced on trophy cup bases?* *D. B.*

ANSWER.—The black bases used for silver prize cups are of wood, polished and blackened with shellac and lampblack. The wood turner sandpapers and smooths the bases as fine as possible, then brushes on a coating of the lampblack and shellac. When dry he will place it again on the lathe, and, while revolving, will polish again with fine sandpaper. This alternate painting and polishing may be done several times, or until the desired finish is obtained. The last operation consists in rubbing up with a cloth, but not enough to make it glossy.

The Production of the Ring Mesh Purse.

By WINFIELD E. DENHAM, in the *Metal Industry*

THERE is probably no other article manufactured today in the jewelry industry that is meeting with such continued success as the ring mesh purse. It seems to almost rival the bracelet in the enormity of its sales. Its origin dates back some six or seven years and the output has increased steadily until today almost all of our fair jewelry lovers of the country, from the society belle to the humblest servant, possess one of these articles of modern manufacture.

In its design it is an outgrowth of the punch purse, so called by its mode of manufacture, which consisted of squares of metal with prongs which were pressed down over rings. These purses were very popular when first placed on the market, but as their design could not be changed, except with different tops, the superiority of the mesh bag is easily conceived. Mesh bags are made very graceful by the mode of shirring the top part near its intersection with the clasp. This is usually done by tapering the top of the bag to points that are afterward connected by rings so as to show a fold. These folds, sometimes three to five in number, greatly improve the design. Strips of mesh varying in width according to the size of the purse, with the ring mesh running in the opposite direction of the purse proper also compose some of the latest designs.

PRODUCTION OF RINGS.

The production of the rings which compose the mesh is not as simple an operation as one might expect. These rings must be of a uniform hardness; if too hard they become very brittle and, therefore, hinder in no small degree the production of the bags. The wire that composes these rings consists chiefly of German silver, although some are manufactured from sterling silver and the most expensive from solid gold. This wire is almost invariably drawn to about 25-1000 in diameter and it is in this drawing process that the workman must study the hardness of the metal, for a little carelessness in this part means considerable in the production of thousands of rings.

MANUFACTURE OF MESH.

The factories which manufacture these purses usually employ an agent who gives these rings out to individuals to make according to a formula, as different bags must conform to a particular top. This seems to be the cheapest as well as the quickest method to increase their output, as one agent for a hustling concern may have as many as three or four hundred persons who devote most of their spare time to the making of these bags. This particular business has been of especial value to the unemployed or families where sickness has left them almost destitute for the necessities of life. In many of the houses among the poorer classes it is no uncommon sight to see whole families engaged in this vocation. In the jewelry districts the writer dares venture to say that two-thirds of the middle class of people, mostly women, are or have been engaged in the production of the mesh bag. Considering the vast area covered by the agent or sub-agent of the factory in the distribution of rings, one can imagine the extent of the production; residents living within a radius of from 10 to 20 miles seem to be as well acquainted with the use of pliers and rings as those in the immediate vicinity of manufacture.

MODE OF FINISHING.

With the possible exception of the lining the assembling of the other parts of the purse is done wholly in the factory. After the bags thus made are returned they are given a heavy plating of silver or gold. Those that are plated with silver are placed in a tubbing machine that revolves and which contains soft soap and water, into which steel shot ¼ inch in diameter is placed. This shot revolving around the mesh produces a very fine burnish to the rings, much better than can be produced by any means of scrach-brushing.

As many as fifty to sixty bags may be burnished in the space of twenty minutes in a machine not larger than and almost as similarly constructed as an ordinary beer keg. It may be well to mention that the tubbing machine, as it is called, seems to be an almost indispensable asset to our modern coloring plant, its finish seeming to surpass the polished surface with much less expense.

THE PURSE TOP.

After the bag is thus colored, aside from lacquering, it is now ready to be joined to the top. These tops are most artistically designed, containing all our modern types of high-class die cutting from the scarab design to numerous models of cupids and flowers. The kind of purse, or, as commercially classed, its number, is usually derived from the top it contains. The tops are always finished in accordance with the bags, the silver plated bags usually containing an oxidized silver top and the Roman bags either Roman or burnished rose gold finish.

The many operations necessary in the manufacture of the top tend to increase quite perceptibly the cost of the purse. The tops may be struck many times in the die and annealed thoroughly before the design is absolutely clear. After the tops are properly struck a lining is usually soldered on the inside and the barbed edges are polished with pumice or tripoli before being ready to receive the buff gloss. The sides of the top are also pierced to accommodate the rings for its attachment to the bag; alternate clasps are soldered to the tops and hinges are also soldered to the sides, which, when properly riveted, afford its easy manipulation.

Most all of these operations require accurate workmen, as any misplacement in the parts or defect in the soldering is sure to prove detrimental to the proper working of the top. Before the bag is joined to the top, linings that are made of different shades of satin or some composed of kid are sewed under the top and suspended throughout the bag. These linings, usually comprising one or more compartments, improve the general shape of the bag and make the shirring more prominent.

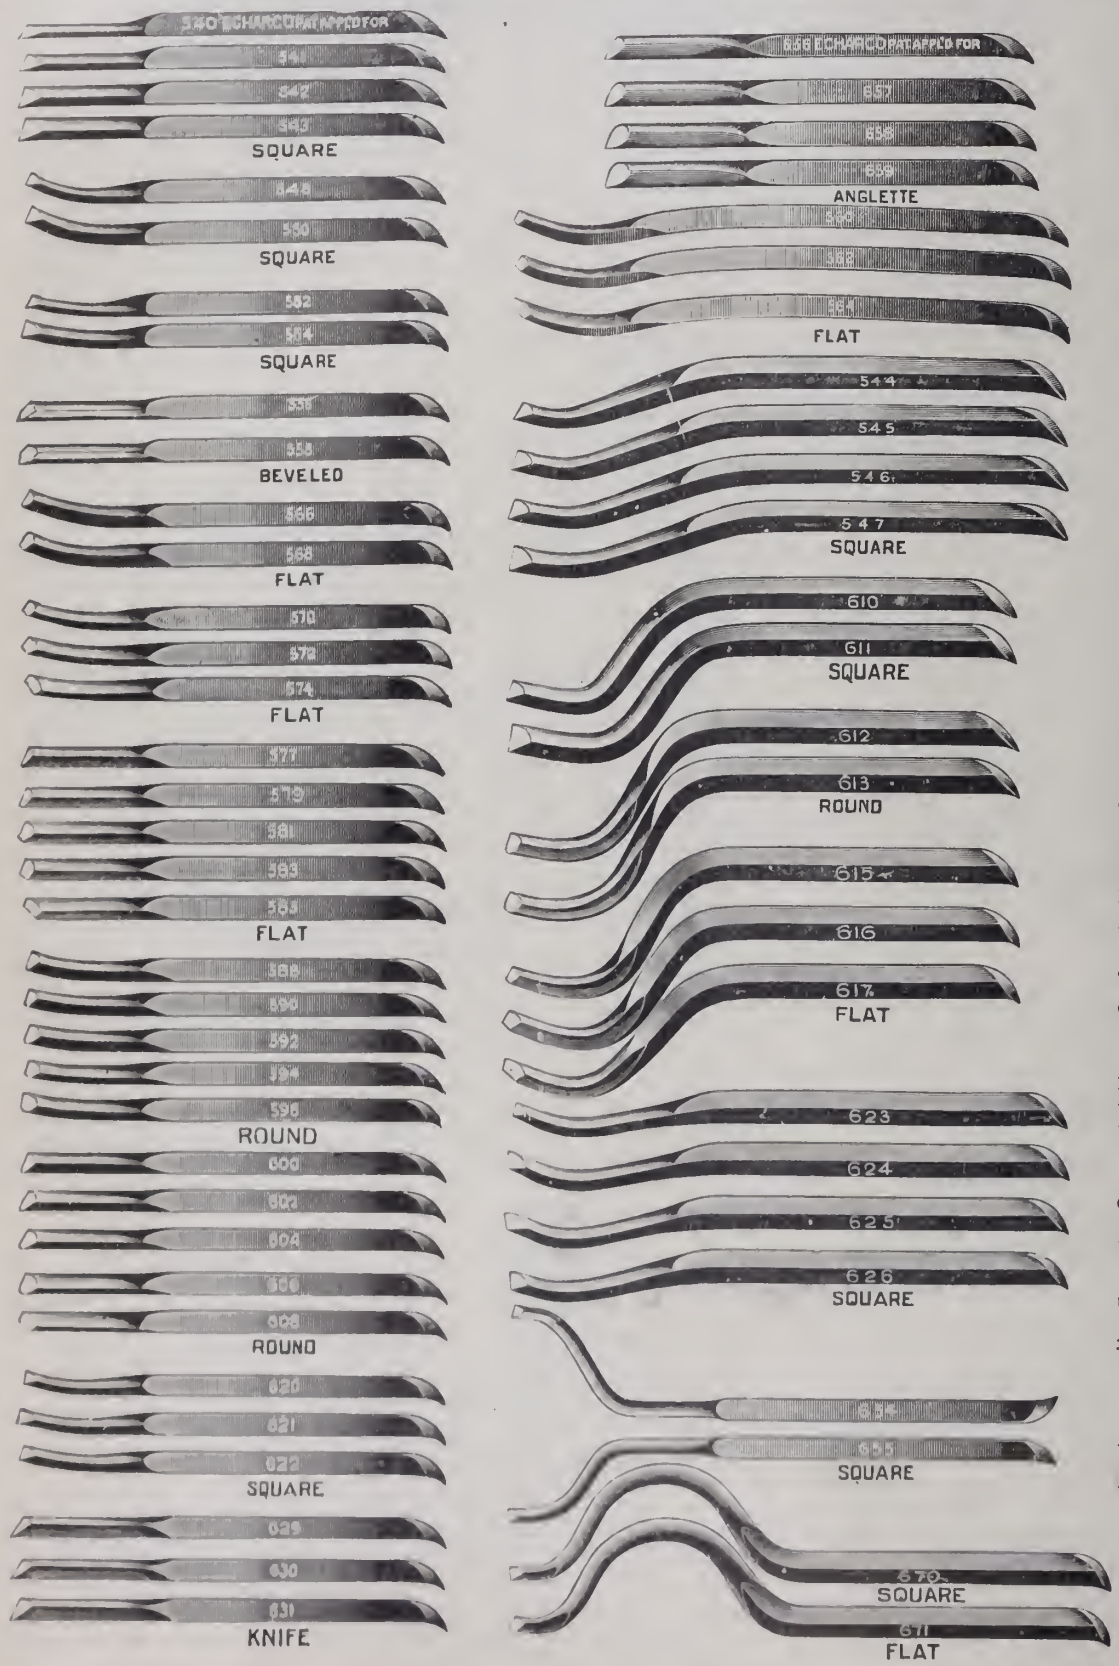
IMPROVEMENTS IN MANUFACTURE.

In all the operations connected with the manufacture of the ring mesh purse many improvements have been made in the making of the top, thereby reducing its cost to some extent. Formerly it was the custom to drill all holes in the top for the joining of the bag, but now that has all been done away with. The bag is either swedged to the top or the top is placed in a press and the apertures pierced in one operation. Other minor improvements in the assembling of parts of the top have also been made, each being an important factor in the mode of production. * * *

Notes of the Watchmakers' Craft.

H. E. DUNCAN, of the Waltham Watch Co., Waltham, Mass., on Feb. 15-16 will deliver a series of lectures on "Watch Mechanism," illustrated by stereopticon views, before the Colorado Horological Society in Denver, Colo. The horological society has extended to every watchmaker in the adjacent territory a cordial invitation to attend.

Plans are being made for the erection of a large clock tower at the intersection of Detroit Ave. and Boulevard, Cleveland, O. The tower will be 70 feet high and of attractive architectural design. Near the top of the tower of the clock four dials will be erected.



Echarco Graver Handle No. 800

THE NEW LINE OF

Echarco Gravers

AND HANDLES

(Pat. Applied for.)

Gravers are of highest grade hand forged Steel, have a special Graver temper, and are ground ready for use. The numerous shapes, designed by a practical Engraver, should meet the requirements of the most fastidious. The handle is of an entirely new construction, most pleasing to the hand. The locking device holds the gravers absolutely rigid, and permits an easy and quick change of one graver for another. The slightly bent ends of the gravers engage in the three notches in underside of handle, and permit the lengthening or shortening of the graver without removing same from the handles.

NEW—WATCH REPAIR RECORD—NEW

Three distinct points have been sought in compiling this Watch Repair Record, namely: That it should be COMPLETE, CONCISE and CLEAR.

A Record that eliminates all so-called "Red Tape"—that does not burden one with lengthy writings and descriptions which are so unnecessary, and at the same time affords one an ABSOLUTE COMPLETE Record.

From the following illustration you will readily note how well these points have been fulfilled, showing the superiority of the "Swartchild's Watch Repair Record" over all others.

ALVIN SILVER

Morning Glory Pattern

925/1000 FINE

One of our new patterns of Sterling table ware, of medium weight d moderate price.

The Morning Glory Pattern is another example of Alvin Superiority—it most attractive and artistic pattern, full of character, in French gray finish, cu high relief, as ornate on the back of each piece as on the front, in fact, excellency of the die work cannot be surpassed. The execution of the flo together with the other details of the pattern, make it a pattern possessing ex sive qualities. Made in full line of fancy pieces, ounce goods and cutlery.

A BRIGHT PROSPECT

A bright prospect is before the retail jeweler who buys his diamonds of us, because then he has his diamonds at the lowest possible prices. He is also sure the stones are exactly as represented.

Consequently no competitor can sell equal goods for less, so his chances of selling are greatly increased.

J. R. WOOD & SONS

at Belcher ring as received with ws badly worn.

How the same ring looks when stone is reset without new claws. Stone is not secure and point is below inside of ring.

How we splice settings and solder in new claws; seams do not show and rings are as perfect as when originally made.

How ring looks with new claws and stone securely reset. Entire ring is finished like new.

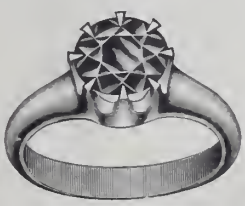
When we tell you that we have received as many as 75 diamond rings in one day for new gold or platinum claws and settings, you will not think us extravagant for using a full page in THE JEWELERS' CIRCULAR to exploit this feature of our business, but will wonder if you are getting your share of claw work.

99 out of every 100 owners of diamond rings willingly pay $1.50 to $5 for new gold or platinum claws or settings on their rings, but would not buy new mountings for $5 to $25.

It is worth while to familiarize yourself and your employees with this work, as it is one of the important little things that help to make your business profitable.

WENDELL & COMPANY

The firm that did much to change the repair end of the Retail Jewelry Business from a source of worry and dissatisfaction to one of pleasure and profit.



47 John Street

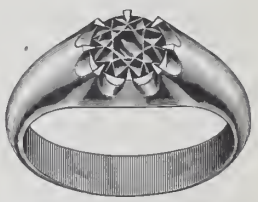
TWO WONDERFUL SHOPS

256 Madison Street
Chicago



Tiffany ring as received with worn off claws. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.
(See cut No. 2 of flat belcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

Oval Belcher ring as received with claws badly worn. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.
(See cut No. 2 of flat belcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

THE PRICES QUOTED ABOVE FOR NEW CLAWS AND SETTINGS ARE SUBJECT TO OUR CATALOGUE DISCOUNT.

WE CAN PUT NEW GOLD OR PLATINUM CLAWS AND SETTINGS ON MOUNTINGS TAKEN IN TRADE AND REFINISH THEM SO THEY WILL BE AS GOOD AS NEW.

WE RETIP CLAWS AND MAKE NEW GOLD OR PLATINUM SETTINGS FOR CLUSTER MOUNTINGS SO THEY ARE AS GOOD AS WHEN ORIGINALLY MADE, AT PRICES THAT MAKE IT ADVANTAGEOUS FOR THE OWNERS TO HAVE THIS WORK DONE.

Carrying no diamonds in stock, entering and tagging each piece of diamond jewelry as received, then giving to each workman but one ring at a time, which is returned before he receives another, prevent any possibility of diamonds being exchanged while in our possession.

CHICAGO, ILL.: Heyworth Bldg. SEATTLE, WASH.: Arcade Bldg.

What You Expect from Your Business Are RESULTS

"MORE THAN I EXPECTED."

¶ If a thousand jewelers told you that they had received "More Than Expected" for their metals wouldn't you feel it worth while to investigate the matter? We would rather *do more* than *do less* than you expect, and we make this statement good with a check that will measure up to your expectations.

¶ If by Our Accurate Valuations you can get more for your Old Gold, Silver, Filled Cases, Plated Jewelry, Sweeps, etc., there is no reason why you should accept less from another concern. We guarantee where others promise and the evidence of it is "Best Proved" by a Trial. This is the time to clean up and if you overlook sending us your next shipment you do yourself and your business an injustice. Shipment returned at our expense if you are not satisfied.

As the Watch Ticks Time Away

The Wadsworth 25-Year "PILOT" Case

HOW MANY TIMES does a watch tick in twenty-five years? You don't have to answer it. It is enough to think of it, and even that almost makes one tired. So many years of constant "tick-tick" might wear out the movement at last, leaving only the

WADSWORTH 25-YEAR "PILOT"

Watch Case to survive it. Looking at the question another way, the child in the picture would have time to grow up and may be have a child of its own who will hold the same "PILOT" case and listen to the ticking of the watch. The case to recommend.

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two million have mesh bags. **We** must supply the other forty-eight million with machine-made mesh bags.

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than used on hand-made bags, and machines harden it still more in working, making wire **stiff and strong,** no **rough joints to catch,** and wear the dress. Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** other **so-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

Our New Selling Plan Is a Success

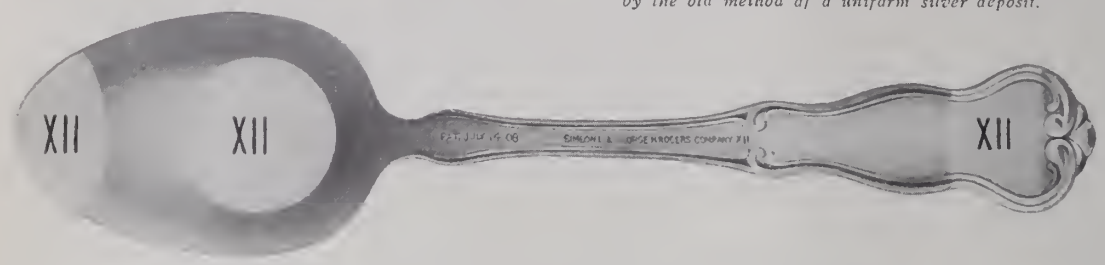
When we announced that we proposed to eliminate from our business the high salaried, expensive traveling salesmen, and deal with you direct by mail, we realized we were opposing a time honored custom of the trade. But we had confidence in the business judgment of the local jewelers, we believed you would readily appreciate our arguments that all the railroad and traveling expenses of these men, while in no way affecting the value of the goods, necessarily added to their cost to you.

YOU PROVED US RIGHT

The heavy response to our announcements, the universal commendation of our plan more than fulfil our expectations.

This is an age of keenest competition and scientific business methods must prevail. We must eliminate all manufacturing and selling wastes. You must buy on the most economical basis. Our selling-by-mail plan is a great stride in this direction. It enables you to obtain the same Woodside Quality Sterling and Deposit Ware you have been familiar with for years, but we are able to reduce the price 15% to 20%. This permits you to

CHOOSE More Goods for the Same the Same Goods for Less **MONEY**



Write us to-day for our new Spring catalog and full details of the new selling plan.

Woodside Sterling Co.

170 BROADWAY NEW YORK

Our regular Spoons and Forks receive a triple silver deposit at the points of wear (marked XII) which enables us to guarantee that our product will outlast any and all other brands of silverware plated by the old method of a unifarm silver deposit.

Your Reputation

and

Our Reputation

depend upon the goods we sell

To retain your trade and to add to it you must sell the best goods obtainable. For the same reasons we make and sell only the best.

We are not relying alone upon our past reputation to sell our goods. Dealers know that our strong hold upon their trade is obtained by our constant effort to produce the best silverware.

Our Sectional Process has proved our ability to produce the most durable silver-plated ware made. Our long experience and success insure to the dealer handling our line a quality that will enable him to secure the cream of the retail trade in his locality.

The low prices which we quote on these exceptionally fine goods make our plated ware the most attractive proposition on the market as a money maker.

Send for our Catalog and give us a trial order. It will add to your reputation as a dealer in very fine silver-plated ware

THE SPRING COMBINATION

CORAL, SAPPHIRE, FRENCH GREY

PINK is essentially a Spring color—the color of the blossoms. It combines delightfully with grey. Hence the beauty and appropriateness of the new combinations of Coral with French Grey. With the same finish also is combined Sapphire, equally appropriate because its blue is proverbially a cool color for the warmer days approaching. The stone affords a welcome variation from amethyst. The line is comprehensive. The Long Chains are in special favor. One should also see effects in Hat Pins, Sash Pins, Brooches and Neck Pendants.

The Benevolent Protective Order of Elks is constantly marching on, increasing in numbers and in strength. We are keeping pace with the movement, always adding to our line of buttons, charms and emblems suitable for the members of the Order. Our trade has shown their appreciation of the assortment which we show by using large numbers of our exclusive designs. We have added many new patterns this season, samples of which we should be pleased to send on request to any jeweler who is interested. Write for selection package. It will pay you to see our new sellers.

Our Trade-Mark, "The Rose," stands for Quality and Excellence

Mr. Retailer:

IF SOLIDARITY GOLD CASES are not "THE BEST POSSIBLE" we are false to our people—false to our principles. We are "A Community of Interests."

Every man attends to his own Knitting, and no man Knits long who Knits poorly, in that Community. We distribute our burdens Wisely, we divide our benefits Justly.

If these features are stamped indelibly in our product, are our Cases Good Enough for You?

They are sold through the WATCH JOBBER ONLY.

Echarco Graver Handle No. 800

THE NEW LINE OF

Echarco Gravers

AND HANDLES

(Pat. Applied for.)

Gravers are of highest grade hand forged Steel, have a special Graver temper, and are ground ready for use. The numerous shapes, designed by a practical Engraver, should meet the requirements of the most fastidious. The handle is of an entirely new construction, most pleasing to the hand. The locking device holds the gravers absolutely rigid, and permits an easy and quick change of one graver for another. The slightly bent ends of the gravers engage in the three notches in underside of handle, and permit the lengthening or shortening of the graver without removing same from the handles.

Price:

GRAVERS, - Each 35c.
Handles, No. 800 " 50c.

For Sale by all Jobbers in the United States and Canada.

NEW—WATCH REPAIR RECORD—NEW

Three distinct points have been sought in compiling this Watch Repair Record, namely: That it should be COMPLETE, CONCISE and CLEAR.

A Record that eliminates all so-called "Red Tape"—that does not burden one with lengthy writings and descriptions which are so unnecessary, and at the same time affords one an ABSOLUTE COMPLETE Record.

From the following illustration you will readily note how well these points have been fulfilled, showing the superiority of the "Swartchild's Watch Repair Record" over all others.

Curious Incense Boat.

IN the illustration on the front page of this issue is shown an incense boat of extremely elaborate construction in the shape of a nef, which is to be found in the treasure of the Basilica di S. Antonio at Padua. It is evidently of German workmanship. Nefs for use in the church are extremely rare; outside of that in the Rheims Cathedral there are probably not many more.

Even of incense boats in general there are not many to be seen besides those that are hidden away among the treasures of some of the more important continental churches, says Dawson. A few are in the hands of private collectors and are only seen from time to time in public loan exhibitions.

Censers and incense boats, at least such of the former as now remain, were nearly always treated in an architectural manner; these are chiefly of the 14th, 15th, and 16th centuries. The richer specimens are a mass of buttresses, pinnacles and gables with windows which provided openings from which the smoke could issue.

Vogue of Dutch Silver.

(From the Philadelphia *Bulletin*.)

AN attractive specialty shown in several of the leading shops is Dutch silver, the vogue of which is probably a surprise to manufacturers, who tentatively launched certain varieties on the market about the time of the Hudson-Fulton celebration in the shape of souvenirs. These, for the most part, were tiny replicas of the *Half Moon* and of Dutch windmills, and both designs immediately found great favor. Pleased with their reception, manufacturers continued to turn out more and more of these small pieces, and now they have a high place among the best specimens of tiny silver cabinet pieces, which also include Dutch shoes carved in typical Dutch indoor and outdoor scenes, and to represent thatched Dutch cottages, marvels of workmanship. Makers of Dutch silver then went further, working out the same ideas in articles for personal and table use result that in some of the best stores the likely to attract holiday shoppers.

A woman who visited a local store three times in two days told a salesman that she found the Dutch silver too fascinating to resist, and that she had to buy something at each visit. Her selections included a candlestick ornamented with raised carved Dutch figures, the handle shaped like a ship; a matchbox shaped like a Dutch shoe adorned with festive Dutchmen, and a toilet bottle partly covered with a raised silver design combining a windmill and a Dutch house.

Some of the best carvings and shapes are combined in berry, bon-bon, salad and other spoons, each quite massive because almost covered with a carved design in relief representing marine views with the *Half Moon* in the foreground; landscapes with peasants, Dutch merry-makings, and so on. There are also tea caddies—square, octagon, round, and oblong, in style and decorations suggesting antiques but costing perhaps a third as much; boxes, round, square, and oblong of many sizes; bon-bon and other small dishes in a variety of shapes; trays, card cases, pen-knives, each of typical Dutch design.

Aeronautic Trophies.

DURING the recently closed first large aero show in Frankfort, Germany, an unusual number of prizes were at disposal in cash, as well as cups, etc. A selection of the latter is shown in the cut below.

Considering them from left to right, we see that the first is a beaker cup 75 centimeters in height, showing the Eschenheim tower in Frankfort. The front view shows that city with the Zeppelin airship in the air. The back represents a scene from the old Frankfort. No. 2 is a goblet in the shape of a Montgolfiere balloon. On it we notice the 12 pictures of certain stars. The third is a cup 55 centimeters high in the form of a free balloon crowned by the Frankfort eagle. Cover, base and column show rich ornaments of colored stones, lapis lazuli and metal leaves. The difficult task to bring the Gothic forms into harmony with the balloon parts is well solved.

The small design (No. 4) is also a Gothic cup of compact shape, richly decorated with leaves. On the upper part are four coats-of-arms surrounded with wreaths in enamel presenting a good contrast with the gold of the cup. The next object has a height of 80 centimeters and contains a French Montgolfier on the top of cover. Then follows a large vase of the style of Louis XVI. upon a fine mahogany stand.

The row is concluded by a Gothic cup 70 centimeters in height in the shape of a free balloon. The base is formed by the car with ornaments of lapis lazuli; also, the middle part shows colored stones. The whole piece is crowned by a Frankfort eagle in strictly Gothic form.

SEVEN OF THE PRINCIPAL PRIZE CUPS AWARDED AT THE AERO SHOW AT FRANKFORT, GERMANY.

SHOW YOUR CUSTOMERS

when they ask for a set of shirt studs, a Line of Larter Automatic Shirt Studs.

TELL THEM they are automatic in action, and can be operated with the greatest ease.

They fit any style shirt made, and are absolutely the best for a coat shirt.

They cannot work out of a button-hole or eyelet-hole, because a strong coil spring holds the backs firmly in position.

There is nothing to come apart and lose.

Silversmiths and Goldsmiths' Work.

An Address by Omar Ramsden at the Seventh Ordinary Meeting of the Royal Society of Arts, London, Jan. 26, 1910.

IT was with considerable trepidation that I undertook the task of preparing a paper on the art and craft of the English silversmith; not only from the natural shrinking of the artist from talking about his work in public, but also from the consciousness of my own inability to do justice to a subject which has been so frequently treated. Sometimes I think it has been treated to death, and yet, on the other hand, the grossest ignorance still prevails upon it, and therefore a standard of taste, in defiance of, and at variance with, those principles and canons of what is good and bad, by which men of culture are guided in the other arts.

It is very unfortunate that the vulgar value of the silver and gold as bullion has always been a great drawback to the artistic appreciation of the craft we are about to consider. Almost in all ages, even the best (if we except the early Gothic), we come across the tendency to vulgarize the real value of the article by an exaggeration of its mere money value in weight and size. Equally unfortunate is it that, in order to preserve and guard this commercial value, a system of markings and dates has been instituted and deified under the title of Hall Mark. This has been a perfect godsend to a mass of experts and authorities created by it, whose particular genius is compilation. These important gentlemen, with their magnifying glasses and much impressive antiquarian chatter, have classified into periods, with their equivalent market value, every article from the beginning of time to the last of the Georges. In fact, it has become a question not of the art of the silversmith, but the glorifying of the assay mark, coupled, may I add, with that of the authoritative expert. The public is acquiescent, because it is so much easier to use tables than brains, and a band of auctioneers keep things going merrily.

And now, having indulged in my little grumble, let me proceed to my paper on gold and silver work.

To cover the whole field of such a subject to-night would, of course, be impossible, for since the beginning of civilization the precious metals have played a very important part in the world, whether for beauty or use.

In the days of the city of Carthage, when the temper of the times was lavish and ostentatious, the possession of wealth meant power, and was, in fact, only possible to the powerful, since it had to be maintained by main force. Then it is we hear of the great Suffete, of Carthage, Hamilcar Barca, spending the livelong day wandering through chambers and caverns, in which were stored gold and silver taken in the wars of Carthage or gained in the mines of Spain by the life blood of untold slaves; opening door and secret panel, the trick of which was known to him alone, its key tattooed on his arm in Puric signs for life-long remembrance, since, once forgotten, this wealth would be lost to man in the depths of the hill of Megara; to pass along from this ecstatic contemplation of his almost limitless wealth, to meet the city ancients in the Temple of the Moon, convened to offer him the leadership of Carthage against the revolted barbarian mercenaries, or, on the other hand, the grim alternative of slow death upon the cross.

Later on, how the greedy eye of Frank and Goth must have opened when, at the taking of Rome, they suddenly broke in upon some splendid repast spread by some too confiding patrician, who had lived his accustomed life of luxury to the last, never believing that the Sacred City could fall before the despised Goths, however numerous. One sees the rose-festooned marble court fill with a rough and turbulent horde, checked for an instant at the sight of the tables with their treasure of gold and silver, such as perhaps the world has never since seen for quantity of articles of exquisite form in actual daily use. Then what a scrambling and fighting that the most prized pieces might remain to the strongest arm! What killing of Goth by Goth for covetousness of them, so that by means of his gold goblet the Roman was often avenged.

What bullock loads of precious plate one sees slowly drawn over the level plains of Lombardy and through the somber Brenner Pass; through those dark defiles, where now stands smiling Innsbrück, on to the wild homes of Franconia, or perchance by the side of the stern Rhine or great Danube, as attested even now from time to time by the finding of immense treasure trove; treasure no doubt buried at a later date, when, in their turn, these parts were swept over by Hun and turk, and thane and lordling hastily buried the treasure of old, which their most cunning artificers could not even begin to copy, much less create. Not but that they had their influence upon the intention of the barbaric artist, as is shown by Scandinavian and Burgundian work now existing. The cups, dishes and weapons used by the prototypes of Wagner's heroes in his noble rendering of the Burgundian myth, the Ring of the Nibelungen, would be a curious mixture of Roman and Scandinavian, a style of work that has much in common with Irish silver work, but with less refinement.

There is, of course, no doubt of the real worth of Irish work of the seventh to the 10th centuries, a time when most of our own island was wrapped in artistic darkness, a darkness that is only broken by the description and tradition of the work done by St. Dunstan. Unfortunately, none of his work has, I believe, come down to us, but it must have been of exceeding beauty and skilfulness, for was not he, by common consent, the patron saint of English gold and silversmith? There remains to us, however, the Alfred jewel, a mysterious and beautiful object, and well worthy to be, as it is, almost the only example of a most interesting epoch. In the case of St. Dunstan we have a great tradition, without surviving examples; whereas of Irish art we have many examples almost without any tradition as to the artificers. The bell covers, croziers, crosses and so forth have come to us with a halo of romance from those dark and vague days of which the best history is that of poetry. These objects, with their gleam of jewels, curiously intertwining knots and weird beasts and inscriptions interlacing, that look like talismen of some black art, recall fierce kings with fluttering purple cloaks and jeweled swords succouring timorous maidens, and all the mysterious beauty of the legends of Tristan and Isolde, King Mark, Merlin and Vivian.

I recently heard a well-known authority say that "he considered that, with the exception of one or two founders' cups, and one or two pieces of Gothic silverwork in England, *all* English silverwork existing was of the devil, that the furnace was too good a fate for it, and that for true silverwork we must look to Ireland." This was the judgment of an extremist, and I must say that personally I consider Irish work more as a jewelry on a large scale than as silverwork. I think it is most beautiful, but of the beauty of a jewel. Even the well-known and much copied stone crosses are based upon a design consisting of a series of bosses representing so many jewels, round which play just the sort of lines that should surround the setting of precious stones.

Next picture the entrance of the Crusaders into Constantinople. The rude, if gallant, knights of the Latin cross with their eager but ragged and starving followers, meeting for the first time the effete culture of the Greek Cross, defiling before the splendid and awful figure of the Emperor, seated on his throne of gold, ivory and precious stones, his crafty head weighed down with massive crown, his form with heavy robe, and holding in his ineffectual hand the scepter of the Eastern world, all these of the most precious and intricate workmanship that Greek art could devise. He little thought that all his power and splendor was to be borne down by the fanatical Turk and all his treasures scattered to the four winds, in the remarkable way in which gold and silver objects so frequently were flung afar from the land of their birth in olden days.

There is in the Victoria and Albert Museum a beautiful little chalice of very early date found in Iceland. It is so good in proportion and ornament that, if it was not made in Byzantium, it is at least a very clever copy of one that was so made. In all probability it had been looted from the Bosphorus, or maybe Ravenna, and had made the long journey to Iceland by Viking ship.

Again, the first missionary sent by Rome to the wilds of Norway was hospitably received by the Norsemen, but recoiled when offered wine of the Garonne out of a gold chalice, seized, as he well knew, from the dying hands of some murdered priest in the sunny lands of the south.

In short, the looting from the vine lands of goblets, as well as of skins of wine, was an important item in the gradual education of the northern artist. His eye and mind, which until this epoch had dwelt upon mere

Roman Pearl Necklaces

retirons of the gloomy signs of Woden Thor hammers, were enabled to con- t their work with those sunny designs m southern lands, and were opened to infinite possibilities of a new style. His e but vigorous hand grasped the living dition of a great art from the hold of Greek and Roman at a moment when, r some centuries of moribund existence, t hold was relaxing and their art on the nt of extinction. For some centuries it w, at first slowly and then by leaps and nds, until it astonished the world with perfection of Gothic art—an art, be it cup or cathedral, tankard or town hall, beautiful and suitable for our dark thern climes as classic and Renaissance ugly and unsuitable; for with its high- ched roofs to throw off snow and rain, aspiring turrets, buttresses and towers, deeply cut bands of ornament and vast panses of stained glass, it is capable of ing deep satisfaction to one's soul, even the gloomist day (it must, however, be real article, and not the well-named rpenter's Gothic" of the Victorian era); hereas the one or two bits of Gothic exist- in Rome or Naples seem almost silly their sunny surroundings, just as the ve of a Greek moulding, designed for lliant sunshine, looks heavy and sodden England, as anyone who has been to the itish Museum on a rainy day will re- mber to his cost.

Even to the most cursory student of his- y the words silver and gold must recall glamors of the past.

What visions of the somber gorgeousness medieval shrines set deep in the heart some casket cathedral of wrought stone! lver-sheathed high altar weighed down by lden crucifix and the six great candles of e high mass, three on either side; the ld sobered by age, and the ever-wreathing, ngent-smelling incense, through whose rling clouds flash out their encrusted wels, whose fire no age can dim, and be- re which progresses the ever-shifting geant of Roman ceremonial, with all its vely use of chalice, pyx and gold-encrusted bernacle, monstrance and miter of jew- ed gold, bell and book, cross and crozier lustrous silver, and cope and chasuble cloth-of-gold, while around stand red- bed acolytes with standards of silver, earing lighted candles, which sway over e heads of the officiating clergy. The 'ascal candlestick, some 12 feet high, of tricate wrought silver, stands on the altar's ght, around which group the censers, with eir spikey, clanking, silver-chained incense rners, for whose incense they, from time time, approach the altar to receive it out a silver incense boat by means of a lden spoon surmounted by a crystal dove, the jeweled hands of the priest, whose inly seen but lustrous robes are now and gain thrown into relief by contrast with e side altars, banked high with golden wers and silver alms dishes, ablutionary owls, reliquaries and other vessels used in atholic ritual, perhaps the richest pageant er devised by man—the whole seen hrough an immense grille of dull gilt rought iron, which soars above and out of he picture.

However, after this digression, we must eturn to our subject of silver and gold, through its few remaining phases, until we reach the sad *debâcle* of Victorian times.

Coming then to Tudor days, what a wealth of plate must have existed in our own little isle! Under Cardinal Wolsey, when the great palace of Hampton Court was full of guests, think what that meant; for the records speak of dozens of important political guests and hundreds of gentlemen followers all served upon gold and silver dishes (which later, if I remember rightly, it took 30 bullock wagons to remove). Add to this the colleges, hospitals and titled and landed gentry, all possessing rich plate, and then think what a holocaust of precious workmanship there was under Charles I and Cromwell—to mention only two of our quarrelsome rulers—to provide the sinews of war! For, remember, all this plate was of more or less fine workmanship. The word "shoddy" had not been invented, and the beauty of most of the surviving pieces of plate is beyond question. In fact, I think that the mass of silverwork seen today is not worthy of being melted in the same crucible; which word again brings me back to the consideration of silver from the practical point of view, which is the real object of my paper.

We must remember that in the evolution of executive ability the art of working in the precious metals does not follow on the same line of development as in painting or sculpture. The early mastery of technical difficulties seems to have been so perfect and so universal that, when considering the advance from a primitive state to one of greater pretension to culture, we may leave out of consideration the question of what particular degree of difficulty in working has been overcome, and shall demand good workmanship as a matter of course.

Now, having narrowed the field, we will consider what that workmanship shall express, and that is the basis upon which my argument rests. First of all, we must consider and bear in mind the three qualities of gold and silver, ductility, beautiful color and preciousness. It is owing to these qualities that men have from the earliest time used them to enrich their costumes, weapons and articles of utility and commemoration. Ruskin expressed the last idea when he wrote:

"At every marriage and at every birth, get a new piece of silver if you will, but with noble workmanship upon it, done for all time, and put it among your treasures; that is one of the chief things gold and silver was made for and made incorruptible for."

There have been connoisseurs who have drawn inviduous contrasts between wrought ironwork and wrought silverwork, to the disparagement of the precious metals. With these gentlemen I do not agree in the least. Each metal has its own special charm and its beauty should be the outcome of its own particular properties, the special properties of gold and silver being ductility and soft polished surface. For let it be clearly understood that I hold a brief, and a very decided one, too, for beaten silver and gold as opposed to cast work. The latter is sometimes necessary as a means of execution, but only for accessories, such as small statues, flying buttresses, etc. Cast silver work, I hold, should only be used in places where a mass is required for strength, either esthetic or actual, or as a more convenient way of getting a result, as in a figure. To make a figure up by beating out thin plates and joining them together is a very long, laborious and handicapping process in the way of success, from a modeling point of view. The true silversmith of to-day, as in the best Gothic times, is a beater of metals. His eye, by instinct and a prolonged study of successful forms and decorations, selects a scheme that can be produced at first hand by hammer work, without the intermediate processes of modeling, moulding and casting. Each period of decadence of the goldsmith's art (this term, of course, includes that of the silversmith) has been marked by the worker resorting to casting as a means of expression. Look at the fairy-like gold work of the Etruscans. It is all, or almost all, beaten and soldered work. The Greek and early Roman work is all, or all I can remember, beaten. The lower Roman Empire cast a great deal of work, but it was but natural that that should follow the debasement of their other arts. In early Gothic times (Gothic at its best), as seen in the exquisite incense holder dug up in Whittlesea Mere, silver work was almost all wrought and beaten, whereas in its decadence silver and gold were almost entirely cast, particularly in Spain, Portugal and Italy.

The Rennaissance repeats the same facts, for in its later period we find entire works of cast silver—figures, pillars, domes, in fact, architecture in little, put together with screws and nuts like a machine. It may be ingenious, but it is not silver work. I hold that when one sees a work executed in silver entirely, or even principally, by the process of casting, one sees an accident, because the special beauties of the metal have not been studied. It is like cutting a diamond *en cabochon*. It may be a most beautiful design and full of precious modeling, but it is not silver work, or had I better say silversmithing? It just happens to be composed of silver, and is more of the nature of a model, on a small scale, of a bronze statue, or a stone palace, and to be treated seriously should be in its legitimate material, whether wood, stone or bronze. It cannot be too much emphasized that the designing of gold and silver must be in beaten forms, as any other treatment betrays an imperfect appreciation of the material, however beautiful the details may be, or costly the workmanship of chasing.

Please do not think that by beaten work I mean hammer marks, such as those with which our West End shops now sometimes pock-mark their otherwise machine-made silver in order to draw in a chance customer who has been told "If a thing is hammer-marked it is hand-made and artistic." No, by beaten work I mean form that has been stretched out under the hammer from the flat sheet, each succeeding tap tending to make the desired shape, which may not show the marks of the hammer at all.

(To be continued.)

By mutual consent the firm of Palmer Bros., Mankato, Minn., was recently dissolved. W. E. Palmer will continue the business at Mankato, and will collect and pay all bills. A. E. Palmer is president of the A. E. Palmer Co., Grand Forks, N. Dak.

eresting Session of the Executive ommittee of the New York State Retail Jewelers' Association

TICA, N. Y., Feb. 9.—An important ting of the executive committee of the N York State Retail Jewelers' Associa- was held at Boggs' Hotel, Monday, and nbers of the State association from any, Binghamton, Syracuse, Rochester Buffalo were the guests of the Utica ciation at a dinner at 6 o'clock, fol- d by a theater party in which 31 rep- ntatives of the retail jewelry trade in joined with the vistors in celebrating advent of good fellowship and the fact co-operation is rapidly replacing com- tion.

uring the afternoon the visitors were about the city by a committee of the association consisting of Messrs. Hy- . Wineburgh, Arthur D. Evans and es R. Burtiss. A visit was made to the ome Home where the visitors were wn the greatest courtesy. While at the e the visitors had the pleasure of wit- ing the rehearsal of the home orchestra er a competent instructor.

he executive committee convened with following present: President Evans, e-President Mix, Treasurer Crouse, retary Sunderlin, Vice-President Scheer, Messrs. O'Donnell and Zilliox, of the cutive committee.

he president brought up the subject of approaching convention at Rochester considerable discussion was had on the stion of the program of the convention upon motion of Mr. Mix, seconded by Crouse, it was decided to have a vention of retail jewelers only, the en- e program to be furnished by the mem- s of the State association.

he president submitted a program with jects of addresses which was decided to of an appropriate nature. The sub- ts will be such as, "The Retailing Job- "; "Advertising a Retail Jewelry Busi- ss"; "The Fixed Selling Price"; "The pair Department, a Necessary and Profit- le Adjunct of Every Jewelry Store"; uying Stock"; "What Constitutes a Fair ofit"; "The Local Organization; Its Ad- ntages"; "Trade-Marks and Qualities"; mployer and Employe"; "Competition d Co-Operation"; "Price Cutting; Its actice and Its Remedy"; "Keeping Up pearances."

Mr. Sunderlin brought up the matter of e annual convention and stated that ursday, May 26, and Friday, May 27, had en selected as the days for the 1910 con- ntion. He outlined the plans that the chester association has made for enter- ining the visitors during the convention. ll details will be sent to the members of e association later.

The question of the banquet in connec- on with the convention was brought up d it seemed to be the opinion of the ex- utive committee that it should be careful out establishing precedents which would hard to maintain; also that no unusual pense should be thrown on the shoulders any local association. It was therefore oved by Mr. O'Donnell, seconded by Mr. illiox, that the expenses of the annual nquet be charged to each member of the association attending, at the exact cost of serving.

The returns from the circular letter sent to jobbers were canvassed by the executive committee and it was decided that before publishing the lists should be sent to the local associations in Buffalo, Rochester, Syracuse, Utica, Albany, Elmira and Binghamton for revision before being published and mailed to the membership. After the revisions are made the president and secretary were directed to prepare a circular letter to be sent to the membership containing reports of what the association is doing and enclosing a list of the non-retailing jobbers.

The membership of the New York State association is now 110 and is growing rapidly. The convention at Rochester promises to be profitable in its instructive talks and entertaining in amusements.

Those present at Utica Monday and who were the guests of the Utica association were: Albany.—E. D. Mix, E. F. Wentworth, F. D. P. Jennings and J. J. Fuhrman. Binghamton—Benj. T. Ash Buffalo.—Albert Zilliox, Louis Schutt, Emil Dettling, August Hoyler, Richard Petersen. Rochester.—C. E. Sunderlin, E. J. Scheer, Geo. P. Klee and S. D Burritt. Syracuse. —Charles A. Crouse, John Bleit. Those present from Utica included the following: W. B. Wilcox, A. J. Rehn, John Brown, Hyman Wineburgh, Jas. H. Price, John D. Greene, S. Charles Greene, James R. Burtiss, J. F. O'Connor, G. Will Payne, John Hughes, Thos. Lafferty, W. A. O'Donnell, E. C. Boucher, Wm. Lehman, Louis Vaughn, John Hannan, Jeremiah Gomph, Chas. P. Gomph, Gustave Goering, Pierre F. Darrigrand, Richard Perlen, C. Clark Jones, George Yaekle, Thos. F. Murphy, Fred W. Houghton, George H. Evans, Arthur D. Evans, Charles T. Evans, William W. McDaniels and P. Erwin Crippen.

Little for Creditors of Morris Weinthal Who Went Into Bankruptcy at Pittsburg, Pa.

PITTSBURG, Pa., Feb. 11.—Morris Weinthal, of 6806 Frankstown Ave., has filed a bankruptcy petition in the United States District Court, as noted in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, and a United States Marshal is now in charge of the store. His liabilities are $1,845.71 and his assets only $800.

J. Weinthal, a relative, is the principal creditor, having a claim against the bankrupt for $300 for wages. The larger creditors are Edward Wagner, rent, $32; Graffner Bros., $183; Landaw Bros., $124; J. Bernstein, $775; Park Bank, Pittsburg, $135; L. Hahn & Co., $52; Keystone Post Card Co., $65; Solomon M. Mendahl, $95. Weinthal's stock in trade is valued at $500.

The bankrupt claims $300 exemption of goods as provided in the bankruptcy act, so that there likely will be little left for the creditors. A meeting of the creditors will be held in a few days.

Mr. Leary, of Leary & Penfold, 9 Maiden Lane, has just completed a new novelty, soon to come on the market, which should be very popular. Wm. C. Penfold will show this article to the trade this week.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Feb. 7.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

Auckland: 59 cases clocks, $1,196.
Bombay: 22 cases clocks, $500.

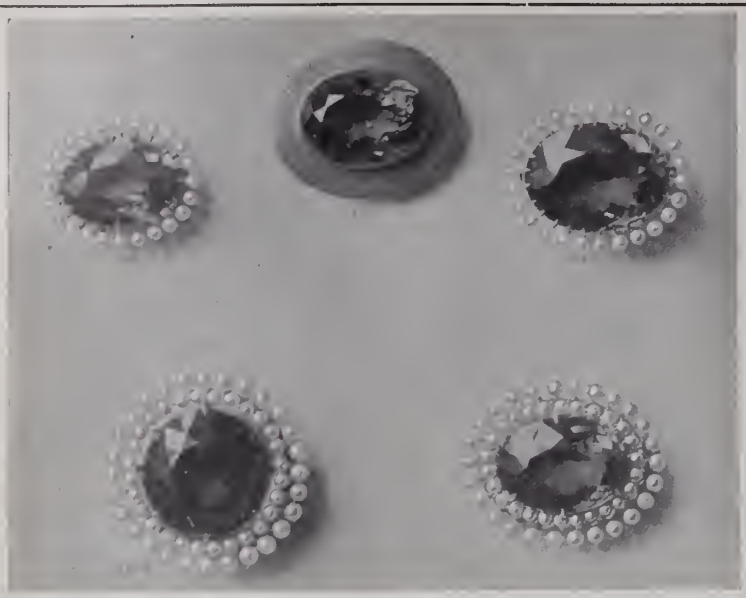
Sheffield: 4 cases jewelers' sweepings, $2,600.
Sierra Leone: 1 case watches, $196.
Sydney: 2 cases optical goods, $176; 75 cases clocks, $854.
Vera Cruz: 1 case plated ware, $67; 44 cases clocks, $640.



Police Capture Thief While He Is Robbing Jewelry Store at Niagara Falls, Can.

BUFFALO, N. Y., Feb. 10.—John Millan, who claims he came from Buffalo, is under arrest at Niagara Falls, on the Canadian side, on a charge of robbing the jewelry store of George E. Ditmars in that city. Millan was arrested by Sergeant Welch and Patrolman Dart. The prisoner was arraigned before Magistrate Fraser and was remanded for eight days. Chief John Kimmins will look up the man's record. He is believed to come from Hamilton, Ont.

Millan, who was surprised by the police officers in the store, is alleged to have collected about $400 worth of trinkets from the place. A passerby chanced to see the man in the store and, thinking his actions suspicious, he notified the police officers. Sergeant Welch entered at the rear through a window broken by the burglar. Dart took station at the front door. Revolver in hand Welch came up with his man, who meekly surrendered.

Millan had a various assortment of bracelets, cuff buttons, watches and fountain pens in his pockets.

BUFFALO, Feb. 12.—Chief of Police Kimmins, of Niagara Falls, Ont., says that John Millan may have been a member of the United States Infantry stationed at Fort Leavenworth, Kans. On Wednesday, Feb. 16, the prisoner will appear before Magistrate Fraser on a remand for a hearing. Word from Fort Leavenworth is expected by that time.

AMETHYST JEWELRY

We offer very fine amethyst jewelry in select amethysts, in combination with pearls and pea and diamonds, at moderate prices.

DIAMONDS

We have a large stock of carefully selected Loo **Diamonds** of all sizes and grades, which we a offering at the old prices.

ditors' Committee Reports on the ondition of Lyons Bros., Chicago, l and Recommends a Settlement.

HICAGO, Feb. 12.—In the bankruptcy case Lyons Bros. the creditors' committee has to the creditors a statement which ws that the liabilities aggregate $629,-45, of which $137,500 is for borrowed ney, secured to the extent of $100,000. e appraisers appointed by the United tes District Court have appraised the gible assets as follows: Merchandise, 5,921.40; printing plant, $2,703.19; furni-e and fixtures, $9,404.74; electric light em and supplies, $2,793.86, making a l of $190,823.19.

n addition to the above the receiver had hand, Feb. 4, 1910: Cash, $60,556.07, lized from sales of merchandise and col-ion of accounts; also real estate equities rth not to exceed $10,000. The balance the good uncollected accounts and bills eivable belonging to the estate on Feb. 1910, amounted to $80,000.

There is due the State about $7,000 for es, which is a prior lien and must be d in full. There is also to be paid the eiver's fees and expenses, trustee's fees, eree's commission and attorney's fees, of which will aggregate a large sum of ney.

With this view of the situation, from the above figures, as well as the general conditions governing, the committee recommends the acceptance of the following proposition: A total of 33⅓ per cent., to be paid as follows: 11⅓ per cent. cash and the balance in equal instalments, to be paid in six, 12, 18 and 24 months, deferred payments to bear 5 per cent. interest.

Geo. N. Schaeffer, Who Murdered Leopold Ermann, a Philadelphia Jeweler, Hanged at Allentown, Pa.

Allentown, Pa., Feb. 10.—George N. Schaeffer paid the penalty with his life in the corridor of the county jail here to-day at 10.05 A. M., for the murder on his chicken farm, near Schencksville, this county, Nov. 18, 1908, of Leopold Ermann, 1305 N. 7th St., Philadelphia, a traveling jewelry merchant. The execution was conducted very quietly and privately, the trap being sprung by James Van Hise, of Jersey City, the official hangman of New Jersey.

Schaeffer went to his death unfalteringly. He confessed that he killed Ermann in the heat of passion because the old jeweler twitted him about his approaching marriage to Miss Florence Shuler, of Siegersville. After dismembering the body Schaeffer buried it beneath the floor of his brooder house, which he subsequently concreted.

Schaeffer was to have been executed Jan. 4 last, but on his plea that he desired more time to prepare for death Governor Stuart granted him a new lease of life until Feb. 10.

After the execution the body was taken to Unionville Church Cemetery for interment.

Following the disappearance of Ermann, who carried with him a stock of watches, jewelry and trinkets valued at $800, and about $60 in cash, his brother, Jacob, employed detectives and offered a reward of $500 for his brother, alive or dead. Schaeffer was arrested Jan. 16, 1909, and at once employed counsel, insisting that he was innocent. Jan. 11 the concrete floor of the brooder house was dug up and Ermann's body in six pieces, together with his grip, was revealed beneath. Schaeffer was tried and convicted on June 19. In August last Schaeffer attempted to break jail, but the attempt was frustrated.

Schaeffer's crime was the more cold-blooded for the reason that Ermann was particularly fond of him, and on more than one occasion had entertained him at his Philadelphia home. He had favored Schaffer's wedding to Miss Schuler and had informed certain people of his intention to make the couple a handsome present upon the occasion of their marriage.

It was Schaeffer's idea to make a statement to those assembled about the scaffold, but acting under instructions from the sheriff, the official hangman quickly adjusted the black cap and rope and pulled the cord that dropped the weights that pulled Schaeffer into the air.

The store at present occupied by J. S. Newing, Binghamton, N. Y., has been leased for a long term. It will be remodeled for the use of the Broome County Trust Co.

Tracks in Snow Lead Police to Hiding Place of Jewelry Stolen from Auburn, N. Y., Store—Two Suspects Arrested.

Auburn, N. Y., Feb. 9.—Two women passing John Gruner's jewelry store in the Osborne House block about 11:30 o'clock Sunday night heard a noise resembling falling plate glass. They glanced into Gruner's store and saw two men taking jewelry out of the cases. The women notified a traveling man at the Osborne House and the police were told what had happened. When the police reached the Gruner store the thieves had left.

Fresh snow had fallen. The police saw tracks leading from the rear of the store. They followed them without difficulty to an old mill race near Washington St. There they unearthed the burglars' "cache." About $500 worth of jewelry, including 89 rings, 14 watches, 11 bracelets and a small clock wrapped in an old vest were found. Mr. Gruner identified his property.

The police soon arrested two former Auburn convicts, William Dittmars and Michael Coughlin, and they have been held for examination on Feb. 14 on charges of burglary and grand larceny.

The burglary was a daring one. One of the door windows had been smashed. The burglars were evidently posted as to the time when a patrolman would pass the store. A disagreeable night aided them also. Both Dittmars and Coughlin deny the charge.

Dittmars, Coughlin and another thief robbed the Gruner store in 1903, securing about $500 in plunder. Dittmars got away, but was caught a few years later. The jewelry was never recovered. In 1905 Coughlin and another man stole a traveling bag containing jewelry valued at about $1,000 and owned by Mrs. Henry R. Hurd, of Boston, on a New York Central train. Coughlin planted the bag and its contents near the spot where the Gruner jewelry was recovered last night. He was captured that time while trying to sell a brooch, valued at $400, for $10.

Despondent and Ill, Denver Jeweler Commits Suicide by Swallowing Morphine.

Denver, Colo., Feb. 9.—After a long illness of consumption and depressed by family troubles, David Lemport, a manufacturing jeweler, committed suicide by swallowing a dose of morphine. He was found early Saturday morning at his home, 1120 Curtis St., in a dying condition and passed away at the County Hospital, to which he had been removed.

The jeweler left a letter dated Feb. 1, stating that he would commit suicide Feb. 5, which was the anniversary of his son's birthday, and also the anniversary of the date he had gone to jail by reason of family differences. He asked that his body be cremated.

Deceased was 44 years of age and came here with his wife and five children five years ago. He has been a sufferer from lung trouble and he and his family have been in destitute circumstances for a long time.

The Japanese Cultured Pearl

IT IS NOT an artificial pearl.

IT IS A REAL ORIENTAL PEARL produced by the pearl oyster in much the same manner that all the other species of pearls are produced.

It is the product of a long, unceasing process of cultivation, consuming a period of not a day, a week or month—but FULL SEVEN YEARS and over, a process so characteristic of Nature's painstaking, patient, careful work in making her most favored gems.

Only a small part of all the oysters cultivated in the Bay of Ago mature, and of these, but a percentage yield the gem which, however, once produced, is well worth the labor, skill and patience spent.

It is as beautiful as the process is fascinating—although difficult.

You cannot afford not to have this pearl in your line.

Its merits adequately represented—its demand's assured.

LOUIS J. DEACON, Atlantic City, N.J.

Detectives Follow New Clew in Sample Trunk Mystery.

San Francisco, Cal., Feb. 7.—San Francisco detectives are still busy trying to solve the sample trunk mystery that has been puzzling the officials of the Southern Pacific Railroad Co. as well as the Los Angeles wholesale firm to which the stolen goods belonged, and while the trunk has been found, together with a portion of its contents, the value of the jewelry it contained is still missing and the perpetrators of the clever robbery have not yet been apprehended. Agents of the railroad company have gone to Los Angeles, taking the trunk with them.

Quincy, a lock expert, has given it as his opinion that the two locks on the trunk had neither been forced nor picked. The woman who is supposed to have used the trunk must have used either the original keys or duplicates, detectives say, as it is declared that there are no duplicate keys made for such locks. H. W. Copp appraised the value of the goods that were stolen, and it is declared that out of the list valued at $11,000 only about $650 worth remains. Only the valuable articles were taken, and either the thieves were expert judges of jewelry or knew in advance which of the articles were valuable.

The goods that were left were bulky articles, consisting largely of combs, plated jewelry and imitation stones. Adam Gillingham, an insurance man, was present at a conference held just before the case was transferred to Los Angeles, and stated that the firm represented by him had insured the trunk for $5,000, but declared the salesman had violated the provisions of the policy by not accompanying the trunk from the Southern city. He stated that after checking the trunk the salesman waited 12 hours before leaving for San Francisco.

The trunk arrived here Dec. 30, and was immediately claimed by the mysterious man in the case. The salesman did not arrive in this city until Dec. 31., and when he presented his baggage check received an empty suit case. Fink & Co. have filed a claim against the railroad company and have valued the contents of the trunk at $6,000.

Death of William Albert Reider.

West Newton, N. J., Feb. 11.—William Albert Reider for 31 years a jeweler of this place, died at his home, 8 Union Pl., last Friday night of heart disease. Mr. Reider was within a few weeks of being 64 years old. He was the senior member of the firm of Reider & Murray, Spring St.

In October of last year Mr. Reider's health began to fail, but, with the exception of one or two periods of sickness he attended to business up to within the last few days. Deceased was the son of the late Mr. and Mrs. John Reider, of Carbondale, Pa., and was one of a family of seven children, all the male members being jewelers. After he had learned his trade he conducted a store for about two years at Belvidere, and then went to Washington, Warren County, where he was in business for nine years. In October, 1869, during his stay there, he married Miss Catharine Felver, who still survives him. From Washington he came here and established himself. About 12 years ago Mr Reider took his clerk, Thomas Murray, who had been with him since he first came here, into the firm.

Besides his widow, Mr. Reider is survived by two sons, Charles, at home, and William, of The Bronx, New York. A brother and two sisters also survive, Joseph, of Cortland, N. Y.; Mrs. R. L. Hine and Mrs. James Higgens, of Paterson.

Jeweler's Son Charged with Being Responsible for Fatal Automobile Accident at Denver.

Denver, Colo., Feb. 9.—The authorities of this city have become active in the matter of the automobile accident which, as told in the last issue of The Jewelers' Circular-Weekly, resulted in the death of James Baker, a retail jeweler and a representative of the Frank M. Whiting Co., Mrs Mary Hamilton Keating, the daughter of a local jeweler, and Miss Virgil Cain, and also caused the injuries to Russell F. Talbott, salesman of the Alvin Mfg. Co., and to Morris Mayer, son of Sam Mayer, of this city. The four others were guests of Mr. Mayer, who was driving the automobile when it collided with a trolley car. The authorities now seek to place the responsibility of the accident upon Mr. Mayer.

After the burial of Mrs. Keating, Wednesday, and the shipment of Baker's remains to Cincinnati, it was believed that the incident was closed as far as the prosecution was concerned, but later an information was filed by the District-Attorney in the Criminal Court, charging Mayer with manslaughter, being responsible for Mrs. Keating's death. The prosecuting witness is said to be Jos. A. Hamilton, father of Mrs. Keating, and the names of 22 witnesses are indorsed on the back of the information.

Mr. Talbott, who is recovering from his injuries, is an important witness in the case and expected to leave Denver before the prosecution was instituted. As a result of the activity of the authorities it is reported that he will be asked to give bonds to insure his appearance at the trial.

Death of Henry Wolf.

Louisville, Ky., Feb. 9.—Henry Wolf, who conducted a jewelry store in this city for about 40 years, died Feb. 6 at his home, 306 S. Preston St., and the funeral services were held yesterday afternoon from his late residence.

Mr. Wolf was a native of Germany, in which country he was born 72 years ago, and there learned the watchmaking trade. He came to the United States as a young man, and started in the jewelry business. After settling in Louisville he opened a store, where his ability as a workman and his honesty and integrity soon served to give him a reputation as a merchant and a jeweler. He built up a good trade and remained in business alone for many years, conducting a store at 508 Preston St. He was highly regarded and well thought of in the business community of this city.

Deceased is survived by a daughter, Mrs. Minnie Schoening.

Edwin Zittle has just resigned his position with C. C. Fried & Son, Springfield, O., after 31 years of continuous service.

Fire Causes Damage to Building Occupied by Manufacturing Jewelry Firms of Providence, R. I.

Providence, R. I., Feb. 12.—Fire in the brick building, 109 Friendship St., belonging to Charles W. Bowen, and occupied by manufacturing jewelers, caused damages of several thousand dollars to the building and contents, on Tuesday morning. Patrolman R. H. Rowe was passing the building about 3.55 o'clock in the morning, when he discovered smoke issuing from the windows and at once sounded an alarm.

The blaze started on the first floor, in the shop of the Macomber Jewelry Co., from some unknown cause. The flames rapidly worked their way up to the roof through an air shaft, causing considerable damage to the shop of the H. N. Pervear Jewelry Co., on the second floor, and that of the Craft & Newcomb and the Empire Jewelry Co. on the third floor. The damage was mostly caused by smoke and water. The loss on the building was estimated at $1,000, and that on the jewelry establishments at approximately $3,500 to $5,000.

Smuggled Jewelry to be Sold by Government at Boston, Mass., Feb. 19.

Boston, Mass., Feb. 14.—Announcement of a sale to take place in the Federal building in this city next Saturday, Feb. 19, under the direction of United States Marshal Guy Murchie, recalls a smuggling case that was of interest to jewelers hereabouts some time ago.

The property to be disposed of comprises a lot of smuggled stock that was confiscated by the government. It was seized from Evaristo Nagheri, of Italy, who brought it over in a trunk with a false botton. There are listed 126 watches, 1 gold bracelet, 13 gold rings, 14 pairs of gold earrings, 29 silver chains, 22 nickel chains, five small clocks and a package of coral, the latter being of considerable value, it is understood.

Nagheri is said to have contemplated starting in business, with this outfit as the nucleus of a small jewelry establishment.

Death of Barney M. Kattelle.

Boston, Mass., Feb. 11.—Barney M. Kattelle, formerly of the old and well-known retail jewelry house of Kattelle Bros., which was located for a number of years at 95 Court St., this city, in the store now occupied by Wilson Bros., and later on Tremont St., on the site of the old Boston Museum, died Feb. 9, at his home in West Newton.

Mr. Kattelle was born in St. Albans, Vt., about 60 years ago, and came to Boston when a young man, later forming a partnership with his brother, Charles E. Kattelle, which continued until the firm met with reverses a few years ago, when it was dissolved. Mr. Kattelle subsequently worked as a watchmaker with his brother Charles, who started anew in the Kimball building on Tremont St. Of late, however, on account of failing health, he had not been actively employed.

He leaves a widow and three children. His son Lawrence is a student at Tufts College.

reditors File Bankruptcy Petition Against M. J. Daniels, Columbus, O., After His Assignment.

Columbus, O., Feb. 12.—The assignment f Meyer J. Daniels, pawnbroker and jew-er, Tuesday morning, as noted in the last sue of The Jewelers' Circular-Weekly, as followed that afternoon by involun-ry bankruptcy proceedings being insti-ted in the United States Court here by umble & Gumble, as attorneys for Ingo-ar Goldsmith & Co., Veit-Hirsch Co., d Cohn, Abraham & Co., all of New ork. The assignment was made the basis the petition, and the firms made the fol-wing claims against the defendant: In-mar Goldsmith & Co., $2,547.12; Veit irsch & Co., $2,626 90; Cohn, Abraham & o., $911 72.

Judge Slater, sitting in the bankruptcy court Cincinnati, Friday, appointed C. P. Outh-aite, a Columbus attorney, to act as ref-ee in the case. The schedule of assets d liabilities is awaited with interest here, Daniels on Jan. 1 sold to the Hoster-olumbus Associated Breweries Co., a cafe d a valuable 99-year leasehold on N. High t. The consideration was given as "$1 and her considerations," but attorneys inter-ted in the deal gave out statements lead-g to the impression that the breweries mpany had paid Daniels a bonus of $50,-)0 for the leasehold.

ouis Dolgin Applies to the Bankruptcy Court at New York to Relieve Him of Debts.

Louis Dolgen, a manufacturing and holesale jeweler, formerly in business at Eldridge St., and who gives his address 22 E. 106th St., Manhattan, filed a volun-ry petition in bankruptcy, Thursday, in the nited States District Court, New York, ith schedules showing liabilities of $5,-61.36 and assets of $2,873.61.

Among the unsecured creditors are the linton Jewelry Co., $69; H. Bergman, $58; astanhuber & Lehrfeld, $157; Electric hain Co., $304; Elm Mfg. Co., $160; Font-eau & Cook Co., $825; William C. Green Co., $598; Friedman Bros., $68; S. & B. ederer, $150; Acme Comb Co., $83; Waite Evans, $89 Clark & Coombs, $90; H. C. indel Co., $100; Miller, Fuller & Whiting, 145; C. H. Eden Co., $183; C. D. Lyons Co., $235; Whiting & Davis, $95; Morgan ewelry Co., $90; Williams & Payton, $107; da Dolgin, $50; Lyons Mfg. Co., $55; rank & Sass, $460; D. Dolgin & Son, $80; oseph Finberg $326; D. Dolgin, $200.

Mr. Dolgin was for a time employed by is father, a small manufacturer at 36 Eld-idge St. He was afterward employed by . H. Macy & Co. in the repairing depart-ent. He started in business for himself March, 1906.

Death of William J. Tracey.

Providence, R. I., Feb. 12.—William J. racey, for nearly half a century engaged s a clockmaker in the town of Burrill-ille, died at his home on East Ave., in the illage of Harrisville, Wednesday, of ill-ess incidental to old age.

Mr. Tracey, who was 81 years old, was ne of the best-known residents of the ommunity, and for 40 years had occupied the building at the corner of Main and Chapel Sts., as a jewelry store. In more than one farmhouse in the northwestern part of the state, is to be found one of the old-fashioned clocks with wooden works that has been cared for and repaired for years by Mr. Tracey. Deceased was treasurer of the board of trustees of the Smith Memorial Library building fund, but never held any public office in the town. He leaves one son.

Death of Charles Kohler.

Norristown, Pa., Feb. 9.—Charles Kohler, a well-known merchant, who conducted a jewelry store on Main St., near De Kalb, dropped dead Feb. 7 at the railroad station at Overbrook, from valvular disease of the heart, while on his return home from a visit to friends in Overbrook Mr. Kohler had not been well for some months, never having fully recovered from an appendicitis operation performed several years ago.

Deceased was about 50 years of age and had lived in Norristown about 25 years. He started in business life as a clerk in S. C. Levy & Co.'s jewelry store at De Kalb and Airy Sts., later purchasing the business under the style of Charles Kohler & Co., and removing to De Kalb and Main Sts. The firm dissolved in 1891, since which time Mr Kohler conducted it alone.

Mr. Kohler is survived by his widow, who had decided to remain in Overbrook for a short time, and was with her husband at the time of his death. A porter found Mr. Kohler's body in the waiting room at the station. He was identified by a mileage book bearing his name.

Harry Yaseen, Delhart, Tex., and Tucumcari, N. Mex., is reported to have given a trust on the instigation of some of his creditors. He has stock and fixtures estimated to be worth $13,000, while his liabilities are said to be but $12,000. Mr. Yaseen began business in Delhart in July, 1906, to which place he came from Springfield, Ill., where he had been since 1902.

August F. Margileth, Springfield, O., Forced to Go Into Bankruptcy.

Cincinnati, O., Feb. 9.—August F. Margileth, a jeweler of Springfield, O., Monday petitioned the United States District Court here for the benefits of the bankruptcy act. He owes $19,661.10 and has assets of $16,000. He owns stock valued at $10,851.26, $2,825.50 in fixtures and $2,375.81 is due him on open accounts.

Attorney James P. Goodwin, who filed the petition, requested that notice be given him if any of the creditors ask for the appointment of a receiver. Shortly thereafter Attorneys Cobb, Howard & Bailey made application for a receiver on behalf of Thoma Bros., of this city.

Springfield, O., Feb. 9.—The bankruptcy of the A. F. Margileth Co. was unlooked for in the local business field. The liabilities of the firm are given as about $19,000, with the assets approximating $16,000. Most of this indebtedness is said to be in favor of eastern jewelry firms.

The decision of Mr. Margileth to file a petition in bankruptcy was made after a great deal of thought on his part. The fact that a claim for $1,500 would fall due within a few days hastened the decision, and the fact that if this claim was paid it would only temporarily relieve the financial embarrassment of the firm, and that there were a number of other creditors who Mr. Margileth thought would not get a fair deal in the affairs of the company, led him to protect all the creditors as much as possible.

Contrary to the general impression existing in local business circles, Mr. Margileth says that for some time past the business has been conducted at a loss. Added to this feature is that of the continued ill health of Mr. Margileth's family which aided to make this move a necessity.

The business is owned by August Margileth, the company being nominal, and was founded by him a number of years ago. In 1899 he sold an interest to Mr. McFarland and for a while the style of Margileth & McFarland was used, but the firm dissolved in January, 1908, since which time Mr. Margileth continued alone. He is also interested in the musical instrument business of Carr & Margileth, but this has no official connection with the jewelry business.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended Feb. 12, 1910.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin	$328,154.69

torney General of Ohio to Look Into harges That Keystone Watch Case Co. and Allied Companies Violate Ohio Trade Laws.

LUMBUS, O., Feb. 10.—Former Senator raker, who is the counsel for the Dueber tch Case Mfg. Co. in the action which concern recently commenced at Cinnati against the Keystone Watch Case and the corporations allied with it in watch and watch case trades, has ten to Secretary of State Thompson ing attention to the circular which the tone concern recently sent out to jobasking them to handle no other manuacturer's watch cases, which circular forms basis of the Deuber company's suit for ,000 under the Sherman Anti-Trust

Senator Foraker, in his letter to Sec- Thompson, asserts that the Keystone tch Case Co. and the corporations as- ted with it are engaged in the business nlawfully restraining trade in defiance he laws of Ohio. To-day Secretary mpson turned the communication, to- er with the allegations made, over to rney General Denman, on whom he s prompt action provided the facts are utlined in Senator Foraker's communi- on.

NCINNATI, O., Feb. 12.—Deputy United es Marshals Sanderson and McGuire, served the summons upon Secretary g. of the Keystone Watch Case Co., he suit brought under the Sherman i-Trust Law by the Dueber Watch Mfg. Co. against the Keystone and watch and case companies with which associated, were called upon to serve lar papers on Harry C. Walton, former nt here of the Keystone concern. When lton was approached by the marshals told them he was no longer employed the defendant corporation so the marls then made service upon J. Charles ker, local manager of the Philadelphia tch Case Co., which, with the New k Standard Watch Co., the E. Howard and the Crescent Watch Case Co. are hed as defendants.

t is possible that the matter may come before the local court here Monday on reliminary motion. The defendants have days after service in which to file their wers to complaint. As yet no answer been filed nor has any statement been de on behalf of the defendants.

Albert M. Dueber, president of the Due- Watch Case Mfg. Co., when interviewed a JEWELERS' CIRCULAR-WEEKLY reporter, l:

A principle which we have always ght for has been to keep the market open all watch cases, no matter of what manacture, believing it to be for the best inests of the trade to allow them to buy watch cases which they consider the t on the market and by so doing stimue all manufacturers to their best efforts. h a view of establishing a high standard excellence. The Dueber Watch Case g. Co. in all its many years of existence s never sought to dictate to any jobber hat watch cases he should use. It has ver used, directly or indirectly, any method of coercion or force to either restrict the product of any watch case manufacturer, or to force the production of its cases upon any wholesale or retail jeweler to the detriment of any other manufacturer of watch cases. It employs the 'open door' policy in selling merchandise and believes that the trade should be open to all manufacturers and jewelers alike and to that end will bring all its energy to bear for the good of the entire trade."

Death of Robert C. Brown.

Robert C. Brown, head of the purchasing and sales department of the Julius King Optical Co., 12 Maiden Lane, New York, died Friday morning, Feb. 11, at his home, 825 Lincoln Pl., Brooklyn, from an affliction

THE LATE ROBERT C. BROWN.

of the throat from which he had suffered for years. Mr. Brown was well known to many in the trade and news of his death was received with much regret.

For 23 years Mr. Brown had been continuously in the employ of the Julius King Optical Co. and because of faithful service was advanced from office boy to a position of responsibility and trust. He was a man of pleasing personality and kindly disposition, and although he suffered a great deal from the trouble which ultimately caused his death, he was always the same pleasant and agreeable man—and because of these qualities he endeared himself to his friends and business associates.

Deceased was born in New York Jan. 30, 1871, and here he spent his early life. His years of honest service won him a place of high regard in the estimation and esteem of his employers and business associates. A meeting of the employes of the Julius King Optical Co. was called and an engrossed set of resolutions deploring his untimely death was ordered to be drawn up and presented to the bereaved family.

Mr. Brown was a member of the Masonic Fraternity and a member of the United Order of American Mechanics.

The funeral services were held Sunday night from his late home. Burial was Monday in Greenwood Cemetery.

Burglars Thwarted After Elaborate Work in Breaking Into New York Jewelry Store.

The trade is constantly learning of new ways in which burglars attempt to rob stores. The latest original method was used in an attempt made Friday night to gain entrance to the store of Isidor Lewkowitz, 269 Sixth Ave., New York. Taking advantage of the storm, the burglars, with the aid of a rope ladder and chisel, cut out a hole in the roof of the three-story building the jeweler occupies and prepared to carry out the most of the valuable jewelry when one of them accidently set off the burglar protection which brought several men to the store but not, however, until the burglars had made good their escape.

The marauders entered an unoccupied building several doors away. From the roof, with a rope ladder, they found their way to other adjoining buildings and finally reached the jewelry store. With chisels they cut a hole in the roof which let them through to the top floor, which is occupied as a workshop. They carefully made their way to the second floor, used as a silverware room, and from there to the street floor, where the most valuable jewelry is kept. The men evidently took considerable time in making their selections from the stock at their disposal because of the fact that several valuable pieces which they had packed into a valise were found when the police arrived. The safes and the side cases on the walls are all wired and the burglars avoided these but cleaned out several show cases, packing the jewelry in neat piles.

When one of the burglars accidentally stumbled against a protected case the alarm immediatcly sounded in the "Holmes" office on 14th St., a few blocks away, and officers were at once sent to the scene.

Grant Humphrey, manager of the store, in speaking about the robbery to a reporter of THE JEWELERS' CIRCULAR-WEEKLY placed the loss at about $500 and said that the burglars also left a bag containing a large quantity of silverware. The firm is a member of the Jewelers Security Alliance and this organization has been notified of the robbery.

Charles F. Miller Succeeds Charles D. Rood as President of the Hamilton Watch Co.

LANCASTER, Pa., Feb. 9.—President Charles D. Rood, of the Hamilton Watch Co., retired Monday, Feb. 7, and was succeeded by Charles F. Miller, a successful Lancaster business man, who for the past seven years was treasurer of the company.

On the date mentioned the annual election was held by the stockholders, of whom there are 42, and the following directors were elected: P. T. Watt, J. Fred. Sener, J. B. Bausman, Charles F. Miller and George E. Fahys, who succeeded Charles D. Rood in the board. The directors organized by electing Charles F. Miller, president; P. T. Watt, vice-president; J. W. B. Bausman, treasurer, and F. C. Beckwith, secretary.

The election introduces into the management a representative of Joseph Fahys & Co., New York, who have watch case and silver factories at Sag Harbor, Long Island. Some time ago the watch case concern purchased a large block of shares of stock in the company. The stock so purchased by Joseph Fahys & Co., together with their allied interests in Lancaster, gives it a controlling interest in the watch company.

The new secretary, Mr. Beckwith, was with the Fahys concern a long period of years prior to being sent to Lancaster to look after the Fahys' interests.

The company now known as the Hamilton Watch Co. succeeded the Lancaster Watch Co. 17 years ago, and in the reorganization Charles D. Rood was elected president. The factory owned by him at Aurora, Ill., was incorporated with that of the reorganized Hamilton company, which was capitalized at $250,000. After serving 10 years he was succeeded by Capt. George M. Franklin, who died in office, and J. T. Watt filled the unexpired term. Mr. Rood was then again elected president and has filled the post ever since. Two years ago the capital stock of the company was doubled, being now half a million dollars. The factory employs 700 hands and the weekly payroll is nearly $4,000.

Philadelphia Gem Dealer Held Up by Bold Robbers, One of Whom Is Captured.

PHILADELPHIA, Feb. 12.—An attempted robbery that has seldom been equaled for daring was made Friday afternoon, when David Salkin, a diamond merchant of this city, was held up by Joseph Fox and four other companions. Salkin, who had just drawn $600 from the Central Trust Co., was wending his way toward the course building when he was suddenly pounced upon by the men.

Fox, who apparently was the leader of the gang, managed to abstract the wallet from the back pocket of the diamond dealer, but was unable to get away with it. Salkin's former position as a policeman stood him in good stead in this case and he engaged in a hand to hand fight with his assailants. A large crowd was attracted, but not knowing the nature of the fight did not interfere.

Fox finally succeeded in getting away and started on a run. He was soon caught, however, by Policeman Harvey and taken to the City Hall. In the meantime a detail of plain clothes men were sent out to look for the accomplices.

The prisoner was given a hearing by Magistrate Beaton and held under $2,500 bail for court. According to the police Fox goes under many aliases. They think he is Joseph Gross, an all around sneak thief, who in the past attempted similar hold-ups.

Two Trays of Diamond Rings Stolen from Show Window of Store in Omaha, Neb.

OMAHA, Neb., Feb. 9.—Two trays containing diamond rings valued at about $700 were stolen from the show window in the store of Gustafson & Hendrickson in the Loyal Hotel building, some time Saturday evening. The theft was not discovered until the store was closed at 11 o'clock that night. There is absolutely no clue to the thieves.

The trays were placed in one of the front show windows Saturday morning and no further attention was paid to them by any one connected with the store until closing time. When the doors were closed Saturday night and the jewelry in the window was being put in the safe it was found that the trays were missing. They contained 12 diamond rings in all.

The window from which the diamonds were stolen is protected from the inside by sliding panels. The proprietors of the store are at a loss to understand how any one could open these panels and remove the trays without being detected. The police are of the opinion that the job was done by expert diamond thieves who had carefully planned the robbery. Several diamonds of over a carat, rings and brooches were also in the window, but were left untouched.

Just three years ago Gustafson & Hendrickson lost a diamond brooch worth several hundred dollars in a similar manner.

Bad Fire at Lancaster, Pa., Destroys the Jewelry Store of W. W. Appel.

LANCASTER, Pa., Feb. 12.—The jewelry store of W. W. Appel was wiped out Thursday by a fire which destroyed a number of buildings, causing a loss of about $400,000. The jewelry store occupied a place in the Kepler building, together with other stores, in one of which, Reilly Bros. & Raub's hardware store, wherein a powder vault was located.

None of Mr. Appel's stock was saved, and he sustains a loss of $15,000, which is not fully covered by insurance. He intended vacating the Kepler building April 1, as his store had been leased to another party.

New Members Elected by the Jewelers Security Alliance.

The regular monthly meeting of the executive committee of the Jewelers Security Alliance was held Friday, Feb. 11, the following being present: Chairman Butts, President Sloan, Vice-Presidents Wood and Champenois, Treasurer Karsch, Secretary Noyes and Messrs. Abbott, Bowden, Brown and Stern.

The following new members were admitted:

Wm. Grieshammer, New York; Kaufman Jewelry Co., St. Paul, Minn.; Edwin Le Gro, Farmington, N. H.; W. M. Shlaes, Hancock, Mich.; Abner Woodin, New Rochelle, N. Y.; Concord Watch Co., New York; L. E. Grant, Portage, Wis.; Hansen Co., Oceanside, Cal.; George E. Hanson, Rockford, Ill.; F. H. Koebelin, Janesville, Wis.; C. A. Rose, San Francisco, Cal.; F. M. Smith, St. Paul, Minn.; P. H. Sperry, Marinette, Wis.; William Eissler, Philadelphia, Pa.; Hansen & Westberg, St. James, Minn.; Mac. S. Isaacs and William C. Lemkuhl, Baltimore, Md.; Roy G. Pierce, Odebolt, Ia.; Fred G. Polley, Oneida, N. Y.; Robert Rausch, Baltimore, Md.; Max H. Schleuder, St. Peter, Minn.; Warren T. Coffin, New York; Crown-Reinch Jewelry Co., St. Louis, Mo.; F. R. Cullumber, Elden, Mo.; C. H. Ingraham and Otto Mueller, Wausau, Wis.; Joseph Nicol, St. Charles, Ill.; Steffen Bros. & Co., San Francisco, Cal.; H. S. Wright, Wausau, Wis.; J. J. Beale & Bro., Rockford, Ill.; K. F. Keller & Sons, Appleton, Wis.; E. H. Kennerdell, Tarentum, Pa.; S. Lande, Battle Creek, Mich.; C. Laroy, Kalamazoo, Mich.; F. E. Lenhart, Pomona, Cal.; George Rickman, Kalamazoo, Mich.; William J. Scelen, New York; Smith & Webster, Inc., Richmond, Va.; P. E. Tetens, Jackson, Mich.; Rexford Co., Philadelphia, Pa.; William Moore, Falls Creek, Pa.; I. Buchhalter, St. Paul, Minn.; J. Burgess Jewelry Co., Bloomfield, Ia.; A. O. Hulberg, Northfield, Minn.; Mueller & New, New Brunswick, N. J.; Henry Muench, Atlanta, Ga.; Sartor & Sprague, San Antonio, Tex.; A. O. Schuster, Wilmington, N. C.; M. J. Kershaw, Perry, N. Y.; Hill & Co., Madera, Cal.; Miller & Motl Co., Milwaukee, Wis.; John E. Geertsen, Waterloo, Ia.; Vlach Bros., Wahoo, Nebr.; W. E. Mount, Pueblo, Colo.; F. P. Scofield & Co., Newark, N. J.; D. T. Reamer, Meadville, Pa.; J. Lyman Van Buren, Dunkirk, N. Y.; C. C. Stone & Co., Ft. Collins, Colo.

The following reward was ordered paid:

Reward No. 99 to Police Officers James F. Murphy and John M. Hayes for the arrest and conviction of Walter J. Walsh, who broke into the jewelry store of Philip H. Kimball, of Newburyport, Mass., on the night of Dec. 17 and stole watches to the value of over $100. Nearly all of the stolen property was recovered. The thief was sentenced to 15 months in the House of Correction.

Samuel Graubart Co., Schenectady, N. Y., Denies That It Is Bankrupt and Will Fight Creditors' Petition.

SCHENECTADY, Feb. 14.—The Samuel Graubart Co., South State St., Schenectady, which was petitioned into the hands of a receiver by New York creditors, has retained Attorney Benjamin Terk to oppose the petition in bankruptcy. The subpoena is returnable at Utica on Wednesday. It is claimed by the company that it is not insolvent and that the petition filed against it was in bad faith and that it was filed to compel the company to settle claims which are disputed.

Attorney Terk will file an answer to the petition of the creditors and then the matter will come up before the referee as to the insolvency of the corporation. A receiver appointed by the bankruptcy court is in charge.

Paris Pearl Market.

PARIS, Feb. 6.—During the early par January the pearl market here was usually lively, this condition being duced in part by large purchases made American buyers, as a result of which the fine large pearls went out of the ket. Regular business, however, did quite come up to expectations and the ond half of the month closed ra quietly.

The catastrophe in which Paris, an fact a good part of France, is suffering reason of the floods, has had a very effect upon business. As a result n dealers have preferred to wait and what will be the extent of the disaster fore they purchase for the future. F week many people in the city were p tically isolated and communication with outside, and even within, the city, often impossible. In fact, the situa was compared with that during the s of 1870.

It is not yet possible to calculate enormous damage that this flood caused, but it is hoped that when the d ger is entirely over people will courage ly return to their regular occupations try and forget what we have passed throu The home trade will certainly suffer v much as a result, and large amounts money, which might otherwise come to gem line will be employed in repairing damage done.

The market in colored stones has b rather quiet, but emeralds have shown slight activity and several parcels have b sold.

Death of Geo. O. Sawyer.

OMAHA, Nebr., Feb. 9.—A telegram been received here by Sol. Bergman, nouncing the death of George O. Sawy Ainsworth, Nebr. Mr. Sawyer was a pro inent jeweler, as well as one of the p prietors of the Aisworth Auto Co. H death was due to the result of an accid which occurred half a mile west of W Lake, Ia.

Mr. Sawyer was taking a party of trav ing men from Ainsworth to Wood La and had stopped his machine and left it gear. Upon cranking to renew the jour the machine started suddenly, knocking h down and passing over his chest. Mr. Sa yer lived half an hour after the accident.

The deceased had many friends in Oma where he made frequent trips to purch stock. He leaves a widow and three ch dren.

Bankruptcy Petition Filed Agai Cooperman & Springer Dismissed After Settlement Is Made.

Judge Holt in the United States Distr Court dismissed last week the petition bankruptcy filed on Jan. 17 against Coop man & Springer, 124 Hester St., New Yo

Oppenheimer & Arnold, the attorne who acted for the petitioning creditors, s that a settlement had been made wi creditors at 40 cents on the dollar, payal 5 per cent. in cash and the balance in no at four, eight, 12 and 15 months.

The liabilities were said to be abo $10,000.

Members of the Minnesota Retail Jewelers' Association Convene in St. Paul and Elect Officers for Ensuing Year.

. Paul, Minn., Feb. 11.—One of the t interesting and inspiring conventions ne history of the Minnesota Retail Jew-'s' Association took place Wednesday in city. There was a large attendance of lers from all over Minnesota. A num-f subjects of vital interest to the trade, particularly to members of the associa-were discussed. Incidentally there was he display of jewelry by jobbing and ufacturing houses.

he session opened with an address of ome by Henry Haas, acting mayor of Paul, after which President A. E. er appointed the following committee resolutions: C. A. Sherdahl, William kner, F. B. Logan, E. F. Miner, Charles nberg, F. H. Strant, J. C. Herdliska. uditing committee consisting of J. H. ers, Oscar Holmes and J. C. Herdliska also appointed.

ollowing this came the reports of the retary and chairman of the entertainment mittee and that of the treasurer. The er showed a balance in the treasury of 34.

mil Geist, St. Paul, a charter member of he association, delivered an instructive ress on "The Retailing of Diamonds," which he gave many valuable pointers. L. Sacket, sales manager for the Rock-d Watch Co., gave what was generally gnized as one of the finest addresses the ociation has been privileged to hear. His ject was "Selling Watches at a Fixed ce." The matter which he brought out to a general discussion on the subject "Fixing Prices," in which President A. Barker led. A number of the members he association participated.

t was the sentiment that a variable price the tool of the unreliable jeweler; that h firm should have a fixed price, give it mptly when asked and stick to it.

H. C Carpenter, of the South Bend tch Co., spoke interestingly on "The wer of Thought," taking the place of H. Bosworth, secretary of the Minnesota holesale Jewelers' Association, who was heduled for an address, but was unable to present.

The committee on resolutions reported following, which were adopted by the vention:

e it resolved, That the different clock manufac-ers be requested to co-operate with the jew-rs of the United States, and as far as possible fine the sale of their products through the le-mate jewelry trade; and, be it further

esolved, That the different manufacturers of er plated hollow and flat ware be requested to rket their products only through the legitimate elry trade; and, be it further

esolved, That the names of the manufacturers o accept our proposition be published in our nthly reports to the members of this association.

esolved, That we tender the thanks of this as-ation to the outgoing officers for their efficient k during the past year, especially to Secretary labaugh, who is about to take up his residence a far distant State and who has been a most thful worker for this association.

esolved, That we tender our thanks to the nagement of the Ryan Hotel for the room fur-hed for this meeting and other courtesies ended

The convention also wired a message of condolence to J. P. Archibald, Blairsville, Pa., president of the National Retail Jewelers' Association, whose wife is seriously ill.

A feature of the convention was the address of A. E. Barker, president of the Minnesota association, which was filled with helpful suggestions and recommendations.

Mr. Barker recommended the discontinuance of the custom of holding two meetings of the association annually, saying that it would be better to have one annual meeting in the Summer with a three-day session and simply have the board of directors meet in February to dispatch whatever business might come up at that time. This would make it more convenient for jobbers and manufacturers who have to make a large number of State association meetings in different parts of the country to attend.

He also recommended that the annual dues of the association be raised from $3 to $5, so that more frequent reports can be made to the members by the secretary. Another recommendation was that the association appoint an examining board of three to examine watchmakers and test their qualifications, the board to award certificates in three different grades to those who pass, according to their proficiency. This, he believed, would operate to eliminate inefficient men from the ranks of Minnesota watchmakers.

In its report the committee on the president's address heartily approved of the plan to do away with the semi-annual meetings of the association and have just one meeting each year, to be held in July or August, the length of the meeting being left to the board of directors to determine. This plan was adopted by the association and becomes immediately effective.

The committee further recommended that the question of raising the dues of the association be deferred until the next meeting, and all members notified that the matter will be taken up at that time. It also recommended that the plan of examining watchmakers be referred to a committee of three, with instructions to report at the next meeting of the association, and that the salary of the secretary of the association be raised and fixed by the board of directors. The entire report of the committee was approved by the convention.

The election of officers resulted in the choice of the following: President, Emil Geist, St. Paul; vice-president, C. A. Sherdahl, Montevideo; secretary, A. E. Paegel, Minneapolis; treasurer, I. Reiner, Hutchinson.

J. C. Herdliska, Princeton, was elected to the board of directors for three years and William Plackner, Benson, for one year.

Setback to Ceylon Pearl Fisheries.

The *India Government Trade Journal* says concerning the pearl-fishing industry of Ceylon:

"The Ceylon Co. of Pearl Fishers, which leased the fisheries from the Government for a period of years, paid large dividends at the outset, but is now compelled to call up 5s. ($1.21) per share on the 150,000 ordinary shares to meet the rent due under the lease. For the second year in succession it has been found impossible to hold a fishery, this being due to the ravages of predatory fish. In November, 1909, deposits of spat, estimated at 390,000,000 oysters, were discovered during the inspection of the pearl banks, but between that time and the next inspection in February the whole of them had been destroyed.

Death of William H. Guyer.

The funeral of the late William H. Guyer, who was for 41 years a salesman in the employ of the Waterbury Clock Co., New York, was held last Wednesday, Feb. 9, from his boyhood home at Westport, Conn. Mr. Guyer was stricken with cerebral hemorrhage at the Tampa Bay Hotel, Tampa, Fla., on Feb. 2, and died the next day. His sudden death was a great surprise and caused much regret to a wide circle of friends and acquaintances in the trade.

As soon as the hotel authorities notified the New York headquarters of Mr. Guyer's illness word was at once sent to his brother, who started for Tampa, but did not arrive in time to see him alive. The New York office was soon afterward notified of the salesman's death and instructions were telegraphed. The body was then brought home for burial.,

William H. Guyer was born March 11, 1846, at Westport, Conn., where he spent his early life. As a young man he entered the employ of the Waterbury Clock Co. in the sales department and became a traveler. He was one of the best-known salesmen in the South and West and made, during his long term of service, many friends, who held him in high esteem.

Mr. Guyer had been seemingly in good health, and the day previous to the one on which he was stricken he had visited the trade in Tampa as usual. He was the oldest salesman in the company's service, never having been in the employ of any other firm in the trade. For many years previous to his marriage, about three years ago, he made his home at Montclair, N. J.

Deceased is survived by a widow, two brothers, a sister and an aged mother.

Death of L. D. De Mars.

Minneapolis, Minn., Feb. 9.—Louis D. de Mars, an old resident of Minneapolis, and one of the best-known jewelers in the State, died, Friday, at the age of 62. His death brought to a close a long illness. The funeral was held Monday, and was attended by a number of the local jewelers and Knights of Pythias, of which order Mr. de Mars was a prominent member.

Mr. de Mars had been in business in Minneapolis for 25 years. For a long time he was a member of the firm of Reed & De Mars, now the Reed-Bennett Co., wholesale jewelers. After he disposed of his interest in that firm he continued in business for himself for some years as a manufacturing jeweler. He retired from active life four years ago. One of his sons, Louis L. de Mars, is head of the De Mars School of Optometry, in this city.

Third Annual Convention of the Indiana Retail Jewelers' Association, the Largest and Most Important Ever Held in that State.

INDIANAPOLIS, Ind., Feb. 10.—By far the largest attendance in the history of the organization was present at the third annual convention of the Indiana Retail Jewelers' Association, held at the Grand Hotel, in this city, Monday and Tuesday of this week, the convention closing with a banquet at the Denison Hotel, Tuesday evening. Until they gathered for the meeting, the members did not realize what a rapid growth, both in size and interest, the association had enjoyed during the preceding year.

There were few addresses on the program, but what there were received much attention. The several sessions during the two days were devoted largely to a discussion of proposed legislation and matters of trade interest. The members were also drawn more closely together than they have been in former sessions.

In previous years there have been small representations of the membership at the annual meetings. This year the register showed that 73 members were present, but it is probable many were present who did not register. It was also notable that many out-of-town guests were present, including A. L. Sackett, sales manager of the Rockford Watch Co., Rockford, Ill.; Charles T. Higginbotham, consulting superintendent of the South Bend Watch Co., South Bend, Ind.; Col. J. A. Shepard, New York; C. J. Wiltsie, Elgin, Ill.; C. C. Bigton, Rockford, Ill.; C. H. Fielder, R. H. Ingersoll & Bro., New York; W. F. McCombs, Waltham, Mass., and George Engelhard, Chicago.

At the concluding session, former officers were elected to succeed themselves, as follows: President, H. H. Bishop, Indianapolis; 1st vice-president, H. L. Rost, Columbus; 2d vice-president, C. F. Artes, Evansville; secretary, J. A. Oswald, Crawfordsville, and treasurer, J. H. Arnold, Columbus. The executive committee was also re-elected, including W. H. Mellor, Michigan City; E. M. Wilhite, Danville; C. Z. Rowe, Argos, and A. Rothermel, Connersville.

The opening session was held at 9 o'clock Monday morning, with President Bishop in the chair. A large number of members were present, which was considered as encouraging, in view of the fact that in previous years there have been few present at the first session. The morning was occupied by reading the minutes of the previous meeting, passing on applications of prospective members and admitting them to membership and to listening to the annual address of the president.

Mr. Bishop stated that the preceding year had been a profitable one to the organization and recalled some of the incidents that had marked the year. He dealt largely with a discussion of the fight against parcels post. His address was as follows:

PRESIDENT BISHOP'S ADDRESS.

To say this is one of the happiest moments of my life would be putting it mildly. There are some things I cannot do, and one of them is to make a speech or give an address. So you know I must be happy on this occasion—the third annual meeting of the Indiana Retail Jewelers' Association.

The year just drawing to a close, I believe, has been a profitable one for the I. R. J. A. While not many things of great importance have happened, the association has held its own, with perhaps a small increase in membership.

We had our round with the parcels post bill the first of the year. I wrote to Senator Beveridge and also Senator Shively in relation to the bill May 17, and received a reply May 20, acknowledging receipt of my letter from both Senators Shively and Beveridge. The members of the association will call to mind the circular letter sent out to all of the members at the same da urging them to write to both senators in rega to the defeat of the bill.

I received a letter from the secretary of t Evansville association inclosing a copy of a re lution adopted by them and sent to both Senato I was also informed by Walter H. Mellor, Michigan City, that he had the Board of Tra of that city to pass resolutions condemning t measure, which was also sent to both senators.

I also received a letter from one of our me bers in favor of parcels post. I don't believe t jewelers of our State realize what a benefit parc post would be to the mail order and catalog hous Do you know to what extent these houses are e croaching on your business? I used to thi their business was all confined to the country d tricts, but it is not so. I know of doctors a business men located in this city who buy t greater part of their household goods from the houses. One man I call to mind even buys l childrens' playthings from them.

This bill is not going to be dropped by the houses and I believe this association should a point a committee or instruct the committee trade interests to devise some method to fig their plans.

During the year the people of our State been swindled by a sale of cheap jewelry a watches. I am speaking of the Brown stock t was sold in a number of cities of the State A I understand all over the United States. Part the trash was unloaded in our capital city

It is only a pity there was not some law where the people conducting the sales could be prosecute

At the time of our last meeting the State leg lature was in session and this association pass resolutions asking both the House and Senate pass a bill relating to fraudulent advertis which was lost. This bill, or a similar one, sho be pushed by this association until it is made law. Then we could reach some of these bankru sample and bargain sales.

I want to read you a part of an advertiseme appearing in one of our daily papers advert s one of these sales.

In the latter part of May, our secretary, Broth Oswald, and myself, took a trip to the northe part of our State to see what we could do towar creating more interest in our State associati We arrived at South Bend shortly after o'clock noon, and were met by the officials of t South Bend Watch Co., who had a spread pr pared for us at the Oliver Hotel and all of t jewelers of the city on hand. Before we le they had an association of South Bend jewele and the majority had joined the State associati We were successful in Mishawaka, LaPorte a Michigan City in gaining new members, and al gether feel we have had a very successful t p

Not to keep for sale goods handled by department stores or to avoid pushing the sale of the same.

I wish to thank the officers of the association for their support the past year, and especially the secretary, who has always been ready to lend a helping hand whenever asked to do so.

I thank all of you for your attention.

Mr. Sackett spoke at the afternoon session on "Pioneers and Promoters," but unfortunately as he spoke without manuscript, his address cannot be given in full. However, he likened the charter members of the association to the pioneers who made great sacrifices to build themselves homes in the forests and who sought to stand by their convictions. He said it was probable that the nine men who met a few years ago to organize the Indiana Retail Jewelers' Association had been regarded as foolish, but that their early efforts had met with successful results was evidenced by the substantial growth of the organization.

During the course of his talk he likened the results to be obtained by organization to the conservation of the forests and other resources. He said that aside from any immediate gain to be expected in the conduct of business, members of the association should plan ahead for the future generation, that the latter might reap some of the benefits of the efforts of the present generation.

"We should work on the principle," he said, "that someone—perhaps in the distant future—shall be benefited. We are building a great canal which many of us do not expect to live to see completed. Yet we know that that canal, when finished, will be of great benefit to those who are to follow us. You, of your organization, are building a work more serious than immediate business results; you are working to better the lives of future generations."

Mr. Sackett also dwelt at length on the question of the parcels post.

"The mail-order houses are the chief danger which threaten the local jeweler and merchant. Destruction of the business of the local merchant will inevitably bring about the destruction in a commercial way of the small towns and cities. The local merchants pay taxes to pave the streets and to support the schools and libraries, and these facts should be impressed on citizens who have a tendency to patronize mail-order houses.

"If the parcels post becomes a law, as it is now proposed, it will benefit the mail-order houses more than anyone else. I am as heartily opposed to the parcels post as anyone could be, yet we must recognize the fact that parcels post is coming in some form or other.

"Congressmen are receiving petitions from their constituents urging the passage of a parcels post law. As long as the express rates are permitted to remain at their present exorbitant figures, there is going to be a demand for a parcels post from the masses—the consumers.

"The jewelers and the merchants form only a small portion of the population of the country. While they cannot stop the passage of a parcels post law, they should get together and urge a modification. I believe they will be able to bring sufficient pressure to bear to obtain some sort of a modification.

"In many places I have advocated that the parcels post be made to apply only on rural routes from places from which the routes emanate. In other words, have it apply so that the merchant in a town can send merchandise to his patrons living on rural routes emanating from his town or city. In this way the mail-order houses could use parcels post only on rural routes emanating from the respective cities in which such houses are located."

Secretary Oswald, following the address, stated there were two proposed amendments pending from the previous convention. One of these provided that an amendment to the by-laws could be sub-

mitted at any session of a convention ar acted on at any subsequent session of tl same convention. The resolution w adopted. Formerly the by-laws provide that an amendment presented at one co vention could not be adopted until the su ceeding convention. Another amendme adopted fixed the time of the annual mee ing at the first Tuesday after the first Mo day in May, and provided that the conve tion could be held at any city designate by a majority of the members present the session when the convention city w selected.

Immediately the delegation from Evan ville extended an invitation to the associ tion to meet in Evansville, in May, 191 Some objection was raised by membe who believed, that until the associatio grew older, the conventions should be ce trally located, so as to attract crowds fr all sections of the state. Others argue that holding the conventions in differe parts of the state would tend to build u terest in the association in the various l calities where the conventions were hel and thus build up the membership. It w finally decided to leave the settlement the question until Tuesday morning, whe the Evansville invitation was accepted.

Mr. Rothermel, Connersville, asked th a committee be appointed to take up tl question of a parcels post bill with othe retail organizations of the state. He sa he believed that the aid of other reta merchants, including hardware dealer druggists, etc., should be enlisted in tl parcels post fight. President Bishop a pointed Mr. Rothermel, Walter Mello Michigan City, and Oliver M. Arte Evansville, as a committee to take up tl question.

President Bishop suggested that some a tion be taken relative to again asking th enactment of a fraudulent advertising law He said a bill along similar lines, intro duced at the last session of the legislatur met defeat because there were about 15 bills killed to make way for the county lo cal option fight. He recalled a recent sal of watches and jewelry by an Indianapoli department store which, he said, had bee purely fraudulent, and that had such a la as the one proposed been on the statut books, it would have been impossible to ad vertise the sale in the newspapers. Thi question was also referred to the commit tee which was appointed to look after legis lative matters.

Another question brought up was th enactment of a law which would permi jewelers to sell uncalled-for repairs. Presi dent Bishop said it was probable jeweler had their safes filled with such merchan dise, which should be sold to obtain the cos of doing the work. He said the only way t sell such articles in Indiana was to adver tise notice of the sale, then send notice t the party interested and finally gain th approval of the court.

Secretary Oswald said he had uncalled for repairs in his safe that had been ther 15 years. A committee composed of Car Rost, Indianapolis; L. Beckman, Kendall ville, and Joseph Booth, Tipton, was ap pointed to give further consideration t this and other legislative questions.

President Bishop brought up the ques tion of fixed prices for gold-filled watche

l standard lines. He said many depart-nt stores and some jewelers, sold gold-ted watches at actual cost, as "leaders." said that jewelers should not patronize ncerns that allowed their goods sold in h a manner by department stores.

This discussion was taken up again Tues-y when the country storekeeper, barber d even farmers, who are enabled to buy elry and silverware from standard com-nies, and sell such articles at a small fit, were discussed. It was suggested that list of every reputable jeweler in the te be compiled and sent to the wholesale l manufacturing concerns, so that the ter may know with whom they are deal-. During the ensuing year the secretary ll endeavor to compile such a list.

Secretary Oswald reported that 42 new mbers had been received during the year, king a total membership of about 200. also stated that there was a substantial h balance in the association treasury.

The session on Tuesday morning was oc-pied by an address on "Watch Springs," Charles L. Higginbotham, consulting perintendent of the South Bend Watch . Mr. Higginbotham's address will be und in the Horological department of is issue of THE JEWELERS' CIRCULAR-EEKLY.

Tuesday Afternoon's Session.

The Tuesday afternoon session was en up with the election and installation officers. The committee on deceased embers also reported the recent death of illiam H. Helman, Terre Haute, and res-utions of sympathy were adopted.

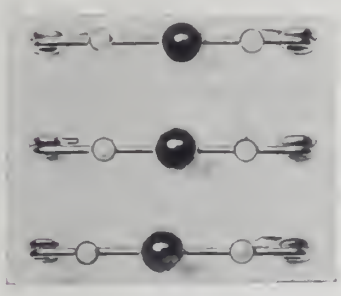
A banquet was given at the Denison Ho-l, Tuesday night, by the Baldwin-Miller . and Charles W. Lauer & Co., whole-lers and jobbers, of Indianapolis. Cov-s were laid for about 200 guests, and, in ldition to members of the association ose present included many Indianapolis welers not identified with the association, d their employes.

There were two long tables, with a aller table running crosswise at the far d of the banquet room. At the small ta-e were seated the speakers and toast-aster, the latter being Robert G. McClure, cretary of the Indianapolis Commercial lub.

The tables were decorated with numerous askets of carnations with strings of nilax connecting the baskets. Carnations ere also given as favors.

The following excellent menu was erved:

Blue Points.
Celery. Radishes. Olives.
Green Turtle Soup.
Salted Almonds.
Fresh Lobster Patties, a la Newberg.
Champagne Punch.
Fried Spring Chicken, Maryland.
Julienne Potatoes.
Cold Asparagus.
Metropolitan Ice Cream.
Assorted Cake.
Roquefort Cheese.
Coffee.
Martini Cocktails. Sauterne. Champagne.
Cigars. Cigarettes.



Back of the speakers' table was an or-hestra that gave a number of selections, while the courses were being served. Pres-lent Bishop gave the address of welcome, aying he was only sorry that he could not ay every jeweler in Indiana was a member

f the association. He urged those who ere not members to join, as they all eaped the benefits of association work, hether members or not.

Those who responded to toasts were: ames M. Ogden, "The Wise and Other-ise;" Col. J. A. Shepherd, "Pink Salve;" udge Cassius C. Hadley, of the Indiana upreme Court, "The Bright Side of Life," nd Brant C. Downey, "The Long Green."

Col Shepherd spoke on the opportunities nd responsibilities of the retail dealer.

"The grouch has no place in the retail usiness," he said. "There is enough sad-ess in the business world as it is. If the etail dealer will keep a smiling face and s heart full of regard for his neighbor lso his competitor, he will get more out f life and have more happy days than if he ontinually goes around with a frown on is face and a chip on his shoulder. The uccessful business man is the one who ooks on the bright, not the shadowy side f life."

Following the toasts, a number of vaude-ille features were given, several artists rom a local theater participating in the rogram.

THE ROSTER.

The roster at the convention showed that he following attended the sessions of the onvention:

Charles M. Schuell, South Bend; D. Bixler, Berne; F. A. Vogt, Mishawaka; Frank H. Wann, Oxford; W. E. Eldredge, Boswell; Claude R. Stoops, Nappanee; J. A. Arnold, Columbus; C. M. Hunnicut, Rockville; Emil Rossier, Martinsville; H. C. Klein, Crawfordsville; B. F. Kiser, Muncie; George Engelhard, Chicago; C. N. Hetzner, Peru; S. B Merrick, Plainfield; Charles T. Neff, Terre Haute; T. A. Anderson, Bedford; E. M. Wilhite, Danville; M. O. Cockrum, Oakland City. A. G. Craig, Bicknell; T. H. Purple, South Bend; E. C. Lay, Laporte; J. E. Scott, Atlanta; Otto Graf, Indianapolis; W. C. Davis, Elkhart; C. G. Beckman, Kendallville; Frank Haselline and K. W. Kern, Kokomo; A. Rothermel; Connersville; D. S. Whittaker, Lebanon; C. J. Wiltsie, Elgin, Ill.; J. L. Whisler, Marion; J. W. Thompson, Danville; George S. Kern, Indianapolis; J. M. Washburn, Anderson; Frank S. Day, Angola; S. N. Jenkins, Richmond; H. L. Rost, Columbus; G. V. Brown, Flora; W. E. Hart, Scottsburg; W. O. Davis, Scottsburg; W. F. McCombs, Waltham, Mass.; August Anderson, North Salem; E. F. Stark, New Point; J. B. Hesselbrock, Liberty; J. B. Dennis, Williamsport; Herman Vollmer, Princeton; Jay D. Taylor, Logansport; Charles M. McKee, Goodland; H. E. Barth, North Vernon; John L. Duncan, Wingate; C. A. Rinard, Kentland; B. S. Staley, Indianapolis; Philip Horr, Aurora; D. F. Booher, Evansville; C. C. Bigton, Rockford, Ill.; F. S. Crebs, Frankfort; O. A. Wise, Mitchell; S. H. Fielder, R. I. Ingersoll & Bro.; A. M. Keck and Mrs. A. M. Keck, Odon; G. W. Arnold, Laporte; J. H. Noyes, Osgood; William E. Bloomer, Terre Haute; Joseph E. Booth and Isaac Booth, Tipton; J. H. B. Ness, Indianapolis; A. C. Woods, Johnston Optical Co., Detroit, Mich.; Fred Frosier, Peru; N. P. Hoffman, Syracuse; C. F. Artes, Evansville; O. M. Artes, Evansville; Carl L. Rost, Indianapolis; Walter H. Mellor, Michigan City.

The site for many years occupied by Boyd Park, Inc., Salt Lake City, Utah, was sold a short time ago at private sale. The property is loceted at 170 S. Main St. The building was erected in 1873 by Boyd Park and W. F. Raybould, jointly. The price paid for the site at that time was $9,000. The new purchasers will not take possession until the expiration of about two years, when the jewelry concern will probably be ready to move to their new store in the Boyd Park building.

Connecticut.

W. T. Woodruff, Thomaston, attended the recent funeral of Seth E. Thomas, in New York.

A permit has just been issued to the Rockwell Silver Co., Meriden, to build a concrete addition to its factory on Maple St.

Israel Bloom, New Haven, recently filed a petition in bankruptcy. The petition was recommended for discharge by Henry G. Newton, of the bankruptcy court.

At Tampa, Fla., about a week ago occurred the death of Wm. S. Guyer, of Westport, for many years representative of the Waterbury Clock Co., for which concern he was traveling when he became ill.

Elias M. Ingraham, son of Walter A. Ingraham, Bristol, was married at Hamilton, Cuba, recently, to Miss Emma A. Kempy, daughter of Richard Kempy, of that place. The couple will return to Bristol early in the Spring.

At the annual meeting of the stockholders of the Silver City Cut Glass Co., Meriden, the following officers were elected: President, Percy Phoenix; vice-president, A. Abecwnas; treasurer, J. N. Schnick; secretary, H. J. Reeves.

The heads of the departments of the Waterbury Clock Co., Waterbury, enjoyed a banquet and entertainment one day last week at the Hotel Connecticut. The banquet was largely attended, Superintendent Wm. J Larkin acting as toastmaster.

P. A. Berg, well known in the trade, died recently at St. Raphael's Hospital, New Haven. Deceased was a resident of New Haven for a number of years and had a large circle of friends. He was an expert watchmaker and made a thorough study of horology. For the last year he was with S. Fry, on Church St.

Altoona, Pa.

S. Silverman, 1327 Eleventh Ave., has installed a first class optical department in charge of Dr. W. F. Cowell, for years a leading specialist of Richmond, Va.

Fire was discovered late Sunday night, Feb. 6, in the jewelry store of W. C. Davis, 905½ Eighth Ave., caused by an overheated stove, communicating fire to a nearby couch, from whence it spread to a stand. The entire store was threatened, but the firemen confined the loss to about $50. The building is owned by August Blumenthal, of New York City.

Warrant Issued for Apprehension of Jeweler of Treadwell, Ont.

TREADWELL, Ont., Feb. 10.—A warrant has been taken out for the apprehension of E. E. J. Mallet, late of this place, on a charge of defrauding his creditors. Mr. Mallet had a pretty big jewelry stock, but business slackened and he failed. His creditors insisted on an investigation into his affairs, but some days before the date fixed for his appearance before the judge he disappeared.

Mallet's liabilities amounted to upwards of $8,000, and only 15 cents on the dollar has been realized. Several Montreal supply houses were affected by the failure.

S. H. Babb, Bronte, Tex., has moved to Beaumont, Tex.

C. D. Gove has opened a store at Sheridan, Ia.

E. F. Evans has opened a repair shop in Hawkinsville, Ga.

C. I. Bederman is about to begin business in Richmondville, N. Y.

T. L. Hunter has engaged in the jewelry business at Clay Center, Nebr.

A new jewelry store has been opened by M. M. Huck at Schuyler, Nebr.

W. L. Spooner has opened a store of his own at 205 52d St., Philadelphia, Pa.

An enameling business has been started at 209 Pine St., Providence, R. I., by L. Berberian.

A. B. Carroll has started in the watch repairing business on East Main St., Spartanburg, S. C.

Dean, Lord & Cardin have engaged in the manufacture of sample cases at 45 Eddy St., Providence, R. I.

W. M. Taylor has located in North Emporia, Va., where he has opened a watch and jewelry repairing establishment.

Allen Hoffman has opened a jewelry and repairing establishment in the Western Union Telegraph office, Titusville, Pa.

Joseph W. Dupont has opened a jewelry establishment at Missoula, Mont. Mr. Dupont was at one time engaged in business in Minneapolis, Minn.

The Sherman Jewelry & Optical Co., Sherman, Tex., has been incorporated with a capital of $20,000. The incorporators are J. E. Muchert, W. S. Dickerson and J. L. Wolfred.

The Whitener Jewelry Co. was recently incorporated with a capital stock of $3,000 in Caruthersville, Mo. The incorporators are: Lee W. Rood, H. C. Garrett and H. M. Whitener.

Articles of incorporation have been filed by the Petow-Krieger Jewelry Co., Providence, R. I. The incorporators are: Lazarus A. Petow, Leon Krieger and Max Ross, all of Providence.

E. G. Chapman, for some time with Ryrie Bros., Ltd., Toronto, Ont., has engaged in business with his brother, B. Chapman, under the firm style of Chapman Bros., Ltd. The new concern will be located at 261 Yonge St., Toronto.

The Pittsburg Watch & Metal Co. recently filed articles of incorporation in Pittsburg, Pa., to engage in business as wholesale and retail dealers in jewelry, precious metals, watches, etc.

Workmen are now busily engaged in arranging for the installation of the big clock which is to occupy a place in the tower of the Federal building, Jacksonville, Fla., and the timepiece will probably be in place by the end of the month. The big bell was hoisted to the top of the tower a few days ago.

Don't Stand Still—Contentment is rust—men who are satisfied with what they have done soon cease to be of value to themselves. Every twenty-four hours produces a change in the way of doing things and the self-satisfied man, content with his knowledge and opportunity, soon becomes a back number. He stands still while things are moving forward.

Sign this Coupon to-day—It's your opportunity to move forward

By Signing and Mailing this Coupon NOW—

to-day, you will possess the power to do better things than you are doing

The Most Powerful Backing Any Jeweler Ever Had is Yours!!

We not only make permanently insured rings—we do more—we help you sell them. We do what no other manufacturer does. What we are doing for the jeweler who is fortunate enough to get *WWW RINGS* is so marvelous, so startling, so phenomenal, that it will be a revelation to the business world, and the envy of the jeweler who, through his lack of foresight and progressiveness, did not make arrangements to buy WWW insured Rings.

It Moves!! It Swings! It Almost Talks! It Will Draw Thousands To Your Window! It is Free! It Costs You Nothing!

This remarkable mechanical display stand is not for sale. It is given away. It is given absolutely free to the buyers of the famous Three W insured rings. It is beautiful in construction, handsome in appearance. In a mechanical, fascinating way it proves to the people of your community the important fact *that the stones do stay in Three W Rings*, and that you sell them.

The Factory Behind Three W Insured Rings

Better known as THE LIGHT OF HEAVEN FACTORY—86 windows and 3 skylights. These remarkable facilities bring us the choice of America's skilled workmen. No other factory can possibly obtain superior workmen. Consequently, Three W insured rings are made and set by the best Ring Makers and Stone Setters in the world. Three W Rings are the only permanently insured rings in all the world. It is one of various good reasons why you as a progressive jeweler should sell Three W Rings if you are not already doing so.

Permanent Insurance on W. W. W. Rings Means Increased Sales to the Retail Jeweler

Every WWW Ring is accompanied by a signed Guarantee. WWW Rings are the only rings that can be bought with *permanent* insurance. The jeweler who gets our line for the coming year will make a big catch—he'll land the best thing in the jewelry business—the one thing that will do more to create trade than anything else he could possibly do. Any dealer who offers his customers WWW insured rings will get the best trade—it doesn't fail; it has been proven a hundred times.

W. W. W. Insured Rings Combined with Our Modern Advertising Appeals to the "Live-Wire Jeweler"

This combination of ours cannot help but attract the progressive jeweler. Such a combination cannot help but bring success. Every man who has scratched his name upon the tablet of time was a self-believer. To be successful you must have boldness, confidence in self, ambition, daring and determination. The strength of our wonderful proposition and the merits of our rings will make any man bold, confident, daring, determined—will make any man successful. Be a self-believer. Only the ambitious achieve, and ambition without initiative is a useless possession—it has as much value as a gun without ammunition. You have the ambition, we furnish the initiative. We furnish the ammunition. Our methods will increase your business—increase your profits. Your success the coming year depends entirely upon the methods you secure. Surely you will not deny yourself the privilege of securing all this Advertising—the privilege of selling the only permanently insured ring in the world, when it simply and only involves the signing of the coupon.

White, Wile & Warner

Makers of Rings in Which the Stones Do Stay In

Buffalo, New York

Philadelphia.

L. P. White has returned from Florida after a pleasant sojourn.

A. C. McKinna, with A. G. Davis, 52d and Market Sts., is ill at his home.

C. Wettling, Newtown, Pa., has started on a pleasure trip to Cuba and Florida.

W. C. Penfold, a former Philadelphian, was here, last week, for his firm, Leary & Co., Ltd.

A. G. Lee, representing the E. Howard Watch Co., Waltham, Mass., was a recent visitor here.

H. H. Greiner, retail jeweler, of Bethlehem, Pa., has returned from a pleasant trip through the south.

W. Wheeler, of the firm of Wheeler & Salem, N. J., has gone to New Orleans on a pleasure trip.

William Waltz, formerly of Perkasie, Pa., has accepted a position as watchmaker at Atlantic City, N. J.

John Lohmeyer, watchmaker for D. Wolff, 909 Vine St., is seriously ill at the Philadelphia Hospital.

W. L. Spooner, formerly head of Wanamaker's clock section, has opened a store of his own at 205 S. 52d St.

Frank Tyack, Reading, Pa., has recovered from his recent attack of grippe, and was in the city buying, last week.

Transfer is recorded of five lots of George S. Katz, a prominent jeweler, of Collingwood, Pa., to Mary Keffer.

M. R. Lummis, retail jeweler, of Salem, N. J., who who recently sustained severe injuries from a fall, is convalescent.

Fred Barry, with Louis Stern & Co., New York, has again started on the road, Philadelphia being his first stopping place.

Mrs. Freda Liberman announces the engagement of her daughter, Sylvia, to Abraham Press, a retail jeweler, of this city.

The firm of Wigman & Khaner, 129 S. 7th St., was dissolved Feb. 12, and the business will hereafter be conducted by Jacob Wigman alone.

Aaron Haag, a retail jeweler, of Bernville, Pa., was buried, last week. Mr. Haag was 56 years of age and was well known to the trade.

Max Goldstein, with H. O. Hurlburt & Sons, will spend the latter part of this month at Atlantic City, combining business and pleasure.

The North American Watch Co. was represented by the Chicago manager, W. H. Alger, who was here the past week and booked many orders.

E. H. Fluery, salesman for H. O. Hurlburt & Sons, has been handicapped in his work because of a serious case of blood poisoning, which developed from a trivial scratch.

E. C. Albertson, Bridgeton, N. J., has changed the firm's name to Albertson & Cook, Inc. Mr. Cook has been associated in business for many years with Mr. Albertson.

F. P. Borgelt, an old Philadelphian, has returned to this city after an absence of two years spent in Kentucky. Mr. Borgelt will shortly embark in the jewelry business in south New Jersey.

The sympathy of the trade is extended to Mrs. Guyer, a former Philadelphian, whose husband was, until the time of his death, the representative of the Waterbury Clock Co., New York.

F. W. Haas & Co., South Bethlehem jewelers, have disposed of their stock and fixtures to Warren Geary, formerly with E. H. Wetherhold, Allentown, Pa. Mr. Geary has started alterations on his new store.

A "sand artist" at Atlantic City and familiar to all Philadelphians was arrested and convicted, last week, of having robbed a number of jewelry stores on the boardwalk. The goods stolen amounted to $2,000.

The Bailey, Banks & Biddle Co. made and designed the handsome loving cup which was presented recently by his Philadelphia friends and admirers to John McCormack, the Irish singer, in recognition of his great talent.

Horace Lockwood, who succeeded Mr. Gilbert as manager for the Dennison Mfg. Co., has been appointed a director, and will visit the Dennison trade at frequent intervals. George Dunwoody will assume charge during Mr. Lockwood's absence.

Col. J. Warner Hutchins sails on the *Caronia* Feb. 19, and will travel through England, France and Holland; his tour will combine business and pleasure. He regrets sailing before the jewelers' banquet, at which for many years he has been a prominent guest.

The jewelry store of N. Gorin, 103 S. 5th St., was totally destroyed by fire, last week. Mr. Gorin estimates his loss at $10,000. Valuable gems and part of the stock are supposed to have been buried and lost in the debris in the cellar. The origin of the fire is unknown.

Inquiry in the jobbing trade since the robbery of the store of Mr. Mayer discredits the attempt of the police authorities to question his version of the affair. Mr. Mayer carried no burglary insurance, both his business and personal matters being in good shape, his entire personal indebtedness being only nominal.

G. W. Leopold, traveling for H. O. Hurlburt & Sons, has returned from a successful business trip through Baltimore and Washington. While on the trip several bowling matches were arranged for Mr. Leopold by his friends, and as a compliment to his extraordinary playing he was presented with a very handsome prize.

The Jewelers' Club, of Philadelphia, has sent out cards announcing the 15th annual banquet on Saturday evening, Feb. 19 at 7 o'clock at the Bellevue-Stratford. According to one of the members the dinner will be the most successful ever given by the club. Many distinguished guests from Washington will be among the speakers.

Creditors of S. Jacobson, a bankrupt jeweler, learned, last week, that while Jacobson has been discharged in bankruptcy the estate has not been closed. The trustee has been endeavoring to collect some book accounts, but without much success. The trustee's attorney promises to try and get the final account ready for filing within the next month.

Complimentary to Lincoln's Birthday, J. G. Caldwell & Co. displayed in their window Lincoln bronzes by notable artists, including the Lincoln Bust, by Paul Winters Morris; the famous George E. Bissell bust; bust by Bachman and the life mask by Victor D. Brenner. A collection of plaques and medals were also on view. The window attracted unusual attention.

Charles H. Moore, 10th St. and Fairmont Ave., and "Gus" Miller, of 22d and Seybert Sts., were held Friday under $1,500 bail each on the charge of robbing the office of E. E. Dungan & Co., jewelers, of this city. The building, 1208 Chestnut St., was entered several days ago, and jewelry valued at $125 was taken from Mr. Dungan's office. Since the arrest Moore has exonerated Miller of any part in the crime.

The following jewelers were visitors to this city during the week: E. C. Albertson, Bridgeton, N. J.; John MacPherson, Mauch Chunk, Pa.; D. H. Kraus, North Wales, Pa.; M. E. Hunter, Beverly, N. J.; George A. Bowen, Bridgeton, N. J.; Roland Oliver, Burlington, N. J.; W. K. Schlotterer, Schwenksville, Pa.; Henry Bode, Atlantic City, N. J.; G. A. Terhune, Ingersoll & Bros., New York, and James B. Ray, Conshohocken, Pa.

New Orleans, La.

It is reported that the property at 106 Barron St., which was recently leased for a long term, will be used as an optical parlor.

The "Rex" and "Comus" carnival jewels have been the subject of usual interest. The Rex jewels were exhibited in the window of Coleman E. Adler's store, while the Comus jewels were shown by A. B. Griswold & Co.

The police have been looking for Joseph Wallace, a printer, who is accused of assaulting F. Fisher, a Canal St. jeweler. Wallace is accused of knocking Fisher down and kicking him in the face while he lay on the sidewalk. Fisher's right wrist was broken by his fall.

August Royerre, a jeweler and watchmaker, is held here without bail to answer the charge of shooting his wife. While in a drunken frenzy Feb. 2, Royerre, who lives at 1554 Clabourne Ave., shot at his wife and then turned the pistol on himself. While his wife's wound was mortal, Royerre's shot at himself resulted in a scalp wound over the right temple, and before he could shoot again the revolver was taken away by his 19-year-old son. Mrs. Royerre was operated on after the shooting in the hospital in the hope it would save her life. The jeweler was locked up to await the result of his wife's injuries.

The funeral of Mrs. Christian E. Boehm, mother of Geo. R. Boehm, jeweler, at 830 Canal St., was held Friday afternoon at 3.30 o'clock from the residence of her son, 208 David St. Rev. Mr. F. Lowenstein officiated, and interment was in the Greenwood Cemetery. Mrs. Boehm was born in Copenhagen, Denmark, nearly 90 years ago. She was educated in Copenhagen, and at the age of 17 became maid to Princess Henrietta of Denmark. She remained as maid for three years. When she was 30 years old she came to the United States, and arriving at New Orleans met Mr. Christian S. Boehm, whom she married in 1851. Six children were born to them, of whom George A. Boehm alone survives.

GORHAM SILVER

WHAT EVERY WOMAN KNOWS

That the Gorham trade-mark is a certificate for Sterling Silver $^{925}/_{1000}$ fine, and needs no explanation to the recipient when sent as a gift; therefore, when a dealer offers solid silver bearing this mark the sale is readily made. How much better this is than trying to explain that some other make is "just as good."

ALTHOUGH the jewelry failures during January were in number not above the normal, the amount of the liabilities recorded was the largest in a great many years. This, however, is due to the fact that the liabilities of two failures alone, a diamond and jewelry house in New York and a jobbing firm in Chicago amounted to more than $1,000,000. When this is taken into consideration the figures do not make such a bad showing as at first appeared. According to statistics compiled by R. G. Dun & Co., there were 45 failures in January, 1910, with liabilities of $1,187,102; 61 in January, 1909, with liabilities of $195,620; 63 in January, 1908, with liabilities of $1,105,161; 36 in January, 1907, with liabilities of $377,069, and 39 in January, 1906, with liabilities of $366,022.

Help Enforce the Stamping Law.

IF there is one trade more than another in which a merchant's reputation for honesty is a most essential element in business success it is the jewelry industry, because in few lines is it less possible to tell the intrinsic value in the articles sold than in this. Therefore, dishonesty on the part of either manufacturer or dealer, either in the lines that he makes or representations as to their quality, is apt to have a serious effect not only upon the people involved, but upon the trade in general; and no man, manufacturer, wholesaler or retailer, can look with indifference upon cheating or misrepresentation of any kind in his craft, no matter how remote it may be to him or his business, because he knows that sooner or later, directly or indirectly, it may have some effect upon him or his customers.

It was this general realization that honesty must be enforced throughout the entire trade that made the makers and handlers of jewelry and silverware a practical unit in favor of legislation to prevent fraudulent marking, and it was the unanamity of the trade as to the ultimate effect desired that made a national stamping law possible and has also brought into being the various State laws governing the frandulent marking of precious metals.

That the moral effect of these laws has been good there is no room to doubt, because even though they have been seldom evoked a large amount of spuriously marked articles which used to be manufactured, disappeared with their coming into being, and to a certain extent they have created a public demand for goods containing the sterling or karat mark, which had not previously been felt.

That these laws were necessary no one will deny. Nearly every civilized country has realized the necessity of protecting its citizens as to marking gold and silver, and for a long time the United States was the one great exception. Our own laws to-day are in no way as stringent as those of many European countries, because it is impossible under our form of government to provide for compulsory marking of merchandise wherein the health and welfare of the community are not immediately involved. All that could be done was to obtain legislation against false representation when a marking was used, our laws providing that when articles are marked as to quality they must be up to that quality, leaving the manufacturer free to make anything he likes, provided he puts no stamp upon it.

These laws may be inadequate to wholly stamp out *all* fraud, but they have served a good purpose and will do so long as they are respected. However, there is one point to be borne in mind; that is, that laws of the character of stamping legislation of the various States and of the Federal Government do not enforce themselves. The prosecuting authorities, both State and Federal, do not of their own initiative seek the offenders against such statutory laws obtain the evidence and bring them to justice. To start the law in operation a complaint must be made, and it is a common occurrence for public prosecutors to insist that not only must complaint be made, but evidence must be given to them by complaining witnesses that is strong enough for them to go before a grand jury. In other words, the prosecuting authorities ask cooperation from those whose interests lie in the enforcement of the law. When this cooperation is given they are ready to act, but the cases are treated in a different manner from those of robbery, murder and other common-law crimes.

Whether the public prosecutors' attitude is right is a subject that does not concern us at present. "It is a condition, not a theory, that confronts us," and the prosecuting authorities, having taken this attiude, it is for the jewelers to realize that if they want these laws enforced they must do their part towards setting the machinery of the criminal courts into motion. Though the individual dealer may not feel that it is up to him to act as a "trade policeman," nevertheless the subject is a proper one for the merchants to act upon through their local and State organizations, and it might be well made part of the duty of some of the committees to cause investigations to be made from time to time of complaints of violations of the stamping law, to gather evidence, and, if they find a proper case has been made, to lay this before the proper tribunal. The mere fact that committees have this work before them would, no doubt, prevent a large number of violations of the statutes which might otherwise occur if people begin to imagine that the laws are not being, or will not be, enforced.

The splendid results obtained by advertisers in the Jewelers' Circular-Weekly, prove its great value as an advertising medium.

A well-dressed woman recently entered the store of Morris Cohn, 704 15th St., Denver, Colo., and asked to look at diamond earrings. She purloined a valuable pair and made her escape. The woman was of middle age, and wore a black plush coat and black and white skirt. She wore a large black hat trimmed with plumes.

Hudson & Son have added an fine painting to the collection which n adorns their store at 519-521 Nicollet A The latest acquisition is a copy of a fam Rembrandt from the Royal Art Gallery, Amsterdam, the original of which is s to be worth $1,000,000. It depicts a me ing of old Dutch councilors.

This has been a busy week for trave representatives of jewelry houses, who h flocked to the Twin Cities in considera numbers owing to the State convention retail jewelers. Among the visitors we Ernest Lunt, Towle Mfg. Co.; Fergus Mead, Barber Jewelry Co.; C. P. You Whiteside & Blank; Mr. Holbrook, Sl & Co.; Frank Milhening, J. Milheni Inc.

Robert Kriess, who, until a few ye ago, was a member of the firm of Kr & Holmes, but who has of late been e gaged in farming, near this city, met tragic fate last Monday. He was drivi into Minneapolis with a load of corn wh his horses became frightened and ran aw hurling him against a telegraph pole killing him instantly. He was 35 years age, and leaves a bride of five months

The annual convention of the Minnes Retail Jewelers' Association brough large number of visiting jewelers to Twin Cities last week. Among them wer C. A. Sherdahl, Montividco; A. L. Mea Delano; William Plackner, Benson; J Birkebak, Lester Prairie; I. Reiner, Hute inson; R. S. Swarthout, Pine Island; W. W. Winchester, Amery, Wis.; I. D. A Cooperstown, N. Dak.; L. M. Taylor, M shall; E. T. Johnson, Baudette; A Cone, Windom, and A. F. Harper, Hute inson; H. L. Weatherwax, Hatton, Dak., and Henry O. Thomas Hampd Ia.

Toledo.

The J. J. Freeman Co. is now havi their annual sale of cut glass. The conce has some very beautiful samples on exhi tion.

After attempting to rob the safe car Thursday morning in the Temperanc Mich., post office, burglars were frighten away before they accomplished their pu pose. This town is 11 miles from Tole and it is thought the thieves came her Three men were seen as they fled fro the building where they attempted to blo up the safe with a charge of nitro-glyce ine. They escaped with $30, a gold watc and chain and a tray of jewelry, whic were taken from the cash register an drawers in the post office.

editors of the Hofman Jewelry Co., Columbus, O., at a meeting held in the ms of the Jewelers' Board of Trade last week, voted to grant the concern an extension. A committee of five has been appointed to take charge of the business while the extension lasts.

Retail jewelers in this city are interested in the first convention of the New York State Retail Jewelers' Association, which will be held in Rochester, May 26 and 27. Charles T. Evans, of Utica, N. Y., is president of the organization, and Charles E. Sunderlin, of Rochester, is the secretary.

George W. Harvey, retiring manager of the Alvin Mfg. Co.'s Fifth Ave. store, was recently presented with a very handsome sterling silver loving cup by the employes, inscribed as follows:, "Presented to Mr. George W. Harvey, as a token of esteem, by by the employes of the Alvin Mfg. Co. Fifth Ave. Store, Feb. 15, 1910."

B. Maiman, of the Crown Mfg. Co., Denver, Colo., who has been in New York, stopping at the Broadway Central Hotel, met with a bad accident early last week. While walking through Grand St. to his hotel he slipped on the ice and broke his arm. He was taken to a drug store, badly shaken up, and medical attendance was secured. Mr. Maiman now has the arm set in plaster.

Gifts of antiques for the governor's room at the City Hall were, last week, placed on exhibition. The gifts were made by a public-spirited citizen whose name has not yet been announced, but who is said to have made other gifts in the furnishing of the governor's room. The list includes two small bronze candlesticks, two larger ones of bronze and marble, four candelabra and a bronze clock. Of the candelabra, one is in the Empire style and of black and gold, and one in the simple Colonial style.

Mills & Batt have been incorporated under the laws of the State of New York to manufacture and deal in jewelry, etc., with a capital of $30,000. The incorporators are Leonard Batt, William R. Mills and B. L. Strasburger. The new concern will manufacture a line of 10-karat jewelry, with colored stones and diamonds. It will have offices and salesroom at 31 Maiden Lane, and a factory at Newark. The new line will be ready to be shown about April 1. Mr. Mills and Mr. Batt were both for many years with Byron L. Strasburger & Co.

A large number of department store buyers have been in this city during the past week, among whom were: J. H. Perrin, Fourqurean, Temple & Co., Richmond, Va.; Mr. Bennet, T. Eaton Co., Winnipeg, Can.; J. A. Belmener, Mannheimer Bros., St. Paul, Minn.; Miss E. Bruce, Callender, McAuslan & Troup Co., Providence, R. I.; Sam Simon, Lipmann, Wolfe & Co.; Portland, Ore.; C. I. Crosby, L. S. Ayres & Co., Indianapolis, Ind.; H. H. Newmark, O. K. Gem, Louisville, Ky.; J. H. Estes, Drewry, Hughes & Co., Richmond, Va.; G. E. Gehring, the Sweeney Co., Buffalo, N. Y.; I. J. Jenkins, Joseph Horne Co., Pittsburg, Pa.

Louis A. Lanthier died last week at his home, 151 E. 29th St. Mr. Lanthier, who was born in Montreal in 1840, came to this city in 1865, and opened "The Old Curiosity Shop" at 747 Broadway. From there he moved to 6 Astor Place, but then he returned to 717 Broadway and finally established his best-known place at 354 Fourth Ave. Numbering among his patrons many of the best-known collectors, Mr. Lanthier was an expert on old and modern pictures, porcelains, furniture, silverware, antique jewelry, armor and precious stones. He was also an authority in the matter of dress and customs of different periods of the world's history, and was frequently called into consultation by theatrical producers.

From Newburg, N. Y., comes the report that jewelers in that city are wondering as to the whereabouts of a slick stranger who visited their city last week and represented himself as a traveling salesman, thereby getting into their confidence and securing sums of money on bad checks. The man is described as being very well dressed and wearing a black overcoat. He is of medium height. At one of the jewelry stores he purchased some dessert spoons, presenting a check in payment. The check was drawn on the Walton Bank, New York. He showed a deposit check book with $1,200 to his credit to back up the check. The name signed to the check was F. B. Thomas. The check was drawn to his personal account. The matter has not been reported to the police, as the merchants decided to try and keep it quiet.

A replica of the Crouching Venus, of which the most famous known is in the Louvre in Paris, is one of the recent acquisitions of the Metropolitan Art Museum, shown with a remarkable Greek lion among other pieces for the department of classical art. Last week's monthly announcement contains the most valuable list given out for some time. There were included a fine terra-cotta polychrome relief of the Madonna and Child by Verrocchio and several pictures, and announcement was made of the coming Whistler exhibition. This will open about March 15. Other recent accessions include: Pottery, ostraca, impressions of royal seals, floral collars and other ornaments, from the excavations of Theodore M. Davis in the Valley of the Kings at Thebes, (gift of Theodore M. Davis); 26 inscribed pottery cones from Sheik Abd el Qurnch (gift of Herbert E. Winlock); 10 marbles; 19 bronzes, including as one item a collection of 15 small pieces; 31 vases; nine statuettes and other objects in terra cotta; fragment of stucco with relief, (purchase); Sultanabad vase, Persian, 13th century (purchase); Luster tile, Rhages, Persian, 13th century, (gift of George Blumenthal); silver medal, Sadi Carnot, 1894, by O. Roty; silver medal, Paul Heyse, 1900, by Rudolf Marschall; silver medal, Gustave Tschermak, 1901, by Rudolf Marschall, (gift of Howard Mansfield); two primitive bronzes; bronze box, with Mohammedan inscription, Chinese, early Ming period; two incense burners, with Mohammedan inscription, Chinese, Chêng-tê period, (gift of William M. Laffan); collection of rubbings of monumental brasses from churches in England, 14th, 15th and 16 centuries, (gift of Mrs. Mary Cooper); bronze statuette, Cleopatra, Sienese, 15th century; two bronze statuettes, Bull and Horse, Paduan, 16th century, (gift of George Blumenthal). t of loans include 15 pieces of silver, nerican, late 18th century.

Manuel Meyer is no longer in the employ M Bauman & Co., 87 Nassau St.

M H Shiman & Co., manufacturers of mond jewelry, are now located at 45 hn St

Henry Fera, of Fera & Kadison, 65 ssau St., is serving as a juror in the y court this week.

Robert W. Adams, of T. W. Adams & 15 Maiden Lane, sails to-day for Eu on the *Cedric* of the White Star Line.

Herbert C. Bliss, of the Bliss Bros. Co., ttleboro, Mass., stopped over at the New ork office on his way home from Chicago londay.

M. D. Rothschild, of the American Gem Pearl Co., 14 Church St., started Satur- ay for Florida where he will spend a vaca- on trip.

Albert Lorsch, of Albert Lorsch & Co., 7 Maiden Lane, accompanied by his wife, ailed for Europe, Saturday, on the *Amerika*.

"Money and Democracy" is the title of a ooklet which has just appeared over the ame of William F. Doll, a former watch ealer of this city.

Mr Wallenstein, of Silbermann, Kohn & Wallenstein, 87 Maiden Lane, who has been ll for the past few weeks at his home, is eported to be improving.

J. Warren Alford, of C. J. Alford & Co., as returned from a two weeks' stay in Florida, where with his wife he has been spending a short vacation.

Reuben Mason, of the Potter & Buffinton Co., and Frank Gray, who is with the W. H. Wilmarth Co., are among the February Grand Jurors sworn in by Judge Dike.

Samuel Elwoosky, formerly in the retail business on Willis Ave., Bronx, is now engaged in the wholesale jewelry trade at 71-73 Nassau St., under the name of Samuel Elroff.

Harry R. Compars, Cleveland; Alonzo J. Newbury, Detroit, Mich.;, and Edward Hardy and Arthur Kelley, with D. C. Percival & Co., Boston, Mass., were among the out of-town visitors in this city, last week.

The Sunday edition of the *Brooklyn Eagle* reproduced part of the article published in the Anniversary Number of THE JEWELERS' CIRCULAR-WEEKLY on The Trend of Fashion in Jewelry, using a number of illustrations.

The Jewelers Security Alliance received a telegram Monday stating that a window in the store of S. J. Trocky, Chicago, Ill., was smashed that morning by some one who hurled a brick through it. The loss in goods is reported to be small.

The Jewelers' Bowling League has decided on May 7 as the date for the annual dinner which will be held at the Broadway Central Hotel again this year. Talent to entertain the bowlers will be provided for the evening and souvenirs will be given, as has been the case in past years.

The trial of Conrad Schickerling on a charge of grand larceny was begun yesterday in the Court of General Sessions, Part V, before Judge Crain. Schickerling was formerly a member of the defunct firm of his name, which became involved in a suit for the recovery of assets, as reported in THE JEWELERS' CIRCULAR-WEEKLY at the time. A criminal charge was later brought against Mr. Schickerling.

United States Commissioner Linsley Rowe, of Jersey City, has committed to the Essex County Jail, in default of $5,000 bail, Alfonso Pisacano, of 688 Sackett St., Brooklyn, for smuggling over $2,000 worth of jewelry. He arrived from Italy Saturday as first cabin passenger on the steamship *Regina d'Italia*, which docked at the Pennsylvania Railroad. Treasury Agent Ranali says he found sewed up in the collar of his jacket and in other parts of his clothing, 50 fine gold chains, eight watches, several rings and a package of pearls.

According to a special agent of the Treasury Department 412 pieces of jewelry and several packages of unset stones were seized a few days ago from a man who was a first-cabin passenger on the steamer *Regina de Italia* from Naples. On the inside of the man's shirt the customs official said were 41 gold and silver chains; in a belt around his waist were 15 chains, one watch, 11 lockets, four braclets, eight pairs of cuff buttons, 41 charms, four studs, 33 brooches, 55 pairs of earrings and 80 finger rings. The man was held in $5,000 bail on a charge of smuggling.

Daniel J. Butcher, a silverware salesman, shot himself in a bathroom near his apartment on the fifth floor of the hotel Raymond, 42 E 28th St., late last Wednesday afternoon. He died two hours later. Mr. Butcher came to this city from Denver several years ago, and then went to Chicago as western representative of the Hamilton Silver Co. After being in the employ of the company for some time he left the concern to devote his time to an invention for cutting bread. He left a letter which explained his act. He was in financial straits and would not ask aid or steal.

Edouard Koehm, said to be a Swiss watch manufacturer of Geneva, who was a cabin passenger by the *Campania* from Liverpool, was asked by the customs men if he had anything about him that was dutiable that he had not declared. He was unaware that they had a tip cabled from Liverpool. He said he had nothing and he was then relieved of a dozen patent silver watch cases, some fastened around his waist and one tied under his left arm. The cases were taken to the public stores and Mr. Koehn was told that he must appear before Special Deputy Surveyor George Smyth and explain.

The Appellate Division of the Supreme Court denied Friday to Burnett Y. Tiffany, son of the late Charles L. Tiffney, permission to demand an accounting from the executors of his father's estate. The executors are Louis C. Tiffany, another son, and Alfred Mitchell, the dead jeweler's son-in-law. Burnett Tiffany, under the terms of his father's will, is to receive the income for life from a trust fund of $250,000 and 50 shares of the capital stock of Tiffany & Co. at $1,000 par each. The executors asserted that to render an accounting would subject the estate and the trust funds to further and needless expense.

Charles A. Senescal, a retired jeweler, and for 40 years a resident of Brooklyn, 35 of which had been spent in East New York, died at Culebra, Panama, Friday, Jan. 28, of old age. For the past three months he had been visiting his son-in-law, Newell P. Kingman, who is stationed there, having gone down with his wife, Rebecca, and his grand-daughter, Mrs. Murray Lenhan. Mr. Senescal was born in Plattsburg, N. Y., 81 years ago. He is survived by his widow, a daughter, Mrs. Newell P. Kingman, and a grand-daughter. The remains will be brought to Brooklyn, and after a funeral service will be interred in the family plot in Greenwood Cemetery.

At the regular monthly meeting of the board of directors of the Jewelers Board of Trade, held Thursday, the following firms were unanimously elected to membership in the board: M. Bauman & Co., New York; Berland, Teitelbaum & Whitebook, New York; Clinton Mfg. Co., Providence, R. I.; Denver Watch Case Co., Denver, Colo.; Ingomar, Goldsmith & Co., New York; A. J. Hedges & Co., New York; The F. W. King Optical Co., Cleveland, O.; Leick Jewelry Co., Newark, N. J.; Charles Marx, New York; Max Petersen & Co., Buffalo, N. Y.; Reichman Bros., New York; The Schwarz Bros. Co., New York; Staiger & Sons, New York; Tannenbaum & Co., Providence, R. I.; Whiteside & Blank, Inc., Newark, N. J.

An action brought by C. P. Goldsmith & Co. against Jacob Schoen for the payment of goods sold and delivered, amounting to $410.50 resulted in a verdict, last week, of $73 in favor of the complainants. Behind the award of $73 is an interesting complication. No question was raised as to the validity of the claim by Mr. Schoen, but he insisted upon a credit of $337.50 for a pair of diamond earrings delivered to one Victor Fodor, who he claimed was acting as the complainant's agent. Mr. Schoen contended that Fodor had obtained the earrings on memorandum, made out for him to C. P. Goldsmith & Co., and produced witnesses and books to prove his claim. Fodor disappeared and could not be located. The jury brought in a verdict of $73, the difference between the account against the defendant and the counter claim which he set up. The case was tried before Judge Davies in the Seventh District Court. The complainants were represented by Hastings and Gleason and the defendant by David Levy. C. P. Goldsmith & Co. have brought suit for conversion against a pawnbroker named Cypress, who testified at the trial that he received the diamonds from Fodor. His case comes up to-day.

C. S. Sherwood, Portsmouth, Va., has just installed in his store a large vault weighing 36,000 pounds and measuring 10 feet in heighth. A special foundation of concrete two feet deep and weighing five tons was built for the big safe at the rear of the main salesroom.

Warren W. C. Geary, of Allentown, Pa., has purchased the jewelry store of F. W. Haas & Co., South Bethlehem. Mr. Geary learned the trade with E. H. Wetherhold, and last Spring he took a course in the Philadelphia School of Engraving. Since that time he has been in the employ of Mr. Haas.

here are 233 pieces of American church erware now in the collection gathered gift or loan at the Boston Museum of e Arts. This artistic assemhling of typi- communion services and other church re, some of it embracing rare specimens early workmanship, has been secured inly through the efforts of Francis H. elow, of Cambridge.

he Waltham Watch Co, and Rohbins, pleton & Co. moved Saturday afternoon at close of business from the quarters ich they have occupied for several years the fifth floor of the Jewelers' building, l on Monday morning were ready for iness in a new and handsome suite of offices in the John Hancock building, just completed, on Franklin St.

Buyers in town during the week included: J. J. Hartigan, Troy, N. Y., C. H Sinclair, Concord, N. H.; Joseph Geoffrion, Manchester, N. H.; L. R. Hapgood, Orange; E. F. Welch, Westboro, George F. Seavey, Haverhill; Joseph Lajoie, Worcester; James Wain, Lawrence; L. Smith, Brockton; H. A. Wippich, Provincetown; C. F. Godfrey, Hingham; J. H. Jacques, Haverhill; W. L. Pierce, Stoughton; H. S. Hewett, Brockton; J. F Hill, Beverly; M. J. Harrington, Whitinsville; W. A. Kemp, East Pepperell, and H S Howe, Concord, Mass.

Arthur W. Cross, who has been located for some time past in the Washington building on the seventh floor, last week purchased from the receiver the fixtures and plant of William A. Thompson, in the Jewelers' building. He will occupy the office and salesroom at No. 66, but has resold the manufacturing plant in room 67 to Charles H. Jukes, who has been for nearly 31 years with Mr. Thompson, a large part of the time being in charge of the workshop. Mr. Jukes will do general work for the trade. Walter Roy Jukes, his son, will be associated with him.

Henry W. Paterson has returned from Montreal, where he attended the annual meeting of the Smith-Patterson Co., Ltd., Feb. 8. Marcel N. Smith, who also attended the meeting, is stopping at the Woodstock Inn on the return trip, where he has been enjoying snowshoe trips, sleighing and other Winter recreations. He is accompanied by Mrs. Smith. Mr. Patterson reports the re-election of the officers of the company, and says the outlook for Canadian trade is even more promising now than it was at the beginning of last year, which proved very satisfactory from a business point of view.

Traveling salesmen visiting Boston included: William B. Peck, Crossman Co.; J. D. Dalzell, J. D. Dalzell & Co.; Frank J. Keller, Keller Mfg. Co.; W. H. Thornton, Henry A. Kirby; Charles T. Dougherty, Osmers-Dougherty Co.; Alfred Reeves, Eckfeldt & Ackley; Charles Theurer, Crane & Theurer; George A. Jochum, C. Cornehlsen; W. Huger, William Huger & Co.; C. E. Mott, J. B. Bowden & Co.; W. N. Peal, Strobell & Crane; Mr. Evans, William Scheer; Harry Ward, Durand & Co.; Fred Hoyt, Hoyt, Obrig & Geiger Co.; John Baker, Jacobson Bros.; Frank Spies, Whiting Mfg. Co.; Louis L. Lawton, Jones & Woodland; H. H. Kolbert, Kohn & Co.; W. J. Harber, Enos Richardson & Co.; George Geer, Tilden-Thurber Co.; Frederick Lapham, Carter, Howe & Co.; Benjamin F. Griscom, Bippart, Griscom & Osborn; Wallace Campbell, Day, Clark & Co.; J. F. Imfeld, Hendrick Co.; H. B. Bliss, B. M. Shanley, Jr., Co.; H. W. Anderson, Bride & Tinckler; R. H. Schley, Sloan & Co.; F. C. Staudinger, Charles Weller & Co.; George A. Briggs, William L. Sexton & Co.; V. S. Chapman, Osmun-Parker Co.

George L. Van Wort has rented quarters in the Stack building on Main St., Susquehanna, Pa., where he will open a jewelry and optical business.

Buffalo, N. Y.

Fred C. Smith, of the Heintz Art Metal Shop, has gone on a three months' trip to the west.

The Buffalo Credit Men's Association, to which belong some manufacturing jewelers, held a banquet Saturday night.

It was reported, last week, that B. M. Henschel is present secretary of the Standard Jewelry Co.; this should have read the Standard Jewelry Case Co.

Gustav Frisch, of Frisch Bros., was among those who were prominent in preparing plans for the annual ball held recently by the Uncle Sams, a leading political organization here.

Among the jewelers who recently visited the Buffalo market were: W. H. Fuller, Silver Creek; R. C. Holmes, Gowanda; I. Traub, Niagara Falls; C. D. Barnes, Gowanda, and Geo. Engel, Springville.

C. C. Penfold, manufacturing jeweler, had charge of a unique form of entertainment at the recent reunion held at German-American Hall by the Veterans' Association of the 71th Regt. His feature was known as an aerial bombardment. An airship concealed on the stage was sent out over the veterans' heads, exploding bombs of confetti.

The Retail Jewelers' Association met at the Genesee Hotel last Friday evening and elected the following officers for the ensuing year: President, Albert Zilliox; vice-president, Louis Schutt; secretary, Emil Dettling; treasurer, Fred J. Dorn. Arrangements are under way for the annual banquet of the association to be held March 1. It is expected that many prominent speakers will attend, among them Charles Evans, of Utica, president of the New York State Jewelers' Association.

Among the travelers who recently called on the local trade were: W. H. Osborne, R. Wallace & Sons Mfg. Co.; D. Skutch, New Haven Clock Co.; Frank L. Wood, Ludwig Nissen & Co.; Joe D. Varley, Allsopp Bros.; Jos. J. Sideman, Redlich & Co.; A. B. Tetthill, Saunders, Meurer & Co.; A. N. Dorchester, Chapin & Hollister Co.; Mr. Whitmore, Rogers, Lunt & Bowlen Co.; Albert K. Bonnet, Henry Ginnel & Co.; E. B. Downs, Hayden W. Wheeler & Co.; Chas. Miller, Ansonia Clock Co.; W. H. Osborne, R. Wallace & Sons Mfg. Co., and J. A. Forsyth, Meriden Cutlery Co.

Ben Freedman, of Freedman Bros., ring manufacturers, 128 Franklin St., accompanied by his wife, has been spending the Winter at Asheville, N. C. They are expected to arrive home later this week. Joseph Freedman, a representative of the concern, will leave Buffalo Feb. 20 to cover the northern part of New York State. Freedman Bros., who were formerly located at 52 Niagara St., have been at their present location since Oct. 1. Their store is equipped with a burglar alarm system and other modern improvements. The members of the concern are Ben I. Freedman, Lawrence Freedman and Marvin J. Freedman.

Dials will soon be placed on the Court House clock in Chambersburg, Pa., at a cost of $250.

Do you believe in conducting your own business or in having the people from whom you buy goods do it for you?

We have conducted our own business in our own way and *successfully* for 50 years.

We absolutely refuse to be told how or from whom to purchase our watch cases, as we feel fully able in this respect to determine what is best for ourselves and our customers.

Our determination in this matter is dictated by our self respect, and the conservative independence we have at all times shown in our endeavor to faithfully and economically serve the retailers who patronize us.

Where competition is stifled and prices are arbitrarily regulated, the dealer is at the mercy of those who submit to such dictation. That we refuse to enter into any trade-throttling agreement we believe will be understood and appreciated by all those who know us.

NEW YORK

Cincinnati.

rvin Herman, of Herman & Loeb, is y happy over the arrival of a baby girl is home.

ohn A. Herschede, of the Herschede ll Clock Co, has left on a long eastern iness trip.

. C. Wilson, of the Crescent Watch se Co., called on the trade here during past week.

William P. Flueger and J. B. Osthoff, Joseph Noterman & Co., have left on ir respective trips south and northwest.

. M. Boner, of the J. M. Boner Jewelry ., Evansville, Ind., and whose stock was ently burned out, was here last week ering fixtures for the new store he will n occupy

Bert Ganz, well known as a traveling esman, was here last week on his first p for the Leroy Mfg. Co. He will cover same territory as he did previously, and ll make Cincinnati his headquarters.

After a satisfactory settlement, the case Lindenberg, Strauss & Co., *vs.* C. C. esterman, jeweler, of Matewan, W. Va., as dismissed. Testerman was released eb. 10, after a week's stay in the county il here.

Eighteen one-dollar watches were stolen om A. Seidensticker's store, 231 High St., amilton, O., Feb. 9, in the evening. hieves, thought to be amateurs, broke the rge plate glass window by means of a iece of asphalt paving, snatched watches nd escaped.

At the annual meeting of the local asso- ation of retail jewelers, the following ere elected: Anthony Schemel, president; . C. Dornseifer, vice-president; William ink, 2d vice-president; George A. Heintz, ecretary, and George Nagel, treasurer. ohn A. Bertling is the retiring president.

Lynn Smith, Nome, Alaska, who has been isiting his mother in Newcastle, Ind., was lso a guest of Fred Thoma, of the Thoma Bros. Co., of whom he is a customer. Mr. Smith is very much attached to Alaska. Aside from holding a government position at Nome and being a jeweler there, he also has valuable gold mining interests.

Out-of-town jewelers who were here the past week buying stock included: Owen Sherwood, Falmouth, Ky.; F. Anderson, Switzer, Ky.; Charles H. Creighton, Franklin, O.; C. E. Seng, Louisville, Ky.; B. Gratz, Lexington, Mo.; H. Rodgin, Bluefield, W. Va.; Joseph Embrey, Richwood, O.; G. W. Schlenker, Eaton, O.; N. E. Supp, Dayton, O.; R. C. Tyson, Carrollton, Ky.; P. H. Sparks, Sabina, O.; J. L. Waters, Wamsley, O., and F. A. Bixby, Ironton, O.

Barker & Freisens, for many years located at 409 Central Ave., have leased quarters at 35 E. 5th St., for a term of five years, at a rental of $4,000 a year, and will open up with an entire new stock some time in March. The King Jewelry Co., recently incorporated, with W. L. Decker as president and Joseph M. Donnelly as secretary and treasurer, with others, has taken over the business of the Barker & Freisens firm on Central Ave. Messrs. Decker and Donnelly have been connected with Barker & Freisens for some years and are well known to the trade.

The following coincidence is related by J. Fred Kramer, of the Frank Herschede Co., in connection with the death of the late James Baker and the recent explosion at the Herschede store. Since the death of Mr. Baker, late representative of Frank M. Whiting & Co., it has been learned that the table of silver at the Herschede store which was so badly damaged, having the appearance of having been pierced with large bullets, was the last invoice from Mr. Baker. The goods had just come in and were laid out to be marked. Every piece of the lot was damaged and it was only these particular pieces that were so injured. The explosion took place at the same time Mr. Baker was killed.

Traveling representatives who called on the Cincinnati, O., trade during the past week include: R. J. Sime, Julius King Optical Co.; W. J. Lane, Kent & Woodland; Vincent W. Henderson, Crane & Theurer; J. E. Jacobus, Bride & Tinckler; Mr. Curran, A. J. Hedges & Co.; George W. Beardsley, Allsopp & Allsopp; Julius F Schuman, Jr., William Kinscherf Co.; Mr Bergsman, Sheffield Silver Co.; S. W. Pickering, A. Ludeke & Co.; E. P. Staunton, Gorham Co.; J. E. Dean, Reed & Barton; G. Glenn Steel, Rogers, Lunt & Bowlen Co.; F. A. Perry, John Russell Cutlery Co.; George A. Schultz, Snow & Westcott Co.; W. R. Eliot, Meriden Cut Glass Co.; S. E. Dickson, Adelphi Silver Co.; Mr. Holbrook, Ferdinand Bing & Co.'s successor; Lew Fleming, Joseph Fahys & Co.

Klein Bros. Co., formerly located in the Traction building, is now completely settled in its handsome new quarters which takes in the entire third floor of the Boylan building, opposite the Sinton Hotel on E. 4th St. The company has leased this floor for a term of eight years, at a rental of about $2,000 a year. With an additional $1,000 and over on the part of the Kleins in the way of repairs and changes, they have made their offices among the handsomest and most up-to-date in the west. The floor space is 50 ft. by 170 ft. and is divided into private offices, buying room, traveling men's room, order department, billing room and stock room. The walls, tinted in pale green, with the green velvet floor coverings in the private offices, and the fixtures, which are entirely in mahogany, make a handsome combination and gives the place a rich appearance.

Wednesday, Feb. 9, attorneys for the creditors of the Herman Keck Mfg. Co., filed a motion asking the Circuit Court of Appeals to dismiss the appeal, and alleging the defendants have not filed their transcript of the proceedings of the lower court. Unless a transcript be filed before March 1, appeal from the decision of the United States District Court declaring the Duhme Jewelry Co. and the Keck Mfg. Co. both bankrupt will be forever barred. This was the judgment of the United States Court of Appeals, Feb. 11, after hearing the argument upon the motion to dismiss the appeal. It appears the two companies declared bankrupt have not been able to raise the $1,600 necessary for the preparation of a transcript. Judge Saler has refused to allow money held by Receiver Carroll to be used for paying the costs of an appeal from the bankruptcy finding. The referee has sent out notices to the Duhme creditors calling a meeting.

Cleveland.

The Scribner & Loehr Co. is extensively redecorating its store.

Mrs. Eliza Ramsay, mother of Burt Ramsay, d ed recently at Clyde, O.

Ed Williams is confined with a sprained ankle which is the result of a fall.

A. D. Weed, with the Bowler & Burdick Co., was called back to his home by illness in the family this week.

H. W. Burdick is taking an active part in the campaign the Y. M. C. A. is conducting to raise $500,000 in two weeks for a new building.

John F. Bommerschein, of Three Rivers, Mich., was in town last week, as was W. E. Butcher, Hamilton, Can., who is stopping here for a few weeks.

P. A. Mequillet, Louis Sands and Ben Click were appointed appraisers of the stock of the Deutsch Jewelry Co., who made a voluntary petition in bankruptcy last week.

Otto T. Loehr is going on the Mexican tour of the Cleveland Grays Feb. 19. The trip will take most of a month and all the principal cities in old Mexico will be visited.

Phil Cohen, who recently made his creditors an offer of settlement of 25 cents, has decided to close out his stock via the auction route and announces daily sales until the goods are disposed of.

A. F. Ingersoll, referee in bankruptcy, has appointed Irwin Loeser receiver for S. Deutsch & Sons, who recently filed a voluntary bankruptcy petition. In the schedule filed the firm says its assets amount to $11,075 and its liabilities are $20,904.

The wholesale merchants' board of the Cleveland Chamber of Commerce has plans under way for the most extensive trade extension trip yet undertaken by that body. Alaska will be the objective, with stops at Los Angeles, San Francisco, Portland, Seattle, Vancouver and Winnipeg.

The following out of town jewelers were in town this week buying: Mrs. J. W. Helfrich, Carrollton; Robt. Miller, Lorain; J. C. Joss, New Philadelphia, O.; H. H. Vath, Sandy Lake, Pa.; Mrs. A. R. Kimpton, Oberlin; Miss Lamphair, Willoughby, and W. C. Fisher, Lorain.

The following called on the local trade this week: D. Skulch, New Haven Clock Co.; J. F. Calloway, Wm. A. Rogers, Ltd.; Geo. W. Whittimore, Sessions Clock Co.; Henri M. Didisheim, Hipp Didisheim & Bro.; Mr. Nordie, R. H. Ingersoll & Bro.; L. P. Arnold, Western Clock Mfg. Co.; J. W. Sherwood, Solidarity Watch Case Co.; L. Heyman, Stern Bros. & Co.

The Reed & Barton Corporation, of Taunton, Mass., announces to the trade that by transactions completed Feb. 8, no other person or corporation in any way connected with or engaged in the silversmithing business has any interest either by ownership of the capital stock or otherwise in its business or affairs. It also states that its policy in the future, as it has been for nearly 100 years in the past, will be to continue independent and free to serve the best interests of those dealing with it.

Los Angeles.

Ed. Turner, of the E. W. Reynolds Co., has returned from his Arizona trip.

E. E. Peck, president of the Los Angeles Gem Co., has purchased an automobile.

The Whitley Jewelry Co. is making preparations to install a stationery department.

H. O. Bonine is enlarging and improving his store at Fresno and has been here buying fixtures.

H. F. Wallace is just now very busy preparing his new store on 7th St. and arranging to move in.

Joseph Zemansky, of the Security Jewelry Co., 205 W. 4th St., has gone to San Francisco on business.

Wm. Kley, Denver, a dealer in precious stones, after spending two weeks here, has gone to San Francisco.

A. E. Baranger, traveling representative for H. F. Wallace, after being home a few days, has started out again on the road.

Wm. Smith and wife, the latter formerly Miss White, of Ogden, have been spending a portion of their honeymoon in this city.

A. P. Wood, president of the Angelus Jewelry Mfg. Co., 126 E. Jefferson St., has arrived home from an extended trip east.

S. Meyer, of S. Meyer & Co., has been taking a short rest at Arrowhead Springs, a popular resort in the mountains near San Bernardino.

E. J. Koke has started out on his initial trip as traveling salesman for Hambright & Walsh, going through the northern portion of the State.

Among the out-of-town jewelers here recently were: Floyd R. James, with Geo. W. Collis, Pasadena; A. Delmas, Oxnard; S. P. Johnston and wife, Glendora.

Ed. Bastheim, of the Bastheim, Adams & Abel Co., wholesalers in the Broadway Central building, who has been on a purchasing trip in the east, is expected home about Feb. 20.

Samuel M. Joel, jeweler and watchmaker, who has been with H. F. Wallace, on Broadway, will take an office and shop on the same floor with Mr. Wallace in his new location.

The Whitley Jewelry Co. has been appointed official timers for the motorcycle races in the Coliseum. Joseph Lawton and Adolph Clabes have had the work in charge for the company.

M. H. Brown, formerly with the Wood stock-Hoefer Watch & Jewelry Co., Kansas City, Mo., has taken a position as salesman in the material department of the E. W. Reynolds Co.

Joseph Fahys, of Joseph Fahys & Co., Boston, Mass., is spending some time here, accompanied by his son, George. Mr. Fahys, Sr., will probably remain for several weeks. His son expects to return east soon.

J. C. Taylor, with A. E. Morro, recently received a letter from C. C. Noble, formerly diamond salesman with the Montgomery Bros., in this city. Mr. Noble, who has been seriously ill for a number of months, reports that his health is much improved.

A. Fink & Co. have received a large importation of amethysts from Germany, and are placing on the market some very handsome amethyst guards with amethyst hearts as pendants. The guards are 12 to 55 inches long and are used as girdles and necklaces.

The next meeting of the proposed jewelers' social club will be held on the evening of Feb. 19. The members will meet at the Orpheum Theater and after the entertainment will hold a banquet, after which more definite details of a permanent organization will be worked out.

All three of the salesmen of the Pacific Gem Co. have just started out on a new campaign for business. E. A. Taylor will cover neighboring territory, while H. A. Russell and L. E. Innes will go to the more distant territory. The company has just completed its annual inventory.

Among the traveling men here, recently, were: John Hartzberg, Henry Abrams; W. S. Sparrow, Stern Bros.; W. H. Hovey, J. B. Whitney Co.; Earle St. Orr, American Oil & Supply Co.; D. A. Wilkins, Ostby & Barton; F. W. Reed, Paye & Baker Mfg. Co.; N. T. Sherwood, C. Sydney Smith & Co.; A. J. Parker, Osmun-Parker Mfg. Co.

The City Council resolved at its last session that no more permits would be issued for auction sales of jewelry in the evening. An ordinance prohibits such sales, but an exception was made and a permit to sell in the evening was issued in the case of T. B. Clark, who has been closing out his stock after conducting a business many years in this city. Mr. Clark's auctions, under the management of Louis Burger, are being continued afternoon and evening.

After checking up the goods found in the trunk which was stolen from them, A. Fink & Co. find that the value of the goods remaining in the trunk was much less than first reported, amounting in all to not more than $500 or $600. The goods left behind comprise mostly manufactured jewelry and the cheaper and more bulky goods carried. The trunk is still in the possession of the Southern Pacific Railroad Co., in this city. If any clue to the robber has been obtained the detectives are keeping it to themselves.

Pacific Coast Notes.

R. W. Scott, Bishop, Cal., has added materially to his equipment of late. A new engraving machine is his latest acquisition.

The report that Arthur C. Mellinger, Arcata, Cal., is to retire from business is unfounded, but he will no longer operate the store himself. J. C. Sherman, a cousin, is to have charge of this store, while Mr. Mellinger is to move to Eureka to enter the service of W. D. Howard.

The Jewelers Security Alliance has been notified by Emil Steinmann, Sacramento, Cal., that James Collins, previously known as a bank robber, was arrested about 6 P.M. Feb. 1 by Detective Ryan and Railroad Agent Biggs for stealing jewelry worth more than $400. Collins was lately released from the Oregon Penitentiary, where he had been serving a long term. His method of obtaining the jewelry from the Sacramento store was cleverly devised, and only failed by an accident. He gained admission to the basement beneath the store. By standing two barrels on end in the basement beneath the show window he bored a section out of the bottom of the window where the diamonds were on exhibition during the daytime. He had evidently been at work some time when discovered, as he had already obtained a considerable quantity of jewelry. A passe by saw in the jeweler's window two finge sticking up through the bottom of t window, but did not know that it was robber at work. The jeweler's attenti was called to the strange phenomena, b before the police could arrive the m made his escape. It is thought that he w working in conjunction with two helpe who notified him of his danger. He tained one diamond ring valued at $2 and one worth $50, together with six rin set with other precious stones, two sca pins and a locket. The man was la arrested in a pool room.

San Francisco.

B. E. Chapman, Chicago, is visiting city at the present time.

J. H. Capen, New York, was in S Francisco during the past week.

B. Marx, a diamond importer of N York, is calling upon the trade in th city.

John D. Hurley, representing a St. Lou wholesale firm, has been calling upon t local trade.

W. L. Block, a manufacturer, of Elg Ill., is here at the present time, accompan by his family.

G. H. French, Boston, Mass., is in S Francisco with Mrs. French and the daughter. They are making a tour arou the world.

Walter G. Tucker, representing t Holmes & Edwards Silver Co., Intern tional Silver Co.'s successor, has located fine quarters at 180 Golden Gate Av where a retail as well as a wholesale bu ness will be conducted.

One of the most important moves th has been made for some time in local jew elry circles is that which has just been a nounced by T. Lundy. This well-know San Francisco jeweler has signed a lea for a store on Market St., a few doo below the present location, and will occup the new quarters as soon as the store bui ing, which is now under course of constru tion, is completed. This location is th most central in the city, and the stores i the new building will command very hig rental. While the terms of this lease hav not been announced, it is understood th about $120,000 is to be paid during the l years' life of the lease. The present sto is being vacated owing to the fact that i is located in a temporary structure, whic is to be torn down next Summer. Eve since the two robberies in which this fir has been an unfortunate victim it has bee desired to get into a permanent home, bu it has also been the desire to remain in th present district if possible, and the chanc to get into the fine quarters that are b in erected was eagerly seized upon.

George W. Knight, San Marcos, Tex has received considerable advertising re cently by announcing that he celebrated th repairing of his 10,000th watch during h residence of 23 years in San Marcos. H kept a record of all the watches whic cost more than 50 cents to repair He takes great pride in the development of hi business since 1886, when he started wit a capital of $14.

Omaha.

arry Ryan, son of Geo. Ryan, is home a few days on account of illness.

Andrew F. Toepel, 118 Gratiot Ave., has been sued for $15,000 by Edna Stille, who claims that she was bitten by his dog

Oscar B. Marx, one of the officers of the Michigan Optical Co., has consented to accept the office of city assessor, his term to begin July 1.

Herman Beyries has sold his store at 606 Gratiot Ave. to Emil F. Schneck, who has been in the employ of F. A. Rolshoven & Co. for a number of years.

Frank Kennedy, president of the Detroit Jewelers' Board of Trade, was one of the speakers at the banquet of the Eighth Ward Republican Club, Thursday evening.

George Matthews has accepted a position with the Grainger-Hannan Co. He was formerly with this firm, but has been employed for some time past by John Kay & Co.

Thieves broke into the show window of Fred Flachsmann's store at 819 Gratiot Ave., Thursday night, and stole four bracelets valued at $19.50. The show window, valued at $90, was insured.

The marriage of Joseph H. Ehrlich, 67 Gratiot Ave., to Miss D. G. Buchhalter took place Jan. 25. Mr. Ehrlich is well known in the trade and has been in business in his present location for a number of years.

Meyer A. Pereira, who was adjudicated a bankrupt in January, has offered his creditors a settlement on the basis of 30 cents on the dollar. A meeting to consider this will be held late in February. The Detroit creditors are inclined to accept.

Carl Jensen, for eight years connected with Kunz & Rogers, wholesalers, died recently, of scarlet fever, having been ill but two days. He was 28 years of age, and had been married about two years. Mr. Jensen had a wide acquaintance in the trade and his loss is regretted.

Louis Meier, whose remarkable clock has been on exhibition all over the country as an attraction at fairs and expositions, is busy this Winter making improvements in the timepiece. He is adding a representation of the planetary system, the various celestial bodies being built in proportion to their relative sizes.

Judge Rohnert recently gave a verdict in favor of J. Friedberg & Son for the balance due on diamonds sold to Annie Smith, a woman who caused a sensation two years ago. This balance was about $900 and the court has ordered the sale of a diamond which had been pawned and also the sale of some brewery stock for the purpose of reimbursing the jewelry firm.

George W. Allen, a traveling salesman, lost a sample case, last week, while making a call at the Adolph Enggass Jewelry Co., 22 Gratiot Ave. He left his case with a negro porter outside the store, but the porter went across the street and the case was gone when he returned. The value of the sample goods was placed at about $400.

Herman C. Nichlaus, 985 Gratiot Ave., has perfected a new taximeter for automobiles which is considered to be a great improvement over previous patterns. This mechanism shows the time of leaving the taxicab station, the time and speed of running, the time consumed in stops, etc. Mr. Nichlaus is an expert mechanic as well as a jeweler, and had much to do with perfecting the nickel-in-the-slot machines manufactured by a large Detroit concern.

The Detroit Jewelers' Board of Trade met, Friday evening, to discuss with the entertainment committee of the Detroit Retail Jewelers' Club the arrangements for entertaining the delegates to the national convention here, next July. After enjoying dinner the remainder of the evening was spent in talking over plans. It was decided that a boat ride should be one of the features, and a trip to Belle Isle may also be included. Charles W. Warren, Frank Fitch, William Traub and H. A. Rolshoven represented the retailers. Previously the retailers had had a meeting in the Hotel Tuller, at which convention plans were also talked of. At the retailers' dinner a letter from President Archibald, of the national association, was read. Some suggestions as to the plans to be adopted were made in the letter.

William F. King, Sr., former Mayor of Adrian, and veteran jeweler of Michigan, has been seriously ill since Tuesday of last week. His malady is pronounced somewhat of the nature of paralysis, and the attack has caused his family and friends grave concern. Mr. King is 77 years of age, has lived in Adrian 52 years, and has made it his pleasure as well as his business to attend to his store every day. The management of the store has largely rested with his son, William F. King, Jr., for some years past, but the father has insisted on doing his part in the work, and has kept to his bench. Mr. King, although a Democrat, has been twice elected Mayor of Adrian, a strongly Republican city, and could have continued in that office indefinitely had he consented to accept another nomination. He is a Mason of high rank, past eminent commander of the Knights Templar and worthy patron of the Order of the Eastern Star in Michigan.

The property occupied for many years by Quintard Bros., jewelers, Poughkeepsie, N. Y., was offered for sale by the executors of William M. Quintard, and it was bid in by the estate, and the property will be disposed of at private sale. The highest bid offered was $27,500. It was made by Thomas Zimmer, of Zimmer Bros., jewelers, who wanted the property for store purposes. The Quintard estate, however, refused to let the property go at that figure. There is a brick building, 20 by 192 feet. The stock of Quintard Bros. is also to be disposed of shortly to close up the estate.

Milwaukee.

Early Johanson, formerly connected with C. F. Herbert & Co., Green Bay, Wis., is now associated with one of the leading jewelry establishments of Milwaukee.

Gross & Saxe, 349½ 3d St., are moving into larger and more adequate quarters in the Metropolitan building, corner of 3d and State Sts. New additional fixtures are being installed and the stock is being enlarged.

The regular monthly meeting of the Milwaukee Jewelers' Club was held at the Hotel Blatz, Feb. 9. The usual banquet was enjoyed and a general discussion of interest to the trade followed. The attendance was large.

Out-of-town jewelers who were Milwaukee visitors, last week, included; W. S. Briggs, Hartland; J. P. Schlaefer, Campbellsport; Mr. Fargo, of the firm of Fargo & Harger, Ripon, and F. P. Beswick, Racine.

According to reports received by Milwaukee wholesalers, E. L. Petersen, Plymouth, Wis., has purchased the F. L. Eltzroth store at Elkhorn, Wis. Mr. Petersen is installing a new and larger stock in his newly acquired store.

The C. F. Dunbar Co., Wausau, Wis., has purchased the site on which its present building stands as well as the site occupied by the adjoining structure, also owned by the jewelry company. A member of the jewelry company was a recent Milwaukee visitor.

Gustav Keller, Appleton, Wis., president of the Wisconsin Retail Jewelers' Association, has resigned as Wisconsin secretary of the Catholic Order of Foresters and has been succeeded by Leo P. Fox, Chilton, Wis. Mr. Keller's resignation was made necessary by the fact that he has been made international treasurer of the order, an office which requires a great deal of his time.

Milwaukee wholesale jewelers have been notified that Ray Bayley has joined partnership with W. H. Becken, a well-known jeweler of Beaver Dam, Wis., and that after March 1 the firm will be known as Becken & Bayley. Mr. Becken will retire from active management and Mr. Bayley will be in charge. Mr. Bayley has been connected with the Becken establishment as engraver and repair man for some time.

One of the most daring jewelry robberies ever attempted in Milwaukee resulted in failure recently when two young hold-up men attempted to rob the jewelry store of Max Krome, 266 W. Water St., but were frustrated and captured after they had leaped into the Milwaukee River. About 9 o'clock in the morning a strange young man entered the store and asked to be shown some rings. Louis Werbil, aged 18 years, a brother-in-law to Mr. Krome and a clerk in the store, was alone at the time. After several minutes of inspection the stranger left, and a short time later two other strange young men entered and also asked to be shown some rings. Werbil spread the trays on the counter before them, but they did not appear to find what they wanted, and asked to be shown some more expensive jewelry. Werbil replaced the trays and brought out some diamond-studded rings, which he placed on the counter. As he was reaching into the case for another tray, one of the men drew a "billy" from his pocket and struck Werbil a stunning blow on the head, at the same time grabbing the tray. Werbil staggered back, calling for help, but retained his hold upon the tray. The thieves, taking alarm, fled from the store with Werbil in hot pursuit. Other people on the street took up the chase, and the men, not knowing the city, turned into Cedar St., where it ran into the Milwaukee River, and finding themselves on the bank leaped into the cold water, intending to swim across. The water was too cold for them, however, and they were only too glad to be assisted out by the assembled crowd and several detectives. The men gave their names as Edward Dubuque and Harry Davis. Dubuque says that he is 17 years old and lives in Thief River Falls, Minn. Davis is 20 years old and claims to hail from Homestead, Pa., where he says that he was a traveling salesman. Both say that they arrived in Milwaukee from St. Paul.

Kansas City.

Bob Clark, the representative of the International Silver Co., has moved his family from Chicago to this place.

Fred Cateron will represent the C. B. Norton Jewelry Co. at the convention of the Nebraska association next week.

The traveling salesmen of the Woodstock-Hoefer Watch & Jewelry Co., will all leave for their respective territories Feb. 15.

C. C. Hoefer, of the Woodstock-Hoefer Watch & Jewelry Co., will represent that house at the Nebraska convention, to be held in Lincoln.

W. H. Meyer, Lawson, Mo., was in the city last week, on his way home from a visit to Oklahoma and the Panhandle country of Texas.

Mrs. Walter Starcke, who has been in the hospital in Kansas City for some time, has recovered sufficiently to return to her home in Junction City, Kans.

M. Flori, of the polishing department of the Meyer Jewelry Co., died at St. Mary's hospital in this city last week, and his body was shipped to his old home in St. Louis.

Henry Furman, who has a jewelry store at 15th and Troost Sts., is offering the store for sale, and has accepted a position in the Central Ave. store of Dave Finkelstein.

S. E. Woodstock, of the Woodstock-Hoefer Watch & Jewelry Co., was called to Clear Lake, Ia., last week to attend the funeral of his nephew, Edward Woodstock, son of J. H. Woodstock, of that city.

On March 1 T. Brenner expects to open another new store at 718 Walnut St., in this city, under the name of the American Jewelry & Loan Co. Harry H. Mayer will be manager of the new concern.

George Greenbaum, a manufacturing jeweler, formerly in the employ of Porter & Wiser Jewelry Co., now engaged in the delicatessen business in Oklahoma City, Okla., has been paying old friends in this city a visit during the past few days.

I. T. Pierce, formerly traveler for the Edwards & Sloane Jewelry Co., but who is now with R. Wallace & Sons Mfg. Co., was married Dec. 21, to Miss Julia E. Whitney. His friends in this city have just received the at home cards, showing that they will make their home in Chicago beginning Feb. 1.

A. H. Clark, who has been manager of the material depatment of the C. B. Norton Jewelry Co. for years, has resigned to take a position with a St. Louis house. He has been succeeded as manager and buyer by J. B. Robinson, who has been in the department for some time, and Earl Littlefield has accepted a position in the material department.

Dave Finkelstein, who has a retail store on Central Ave., near James St., in Kansas City, Kans., has purchased the stock, fixtures and lease of the Gem Jewelry Co. at trustees' sale, for a total consideration of $850. He intended to continue the business when the purchase was made, but his health has failed again, and he now thinks of consolidating the stock with that in his other store and discontinuing at this location.

The following traveling salesmen called on the trade in Kansas City, Mo., during the past week: S. R. Henderson, Jr., The Clark & Co.; T. W. Agnew, New Haven Clock Co.; H. C. Wilson, Crescent Watch Case Co.; Geo. H. Remington, Main Bros. & Elliot; Geo. B. Neill, Keystone Watch Case Co.; B. Hyman, B. Hyman & Co.; Milford E. Fox, Gustav Fox Co.; J. Summer, Providence Mfg. Co.; C. Becker, Martin-Copeland Co.

O. W. Dryer, who recently purchased the business of the Kansas City Polytechnic Institute, has also purchased the business of the Kansas City Horological & Optical School, which was offered him on account of the physical breakdown of Mr. Pittinger, who has built up the business here. The school has already been moved from the old location on 12th St. to the third floor of the building on Main, 7th and Delaware Sts., and it is expected that the two schools will soon be consolidated.

The following jewelers called on the trade during the past week: A. S. Bartlesville, Okla.; Mr. Jones, J. B. Holden, Topeka, Kans.; J. O. Scott, Parsons, Kans.; L. O. Kunze, Harrisonville, Mo.; L. E. DeLanty, Parkville, Mo.; J. Whiteside, Liberty, Mo.; W. S. Nye, Drexel, Mo.; Jas. Pizinger, Hoisington, Kans.; A. J. Levine, St. Joseph, Mo.; C. Wardell, Nowata, Okla.; W. F. Kirkpatrick, St. Joseph, Mo.; A. Rosenfield, Leavenworth, Kans., and James Hay, Topeka, Kans.

Pacific Northwest.

Marx & Co. are opening a new store in Portland, Ore.

G. Heitkemper, Jr., has just moved his stock into a fine new store at Klamath Falls, Ore.

A fire broke out recently in the store of the Carleton Jewelry Co., Marshfield, Ore., but was extinguished before doing serious damage.

F. R. Scholz's store, Tenino, Wash., was entered by burglars recently, and almost the entire stock was carried away. Entrance was effected through the window.

A. A. Woelfel, Centralia, Wash., was in Portland, Ore., recently, on a buying trip and took advantage of the opportunity to inspect an exhibit of aeroplanes that are being made there.

Canada Notes.

G. A. Webster, Durham, Ont., has sold business to J. B. Hillmer.

mes B. McPhee has renewed a chattel ortgage for $283 to J. McPhee, of Arnprr, Ont

he stock of S. A. Wilson, Campbellford, , insolvent has been sold for 53½ cents he dollar

ne assets of H. G. de Paris, St. Cathe S., Montreal, who assigned a fortnight ago, are to be sold.

Conrad Richenbach, Walkerton, Ont., has on the renewal of a chattel mortgage for to Josephine Wingefelder, of the same ce

W. Cole has purchased the interests Coulter in the J. Coulter Co., manufacturers of jewelers' cases, Toronto, Ont., which he has been associated for some

among traveling representatives in Toto, Ont., last week, were George A. Bain, Wilcox Silver Plate Co.; M. Schwab, Schwab Bros., H. F. Morway, E. Ingraham and I. Freedman.

Out-of-town jewelers calling on the Toto, Ont., trade, last week, included: E. Elmer, Berlin; John Maynard, Campbellford; W. H. Wegenast, Aylmer; J. A. Morer, Parry Sound, and W. F. McCarthy, Lindsay—all Ontario.

Gerald W. Birks, of Henry Birks & Sons, Ltd., Montreal, was last week elected a member of the board of governors of the Boys' Home of Montreal, an institution to which Henry Birks has made some very generous donations from time to time.

Henry Birks & Sons, of Winnipeg, who some time since purchased the Y. M. C. A. building on Portage Ave., in that city, have notified the tenants of four stores on the ground floor to vacate. The stores, having a floor space of 88 by 60 feet, will be completely remodeled and occupied by Birks & Sons for their business.

W. Eaves is making preparations to remove to new premises at 107 Notre Dame W., Montreal, his present store having been bought with a whole block of buildings for conversion into a hotel. The new store leased by Mr. Eaves has a commanding position, and he will lay in an entirely new stock, a special removal sale having been arranged by him to dispose of his present stock.

The Inglis building, an imposing construction on W. St. Catherine St., Montreal, in which Johnston Bros., jewelers, are located, is just been leased by a Toronto firm, but Messrs. Johnston last week informed the representatives of THE JEWELERS' CIRCULAR-WEEKLY that their business at 483 St. Catherine St. will not be affected in any way by the deal, as their lease has yet several years to run.

The jewelry store of George C. Ditmars, Niagara Falls, Ont., was broken into on the evening of Monday, Feb. 7, the burglar obtaining entrance by breaking a window in the rear. A passing police constable noticed the shadow of a man in the store, and, entering by the broken window, arrested the thief, who had his pockets full of valuable jewelry. He gave his name as John Allen, and is a German Pole, about 23 years of age. He had been at Niagara Falls about one week, having come from the United States.

The final games in the Ontario Tankard series of curling matches, open to all provincial curling associations, are being played in Toronto this week. Among the jewelers who are participating are F. H. Nettleton, Collingwood; J. A. McFee, Belleville; J. Parke, Bradford, and T. C. Watson, Newmarket. The annual bonspiel at Winnipeg, Man., probably the largest curling event in the world, with 187 rinks of four players each, is now in progress and excites keen interest, many western jewelers taking part. Among the prizes competed for are the trophies furnished by D. R. Dingwall, Ltd., and Porte & Markle, Winnipeg, Man.

St. Louis.

L. A. Fassett, of Weiss & Fassett, will return in a few days from his trip to Europe.

A. G. Sudheimer, of Sudheimer & McCool, is in old Mexico on business for his firm.

Mr. Murphy, of the Burke Jewelry & Optical Co., has been confined to his home with pleurisy.

J. E. Riley, of the Gutfreund-Kemper Supply Co., left, last week, on a trip through his northern territory.

O. H. Kortkamp is one of the stockholders of the National Pin Co., recently formed here for the manufacture of safety pins.

C. L. Glines, Harrison, Ark., who was recently operated on at St. Anthony's Hospital, has entirely recovered and returned to his home.

The Bauman-Massa Jewelry Co. has taken possession of the stock of the Eagle Jewelry Co., Arkansas City, Kans., for the satisfaction of claims.

Mrs. Annetta Robbins, whose husband, Z. B. Robbins, died last week, will continue to conduct the business of the Robbins Jewelry Co., in the Holland building.

Mr. Clark, formerly with the C. B. Norton Jewelry Co., Kansas City, has arrived in St. Louis to take charge of the tool and material department of the Bauman-Massa Jewelry Co.

The $1,400 automobile of A. W. Hawver, jeweler, of Springfield, Mo., was ruined when it was struck by a street car and hurled against a buggy. Mr. Hawver was in the auto, but he was not injured.

A. S. Higbee, Roodhouse, Ill., who was in St. Louis, last week, on business, brought his wife with him, and after Mr. Higbee had bought all the goods he wanted they tarried to see the sights of the city.

Among the out-of-town jewelers in St. Louis during the week were: O. Miller, Flat River, Mo.; Mr. Bass, of the Worrell-Bass Jewelry Co., Louisiana, Mo.; A. S. Higbee, Roodhouse, Ill.; E. L. Barnard, Alton, Ill.; W. Westphal, St. Charles, Mo.; L. A. Beatty, Roodhouse, Ill.; J. W. Strain, Carrollton, Mo.; George Petter, president of the Petter Jewelry Co., Hannibal, Mo.; M. Pilcher, Mexico, Mo.; Otto Burkland, Moberly, Mo.

J. H. Mosley, Bluefield, W. Va., has purchased the stock of J. L. Crockett.

San Diego, Cal.

TRADE CONDITIONS.

The number of tourists spending the Winter here breaks all previous records. The hotels are full and reservations made up until the last of March, all of which operates to enliven the jewelry business.

Prof. J. R. Parsons, who is now in business in San Pedro, was in San Diego recently. Prof. Parsons is the man who built the large street clock for J. Jessop & Sons.

The San Diego Gem Co. recently moved to larger quarters on 5th St. A. H. Neale, who, for the past three years has been head salesman for J. Jessop & Sons, has accepted a position as manager of the sales department.

The Ernsting Co. is planning the erection of a new building on the present site. Work will begin as soon as a suitable location for temporary quarters can be found. The new building will have a 50-foot frontage, and is to be modern in every respect. When the building is finished the Ernsting Co. will have one of the handsomest stores on the coast.

Association Notes.

At a regular meeting of the Evansville Retail Jewelers' Association delegates were elected to represent the association at the annual meeting of the Indiana Retail Jewelers' Association, held in Indianapolis on Feb. 7 and 8. The annual election of officers resulted as follows: President, J. L. Thuman; vice-president, Ollie Artes; secretary-treasurer, Chris. Hewig; board of directors, Jack Bitterman, John Rohlander, A. G. Kleinlein, Ed. Beucher and Louis Gumberts.

The third annual convention of the Retail Jewelers' Association of Illinois is to be held at Springfield May 16, 17 and 18. F. A. Marean, of Belvidere, the president, was in Springfield recently consulting with the local members of the organization and making preliminary arrangements for the meeting. This year there will be a manufacturers' display as a feature of the convention. The convention will close the night of May 18 with a banquet at the St. Nicholas Hotel.

Utica.

Louis Schneider, who died at his home, 40 City St., Feb. 5, of tuberculosis, was connected with the jewelry trade for a number of years. He was born Aug. 17, 1878, and learned the jewelry business with Richard Perlin. He is survived by his parents, two sisters and a four-year-old daughter.

Word was received from Syracuse to the effect that about $300 worth of jewelry was secured by thieves who cut the glass in the window of M. Lemp's store in the Empire block recently and got away with a diamond brooch, four gold watches, a chain and some rings. The local police have been asked to be on the watch, as it is believed the thieves skipped to this city.

A large street clock with illuminated dial has been placed in front of the store of F. E. Ladd, Springfield, Mass.

Providence.

L. Wilkins is sending the Ostby & Barton Co. good orders from the Pacific Coast.

M. Jackson is doing a large business in individual design work at 205 Weybosset St.

Fales & Bartlet, manufacturing jewelers at 234 Chestnut St., have gone out of business.

The will of Oren C. Devereux has been filed at the Municipal Court in this city for probate.

Howard D. Wilcox, of D. Wilcox & Co., is on a three weeks' trip through western New York State.

Samuel M. Nicholson and daughter left Monday for Nassau and Palm Beach for a several weeks' stay.

A. Binsinwanger, buyer for Siegel, Cooper & Co., Chicago, was in town last week placing orders.

B. A. Ballou & Co., 61 Peck St., have been installing a number of pieces of new machinery in their plant.

Frederick W. Aldred, with the B. H. Gladding Co., returned Saturday from a week's trip to New York.

Arthur W. Hutchins, of Cranston, has been granted a patent on a process for drying articles of jewelry, etc.

L. Berberian has started in the enameling business at 209 Pine St., under the name of the New England Enameling Co.

Harvey J. Flint has been elected president of the Narragansett Bay 18-Foot Knockabout Yachting Association.

E. Merle Bixby, superintendent of the silverware department of the Shepard Co., has been in New York the past week.

A. Tingley Wall presided at the annual banquet of the Quarter Century Club at the Crown Hotel on Saturday evening.

Harry Fulford has been elected secretary and treasurer, and Harvey J. Flint one of the directors, of the Edgewood Yacht Club.

L. Dimond & Sons, Inc., distributed thousands of Lincoln buttons to customers on Saturday in honor of Lincoln's birthday.

Mr. and Mrs. J. Samuels and their daughter, Miss Bertha Samuels, are at the Royal Palace, Atlantic City, for a short stay.

William Gow, treasurer for the George N. Steere Co., Pawtuxet, has been taking a few days' rest with friends in New York.

Alterations and improvements of an extensive nature have been made in the office of the Metal Products Corporation, 36 Garnet St.

C. W. Kelley returned last week from a trip through the south in the interests of Tilden-Thurber Co. and left at once for the west. He reports good business.

William F. McGown has been secured by the F. T. Pearce Co., of this city, to succeed the late John Hoagland in charge of the New York office, 180 Broadway.

Edward F. Duncan, associated with the George H. Fuller & Son Co., Pawtucket, died last week at his home in that city in his 29th year. He had been sick for about two months.

Howard G. Ward has assumed the management of the D. C. Denham Jewelry Store, 276 Thames St., Newport. Frank O. Fales has been secured as watchmaker and jeweler.

Charles E. Westcott, of the Snow & Westcott Co., and Ralph Ostby, of the Ostby & Barton Co., have been serving on the petit jury of the Superior Court the past two weeks.

C. Horton Whipple, of Whipple & Campbell, refiners of this city, was recently married in New York to Mrs. Byrdana B. Wilson, daughter of Mr. and Mrs. Josiah Brown, Cayuga, N. Y.

Among those who attended the annual banquet of the Republican Pioneer Club, composed of men who voted for Abraham Lincoln, were Mayor Henry Fletcher, D. R. Child and B. A. Ballou.

Dean, Lord & Cardin is the style of a new firm that has started at 45 Eddy St. for the manufacture of sample cases. All the members of the firm are men of experience in this line of work.

George W. Dover is one of the incorporators of the Tonto Co., East Providence, which was chartered last week in this State for the manufacture of chemical preparations, with a capital of $100,000.

Louis Bederon, an employe of Marshall & Co., manufacturing jewelers at 107 Friendship St., has asked the police to look for a man who stole his overcoat, sack coat and hat which hung on a nail in the shop last Thursday.

Mr. and Mrs. William Loeb returned Friday from Panama and other points unexpectedly and are at the Crown Hotel, this city, for a time. Mrs. Loeb is suffering from a sprained ankle, which caused their summary return from the South.

The Petow-Krieger Jewelry Co. has filed articles of incorporation with the Secretary of State. The incorporators are: Lazarus A. Petow, Leon Krieger and Max Ross, all of this city. The capital stock is $50,000 and the company will be located in this city.

The case of Charles E. Hancock & Co. against Harry Taylor et al, was called in the civil session of the Sixth District Court before Judge Rueckert on Thursday. This is an action on book account and on motion judgment was entered for plaintiff for $65 and costs.

Among the buyers who visited the manufacturers of this vicinity last week were: David Michels, of the 14th St. Store, New York; A. P. Dupries, of Gimbel Bros., Milwaukee; H. Pichel, of Samstag & Hilder Bros., New York, and Mrs. L. B. Walters, of Gimbel Bros., Philadelphia.

The following traveling representatives were in this city the past week calling upon the trade: J. H. G. Marsh, Edmond E. Robert; Morris Klipper, Klipper Bros.; F. T. Clark, New England Watch Co.; Charles E. Mott, J. B. Bowden & Co.; E. E. Horton, Mandeville, Carrow & Crane; E. C. Cole, D. C. Percival & Co.; and a representative of the A. Wittnauer Co.

Judge Brown in the United States District Court last week heard arguments in the case of William J. Brown, trustee for the Lazarus & Griess Co., bankrupt, against Mark Streicher, on a motion for arrest of judgment and motion for a new trial. A jury and the court recently awarded the plaintiff $8,182 in a suit to recover on indorsement of notes.

The first meeting of the creditor[s] Charles H. Ballou, doing business [as] manufacturing jeweler at 127 Eddy [St.] this city, as Charles H. Ballou & Co. [was] held in the office of Chester W Bar[ker] referee in bankruptcy, on Monday. W[illiam] A. Ladd was made trustee, with b[ond] $2,000, and was granted leave to se[ll] bankrupt's assets to the best advantag[e].

Mr. Hofman, of the Hofman Jewelry [Co.] of Columbus, O., visited the cred[itors] that concern here last week, maki[ng] headquarters at the rooms of the M[anu]facturing Jewelers' Board of Trade. [His] errand was to explain to his creditors [the] financial condition and to arrange [if] sible, for an extension. His pro[posal] was favorably received. His total l[iabilities] are about $61,000.

At the annual meeting of the Nich[ols] File Co. the following officers were [elected] on Thursday: President and gener[al] ager, Samuel M. Nicholson; vice-pr[esident] Arthur H. Watson; treasurer, G[eorge] Nicholson; secretary, Walter W. Gr[een]; assistant treasurer, Henry W. Harman; [as]sistant secretary, Harold C. Field. T[he] with Marsden J. Perry and John R[.] Gladding, constitute the board of dire[ctors].

Among the foreign importations rec[eived] the past week through the Providence [Cus]toms House were the following: I[n] Bremen, 21 packages of imitation pr[ecious] stones; from Hamburg, four packages [of] imitation precious stones; from Liver[pool] Eng., two packages of manufactured metal; from London, one package im[itation] precious stones; from Rotterdam, one p[ack]age manufactures of metal; from S[outh]ampton, one package of enamel.

Among the 441 names drawn by the Board of Aldermen of this city last Mo[nday] evening as petit jurors were the f[ollow]ing who are associated with the manufactu[re] jewelry business: Englehart C. O[lney] William B. Streeter, William A. Stafi[ord] Charles H. Battey, George H. St[one] Frank A. Chase, John H. Fehlberg, G[ust]ave J. Vester, Danforth K. Barrett, L[ewis] Sharpe, Samuel Moore, Edward S. W[ard] Walter F. Crowell, Phineas F. Par[ker] Horace Remington, William H. Dr[ake] John Shepard, Jr., Orrin M. Otis, W[illiam] C. Tuttle, Rufus K. Griffith, Jam[es] Arthurs, Herbert R. Lowe, David B[ern]kopf, Edward J. Ettinger, Paul Sho[ver] George H. Kettlety, Walter Hidden, Sa[muel] M. Nicholson, John Fletcher, Louis S[il]man, Walter C. Randall, Edward B. H[ol]lin and George M. Baker.

The Board of Governors of the [New] England Manufacturing Jewelers' and [Sil]versmiths' Association held a m[eet]ing Thursday and acted favorably upon four [ap]plications for membership. The adv[isory] council met immediately afterwards [and] considered the matter of sending res[olu]tions to the members of Congress [from] Rhode Island regarding the objectio[nable] features of the corporation tax law. [The] executive committee reported that plans [have] been practically completed for the [annual] mid-winter banquet of the associat[ion, which] will be held in Infantry Hall on Mo[nday] evening, March 21. A circular letter [will] be issued in a few days calling atte[ntion] to the unusual honor conferred upon [the] association by the fact that President

ching with more than ordinary interest
success of a new industry that has
established in this city. This is the
ufacture of imitation precious stones,
ch has been begun by Tannenbaum &
in a temporary plant at 234 Chestnut
The significance of the successful es-
lishment of such an industry in this
try can be appreciated when it is con-
red that of the total foreign importa-
s subject to duties received through the
vidence Customs House the last quar-
of last year practically one-quarter of
duties paid are for imitation precious
es, thousands of gross of which are
ually used by the manufacturing jew-
s of this city and the Attleboros. Tan-
baum & Co have had a factory and
e at 21 Eddy St., this city, for several
rs, and its members have been asso-
ed in cutting and polishing precious
nes in New York and Paris for nearly
f a century. In addition, they also have
ces at London, Oberstein and Boston.
es & Bartlet, who have been manufac-
ng a line of jewelry at 234 Chestnut
for several months, have discontinued
siness and entered the employ of Tan-
baum & Co. Mr. Bartlet, who is in
rge of the new shop as superintendent.
s had an experience of more than 20
rs as foreman of a large glass works
l has devoted considerable of that time
the making of all kinds of imitation
cious stones. The manufacture of imita-
precious stones has been attempted
y times in this country, but owing to
expense of labor has never proved suc-
sful.

Atlanta, Ga.

C. W. Crankshaw, whose stock is now
ng sold out at auction, designed and
pplied the handsome medal which has
n offered by Ben. Rosenthal to the boys
the McKeon School.

Nat. Kaiser, who is well known in the
we'ry trade, recently paid $100,000 for
e property at 59-61-63 W. Madison St.
his is the highest price recorded for real
tate in this location, the frontage being
ieet. The property runs back 152 feet
d abuts on an alleyway connecting it
ith Madison Ave.

North Attleboro.

Reuben Orr was in New York last week.

An addition is being built to the office of Whiting & Davis Co.

John E. Tweedy is enjoying a stay in Hartwell, N. Y., with friends.

Charlie Brady, buyer for C. D. Peacock, Chicago, was a local visitor last Thursday.

Curtis Reed returned last week from a trip taken in the interests of the H. F. Barrows Co.

The refining shop of H. C. Saunders, which was recently damaged by fire, is being rebuilt.

G. Herbert French, who is making a tour of the world with his family, has reached Japan.

Howard Ballou, Raymond Wise and W. J. Riley have placed orders for new automobiles this year.

A. Binswanger, of Siegel Cooper & Co., Chicago, was in town last week calling on the manufacturers.

Fred B. Brigham returned last week from a western trip taken in the interests of Cheever, Tweedy & Co.

Oscar Hornig returned last week from an extended trip taken in the interests of Codding & Heilborn Co.

John Rose, foreman of the H. F. Burrows Co. factory, will be a candidate for re-election to the board of selectmen.

John L. Thompson, of Thompson & Remington, is mentioned as a candidate for the position of electric light commissioner.

H. A. Hall, who is bookkeeper for Scofield, Melcher & Scofield, has resigned as secretary of the Republican town committee.

Thomas Frothingham, Charles Peckham, Elton Fisher, Walter Duncan and Harry Pierce enjoyed a fishing trip to the Cape last week.

B. F. Simpson, of Benj. F. Simpson & Co., wholesale jewelers of Minneapolis, was in town last Friday calling on the local manufacturing jewelers.

Mrs. Mabel Barber, who has had charge of letting out the making of the ring purses for a number of the local firms, died last week at the Emerson hospital.

Frank O. Emerson, proprietor of the Emerson House, was tendered a banquet Saturday night by a party of business men, many of whom were local manufacturing jewelers. The party included John P. Bonnett, Alpin Chisholm, William F. Maintien, Wallace G. Franklin, George W. Cheever, Orin W. Clifford, C. Ray Randall, Arthur E. Codding, Donald LeStage, G. C. Hudson, John E. Tweedy, Alton H. Riley, George H. Maintien, Frank H. Cutler, Fred A. Howard, Charles T. Paye, E. H. Cummings, D. M. Chisholm, H. H. Curtis and Fred B. Brigham.

Last Wednesday morning John Evans, of this town, was struck and killed by an automobile operated by Frank H. Bliss, of the firm of A. H. Bliss Co. The story as told by Mr. Bliss was that he was going about 25 miles an hour when Evans, who was drunk, staggered in front of his machine and was hit. Thursday evening Bliss was taken in charge by Deputy Sheriff E. C. Brown on the charge of manslaughter and reckless driving of an automobile. In the Fourth District Court at Attleboro Friday morning Mr. Bliss pleaded not guilty to both charges, and was held in the sum of $2,100 to appear before the court next Friday. A. H. Bliss, his father, furnished bonds.

Attleboro.

F. E. Guild, accompanied by Mrs. Guild, has started on a trip through the south.

Frank Truell has returned from a successful western trip for the W. H. Saart Co.

An addition is being built to the factory of the Freeman, Daughaday Co., at Chartley.

John Doran was in New York, last week, in the interests of Doran & Co., South Attleboro.

Frank Mossberg delivered an address before the North Attleboro Board of Trade, last week.

George W. Allen, Jr., was traveling in Canada, last week, in the interests of S. O. Bigney & Co.

A letter addressed to the Attleboro Jewelry Co. remains uncalled for at the Attleboro post office.

H. E. Sweet, of the R. F. Simmons Co., was in Philadelphia, recently, in the interests of his concern.

D. S. Spaulding's jewelry factory was closed last Monday on account of a number of boiler pipes bursting.

Alfred R. Crosby, of Smith & Crosby, has resigned as chairman of the town finance committee, a position he occupied creditably for several years.

At the meeting of the Citizens' town committee, last week, Harold E. Sweet and W. J. Newman were indorsed for positions on the school committee.

The bowling team representing the W. H. Saart Co. won six strings from the Bay State Optical Bowling Team, last week, in the Jewelers' League.

At the annual meeting of the Attleboro Mutual Fire Insurance Co., last week, George H. Herrick was elected treasurer and Harold E. Sweet, R. M. Horton and Daniel Young trustees.

Col. Sidney O. Bigney is a candidate for the Republican nomination for Lieutenant-Governor in 1911. He is even now formulating his campaign, and is in the fight to stay regardless of what the State machine says or does.

Thomas Sadler returned last Sunday from an extended trip in the interests of Sadler Bros., South Attleboro. The sprinkler at the Sadler Bros. shop burst last Monday and flooded all three floors of the building. The damage was not heavy.

The special election to name a Congressman to succeed the late Congressman Lovering will be held March 22. While the names of S. O. Bigney, of S. O. Bigney & Co., and Charles Robbins, of the C. M. Robbins Co., have been mentioned as possible candidates, it is not expected that either will run.

Referee in Bankruptcy Clifford P. Sherman has issued an order restraining the sale of the interests of Charles H. Clifford. The interest in the estate was advertised to be sold Feb. 18 to satisfy a claim of Alvin N. Cooper. The injunction is temporary until Feb. 23, when the matter will be given a hearing before the referee in Taunton.

Newark.

Harry and Joe Aicher, representing L. F. Fritzsche, Hamilton St., in the western territory, report good business conditions.

Superintendent William R. Skillman, of Kohn & Co., 26 Camp St., spent Lincoln's birthday and Sunday at Hotel Windsor, Atlantic City.

E. H. Eckfeldt, of Eckfeldt & Achley, 98 Murray St., has just returned from a trip from the middle west. A Reeves, representing the same firm, is back from a trip to Boston.

The business of La Secla, Fried & Co., of this city, has been incorporated with a capital of $50,000. The incorporators are: Charles La Secla, August C. Fried and Arthur C. Fried.

Arthur H. Moore, of Moore & Son, 22 Green St., is just recovering from a severe attack of grippe contracted at New Orleans about Christmas time. He has been confined to his home since Dec. 29.

C. T. Wittstein, of the Arch Crown Mfg. Co., Orchard and Camp Sts., has just returned from a short trip to Toledo, O., on personal business. E. N. Manderville, representing the same company, has just returned from a trip to Philadelphia, Baltimore and Washington. He reports that, owing to the fact that many are now taking stock, or about to do so, business is somewhat quiet, but that the market is in a good, healthy condition and the outlook is good for business later.

Attorney David Bilder addressed the monthly gathering of the Newark Association of Credit Men at the Board of Trade's rooms, Tuesday evening, Feb. 8, on "Bankruptcy Laws and the Manner of Their Working." He said that it was one of the duties of such organizations of business men to be familiar with the practical application of the law to the credit system, so as to endeavor to strengthen the law and provide remedies for such omissions as exist in the law at the present time.

Theberath & Co., 13 Franklin St., will move, about March 1, to the new Herpers building, Washington and Crawford Sts., where the firm will occupy the entire third floor. There will be ample accommodation for five times the present force of employes. More machinery will be added to increase the output, and the number of employes augmented from time to time. It is expected that by July 1 the force will be enlarged to nearly the capacity of the new quarters. New lines of goods will be added. A new salesman has just started on a seven week's trip through the middle west.

Interest waxes great in the games of the Jewelers' Bowling League. Tuesday evening, Feb. 8, teams representing Alling & Co., the Shiman-Miller Mfg. Co. (team No. 2) and Whiteside & Blank met. Each team played four games during the evening. Of these the team representing Alling & Co. lost all; the team representing the Shiman-Miller Mfg. Co. lost one and won three, and the team representing Whiteside & Blank lost one and won three. Wednesday evening, Feb. 9, teams representing Kohn & Co., Durand & Co. and Krementz & Co. played four games each. The team representing Kohn & Co. won four straight, placing it in second place in the league. The team representing Durand & Co. won two and lost two, while the team representing Krementz & Co. lost all four. Lee R. Jones, proprietor of the Oxford bowling alleys, has issued an attractive schedule of the games of the first annual competition of the Jewelers' Bowling League, which began Jan. 3 and will continue to March 22. Thirteen teams compose the league, and prizes have been offered as follows: First team prize, $36; second team prize, $27; third team prize, $21; fourth team prize, $15; fifth team prize, $9; first high team score prize, $9; second high team score prize, $6; first individual average prize, $9; second individual average prize, $5; third individual average prize, $3.

Savannah, Ga.

W. H. Sparks, with the Seth Thomas Clock Co., was in Savannah recently.

Victor Desbouillons has been appointed a member of the regatta committee of the Savannah Motor Boat Club.

R. Van Keuren, of R. Van Keuren & Co., has been appointed a member of the finance committee of the Savannah Motor Boat Club.

S. E. Theus, of Theus & Co., is a member of the committee of arrangements in charge of the annual pilgrimage of Aloe Temple, Nobles of the Mystic Shrine, which this year will be to New Orleans, leaving Savannah April 9.

A. T. Cronkhite was recently arrested on a charge of cheating and swindling, preferred by Dr. L. A. Hines, of the Hines Optical Co., and is now held under bond for appearace at the City Court to answer the charge. Cronkhite, it is charged, was selling spectacles and optical goods principally to colored people, on the installment plan, and representing himself as an agent of the Hines Optical Co. Fred Warner, colored, purchased a pair of spectacles from Cronkhite, and finding they were not as represented, called on Mr. Hines to demand the return of his money. This led to the discovery of the identity of the prisoner, who has been operating in Savannah and vicinity for several months.

Washington, D. C.

A. O. Hutterly has been appointed to the legislative committee of the American National Retail Jewelers' Association.

John Hausen, proprietor of the firm of Schmedtie Bros., has been drawn for jury duty, which service will cover a period of two months.

R. Harris & Co. have a windmill in their window, a reproduction of the old Dutch type. Like all mechanical displays, it attracts considerable attention.

The designs submitted by the Tiffany Studios for memorial windows to be erected by H. K. Willard, in memory of his father and mother, have been accepted by the trustees of All Souls Church. The designs will portray "Hope" and "Christ Blessing the Children."

Among the travelers in this city, last week, were: Andy Smith, of the L. P. White Co.; Samuel R. Henderson, Liberty Glass Works; John Von Holt Jr., W. H. Terhune; J. Repelye, J. D. Bergen Co.; Mr. Sn Frye Glass Co., and a representative of Theo. Yankauer Co.

Lancaster, Pa.

G. William Reisner, manufacturer, Feb. 9 on an extended trip to the N England States.

Leonard O. Risser has gone to Ashev N. C., to remain until Spring, on acco of pulmonary troubles.

"Tom" C. Mullenberg, of Philadelp formerly with the H. S. Meiskey Lancaster, recently paid a visit to relat in this city.

Charles Wiggins, until recently emplo as a watchmaker with H. M. Griesin Mt. Carmel, Pa., has gone to Los Ange Cal., with a view to engaging in busir there for himself.

William F. Meiskey, of the H. S. M key Co., paid a visit to New York Philadelphia last week. Lawrence Bates is on a two weeks' trip to Clevela Cincinnati and Chicago.

T. Wilson Dubbs, Aug. Rhoads and L. Mayer, of the Non-Retailing Co., w numbered among a party of Lancas business men, who spent a couple of ple ant days last week at the Ferncliff cl housc on the Susquehanna.

The following traveling representati recently paid a visit to Lancaster. T. Brennan, Morris Weil; M. Freedman, Freedman & Co.; Sol. Sickles, Sickles Sons; Louis Gerstman, Dattelbaug & Fri man; F. C. D. Bonnon, F. & F. Felger; M Koch, Long & Koch.

A charter was granted last week by t court to the Arion Musical Associati composed largely of Hamilton Watch f tory employes. The officers are: Preside Milton Jefferies; vice-president, Char Griebling; secretary, Frank B. Lear treasurer, Edward Griebling.

Among the jewelers who recently visit Lancaster were: Archie K. May, Yo Pa.; Jacob Fisher, Elizabethtown, Pa.; F. Andrews, Strasburg; E. L. Heeps, Lutt Jerome Barker, Baltimore; Samuel Cox Pittsburg; Richard L. Pentlarge, Memphi E. M. Rupley, Monaco, Pa.; H. A. Seid Lebanon, Pa.

In order to provide quarters for it duri the remodeling of its building, the La caster Trust Co. has leased the large stor room now occupied jointly by Jeweler W. W. Appel and Henry Gerhart, who w vacate April 1. Mr. Appel has not defini decided on a new location, but is negotia ing for a storeroom on W. King St

D. C. Morgan, with the W. J. Rudge C Monroc, N. C., has entered the local tec nical school as a student in engraving a watchmaking. W. K. Martin, of New He land, Pa., has entered as a student watchmaking. The basket ball team of th school a few days ago defeated Frankl and Marshall Academy, Lancaster, by th score of 32 to 5. The "Tech." player were Kendig, Hostetter Dissinger, Crai and Ward.

George E. Scott, Hibbing, Minn., ha gone out of business.

Texas.

Arthur Cramer, Miles, was adjudicated bankrupt, recently.

Frank E. Yantis, Sulphur Springs, was in Dallas, recently.

L. L. Reeves has just assumed his duties as watchmaker with O. M. Curtis, Denton.

S. H. Abbott, McKinney, was in town during the past few days making purchases.

Otto Longino, who has been connected with P. G. Secrest, Bay City, has opened a store at San Angelo.

The Locker-Andrews Jewelry & Optical Co. has succeeded to the business of B. W. Tickner, Guthrie, Okla.

Wilbert Peterson, Plainview, suffered a loss by fire. His loss is covered by but a small amount of insurance.

A. B. Davis, who was formerly at Alvay, has become connected with T. C. Green, Brady, as watchmaker.

C. F. Lueddeke, Elgin, has removed to Dallas, locating on Exposition Ave., where he has opened a watchmaker's shop.

C. E. Clarke, formerly watchmaker for Albert C. Glover, Dallas, is now in the employ of C. L. Norsworthy in his trade shop.

H. H. Hawley, president of the H. H. Hawley Co., Dallas, made a trip to Denison last Saturday in the interest of the business.

T. S. Lamb was in Dallas recently purchasing an outfit and stock of material for the purpose of opening a watchmaker's repair shop at Mart.

M. Krulewich, Galveston, has just closed a very profitable auction sale, Mr. Krulewich succeeding in getting rid of a large quantity of his old stock.

W. Utay, manufacturing jeweler, Dallas, has made an assignment in favor of his creditors, and is settling his indebtedness at 33 1-3 cents on the dollar.

E. G. Berger, formerly head watchmaker for the H. H. Hawley Co., Dallas, is now connected with the A. A. Everts Co., of that city, in the same capacity.

J. S. Johnson, formerly of Towle & Johnson, Snyder, has assumed full control of the business, moving his stock to Ryder, where he is permanently located.

J. E. Bachelor, Lueders, C. M. Clark, Ennis, and G. C. Newton, Waxahachie, were recent visitors to Dallas, making purchases to replenish stock after the holiday business.

Taylor Bros., Nevada, have just been making some heavy purchases in the jewelry line to replenish their depleted stock, having had a very successful holiday business.

Porter E. Matthews, who was formerly employed by the Crawford Jewelry Co., Temple, has accepted a position as watchmaker and engraver with Caswell & Smith, Austin.

J. P. Morgan, who was formerly connected with H. H. Hawley, under the name of the Morgan-Hawley Co., Dallas, is embarked in the material business as a jobber.

Master J. J. Doehring, son of P. C. Doehring, 1007 Congress Ave., Houston, died recently after a very severe illness. The young man scratched the back of his hand very slightly, and three days later died of lockjaw.

M. W. Walker, Waxahachie, after having passed through a very successful holiday season, was in Dallas recently satisfying all his indebtedness to creditors in this city.

Mark Fairley, jeweler, Bonham, Tex., filed a voluntary petition in bankruptcy recently, scheduling his assets at $4,296.28 and liabilities at $3,906.08. He claims exemption of $612.75.

Ed. Moreland, who was head watchmaker for Caswell & Smith, Austin, died after a very brief illness, and his death has been mourned by his many acquaintances in the trade.

The Armstrong Jewelry Co., Brownwood, has just consummated a successful auction and has started the new year with better prospects for a bright future than at any time in its career.

J. W. Trulove, Memphis, has been forced into bankruptcy, a proposition being made that the creditors accept 50 cents on the dollar in settlement of their claims. This stock has been carried in the name of Mrs. E. L. Trulove.

The H. H. Hawley Co., Dallas, has purchased the Texas Jewelers' Supply Co.'s stock, Fort Worth, at public auction. The latter company having failed some time since, the stock was sold in bulk to the Hawley Co. by the referee in bankruptcy. This stock has been moved to Dallas by the purchaser.

C. C. McBurnett, formerly of McBurnett & Yates, Lampasas, has purchased the stock of W. E. Heald as well as the stock of Yates, who was formerly his partner, increasing his stock, also the size of the store. Mr. Heald later again established himself in business at Lampasas, finding it impossible to separate himself from his chosen vocation.

M. A. Lesser, Fort Worth, has filed a petition in bankruptcy under very peculiar circumstances. Financial statements which were given out by him during the past mid-Summer do not tally with the financial statement rendered in the present bankruptcy application; in fact they are so entirely different that the Jewelers' Board of Trade, New York, has started an investigation.

Lawrence Somers, who has been engaged with his father, Wm. F. Sommers, in the jewelry business on Akard St., in Dallas, has been taken into the firm by his father. Messrs. Sommers have removed to a more advantageous locality on Ervay St., opposite the postoffice, where they have greatly enlarged their stock and are doing a much greater business even than they anticipated.

The business of the Sweeney Loan Office, Houston, which has been carried on for 36 years by J. J. Sweeney, has been transferred to A. D. Spencer, who purchases it for $75,000. Mr. Sweeney is the head of the J. J. Sweeney Jewelry Co., of Houston, and will now devote his entire time and attention to this corporation, which will be conducted by the same officers who have Minute fragments of clothing fibre may be had charge for many years.

The Moore-DeGrazier Co., the wholesale jewelry firm of Dallas, which has been located in the Praetorian building, has leased the whole second floor in the same building and expects to move into the new quarters about April 1. These commodious offices and salesrooms will be the finest in the United States with one exception. The stock of goods is to be trebled and their working force is to be more than doubled.

A new firm which has lately opened in Dallas and is having the co-operation of the jewelry trade is the Funke Engraving Co., Frank Funke being principal owner. He is the son of Mr. Funke, of Chicago, one of the most prominent engravers in that city, and his rigid intstruction at the hands of his father, who was a most thorough disciplinarian as well as instructor, has served him well in his new venture. The grade of work which is being turned out by this firm surpasses anything that has been seen in this section heretofore.

F. L. Schuster, Texarkana, Ark., was visited by a burglar on the night of Feb. 4. Louie, his son, having occasion to pass the store about 11 P. M. noticed a faint light in the rear of the store. Quietly entering by the front door he discovered a burglar with a bag just about to leave through the rear door, which was wide open. Upon finding that he was discovered the burglar dropped the bag and escaped. Investigation proved that there was about $500 worth of jewelry in the bag. The large safe door was found to be open, although Mr. Schuster is positive in his declaration that it was securely fastened before he left his place of business earlier in the evening.

R. Beskow, president of the R. Beskow Optical Co., Dallas, recently succumbed to an attack of pneumonia after but a few days' illness. Mr. Beskow came to Dallas five years ago, and started in the optical business in this city amid strong competition, but by his ability made a success of his venture. He was an earnest, conscientous, hard-working business man, and his energy seemed never to lag. He was not only respected, but loved by his business associates, and his many friends and acquaintances for his many manly traits. The optical trade in general in this whole section mourn the loss of Mr. Beskow not only from a business standpoint but the closer one of friendship. The local optical society as well as the State organization adopted resolutions which were published in all the daily papers and were also engrossed on their minutes and a copy sent to the widow.

The memorial to Bishop Brooks, unveiled in Boston, Jan. 22, was one of the last works of the late Augustus St. Gaudens, and represented an idea to which he had for several years repeatedly endeavored to give adequate expression. It was cast by the Gorham Co. The canopy beneath which it stands is the work of the late Charles McKim. Both are the gift of a committee of public-spirited Bostonians of many communities, whose feelings in making it were admirably expressed by Major Higginson in the address of presentation which followed a service in the church, in which Bishop Lawrence took the leading part. Bishop McVickar was also present.

News Gleanings.

E. M. Dunham, Garden City, Mo., has bought the jewelry business of Arthur Koenecke, at Concordia, Kan.

F. L. Grant, Marion, Mich., has sold out to a Mr. Johnson, who was formerly employed by E. J. Le Heup.

W. L. Davids, Troy, Ala., has purchased the stock of J. P. Wood, of the same place, and consolidated it with his own.

C. D. Grove has disposed of his jewelry business at Washington, Ia., and has arranged to open a store in the Red Cross Pharmacy, Chariton, Ia.

Raymond Hurst has sold his interest in the People's Credit Jewelry Co., at Des Moines, Ia., to J. G. Trent, who will resume active charge at once.

Roy R. Smithers, Cameron, Mo., has made an assignment for the benefit of creditors. The liabilities are given as $7,000 and the assets $4,000.

A. C. Mueller, a former employe, bought an interest in the jewelry business of W. W. McGuire, at Northfield, Minn., and the style of the firm will hereafter be Mueller & McGuire.

Alvan T. Hatch, manufacturing jewelers' agent, is making an eastern trip through Ohio, West Virginia and Kentucky this week. He is now representing five different houses.

Word was received from Prescott, Ark., recently, that T. S. Bryan was involved in bankruptcy proceedings there. Mr. Bryan has been engaged in the jewelry and kindred lines for about 30 years.

Younglove & Singer, Peoria, Ill., have moved into their new store at 410 Main St. The store is furnished in mahogany, and no efforts have been spared to make it one of the finest jewelry stores in Illinois.

A. F. Odell, of Quincy, Ill., has bought the stock of Mrs. Harry W. Koch at Palmyra, Mo., and is disposing of it at a special sale. On Feb. 15 the Palmyra store was opened as a branch of the Quincy store.

Walter Colegrove, Nevada, Mo., has made an assignment for the benefit of creditors and has been declared a bankrupt. A meeting of the creditors was held, Feb. 7, before Referee in Bankruptcy A. F. Spencer, at Joplin.

The L. A. Orr Co., Rochester, Minn., is remodeling and installing a plate glass front in the new store, and will move the manufacturing department, now located in a building on E. Zumbro St., to the rooms now occupied by S. A. Miller and J. W. Soule.

A man giving the name of J. H. Paul, Boston, arrived recently at Fort Collins, Colo., to claim the estate of the late Chas. O. Hunter, a jeweler who died there Jan. 21. On the request of Paul Attorney J. H. Feeney was appointed administrator of the estate.

The Sherwood Jewelry Co., Montgomery, Ala., denies the report which has appeared in certain papers to the effect that it is the successor to the City Jewelry Co., of the same place. Mr. Sherwood, president and manager, says that the present firm is not now, and never has been, connected with the other house.

Mrs. Lida Day, of San Antonio, Tex., has brought suit for $10,000 damages against N. Becker, a local jeweler, on a charge that the jeweler, on Dec. 18, accused her of having stolen a diamond ring from a tray which she was examining and that the public outcry which he made caused her to become an object of suspicion to those who heard him. She asks $5,000 for damages to character and $5,000 as punitlve damages.

Mrs. J. Krenitz, who operates a jewelry and pawnbroker's establishment at 704 Walnut St., Louisville, Ky., was recently charged with being the receiver of jewelry valued at $200 that had previously been stolen in that town. When questioned by detectives Mrs. Krenitz said that she had the jewelry for which they were looking, but said she received it in good faith and in the ordinary course of business.

There is no trace of Leslie Tooley, the boy who is suspected of having stolen the 11 diamonds from the jewelry store of H. W. Radder, Watertown, N. Y., about two weeks ago. It has been learned that a person resembling Tooley tried to sell some diamonds in Carthage the day following the theft. Tooley, as far as is known, has not tried to communicate with anyone in that city, though reports to this effect were circulated.

Representative Bennett, of New York, has introduced into Congress a bill to provide bronze medals, to be presented to each of the officers, enlisted men or their families, who served in the Spanish-American war, outside the limits of the United States, who are still in the service, or who have been honorably discharged. The sum of $3,500 is appropriated for the purpose, and this act is not to conflict with medals already awarded under a previous act.

Owing to a disagreement between the members of the Hughes & Son Jewelry Co., 135 N. Main St., Lima, O., an action was recently begun in the Common Pleas Court on behalf of the company against William Melville, who has been the treasurer since Aug. 3, 1901. The suit is over an accounting of $9,611.70, which Mr. Melville has withheld until his differences with Mr. Hughes and the concern have been adjusted. It was found that the matter could not be settled between the parties, so the courts were finally resorted to.

The members of the F. A. Robbins Co., jewelers, of Pittsfield and Springfield, Mass., have petitioned the courts of that State to dissolve the corporation, as they find the corporation machinery more cumbersome than their business requires. The business will be continued under the same firm name by Frank A. Robbins and J. Frederick Kahl, but as a co-partnership instead of a corporation. There has been no change in the ownership, and will be none in the management. Mr. Robbins will have charge of the financial part of the whole business, and the management of the Springfield store, and Mr. Kahl will have charge of the Pittsfield store. The Springfield store will be moved in April to 123 125 State St., where the firm will have nearly twice the room now occupied. Messrs. Robbins and Kahl intend to make this one of the most attractive stores in Massachusetts.

Creditors of A. Kurtzeborn & Sons, St. Louis, Mo., Offered a Settlement at 33 1-3 Per Cent.

The Jewelers Board of Trade sent yesterday a letter to creditors of A. Kurtzeborn & Sons, St. Louis, Mo., giving assets and liabilities of the concern and stating that at a meeting of the creditors held recently an offer of settlement at 33 1-3 per cent. net cash was made by Leo Kurtzeborn, on behalf of the firm, proposition 95 per cent. of the creditors in amount accepted the offer. He stated that the amount to which the firm owed $6,400 was willing to accept the proposition.

The creditors at the meeting voted to accept the offer. The liabilities are placed at $20,885 and the nominal assets at $2[illegible] of which the accounts receivable, amounting to $2,000, are considered worth much less than their face value, and the fixtures, $3,500 cost that amount 10 years ago.

The concern had for some time past been conducting an auction sale, which realized with collections $67,450. The money paid out during that period amounted to about the same sum.

Comments on the Anniversary Issue

The Jewelers' Circular-Weekly, Feb. 2 is the 41st anniversary of the periodical. Interesting special articles include "Gold and Silversmith Work at the Louvre Museum," by Charles A. Brass and "The Trend of Fashion in Jewelry," by Lillian E. Purdy. The magazine is well illustrated.—Newark (N. J.) *News*

* * *

The 41st anniversary number of the Jewelers' Circular-Weekly, of New York, one of the leading jewelry papers of the world, has just been issued. It is declared to be the handsomest and most complete of the character ever printed in behalf of the trade it represents. The magazine contains over 200 pages of matter of value to jewelers. It is beautifully illustrated.—Pittsburg *Commercial Telegraph.*

* * *

With the last issue of The Jewelers' Circular-Weekly that paper begins its 41st year as a trade paper. Because of this fact the anniversary number on Feb 2 was such that the ability of editors and the skill of the printers could make it. The cover is beautiful, and there were 274 pages, each one of interest to anyone in any way connected with the jewelry business. The appearance of the anniversary issue of this paper has for some years been looked upon as an important event, both in the jewelry trade and in trade circles. From the leading article on the "Gold and Silversmith Work at the Louvre Museum" to the last page of the Workshop Notes there is a wealth of information that would please the eye of all jewelers or manufacturers, as well as many in no wise connected with the trade. The whole is profusely illustrated with half tone engravings.—Elizabeth (N. J.) *Evening Times.*

R. Achurch, Charleston, S. C., is about to close out his stock of jewelry.

Pittsburg.

V. M. Winscad has been confined to his ... by a severe cold for several days.

C. Peckwith, with the Hamilton ...tch Co., was in Pittsburg last week call- on the trade.

...to Herren, who is in the Isle of Pines ... his family, expects to remain there for ... next two months.

...ren Bros. & Co. now close their estab- ...ment at 5:30 P. M., while most of the ...r wholesale houses remain open until ... M.

...el Weinraus, of S. & B. C. Wein- ... has been in New York for the last ... buying stock for his house for the ...ng trade.

... B. Hayes, of the Hardy & Hayes Co., ... has been ill for three weeks as the ... of catching a heavy cold, is still con- ...d to his home.

The W. Bonn Jewelry Co. has been in- ...orated in Delaware with a capital of ... The incorporators are Julius B. ..., Moses Bonn, Walter M. Bonn, all ... this city.

The annual dog show of the Duquesne ...el Club, which will be held in Pitts- ...g, March 16 to 19, is calling for the pur- ...se of a number of silver cups, and jew- ...rs expect to dispose of a great many.

The following out-of-town jewelers were ... Pittsburg, this week, buying stock: B. ... Brown, Monessen; Charles File, Mars; ... Schmidt, Braddock; H. R. Brown, ...ora; W. M. Barbour, Midway; E. H. ...wardel, Tarentum.

S. Bickart left last week to represent ... Ollendorf Co. on the road. E. A. ...ter, also of the same house, is sending ... some good reports of business in the ...ritory in which he is traveling. The ...siness of the house is improving rapidly.

F. A. Keating, of the Grogan Co., and ...ele F. Roberts, of E. P. Roberts & Sons, ...ve been in poor health ever since ...y came home from the banquet in the ...tropolis. They are both suffering from ...ere colds and appear to have taken them ...on their return to Pittsburg.

John M. Roberts, of the John M. Roberts ...Son Co., and vice-president of the Penn- ...vania Retail Jewelers' Association, says ...t dealers throughout the State have been ...scribing liberally to the fund being raised ... carry on certain work of the association. ... has received numerous checks, varying ... amount from $2 to $25.

Capt. William Klein, of the Washington ...antry, reports that the insurance com- ...nies have settled the loss of the infantry, ...ich organization recently lost its uniforms ... the Market House fire. Capt. Klein ...d numerous other jewelers who belong ... this organization will buy new equipment ...th the insurance money, amounting to ...800.94.

Sol Cerf, of Sol Cerf & Co., and William ... Ingham, last week appraised the stock ... Hutchison Bros., at Kittanning, Pa., in ...der to settle the estate of the late Guy ...utchison, whose death was noted in THE ...WELERS' CIRCULAR-WEEKLY some time ...o. E. S. Hutchison will continue the ...siness of the firm, and it is understood, ...ll pay over to the widow of Guy Hutch- ...on the amount of the brother's interest in ...e establishment. The affairs of the de- ceased are now being settled by attorneys representing the widow.

The following traveling representatives, last week, visited the trade in this city: George H. Remington, Manasien Bros. & Elliott; W. J. Lane, Kerr & Woodland; H. C. Klem, Metallic Art Co.; E. A. Reed, Reed & Barton; S. W. Pickering, A. Ludwig & Co.; M. F. Loomis, C. Sydney Smith & Co.; D. Albert Hunting, F. W. Adams & Co.; H. B. Bliss, B. M. Shanley, Jr., Mfg. Co.; W. L. Francis, Waterbury Clock Co.; Frederick Crane, Mandeville, Carrow & Crane.

Some workers of the McClintic-Marshall Construction Co., at Butler, Pa., last week found in the bottom of a railroad car a bag containing five gold watches, 10 silver watches, diamonds and a quantity of small jewelry believed by the police to have been stolen from some store. The car was loaded at Pittsburg. The police have been communicated with, in the hope that the owner of the goods may be found. There is evidence that a robbery was committed somewhere.

The teams of the Jewelers' Duckpin Bowling League played some good games Monday night of last week, the Wattles team taking three games from the Lochs; Diamonds and Terheydens splitting even, the Vilsacks taking three from the Roberts. The Diamonds and the Terheyden's played off a postponed series of four games, both teams dividing honors. Crawford, of the Wattles, made the high score, rolling 119. He also made the best average with 107 3-4 to his credit.

The Grogan Co. is exhibiting a solid silver service which was presented to Governor M. F. Johnston of Pennsylvania, during his incumbency, and who served in that office from 1848 to 1854, the service being owned by Mrs. W. G. McCandless, of Pittsburg, a daughter of the Governor. In some respects it is a remarkable piece of workmanship, consisting of numerous engraved pieces, and takes up an entire window. A great many persons stop to view it, for the style of the ware is not much unlike the style of similar silver services in present-day use.

A number of jewelers attended the Lincoln's Birthday banquet, given Saturday night at the Hotel Schenley by the Pittsburg Chamber of Commerce, this being an annual event. The special guests of the occasion were Speaker Joseph G. Cannon of the House of Representatives; Governor Edwin S. Stuart of Pennsylvania and Representative McCall of Massachusetts. Among the jewelers present were John M. Roberts, who had as his special guest Col. John L. Shepherd, J. L. Roberts, Sam F. Sipe, Steele F. Roberts, J. C. Grogan, F. A. Keating, M. A. Cronin, W. J. Sample, Charles W. Roberts, Frank T. East and J. H. Wattles.

J. Alexander Hardy, of the Hardy & Hayes Co., took a personal interest in the movement inaugurated two weeks ago in Pittsburg by the Young Men's Christian Association for the raising of $300,000 with which to construct four branch buildings in the Greater Pittsburg district. Mr. Hardy joined in the personal effort of the various groups of business men who did some effective campaigning to secure funds. Mr. Hardy secured some large amounts. Among those who contributed through his personal efforts was Frederick Crane, of Mandeville, Carrow & Crane. Mr. Hardy said that he has always felt kindly toward the Y. M. C. A. because of the influences which it had on his life in his earlier days, and that he always takes great interest in helping the cause along in his humble way. All of the money necessary was raised, a whirlwind campaign to secure the funds having been conducted by many of the prominent business men of the city.

An involuntary petition in bankruptcy was filed last week in the United States Court against David Schwart, of Monessen, by creditors having following claims: Landow Bros., $170.90; W. Joseph, $30.70; Pittsburg Jewelry Mfg. Co., $116; H. Mayer, $57; Biggard & Co., $233.70. The claims total $714.30. Later a petition was filed requesting that the bankruptcy petition be dismissed, with no costs and damages. It appears that Kate Goldberg, a sister-in-law, issued an execution upon a judgment secured by her against Schwart for wages and the store was closed on this execution. Then the creditors, or a portion of them, went into the United States Court and filed the petition. Schwart's liabilities, it is said, are between $1,600 and $1,800. The creditors asked for the appointment of a receiver. A. C. Ellis has been named by the court and has taken charge. It is said that the reason the bankruptcy proceedings were withdrawn is because Schwart's father-in-law or some of his relations have come to his rescue and that terms of settlement have been agreed upon. It is claimed that Schwart offered 35 cents on the dollar. Schwart has a small store, and it is asserted, was hard hit during the panic. It is believed that if he is given time he will be able to pay his creditors.

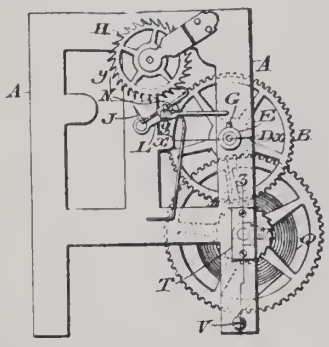
Columbus, O.

B. W. Andrews, formerly with the Homan Jewelry Co., Columbus, has accepted a position with Richter & Phillips, Cincinnati, and is now making his initial trip in Ohio, West Virginia, Kentucky and Tennessee.

L. W. Lewis, 99 N. High St., was the victim of a diamond thief, Monday of last week. A prosperous-looking colored man came into his store, and was waited on by a young woman clerk. He looked at several small diamond rings and finally left without making a purchase. He had hardly had time to lose himself in the crowd before a $240 ring was missed from the tray which had been on the counter. Mr. Lewis immediately gave the alarm to the police, with a description of the suspect, and the latter were certain they would have their man before the day ended, but thus far no trace of him has been found.

An unknown person hurled a missile through a plate glass window in the store of Raphael Bros., Kansas City, Mo., early one morning recently, and stole 24 diamond rings, four gold band wedding rings, 30 lockets, about 40 gold filled watches and several cheap rings. The loss is estimated at $1,800. Footprints of a man and boy were found in the doorway of the store.

PATENT DEPARTMENT

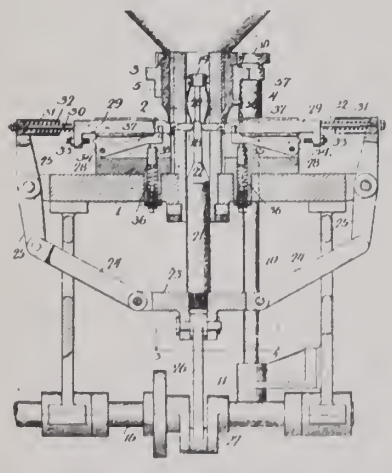


[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN. THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF FEB. 9, 1910.

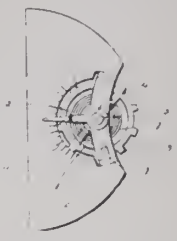
948,363. CLOCK. Abraham M. Yeakel, Perkasie, Pa., assignor of one-half to Wilson L. Yeakel, Perkasie, Pa. Filed April 13, 1909. Serial No. 489,632.



In a clock, a verge, a pin on which the same is mounted, an arm connectible with the frame of

the clock, said pin being adjustably held on said arm for movement in the direction of its length, and a set screw on said arm adapted to engage said pin.

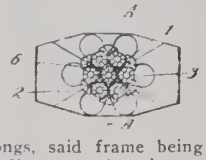
948,615. MACHINE FOR MAKING LINK MESH. Alonzo C. Pratt, Newark, N. J. Filed March 10, 1909. Serial No. 482,634.



The combination of a support for a piece of link mesh fabric consisting of a plurality of parallel rows of intermeshing links and a plurality of parallel rows of links substantially transverse to

said rows, forming-tools for forming links intermeshing with those of said fabric, means for operating said tools, and means for effecting a relative movement of said fabric bodily and said tools to present different portions of said fabric to said tools to receive links.

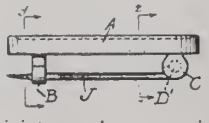
948,652. REGULATOR FOR WATCHES. Wilson E. Porter, New Haven, Conn., assignor to the New Haven Clock Co., New Haven, Conn. Filed April 27, 1908. Serial No. 429,543.



A sheet-metal regulator for watches, the said regulator being adapted at its inner end to be applied to a watch-movement so as to turn on an axis concentric with the axis of the balance-staff, and shaped at its outer end to form a pointer, and folded upon itself between its said ends to form an upwardly opening integral loop, the said inner and outer ends of the regulator being located sub-

stantially in line with each other and the said loop extending downwardly between them at substantially a right angle to them and adapted to receive a coil of a balance-spring.

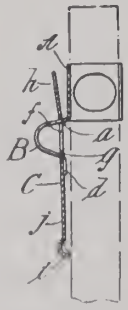
948,774. JEWEL-CLUSTER SETTING. David I Strelitz, Chicago. Filed May 19, 1909. Serial No. 497,028.



A jewel cluster-setting comprising a cluster-frame having a plurality of apertures for single jewels, and a base having a plurality of upwardly

disposed prongs, said frame being notched in its upper face adjacent to its edges and each of said prongs having a seat formed theron adapted to fit and support the edge of said frame adjacent to one of said notches, and the tips of said prongs being bent inward into said notches to secure said frame in said seats.

948,775. PIN. Fred M. Swartz, Providence, R. I., assignor to the Alpha Jewelry Co. Filed Aug. 7, 1908. Serial No. 447,360.



In a pin of the type set forth, a body formed of a block of metal having an integral catch, and

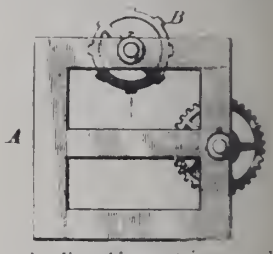
an integral joint member comprising supports, said catch and supports being struck up from one side of the body by displacing the metal by dies or the like without bending leaving the other side smooth and solid, said guard and joint member projecting at right angles from the rear face of the body.

948,802. RETAINER FOR FOUNTAIN-PENS AND PENCILS. Levi D. Van Valkenburg. Holyoke, Mass. Filed May 25, 1909. Serial No. 498,125.

A device of the character described consisting of a metallic band to encircle a fountain-pen or pencil, having a forwardly extending spring tongue

of outwardly bowed loop form, a metallic bar-like plate having by an intermediate portion, a fulcrum engagement with the rear portion of said loop-tongue, having by another more forwardly located intermediate portion thereof an engagement under the loop-tongue, and comprising respectively a rearwardly extended operating lever member, and a forwardly extending clamping member.

948,832. STYLOGRAPHIC PEN. Leon Trotzky. Pittsburg, Pa. Filed June 1, 1909. Serial No. 499,327.



A stylographic pen comprising a tube constituting a reservoir, means for closing one end of said tube, said tube having its other end provided with interior threads, a hollow head comprising a cylindrical body portion and a cone-shaped outer end, said body portion provided with threads e g ing with the threads of the tube whereby the he s connected to the tube, a feed tube exte g through and connected to the conical end of head, said tube extending in said body p and projecting from said conical end, a r ranged in the feed tube and projecting fro outer end of the feed tube and constitu writing point, said rod projecting in said rese a valvular means connected to said rod int diate its ends and engaging the inner end o feed tube for closing it, an inverted L-s bracket connected to the inner end of said

a coiled spring interposed between said br and said valve and constituting a means for taining the valve against the feed tube f r c it, said valve actuated from its seat when pre is applied to said rod, and means carried b bracket for adjusting the tension of said sp

948,912. CLOCK. Abraham M. Yeakel, kasie, Pa., assignor of one-half to W Yeakel, Perkasie, Pa. Filed Nov 24, Serial No. 529,673.

In a clock, a wheel of the train thereof, a carrying said wheel, a bushing for said sha collar, the latter being supported on the fran

the clock and adjustably containing said bus and a screw on said collar adapted to engage bushing.

DESIGNS.

40,495. BADGE OR SIMILAR ARTI Joseph T. Bailey, Philadelphia, Pa.

Dec. 7, 1909. Serial No. 531,911. Ter patent 14 years.

40,496. SPOON OR FORK. August C. Mi Taunton, Mass., assignor to Reed & Ba

Taunton, Mass. Filed Dec. 4, 1909. S No. 531,448. Term of patent 14 years.

40,502. CLOCK-FRAME. John W. Hollo

New York. Filed Dec. 8, 1909 erial 532,133. Term of patent 3½ years.

IMPORTANT AUCTION SALE

AT PITTSBURG, PA.

JAMES L. HAND, Auctioneer

Monday, February 21st, at 10.30 A. M.

I will offer at auction the entire fine stock and fixtures of

L. W. VILSACK & CO.,

who are retiring from business. The sale will be held at their store,

539 Wood Street, Pittsburg, Pa.

This sale is for the trade only as the **goods must be removed at once.** This is a very high class stock—consists of high-grade watches of American and Foreign makes, many of which are set with precious stones. Sterling silver flat and hollowware. Exquisite gold jewelry of all kinds set with diamonds, rubies and pearls. Fine porcelaines and many other articles which appeal to the fine trade. FIXTURES, the finest in Pittsburg, will be sold at 3 P. M. same day. All solid mahogany. About 100 feet wall cases, show-cases, office partitions, large jewelers' safes, etc. The special attention of the trade is called to these fine new fixtures. Nothing finer in America. **All to go!**

The Jewelry Trade is invited to attend this sale. Nothing will be reserved.

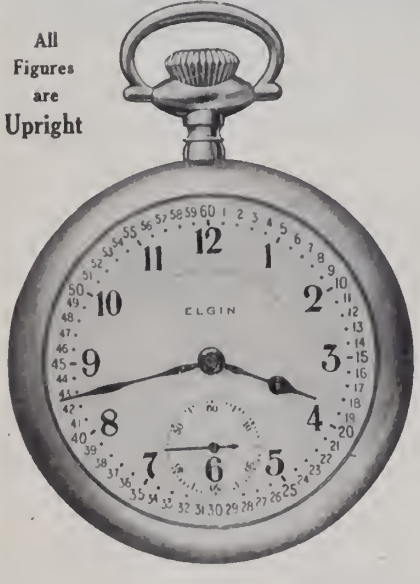
This New Minute Numeral Dial

(MONTGOMERY PATENT)



With Upright Figures

was designed by the chief watch inspector of a large railway system, for railroad men's use and is now supplied on any of the

Railroad Models of the Elgin Watch

All Figures are Upright

Each minute is numbered with clear, sharp, upright figures. The figures of the even five numbers in the minute circle are printed in red. This dial is so well designed that the complete time is read at a glance, doing away with even the momentary calculation necessary with old style dials. Railroad men want Elgins with this dial. The complete line of Elgin Railroad Watches with this dial will be well advertised in railroad men's publications. Be prepared to furnish them to your trade.

Write your jobber or this company direct.

ELGIN NATIONAL WATCH COMPANY

New York Office
15 Maiden Lane

Factories: ELGIN, ILL., U. S. A.

General Offices,
131 Wabash Ave., Chicago

Watch Springs.

(Lecture delivered by CHAS. T. HIGGINBOTHAM, of the South Bend Watch Co., before the convention of the Indiana Retail Jewelers' Association, Feb. 7-8.)

FRIEND, being asked for a suggestion as to the subject upon which to address this meeting, said: "Watch springs." But," said I, "that is rather indefinite. ere are so many descriptions of springs a watch."

So much the better," he replied. "You talk of the kind that you think will ase your audience most. It will, of rse, be either mainsprings or hair-ings."

His suggestion was adopted, which ex-ins the announcement on the programme the subject for to-day.

A story is told of a gentleman who, wish-g to show his gardener a little attention his birthday, asked him into the dining-om and said: "Well, Pat, I suppose you n't object to a little drink on your birth-y."

"Sure, I don't that, sir."

"Well, what will it be—a glass of grog a whiskey punch?"

"Sure, sir, I don't entirely know; but if z don't mind, I can be drinking the grog hile you are mixin' the punch."

Well, gentlemen, we will begin with the og. The punch may follow if we have ne.

When Peter Henlin made his celebrated uremberg egg, as the first watch was lled, one of the principal difficulties he ad to contend with was to find the motive ower to take the place of the descending eight, which was necessary in a pocket-ece. This he accomplished by the use of obably the first coiled spring (mainspring) er used. What a crude affair it must ave been—probably roughly hammered ut. As for a hairspring, he didn't even ream of such a thing. A hog's bristle was e best contrivance he could think of to ontrol the motion of the balance.

No wonder that those early watches were erely mechanical toys. The clocks of those arly days were incapable of more than an pproximation to time. An hour a day was ot considered an excessive error, but the rst watches were so uncertain in their erformance that they were utterly useless s timekeepers. Doubtless many of you ave heard the incident which is related of he deposed monarch, Charles V. But I m wandering from my subject.

The fitting of a mainspring is no haphazard affair to be given to an inexperienced workman or a boy. Both judgment and experience are required.

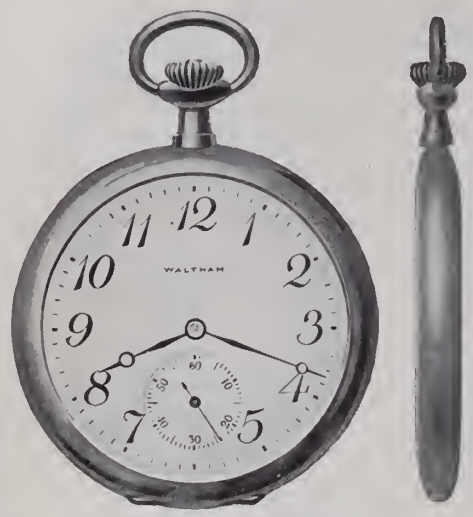
I have often thought that the watchmaker may well be compared with the physician. He is to his regular patron what the doctor is to a family. He knows all the tricks and weaknesses of his customer's watch, having acquired this knowledge by frequent observation and doctoring of the same. When such a customer brings in his watch the watchmaker knows that the old spring was just right, for had he not examined it the last time he cleaned the timepiece? So he simply duplicates the old spring.

Not so when a stranger or a new customer brings in his watch with a broken mainspring. The watchmaker has no right to take it for granted that the old spring was right; he should be able to determine whether it was, or was not, right and proceed accordingly. Then, if he finds it was not right, he should replace it with one that is, thus improving the timekeeping of the watch and possibly transforming a transient into a permanent customer. Remember, every piece of good work you do makes a satisfied patron and is a standing advertisement for your business. Bearing this in mind, buy a good quality of mainspring and be satisfied with nothing else. More trouble to yourself and your customer may be caused by one inferior spring than would pay for a dozen—yes, several dozen—good ones.

The difference in the cost between a good and a poor spring is so comparatively slight as to be unworthy of consideration. Think of it, gentlemen! Ten cents is as much as you could save by buying a poor article. You have no reason to expect good results from an inferior mainspring, and if you do expect them you will be quite likely to be disappointed.

There are two dangers to be apprehended from an inferior quality of mainspring, namely, breakage and setting. The first is bad enough, for it entails the trouble to you of replacing it. I presume you guarantee your mainsprings. The second is more serious, for it impairs the timekeeping qualities of the watch. The power of a mainspring varies quite enough, even when of the best material and temper, but the variation is excessive when both are poor, and that is precisely what you get in a low-priced spring.

A good 18-s. mainspring, when wound to the top, exercises a force of about one pound Troy weight at the teeth of the main wheel, and will exert about three-fourths of that amount at the end of a 42-hour run. This may be demonstrated by suspending a weight from a cord around the barrel. It is a surprise to a person who has never made the test, and I mention it to give you an idea of the great task imposed upon a mainspring and to impress upon your minds the advantage to be secured by using the best the market affords. It is true economy to do so.



See that the spring fits the barrel properly as to width. The proper amount to leave for freedom between the edge of the spring and the barrel chamber is 12/100 of a millimeter. Be sure that the temper is high enough to insure its resilience. When released from the barrel a 16 or 18 size spring should open to a diameter of at least 2½ inches. If it does not it indicates either a poor temper or a spring that has been in use long enough to be changed. See that the barrel gives a sufficient number of turns to equal about 36 hours.

In a watch having 80 teeth in the barrel and 12 leaves in the center pinion, which is usual in American watches, this would require about 5½ turns. Should it be desired to ascertain the number of hours that a given number of turns of the barrel will carry the watch, proceed thus: Multiply the number of turns by the number of teeth in the barrel and divide the product by the number of leaves in the pinion.

We will next proceed to consider the method of getting the best possible results from a mainspring of a given thickness. The old rule which many of you may have been taught—I was taught that way—for determining the amount of mainspring to use in a barrel is, measuring from the center of the barrel to the inside of the wall, the spring being let down, one-third arbor, one-third space and one-third spring. This rule is incorrect. So far as the arbor is concerned, one-third is correct, though this is by no means an arbitrary proportion.

In ordinary watches it is usually adhered to pretty closely. Of the space between the barrel arbor and the wall one-half should be occupied by the spring, whether wound up or run down. Understand, when I say one-half the space I do not mean one-half the radial distance, but one-half the area. When this condition prevails you will have secured

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver Finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these goods for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

WALTHAM WATCH COMPANY
WALTHAM, MASS.

e greatest number of turns possible for a pring of that width, and here a beautiful rinciple exists.

The difference in the number of coils hen the spring is wound tight around the arrel arbor and when it lies close around e inside of the wall will be the exact mber of turns the barrel will give, and, I have said, will be the greatest possible mber that can be secured from that spring y other spring of equal thickness. is is a fixed mechanical law. Either to ngthen or shorten the spring will have a ilar effect—to lessen the number of rns the barrel will give. It is a self-dent fact that whatever space the coils the spring cover that it will be the same al conditions it may assume; but e the space covered and the vacant ce are of the same area the best results secured. The exact radial measurement the center of the barrel to a circle will divide the space into two equal may be accurately figured, but it es mathematical calculation.

A simple rule will answer the purpose most as well; that is, when the barrel bor is one-third the diameter of the cham-r This rule is: Multiply the diameter he inside of the barrel by .745, which ll give the diameter of the dividing circle. simple way to determine approximately e proper amount of spring is to note the portion of the barrel occupied by it hen the spring is released and lies against e chamber wall. The radial measurement f the spring should then be about one-urth the entire radius of the chamber.

Mainsprings as furnished by the material alers are usually marked as to width and ickness according to Dennison's gauge. he recesses in the side of the gauge are umbered from one to 43. These furnish easurements a little less than 1/100 of a illimeter apart, No. 1 being 104/100 of a illimeter, expressed 1.04, and No. 43 ex-ressed 5.04. The thickness of the spring is esignated as force, and is measured by a plit gauge usually attached to the larger rass gauge.

The split steel gauge has graduations arked or numbered from 0000 to 12, the ifference between one graduation and the ext being also about 1/100 of a millimeter. he length of a spring is sometimes, but not lways, marked. It must not be taken for ranted that the spring is the correct length o be placed in any barrel. The spring-aker generally leaves his spring, when not aving the brace attached, a little longer han is necessary, expecting that the watch-aker will break it down to the correct ength. When the brace is attached—unless he spring has been secured from the manu-acturers of the watch—it is more or less a atter of guesswork as to length.

It is a simple matter to measure the width nd force, but not so with the length. To traighten out the spring for measuring the ength submits it to a strain that is highly njurious to its resilience. It will give two ethods for determining the length of a pring without injury. The first method is o cut a strip of paper, or, better still, a trip of tracing cloth, about 24 inches long nd one-half inch wide.

At a point 12 inches from one end make graduation and mark it 12. From this point to the end, at a distance of one inch apart, mark graduations and number them in sequence up to 24. Crosswise of the cloth at distances of about 1½ inches apart cut two parallel slits one-eighth inch distant from each other. The spring may be threaded through these slits and the length determined with the greatest accuracy without disturbing the coil.

A more simple method, and one that will be found to measure close enough for ordinary purposes, is to form a ring of small wire exactly one inch in diameter. This you can easily form on your ring mandril. Coil the spring up in this, count the coils, making due allowance for that part of the spring in the center which does not touch the other coils, and three inches multiplied by the number of coils and fraction thereof will give the length of the spring

A rule for finding the length and thickness of mainspring approximately is:

Size.	*Length in inches.*	*Force.*
18	21 —21½	3½—4
16	20 —20½	4 —4½
12	19 —19½	4½—5
6	15½—16	6 —6½
0	13 —13½	8 —9

When a spring of the proper force fails to give the watch a good motion something is wrong with the watch. To attempt to remedy it by putting in a stronger spring is a poor makeshift. Such a method is not worthy of being entertained one moment. It is very much like the man who, realizing that booze was interfering with his business, cut out his business.

A great advantage to be secured by fitting a spring that will carry the watch not less than 34 hours is that you thereby insure a condition in which the force varies but little during the regular 24-hour run.

Towards the last of the run in the unwinding of every spring there occurs an intermittent variation of force. The power will gradually decrease and then suddenly increase with increasing frequency until entirely down. This condition begins to manifest itself when the outer coil contacts with the wall of the chamber and other coils press against that and each other. The impingement of the coils upon each other form a sort of secondary barrel, impeding the free action of the spring. The sudden regain of power is caused by the coils slipping past each other, thus bringing more length of spring into action, and the decrease of power that follows is caused by the free coils unwinding against the impinging ones.

This condition may be easily felt by securing a pair of slide tongs to the barrel arbor, winding the spring to the top and then letting it slowly down. Towards the last this series of grindings and jumps will be very perceptible. It has frequently been attributed to roughness in the barrel, but it is much more likely to be the result of the condition just mentioned. At no time after the coils thus come into contact with each other is the full power of the mainspring secured, and when that spring is of uneven thickness or rough in surface the loss is proportionately greater.

It is therefore a great advantage, in addition to using the best spring to be obtained, to so proportion the length and thickness that this excessive friction of the coils with its consequent irregularity of power shall be reduced to the minimum amount.

The exact length and thickness may be determined by mathematical calculation, but it is a somewhat complicated problem and equally good results may be arrived at by trial, keeping in mind the mechanical laws governing the action of the spring, to which I have called your attention.

In conclusion I will say a few words in reference to the breakage of mainsprings. It goes without saying that a spring made of poor material or one badly tempered is extremely liable to break. It is also true that one of uneven thickness has the same liability, for the simple reason that undue strain is concentrated on the frailest portion. You doubtless have all seen springs broken in many pieces. Whenever this occurs it is generally produced by an inner coil breaking first.

The result is that the portion of the spring adjacent to the break, in an effort to straighten, presses its severed end on the next coil, producing additional strain upon that particular place, and it, giving way, presses upon the next, and so on, sometimes breaking nearly every coil. When a strip of tempered steel is deflected the atoms of which it is composed are subjected to strain. Those on the inside of the curved piece are compressed, those on the outside are separated. This condition constantly exists in a mainspring, and sooner or later, when the cohesion of the particles is unable longer to resist the strain, a rupture occurs; consequently, the life of a spring is limited to such time.

To secure the best results and increase the life of a spring proper lubrication is required. I would recommend a liberal supply of oil, but, of course, not so much as to ooze out of the barrel. In cleaning the watch always remove the barrel head, clean the viscid oil from the spring and put in fresh oil. It is better to take the spring out and clean between the coils by wiping with tissue paper, being careful not to distort the spring. The breakage which sometimes occurs in a spring which has been removed from the barrel is generally the result of this distortion.

It is a well-known fact that there occurs from time to time an epidemic of broken mainsprings. Many theories have been advanced seeking to explain this. The one which has gained the most favor is a sudden change in temperature; this, however, is not borne out by experience. In temperature adjustments in watch factories mainsprings undergo greater and more sudden changes than under any conditions that they are likely to be submitted to when in use by the owner. They are taken from a temperature of 90 degrees Fahrenheit, or more, and placed at once in a temperature of freezing (32 degrees); furthermore, these epidemics seldom occur in Winter, and when they do they are slight when compared with those which occur during the Summer.

These are invariably found immediately after—they probably occur during—thunderstorms and other electrical disturbances. Being convinced that electricity played an important part in the breakage of mainsprings, I conducted experiments to test the matter, and found that by submitting a piece of mainspring to a strain which

bught it to almost the breaking point the psage of a moderate electric current would cse fracture.

am not to be understood to imply that aberfectly sound spring under ordinary cditions as to use will be broken by aiospheric electric disturbance; but when t t spring is near the end of its life, so speak, it only needs the electric effect t inish it. "It is the last straw that breaks camel's back."

Standardization of Screw Threads.

port on the proposition made by M. Maurice Picard.)

(Continued from issue of Feb. 9.)

TTEMPTS have been made to measure in metrical values the dimensions ameter and pitch) of the principal screws this series, and we have prepared tables ng the values thus obtained for the ws of this series designated by their custnary names.

here have been, moreover, reproduced hese these tables as well as in the statents that follow only the data relative to screws that remain in use, leaving aside se that may originally have figured in full series, but which are no longer d. There has been besides indicated, ecially for the Thury series, only the dinsions practically measured and exssed in hundredths of centimeters in ce of the theoretical ones, the exactness of ich might run into the ten thousandths, ich Professor Thury has indicated.

The principal series are the following:

. The series of *Bourgeaux and Delaarc*, formerly made at Geneva, which is mposed actually of 20 screws, numbered m 00 to 18, of which the diameters ow a decreasing range from 2.26 mm. to mm., decreasing in about a tenth or halfth of a millimeter, and of which the pitch o follows a declining scale from 0.42 mm. 0.096 mm.

The table given in the pamphlet of Prossor Thury systematics of horological rews, differs materially from these indicans and includes 26 screws, commencing th numbers 00 and 0 and ranging from 363 mm. to a diameter of 0.213 mm., the rresponding pitches ranging from 0.420 m. to 0.068 mm.

2. The Latard series, which was originally anufactured at Nyon by Messrs. Perrelet d Martin, is likewise now made up of 18 rews, but these screws are numbered from to 17 and their diameters range diminishg from 2 mm. to 0.47 mm., while the tches vary from 0.35 mm. to 0.11 mm.

Professor Thury's pamphlet gives for ese Latard screws a series of 21 screws, mbered 0 to 20, the diameters varying om 0.029 mm. to 0.367, and the corsponding pitches from 0.352 mm., to 0.087 m.

3. The Thury series, or Swiss series, lopted, as we have stated above in 1880, is series in metric dimensions, chosen among ose for which Professor Thury had given e formula.

This was characterized by the coefficients: = 0.9, M = 6 and k = 6/5, of the formula p = Cn and D = Mpk.

being the pitch, C the number of the screw d D the exterior diameter.

This series comprises 25 screws, of which the diameters decrease progressively, first by 0.2 mm., then by 0.1 mm from about 6 mm. to 0.25 mm. The corresponding pitches vary from 1 mm. to 0.07 mm. All the dimensions of these screws, calculated by the above formula, from a continuous series, and, as we have already intimated, have been indicated by Professor Thury with three and even four decimals, which corresponds to ten-thousandths of a millimeter. In practice there have been substituted for numbers thus calculated values limited to hundredths of a millimeter; but in spite of this simplification this series has found little adoption in practice.

In the series thus modified the 15 last screws preserved, bearing the numbers 7 to 21, range from a diameter of 2.48 mm. to a diameter of 0.42 mm., and the corresponding pitches range from 0.48 mm. to 0.11 mm.

4. A series called metric was proposed in 1878 by Messrs. Muller & Schweizer, at Soleure. In this series the number of the screws increased progressively with the diameter in the reverse of the numeration adopted by the preceding series, and these numbers represented really the diameters of the screws, expressed in tenths and half-tenths of millimeters. The complete series included 21 screws ranging from No. 4 (diameter 0.4 mm.) to No. 20 (diameter 2 mm.), and including the screws bearing the numbers 4½, 5½, 6½ and 7½, which correspond to the variations of the diameters by half-tenths of a millimeter; that is to say, to the diameters 0.45 mm., 0.55 mm., 0.65 mm and 0.75 mm., the other numbers and diameters all corresponding to the numbers of tenths of millimeters.

The pitches of these screws range from 0.10 mm. to 0.50 mm.; they are equal exactly to a fourth of the corresponding diameter. The depth of the thread is equal to eight-tenths of the pitch.

This information completes that given in Professor Thury's pamphlet, "Systematics of the Horological Screws," p. 8, table III.

5. Progress Series.—The preceding series have entailed some difficulties in application. These difficulties may on one hand relate to cases on which following the purpose of the screw it might be useful to provide for the same diameter screws with threads presenting different degrees of closeness (screws with close and screws with open threads), and, on the other hand, with cases in which it would appear advantages to have screws of the same pitch of two consecutive numbers.

With the idea of avoiding these inconveniences the firm of Picard has been led to have made screws of metric dimensions, forming a series entitled "progress series," in which the pitch is made to conform to three types, the one a quarter of the diameter, others a fifth and still others two-sevenths. These dimensions are likewise utilized by the house of Miller & Co., of Soleure.

In this series the same pitch has been preserved for the screws bearing the whole numbers and those bearing the half numbers that follow them.

The screws are divided in the following manner: For screws of a diameter of 4 to 15 tenths of a millimeter there is but a single series of equal pitches, respectively, a quarter of the corresponding diameters.

For screws included between the diameters of 10 to 20 tenths of a millimeter two series of pitches have been adopted, the one known as equal close pitch, of one-fifth the diameter, and the other known as equal wide pitch, of two-sevenths of this diameter. There are in consequence three series of pitches: Ordinary pitch, close pitch and wide pitch for the six screws included between the diameters of 10 to 15 tenths of a millimeter, inclusive.

For all these screws the shape of the thread is determined by the condition that the depths equal to eight-tenths of the pitch, with rounded angles. According to the rules established by Thury the radius of the rounding should be one-sixth of the pitch for the exterior radius and one-fifth for the interior, but these rules could not be strictly observed, and the depth of the thread is thus often found to be equal to 70 only, or even to 65 centimeters.

The dimensions which have just been indicated correspond to an angle of inclination of the thread of about 47 degrees in place of 60 degrees, which would give to the inclination of the thread the profile of an equilateral triangle. The threads adopted are consequently much sharper than those of this last form and are even sharper than the Withwork thread, which has an angle of 55 degrees.

6. New series proposed as international. The experience acquired by the house of Picard in the trade in horological screws has finally led them to propose, for the purpose of the more readily attaining the standardization of manufacture, to apply systematically to these small screws an arrangement analogous to that which was accepted on the proposition of the Society of Encouragement for the National Industry as far as concerns the screws known as mechanical and the screws of small diameter used in the electrical industries in the workshops of objects of precision; screws that we may designate, for the sake of abbreviation, screws used in small mechanics.

The following solution has been finally arrived at by the commission appointed by the society of encouragement.

The admitted principle for this solution consists, while preserving the simple rules already adopted for the series known as metric as far as relates to the method of numbering of the screws and the relation of fourths between the pitches and diameters, in choosing for ordinary screws simple diameters varying in half-tenths of millimeters from 0.4 mm. to 1 mm., inclusive, then by tenths of a millimeter from 1 to 2 mm., and in adopting the same pitch for two consecutive screws, so that a worn screw or one which has become loose may be replaced by a screw of the next higher diameter, making use in new work only of the screw of smallest diameter in each pitch. The screws, as we have stated, are always designated by numbers, representing their diameter expressed in tenths of millimeters.

For the choice of pitch to be adopted M. Picard makes it obligatory to take the pitch that most nearly approaches the mean of those of corresponding screws employed in the ordinary series enumerated above.

(THE END.)

There is one 7-jewel watch that is sold only by retail Jewelers at restricted retail prices and is so advertised to the public that a large trade which the Jeweler controls is being built up.

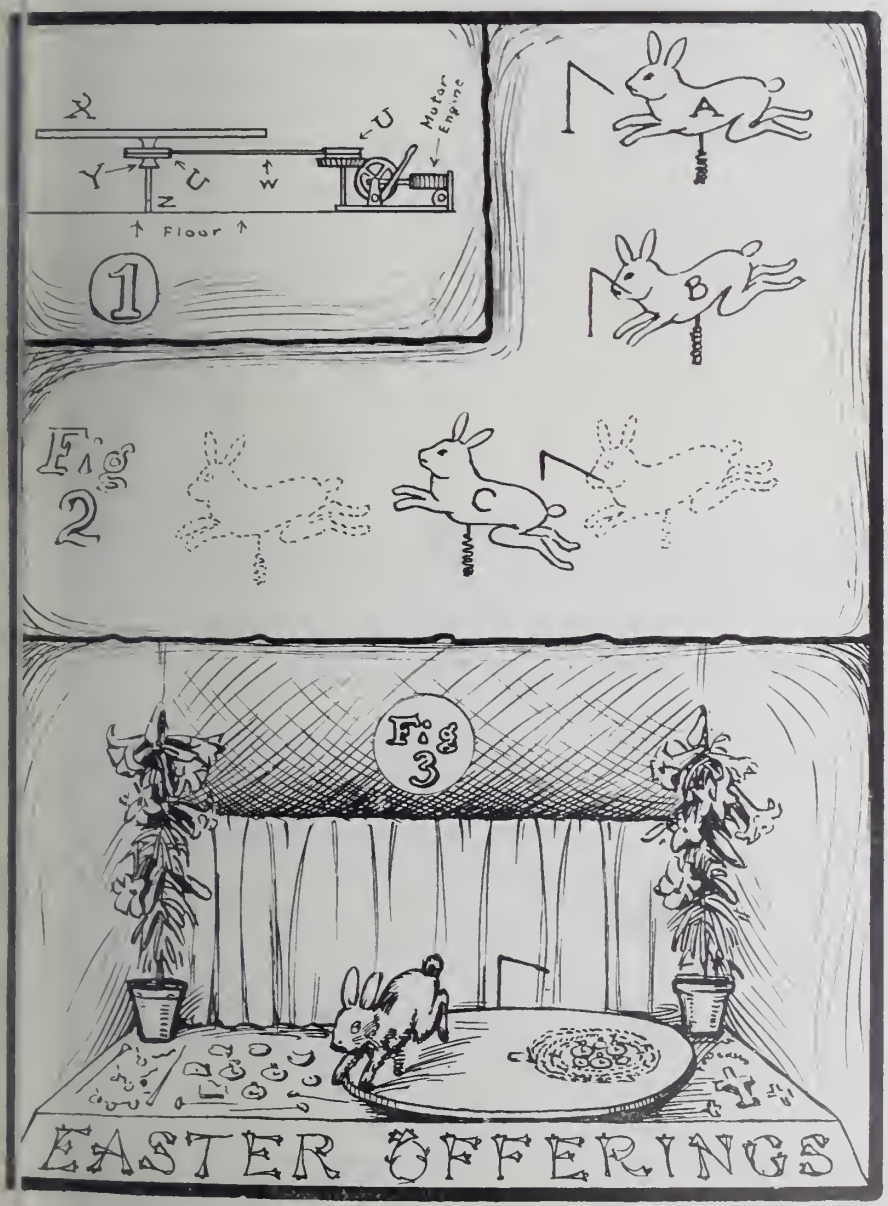
STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Displays for this Year's Early Easter Season.



Designed expressly for The Jewelers' Circular-Weekly.

TAKE a toy rabbit and mount it on a spring on your small moving platform near the front. How to construct this platform has been explained in detail in former issues, but is briefly repeated here. On the small rod, Z, fit a spool, Y, to which has been nailed a rounded platform, X. A barrel top will answer nicely. By means of a pulley, U, connect this with power, W, electric motor or clockwork being available according to the weight to be carried.

At the opposite end of the platform build a nest of entwined watch chains and place therein small watches, as eggs.

At the rear of your window affix a stout wire in such a manner that the rabbit's head will graze it in passing—that is, as the platform revolves. This will cause the rabbit to sway gently and will make the rabbit appear to be scurrying away from the nest of eggs. Fig. 2 shows the rabbit in various positions, A, B and C. The dotted outlines at C show the movements better.

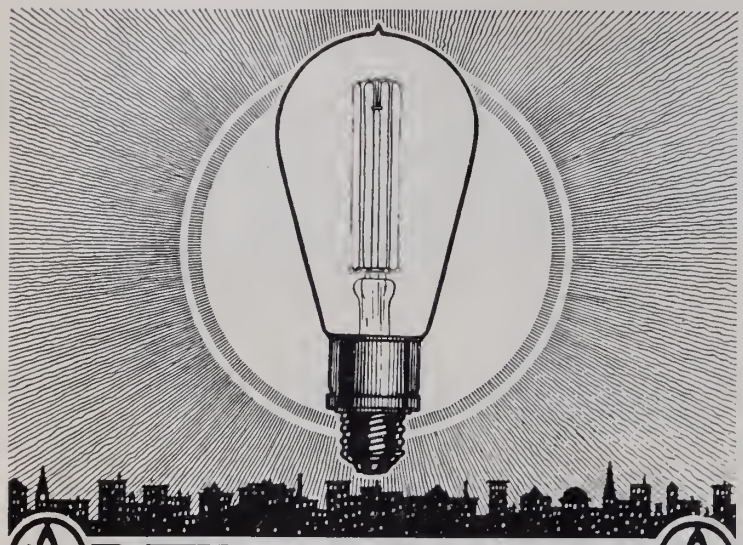
The sign in front of the base, which is built up to conceal the "workings" of the revolving platform can be of decorative design. A lily would be appropriate and two potted lilies in the corners of the window will add to its effectiveness. A display of this kind should not be too much crowded with goods. A select line suitable for the season would be best.

HOW TO CONSTRUCT A TIMELY AND ATTRACTIVE MECHANICAL EASTER DISPLAY.

Another Attractive Window.

(*Illustrated on page* 119.)

The colors for Easter are purple and white, so we will use the purple for our background curtain and for the velvet platform. The ribbons, rabbits, bell and flowers will be white.



The rabbits are made of papier-maché, ribbons and flowers of crêpe paper and the bell of moss paper. The bell, bunnies and flowers can be bought ready made. The ribbons will be cut from the long sheets of crêpe paper. All these things are very inexpensive.

If one wants to be original, jonquils can be used in place of lilies, as one large manufacturer is going to make up these for this season. The jonquil being distinctively an early Spring flower is very appropriate for an Easter window display.

The nest centerpiece is made from a willowwork basket, lined with straw. In this can be placed vari-colored Easter eggs. "Bunny," according to the popular superstition, being responsible for these.

The stock display can be made up of things appropriate to the season, as candelabra, crosses, rosaries, silverware, toilet articles, etc. It is also desirable to feature pearl jewelry.

W. E. Palmer, who has been for 22 years with the A. G. Page Co., Bath, Me., has taken a position with C. A. Harriman, of the same city.

The Sun's Only Rival

The light from G. E. MAZDA Lamps is the nearest approach to sunlight of any electric incandescent. By this light diamonds and precious stones scintillate and sparkle as they do in sunlight, and all details of construction and finish are brought out with striking accuracy and distinctness.

Colors and color tones show up in their true relative values. You readily appreciate the necessity of displaying fine goods in a fine light. With

MAZDA Lamps

replacing your present old style filament lamps, you can flood your store with nearly ***three times its present amount of light*** without adding one cent to your bills for current consumption.

A 16-candlepower electric lamp of the type commonly in use and the 48-candlepower G. E. MAZDA Lamps require approximately the ***same amount*** of electric current.

In other words, you can replace a 16-candlepower electric bulb with a 48-candlepower G. E. MAZDA Lamp without making any appreciable difference in the amount of current consumption.

Your lighting company will be pleased to demonstrate and supply these lamps, which mark the greatest advance in electric lighting since Edison's invention.

Get them to-day and let the year's business for 1910 prove to you that "BRILLIANCY BRINGS BUSINESS."

General Electric Company

Schenectady, N. Y.

A Booklet—No Brag—No Buncombe—Just Horse Sense and Lots of It

Get It, Read It, and, Like the Leisurely Cow, Di[g] It Thoroughly

A very conservative production is the booklet re[cently] issued by me, also a very strange publication for an auct[ioneer] for the reason that I say comparatively nothing about [myself] or my achievements. It is entitled "He that Knows and K[nows] That He Knows Is a Wise Man—Follow Him."

It would be well if every jeweler who ever had—or [now] contemplates—a sale would secure a copy of it. It is [an] structive little work from cover to cover. Almost ever[y] of its pages will enlighten you on some misunderstoo[d] unknown point. The personal element (that is, the refe[rence] to myself) is inconspicuous and secondary.

The booklet, primarily, was designed to convey to [you] facts about which you know little or nothing. Some o[f the] abuses of the business—ABUSES THAT YOU OUGHT TO KNOW ABOUT TO PROTECT YOURSELF AGAIN[ST]—are discussed in unadulterated style. There are some i[n]nating details, too, about the way an auction sale shou[ld] conducted. They may conflict with what you think or [have] been told on this particular point. If they do, just remember that the opinions and suggestions in this little treatise [rep]resent about 22 YEARS OF STUDIOUS APPLICATION TO THE BUSINESS AND THAT INTELLIGENCE, CONCENTRATED THOUGHT AND SYSTEMATIC STUDY play very important parts in the compilation of the a[uc]suggestions and caution therein set forth.

This booklet may be had for the asking. You will [find] it quite different in many ways from the literature alon[g the] same line that you have been getting. And don't forget [that] its purpose is to tell you a good many things you don't [know] and more about some things you already know. It will at [least] give you the ear marks whereby a conservative and bus[iness] like auctioneer may be recognized.

P. S.—We are now closing out the stock of H. A. H[ersh]berger, of Johnstown, Pa. We are giving Mr. Hershb[erger] some startling results. He had a sale some time ago [con]ducted by other auctioneers. The results were also sta[rtling] but in a different way. He likes to talk about the diffe[rence] and we are quite puffed up by the comparison he m[akes]. Write him about it.

H. J. HOOPER

37 Maiden Lane New York C[ity]

Hooper is New York's Undisputed Leadi[ng] Jewelry Auctioneer, and has an unpara[l]leled record for successful sales. There [is] a reason for this and you should know.

Storekeeping Department.

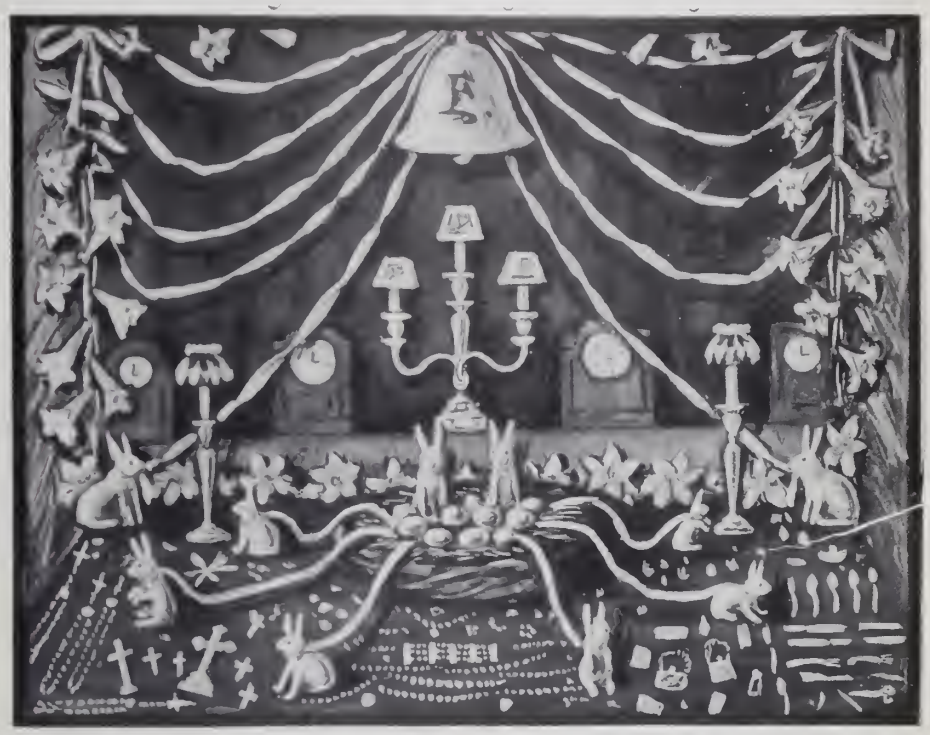
A Representative Store of Iowa.

WHAT is claimed to be the largest retail jewelry store in Iowa is illustrated below. The establishment, which is owned by the Lewis & Van Sickle Co., 619 Locust St., Des Moines, is 132 feet deep and 33 feet wide. The fixtures are of mahogany and plate glass and the store is illuminated by Tungsten lights, while the show cases are also lighted by concealed lights. The diamond room is situated at the right as one enters the main door of the store; on the left is the repair department.

The store is equipped with a large fireproof vault for the protection of stock and one of the finest manufacturing departments to be found in Chicago and Denver. Here is installed every modern device for the making of special order work and diamond mounting. The concern by enterprise, good window displays and judicious advertising has built up a prosperous business and is the largest organized jewelry firm for the national trade in O., making all the pins and emblems for this organization in the United States. The firm's recognition of the value of detail is exemplified in its stationery, which is unusually attractive. A fine quality of white stock is used and the letterhead is embossed and printed in blue. "A Pleasure to Show Goods," printed under the clock and dragon design, makes a pleasing slogan, and at once appeals to the reader. It puts him in a happy mood and makes him feel that he is not an intruder if he enters the establishment to inspect stock, even though he does not make a purchase.

J. W. Lore, Danville, Pa., expects to retire from the jewelry business and will take a trip to California with a view of locating in that section.

INTERIOR VIEW OF THE STORE OF LEWIS & VAN SICKLE CO., DES MOINES, IA.



Foresight a Money Saver for Inventors.

THE Patent Office is the one department of government which actually yields a profit—something more than $80,000 for the last fiscal year, during which the fees amounted to $1,887,000. While it would seem increasingly difficult to invent something which has not already been invented and patented, the records show 62,000 applications for mechanical appliances on which 35,000 patents were issued.

Inasmuch as the last year shows an increase of 4,000 applications, it is evident that invention, instead of growing less, is, on the contrary, steadily increasing, and while many patents are secured on which the inventors realize little or nothing, yet fortunes are now and will continue to be made from new and practical ideas.

In most cases the cause of failure to realize expectations will be found in the natural tendency of an inventor to magnify the possibilities and minimize the difficulties of selling his invention. While an occasional find is made by someone working along a line in which he is poorly informed, hundreds waste time and money developing some device which when finished proves to be either old or without demand.

If the inventor would have his attorney make a search of the records before instead of after completing his invention, he would save money and be able to work out his ideas along lines different from those already protected by patents.—*Popular Mechanics.*

ANOTHER EASTER DISPLAY WITH AN ECCLESIASTICAL TONE.

Selling Schemes.

S. JOSEPH & SONS and the Frank Schlampp Co., Des Moines, Ia., have each presented to the Newspaper Women's Club at that place a dozen sterling silver spoons.

A musicale was given recently in the jewelry store of Hal. B. Smith & Co., Logansport, Ind. Both classical and popular melodies were played.

A concern not in the jewelry trade distributes a copy of a popular song with every purchase. The song bears the name of the firm and has been found to be efficient advertising.

M. N. Gwinn, New Richmond, W. Va., moved recently to Meadow Creek, W. Va.

D. Raskin & Bros. have just opened a new jewelry and optical store at 25 Market St., Brownsville, Pa.

Planning an Advertising Campaign.

From *Practical Publicity*,* by Truman A. DeWeese.

(*Continued from issue of Feb.* 2.)

BEFORE inaugurating an advertising campaign the director of the advertising will naturally post himself thoroughly on all trade conditions. He will want to learn from jewelers just what sort of a watch is wanted by the public and just what are the strongest selling points about this particular watch. It will then be possible to plan intelligently an advertising campaign that will be best calculated to create a demand on the dealer for this particular watch. This plan for the first year should present a combination of general publicity in the national mediums and local publicity in the towns where dealers have been induced to lay in a stock of the watches. The local advertising in the newspapers should always carry the name of the local dealer who handles the watch.

General publicity will not answer for the introduction of a new product. There must be a combination of general and local publicity planned with reference to the work of the selling organization. It would be absurd to spend money to advertise in a city where the selling organization has not made arrangements for handling the goods. The advertising campaign and the selling plan must go hand in hand.

So much for reaching the consumer. The manufacturer, however, cannot afford to neglect those mediums which reach the jeweler through the channels of his own trade interest. The jeweler must be reached through his own trade paper, a paper that is devoted entirely to the watch and jewelry trade.

In preparing copy for such a campaign the same principles of publicity apply to the preparation of copy for this product as those which apply to the advertising of every other commodity that is susceptible of universal use. The first thing to do after deciding upon the general plan and the appropriation is to ascertain the "selling points" of the watch.

What are the points about a watch that appeal to the public? What is the principal use of a watch? Clearly it has but one important function—"to tell the time of day." It is fair to assume, therefore, that a very large percentage of the possible purchasers will buy watches because of this particular function. They have only one idea about a watch—its ability to register time. If they buy watches it is natural to assume that they want accurate timekeepers. A watch that did not keep time accurately would be of no use to them. The transactions and appointments of the business and professional world rest upon accurate time-keeping. The industrial world moves by the clock. A watch is supposed to measure the hours that cover the wide range of man's activities.

It is very obvious, therefore, that the strongest selling point for the advertiser to work upon is the accuracy of the watch as a time-keeper. The advertiser can ring the changes on this point in a way that will gradually impress the public with the idea that this is the one watch that can be depended upon in every emergency of life and he can give some of the reasons for it. He should use the "bull's-eye" method to drive this selling point home. The accuracy of the watch as a time-keeper is the first and most important point to be exploited by the man who writes the copy and originates the advertising campaign.

So much for the purchasing class that buys a watch to keep time. But there are other reasons for buying a watch—other "selling points." The advertiser cannot afford to neglect the class that thinks of a watch as a means of personal adornment—the people who regard a watch as "jewelry"—who think of a watch only as something "to wear." To appeal to this class the skill of the artist must be drawn upon. To these the advertiser must appeal in picture as well as in copy; for these the watch must be a work of art—a jeweled product of the highest craftmanship—fit to bestow upon a person as a reward for industry, a gift for signal achievement, a testimonial of birthday remembrance, a present that reflects not only the loving regard but the good taste of the giver.

An accurate time-keeper for the man or woman of affairs, a chaste and refined expression of the giver's token of esteem or remembrance, a choice piece of jewelry for personal adornment—here is abundant material for the man who is to devise a series of advertisements that will be calculated to create a popular demand for this watch without going into those watch-making details that are interesting only to the watchsmith.

(THE END.)

*Copyrighted, 1906, by Truman A. DeWeese. Copyrighted, 1908, by Geo. W. Jacobs & Co.

Ray W. Bayley has bought an interest in the business of W. H. Becken, Beaver Dam, Wis., and after March 1 the business will be conducted uner the name of Becken & Bayley. Mr. Becken will retire from active work, and the business will be in charge of Mr. Bayley, who has been engraver and watchmaker for the firm for the past five years.

Retail Advertising Department.

Advertising Folly.

(From *The Haberdasher*)

In the course of human events it is but natural that some grievous errors will ide. One of the greatest of these is to a very definite line between profes- and business. Very few of us would d a philosopher as a man with business- houghts. For this very reason some e most beneficial teachings of these g go neglected in the business world. among those who overlook these les- are numbered the illiterate and the ted business men as well. "You can ome of the people all of the time, and the people some of the time, but you fool all of the people all of the time." a' you ever thought of this old adage ning from the lips of an unbusiness- man?

Probably it's because so many fail to and reason this out that they make costly mistake of attempting to fool all e people all of the time. Our modern aper is one form in which many at- to fool the public the entire time. h show window often is another expo- of this erroneous doctrine. In fact, t -day advertising will eventually run into a noose if the prevalent style of tising spreads among the entire busi- world. Do not misunderstand. It is eant that all advertising points to this erably disastrous end. It doesn't. It ly seems to be the tendency.

us pick up a daily paper. We see that k & Co are advertising $1 articles for nts. Smith's shop has cut all prices lf. Jones Bros. are having a "Harvest a" Jackson's are advertising, during Autumn months, special prices on me- -weight undersuits. Isn't it ridiculous? w, what is the natural influence of "ads" on the human mind? You read one evening and are thoroughly im- ed with their reliability and truth. But after you've picked up the paper day nd day out, and always see that these erns are giving you something for ing, what is the natural conclusion? become—and rightfully, too—extremely tical and suspicious. And yet this is style of advertising which, among the um-class merchants and the department s, preponderates.

here is one man in town who at least 10 times each year advertises a "Retiring Sa " At the first of these he did unload eat deal of old stock. The next sale, e not so successful as the first, never- ss yielded him an opportunity of get- rid of some undesirable goods. But when people with the smallest iota of ligence pass his place of business, see posters telling of his quarterly "Retiring Sa," they merely look at the sign, silently er, lose some more respect for the rietor, and walk on. He tried to fool l he people too often, and they became e." The germs of suspicion spread kly, and the people were spoiled forever ustomers.

When times are dull, then does this set of chants advertise to their heart's content. Not a day passes but that they give the public something to which they are not entitled; and the public, eventually realizing that they are really being imposed upon, get up in arms and strive to maintain their dignity, their self-respect and their independence by paying the right prices for the right articles. And then woe be unto these merchants!

To quote another example. There is a man in town who each week advertises a different kind of a sale. One week it's an "Employes' Sale," the next it's a "Buyer's Sale," and each week he gives the people something for nothing, and each week he loses trade as suspicion spreads.

A suspicious person is the worst detriment to the universe. He's good in only one way—he can't be taken advantage of easily; but he's ruined in a hundred other respects. He's suspicious of his honest fellow man; he questions the best of motives; he's the straight and honorable business man's most effective and most feared enemy.

So remember, apart from the moral and the esthetic side, apart from the psychological standpoint, it's an utter impossibility to fool "all the people all of the time."

Pulling Power of Pictures.

(From the *Advertising World.*)

ILLUSTRATED advertising, or in other words the use of eye-catching pictures in conjunction with text matter to draw trade, is found to be so very profitable that more than 90 per cent. of all newspaper and magazine advertisements contain a cut of the advertised article or a picture pertaining to its usefulness.

All the large national advertisers (with but few exceptions) never place an advertisement without an appropriate engraving. The picture takes the place of the salesman on the road. The latter must describe the article, its usefulness, durability and cost, etc., which means travel, hotel bills, dinners and time, all of which costs good cold cash. If care is taken in its preparation, an illustration can be made that will take the drummer's place and show to advantage the articles to be sold.

Pictures are important and care should be taken that every selling argument is taken advantage of and pictured in a clear cut and convincing manner. Make your cuts talk, make them tell something that gives an idea as to the value of your goods.

So many advertisers get the idea that just so it's a picture anything will do and shove it into their space, or buy stock cuts because they are cheap and run them in with their copy. Not long ago I was looking through a local paper and found a bakery and a plumbing establishment using the same illustration in their advertisements. It's a long step between sewer pipe and doughnuts and as the old adage goes, "What's one man's bread is another man's poison," surely applies in this case.

See the beautiful anniversary number, issued Feb. 2, for suggestions for jewelry displays for Washington's Birthday, Feb. 22.

A Canine Press Agent Handsomely Rewarded.

THE bright little canine portrayed below and who was recently presented with a $15,000 diamond collar for services rendered as "press agent" and companion "en tour" of Arthur Wallenhorst, a jeweler of Baltimore, Md., is known as "Dixie" and, considering his years, is unusually spry and active.

All Baltimoreans who know Mr. Wallenhorst know the sincere affection that exists between "Dixie" and his master. Wherever the jeweler looms up you are sure to see the tiny bit of a dog hugging close to his heels. Mr. Wallenhorst has traveled extensively on this continent and in Europe, and "Dixie" has always accompanied him. When the little dog was approaching his

A JEWELER'S CANINE PRESS AGENT.

11th year, recently, the jeweler racked his brain for some testimonial dear to dog nature, and it was finally decided that he should have another collar, and one that would be far above anything worn by the average dog. The result was a magnificent diamond collar fashioned with the greatest of care and containing about 700 select diamonds of graded sizes, valued at $15,000.

The design was made as unique as possible. The stones vary in size from the main center stone in the pendant worth $200, to others about one-sixth of a carat. The picture will give an idea of the design. The part of the collar that rests on the back of the neck narrows down to a single string of diamonds, each set singly and securely to prevent the loss of any stones. On his birthday, when the collar was presented, "Dixie" was given a banquet at Kelley's Hotel, on S. Gay St., near Mr. Wallenhorst's store. The little black-and-tan had the place of honor and showed his good breeding and manners as he partook of a portion of each course. At the end of the banquet "Dixie" was called on to sing, and as no particular selection was called for he responded in his own way, seated on his hind legs with his head straight in the air.

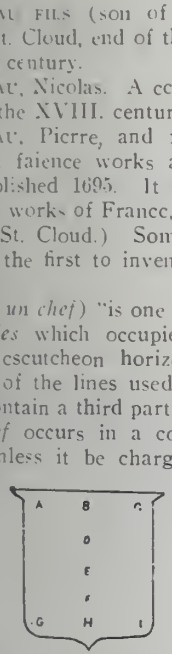
Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(Continued from issue of Feb. 2.)



CHIAVENNA, Giacomo. A gem worker of ...dena, 1621

CHICANNEAU FILS (son of Pierre). A ...amist at St. Cloud, end of the XVII. and ...ly XVIII. century.

CHICANNEAU, Nicolas. A ceramic painter ...Rouen in the XVIII. century.

CHICANNEAU, Picrre, and family. Pro...etors of a faience works at St. Cloud, ...ance, established 1695. It was the firs: ...t porcelain works of France, says Jacque...rt. (See St. Cloud.) Some claim *Chi...neau* was the first to invent soft porce...n.

CHIEF (Fr *un chef*) "is one of the *honor...ble ordinaries* which occupies the upper ...rt of the escutcheon horizontally by a ...in or any of the lines used in heraldry. ...d should contain a third part of the shield. ...hen a *chief* occurs in a coat it is last ...entioned, unless it be charged with any

POINTS OF THE HERALDIC SHIELD.

...aring. Charges placed on the upper part ...the shield are termed *in chief.*"—Robson. ...he *chief* occupies the upper third part of ...shield."—Milbourn. In the division of ...*points of the shield*, the letters A B C ...present the *chief*. (See cut.)

CHIKARA, Mori. Japanese potter at Mika...ji.

CHIMERA, The. A monster having a lion's ...ad and breast, a goat's body and a ...agon's tail. It vomited fire. A goat's ...ad also appears behind the lion's neck at ...es.

CHIN. The Chinese "pearl." One of the ...ight Ordinary Symbols" seen on porce...ns. (See *pearl.*)

CHINA (Fr., porcelain; Ger., porzellan) ...formed of paste which is translucid, ...ereas the paste of pottery is always ...aque."—Marryatt. (See *porcelain.*)

CHINA CLAY (kaolin). The purest white ...y used in the manufacture of porcelain ...d light-colored earthen ware. It is a ...drated silicate of alumina. In England it is often called Cornish clay, being most prevalent in Cornwall and Devon counties.

CHINA STONE (called also Cornish stone, to which refer). Weathered *pegmatite* used in English cream-colored porcelain and stone ware bodies to give hardness and a vitreous nature to the fired substance.

CHING-HWA PERIOD (1465-1488). This was supposed to be the second best Ming porcelain period, and this Ming mark is the most generally found on extant pieces. The Ming color is green.

CHING-TIH PERIOD (1506-1522). This period may be represented solely by the Warham bowl. Chinese history speaks of a superior blue known under the term "Mohammedan" introduced in this period. Also there is mention of an improved red being produced. Yellow glaze was probably usual.

CHIN-TSUNG. Emperor of China, 1004-1007 (Sung Dynasty). He founded a royal porcelain factory at King-te-chin. Ordered that all vases produced for his palace must be marked at the foot "King-te Nien Chi," the name of his period. Pottery had been made there many years. (See *Dynasties.*)

CHING-TUNG period, in Chinese history, dates from 1436 to 1450. It belongs to the Ming Dynasty (1368-1644). Its color is green. (See *Ming Dynasty.*)

CHIPAULT, Jean. Pottery ceramist at Paris, end of the XVI. century.

CHITON. "The underskirt worn by the Greeks, corresponding to the Roman *tunica*. Two kinds were commonly distinguished, the short Doric *chiton* of wool (see cut) and the long Ionic tunic of linen which was worn at Athens down to the time of Pericles. The *chiton* consisted of an oblong piece of cloth, wrapped round the body. One arm was passed through a hole in the closed side, while the two corners were joined together by a clasp on the shoulder. The garment, which thus hung down open on one side, was fastened together at both corners, or sometimes sewn together below the hips. At the waist it was confined by a belt. In course of time short sleeves were added to the arm-holes. Sleeves reaching to the wrists were by the Greeks regarded as effeminate, but they were worn by the Phrygians and Medians, and often appear on monuments as part of the dress of Orientals. The *chiton* worn on both shoulders was distinctive of free men. Workmen, sailors and slaves wore a *chiton* with one arm-hole only for the left arm, while the right arm and right breast were left uncovered. This was called *exomis.*

CHITON.

(See also *chlamys, himation, tribon, Doric dress, Ionic dress,* etc.)

CHIU-KO-KARATSU (Japanese). Karatsu ware made between the years A. D. 1600-1654. The term means "middle old Karatsu" and is used to distinguish it from the earliest and the latest produced. The latter is known as *Karatsu yaki*, and the earliest is called *Ko-Karatsu* ("old Karatsu").

CHIUSA. "A finely crackled Japanese ware, well known in foreign markets, dates from about A. D. 1592, when the Prince of Satsuma, Shimadsu Yoshihisa, a general of the Japanese army, invading Corea, brought home with him a certain number of porcelain makers with their families, who settled first at Kagoshima and afterward at *Chiusa*, in the province of Osumi, where they made the ware known as Ko-chiusa. Afterward they moved to Nawashirogawa, near Kagoshima, and after many experiments succeeded in producing the ware now known as Satsuma."—Franks.

CHLAMYS. A garment worn by the males in ancient Greece. It was a "cloak used for riding or traveling. It is considered to be of Macedonian origin. * * * It was probably brought into Greece from the North by the Dorian invaders when they came down, and in its origin may have been no different from the Homeric *chlaina*. In classical times it was always worn over the short *chiton* by travelers and riders, and was a characteristic dress of the *Ephebi*. * * * Like the *himation*, it consisted of

rectangular piece of material, but was of slightly different shape, being rather more oblong; in fact, doubled it would form an almost perfect square. Its normal dimensions would be about six to seven feet long by 3½ feet wide. In putting it on, the wearer would double it around him and

CHLAMYS DESIGN, BY ABRAHAMS.

and inside it, so that the middle line came along the back of the left arm and shoulder; he would then fasten the two sides together with a brooch on the right shoulder, close to the neck, at the points *e* and *f* in the accompanying diagram; the corners *d* and *b* would hang down in front and behind, respectively, at a distance of about one foot from the ground, and the corners *a* and *c* would hang down together along the right side; the left arm, which held the reins in riding, would thus be covered, while the right would be free to

EPHEBOS IN CHLAMYS AND PETASOS. FROM ANCIENT GREEK POTTERY.

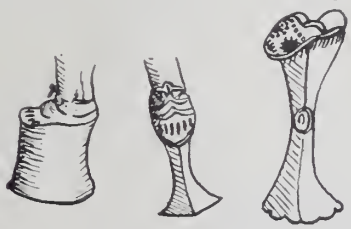
hold spear or whip. The left could easily be freed also by swinging the cloak around so that the brooch came under the chin instead of on the shoulder; the two corners *a* and *c* could be then thrown back over the arms. The *chlamys* is frequently represented in art worn in this way, especially in cases where the wearer is occupied in vigorous action."—Abraham.

CHOISY-LE-ROI (France). A hard porcelain factory was established here "by a Sieur Clement; this establishment belonged, in 1786, to M. Lefevre; we do not know its works."—Jacquemart.

CHOJI (Jap.). On Japanese ware the *choji*, or clove, in conventionalized form is a favorite *motif*. The *choji* is one of the emblems in the *Takara-mono*, or Precious Things. The clove is used in Japan as a purifier and as a "perfume. The spice is

CHOJI.

placed in water in the upper part of a *chojiburo* (to which refer), in the lower compartment of which lighted charcoal is thrown. The significance of the *choji* as an emblem is twofold—as a perfume and as a safeguard from noxious vapors."—Bowes.



CHOJIBURO (Jap.). The Japanese incense burner.

CHOJIRO. A Japanese potter, creator of Raku ware, at Juraku, district of Kioto. He was the son of the Corean potter Ameya, who introduced this ware in the XVI. century. Taiko Hideyoshi honored him with a gold seal on which was engraved the character "Raku," signifying "enjoyment." Hence the ware was named *Raku yaki* (Raku ware). He died 1574.

CHOJIRO, Tanaka. Son of the first Chojiro. He followed his father's trade and his descendant of the 11th generation now carries on the business of making *Raku* ware. The second Chojiro, having lost the gold seal given his father by Taiko, his descendants have since used their own.

CHO-NIU. A Japanese Raku ware potter, descendant of the first Chojiro and Ameya, the original creators. Lived middle of the XVIII. century.

CHOPINE, *Chapiney*. "A sort of stilt, clog or false heel, imported from Turkey into

CHOPINES.

Italy, and from Venice into England."—Planché.

CHORAGIC MONUMENTS. "The small monuments to which we apply this term originated in the time of Pericles, who built an Odeon at Athens for musical contests, not of single persons, but of choruses. The richest and most respectable man was chosen from the 10 Athenian tribes as *choragus*, to make the necessary arrangements, in return for which distinction he had to defray the expenses. If his chorus were victorious he had also the right of placing upon a monument erected at his own cost the tripod which was given as a prize. The rich citizens whose choruses conquered in these contests displayed great splendor in their monuments, which were so numerous that at Athens there was a street formed entirely of them, called the 'Street of Tripods.'"—Fairholt. The *choragic monument* of Lysicrates, at Athens, is called the finest piece of architecture of the Corinthian order known.

CHOSEN KARATSU (Corean Karatsu). Japanese pottery made of a clay imported from Corea is so called. It is very light and is used largely in the "tea ceremonies" (*Cha-no-yu*).

CHOZAYEMON. Japanese originator of the Ohi ware. He started the kiln at Ohi-machi in the province of Kaga, 1680. (See *Ohi ware.*)

CHRISMAL. Same as *chrismatory.*

CHRISMARIUM. The chrismatory vessel holding the consecrated oil. (See *chrismatory*).

CHRISMATORY (called also creme box, oynting box, oile box). "A case to hold the holy oils and chrism. 1. The Oleum Cathecumenorum. 2. Oleum Infirmorum. 3. Sanctorum Chrisma; and it is from this last that the case derives its name. These oils are solemnly blessed on Holy Thursday. The first is used for baptism, and the consecration of altars and bells; the second for the sick and for bells; the third for the sacraments of baptism and confirmation and the consecration of bishops, priests, churches, altars, bells and chalices. There are two sorts of *chrismatories*—the one small and portable, for the visitation of the sick, etc., the other large, for the reservation of the holy oils in the sacristy."—Pugin.

"1. The vessel made to hold the consecrated oil (see *labarum*). 2. A vessel for the reservation of the consecrated host. 3. A cloth used to cover relics."—Mollett.

CHRIST, CROSS OF. "Same as cross *Calvary* or cross of the *Passion.*"—Robson.

CHRISTIAN period in art, 500 A. D. to 1,000 A. D.

CHRISTIAN PORCELAIN. Upon the expulsion of the Portuguese from Japan the Japanese Government started an anti-Christian persecution that ended in the massacreing of 40,000 converts. A peculiar kind of ware, probably made by the Chinese for these persecuted Japanese Christians, has left numerous specimens which are known as *Christian porcelain.*

CHRYSANTHEMO-PAEONIAN FAMILY. A term used by Jacquemart to denote a ceramic ware characterized "by the predominance of chrysanthemums and peonies which invade the ground, overcharge the medallions and even appear in relief in the appendages of the vases. A particular coloration, simple and grand, brings out the ornamental effect of these decorative elements. A grayish or blackish blue, an iron red more or less bright, and a soft, dead gold balance each other in nearly equal masses; in some cases copper green and black unite to the fundamental tints and constitute the class which may be called 'rich Paeonian.' It was the more necessary to create a name for this family, inasmuch as it contains the products of China and Japan, confounded by empiricism under the false denomination of Japan porcelain."—*Jacquemart.*

The Avoidance of "Getting into a Rut"

There is such a thing as "getting into a rut" in business, as well as upon the high road of travel.

You—the Manufacturing Jeweler or Silversmith—for instance, have just received the return of the values recovered from your waste by the refiner with whom you have always dealt.

You have taken these returns as a matter of course, and have given the matter no further thought.

Suppose, however, you consider the percentage of return in its relation to the amount of metal you consume?

Do this, and you will arrive at a point at which we think we can interest you.

Office: 22 Pine St. New York City

Plant: 202 John St. Bridgeport, Conn.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2417.—**Non-Ferrous Metals and Alloys.**—*I am interested in metals and alloys used for making jewelry and similar articles and would be pleased to have you publish a table giving fusing and melting points.* *M. T.*

ANSWER:—As most persons know, metals have certain melting points or fusing points at temperature, at which state of heat they pass from a solid or frozen condition into a fluid or liquid condition, and unless that or a greater heat is present the metal remains solid or frozen. At a lower temperature both metals and alloys will absorb oxygen more or less freely, and burn away without melting, oxide being formed; but such a method of reducing the metals has no general value unless very carefully controlled, and then on certain metals which have a commercial value when thus reduced. Metals or alloys having melting points up to 1,000° F. can be melted in an open iron kettle pot, provided they be covered with granulated charcoal to prevent oxidization. In some cases the pot is coated inside with a mixture of plumbago and china clay, which is applied as a thick cream and dried before using the pot or kettle for melting purposes. Metals or alloys having a melting point above 1,000° F. must usually be melted in crucibles fired in a proper furnace. All metals vary in the exact degree of heat which is needed to melt them, in some cases a little more or less being required, according to the impurities which may be in the particular sample of metal that is treated. Whatever the exact melting point may be, it must be remembered that whatever the weight of the metal—whether ounces or tons—it will not melt below the required heat, and on this point a good many false promises are made. In fact, fine wire gauze and some other forms of metal will not melt at all unless immersed in a bath of molten metal, as the heat is carried away too quickly, while under certain conditions foils simply reduce to oxides only. In any case, solid metals melt better than light stuff, although a longer time may be needed to perform the work. Approximately, the fusing points of commercial metals are given below, it being well to estimate that for brass of a high character nearly as great a heat as that for gun metal will be necessary, this alloy being one of the most variable made, so far as contents are concerned.

	Deg. F.		Deg. F.
Magnesium	455	Gun metal	1,900
Tin	463	Copper (cast)	2,000
Bismuth	509	Gold	2,160
Cadmium	608	Nickel	2,569
Zinc	779	Manganese	3,000
Aluminum	1,242	Tantalum	4,162
Brass (cast)	1,650	Platinum	4,712
Silver	1,830		

Anything requiring over 3,000° F. cannot be melted with carbon as a heating medium, and pure manganese is difficult to handle by itself, but when alloyed with iron and supplied as ferro-manganese with up to 80-85 per cent. of manganese, it can be readily dealt with. Tantalum and platinum must be melted in an oxyhydrogen or electric furnace. Platinum crucibles are often used, for, owing to the refractory character of this metal, it stands the heat required for ordinary metals, but as it costs roughly about $25 per ounce, it is only used for laboratory work as a general rule. In all melting operations time is an element which has to be considered, the metal not immediately melting, but having to absorb the heat until a sufficiently high temperature is obtained. After this most metals begin to melt with some rapidity. Aluminum is rather an exception, however, as this particular metal usually hangs until the whole is at the fusing point, and then it drops suddenly, and in a few minutes is at the right temperature for pouring. Copper, brass, iron and other metals melt as soon as the melting point is reached in any part, or, as the melters call it, "bleeding" down. In a bath of molten tin copper breaks up and melts at some point between 500° F. and 600° F., but this is an item that is only useful in making gun metal alloys, etc.

Solution for Depositing Yellow Gold.

FOR the electrodeposition of yellow gold or the Roman shade, the formula of Roseleur is widely used. It is the one generally employed for ormolu work and is quite satisfactory. To-day, it is used without change in the original formula, although Roseleur employed it in 1846. The solution is made as follows:

Water	1	gallon
Phosphate of soda	8	oz.
Bi-sulphite of soda	1¼	oz.
Potassium cyanide	⅛	oz.
Gold	2½	pennyweights

The gold is "cut" with aqua-regia in the usual manner and made into chloride before adding to the solution.

The solution is used warm at a temperature of from 120 to 150° F. A platinum anode is preferably used and it is held in the hand while gilding. If the anode is allowed to dip but slightly into the solution a pale color is produced. If immersed a greater amount, a yellow shade is formed, while a full immersion gives a redder tone. The work intended to be gilded is usually moved about while it is in the solution.

The production of a yellow or Roman color on articles needs some care in order to obtain the desired shade. Let it be said that a yellow color cannot be obtained directly on copper or bronze unless a large amount of gold is put on. The copper red causes a red shade on the deposit. To obtain a rich, yellow color, the gold deposit should be put on brass of as near the color of the gold as it is possible to obtain.—*The Brass World.*

German Silver.

ALTHOUGH the proportion of copper in this alloy is considerably greater than that of nickel, watchmakers frequently apply the latter name to it, doubtless on account of the beautiful polish of which the metal is susceptible and the comparative oxidizability which it derives from the presence of nickel.

German silver is an alloy of copper, nickel and zinc, with an occasional admixture of a small proportion of iron or tin. When used in objects that require soldering two per cent. of lead is added.

The alloy usually employed in horology is very malleable. It has a mean composition as follows: Copper, 60 per cent.; nickel, 20 per cent., and zinc, 20 per cent. That containing 58 per cent. copper, 14 per cent. nickel, 25 per cent. zinc and three per cent. iron is said to be highly elastic.

For the following useful details with regard to the employment of German silver for watch work we are indebted to C. E. Jacot:

"Watch movements have been made for the last 30 years; it was long thought that the taste would die out, but, on the other hand, the demand for "nickel" movements increases each year.

"German silver is only used for the plates, cocks and bars. The barrels and wheels are made of brass, and surfaces exposed to friction, such as the center pivot holes (all other holes are generally jeweled), are bushed with the same metal, for it is observed that in the presence of nickel oil is rapidly blackened and the pivots wear sooner than when working in good brass.

"The color remains unaltered for a long time if the surface has been carefully smoothed in the first instance; and if cleansed with soap and water its original freshness can be to a great extent restored. Some jobbers employ chemical preparations for cleaning the metal.

"The following is recommended as very effective for this purpose: Mix 50 parts rectified spirits of wine, one part sulphuric acid and one part of nitric acid. Allow the pieces to remain in this liquid for 10 or 15 seconds, wash with cold water and subsequently with spirits of wine. Dry with a soft rag.

"Specimens of fine German silver nearly equal silver in whiteness and susceptibility of receiving a high polish, while they surpass it in hardness and durability. One specimen consists of a mixture of pure copper, 40½ parts; nickel, 31½ parts; zinc, 25 parts, and iron, 2½ parts. This alloy is said to resemble the genuine German silver from the ore in Hildburghhausen, as well as Pakfong, as analyzed by Dr. Fyfe, and is equal to the best Chinese samples."

SMELTING FOR THE TRADE

I AM now engaged in conducting a very high class sale, my second one for Chas. W. Crankshaw, of Atlanta, Ga., and my seventh in this city within the past eighteen years for leading jewelers. Mr. Crankshaw's present stock amounts to fully $200,000 of only the highest grade diamonds, gold goods, sterling silver and art ware. This store is pronounced the most palatial in the entire South.

This particular sale is creating great excitement and is attended by the leading society people of this wonderful city of the New South.

Over two hundred references given of successful auctions. Since having by mutual consent and good will dissolved the partnership with my former associate, I now have two of the most able assistants. My time is being booked ahead, even into next Autumn, so it will be necessary to write promptly if my services are wanted.

Correspondence confidential. All sales made strictly on a commission basis and satisfaction guaranteed. I am in a position now to do more in every possible way for my patrons than ever before. As to my reliability, I will give references from leading manufacturers, jobbers, several banking houses, commercial reports and over two hundred jewelers for whom I have sold.

ARE YOU IN STEP WITH PROGRESS?

IF NOT, WHY NOT?

OUR METHOD WILL INCREASE YOUR BUSINESS 50% TO 100%

Read the letter below written by one who has used our Catalog System every year since 1904

STORE OF B. GOTTLIEB, PINE BLUFF, ARK.

THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio.

PINE BLUFF, ARK., January 29th, 1910.

Gentlemen:—On account of the unsettled condition of the cotton market in this section, and low prices, the farmers, as a rule, did not sell their product, thus business in all lines was seriously affected and merchants generally complained of a poor holiday business, but I am pleased to report a large increase in mine over that of 1908, and am convinced that the Catalog accomplished this.

I have sent out your Catalogs every year for the past six years, and through them my business has grown from a modest one to the largest in the city, and by far overshadowing strong competition.

The goods you furnish, which are illustrated in my catalog, are of the best standard makes, ready sellers, and prices as low or lower than could be procured elsewhere for equal quality. The catalogs have placed my store most prominently before the people and given it a very high standing.

Will have you make my Catalog again this year. It will be even larger than my 90-page book last year. My mail order business in the surrounding country is growing nicely. The other large mail-order houses have a strong hold on our farmers but I am gradually getting it away from them. I will continue to go after this branch of the business. However, it is in the city where immediate and profitable results are always obtained from the Catalog.

Hoping this information is what you have inquired after, with my best wishes, I remain.

Sincerely yours,

B. GOTTLIEB.

If You are Interested, Write us for Particulars

We deal only with the legitimate jeweler and as a rule sell but one in a city.

QUALITY

Winning on Merit

There are many ways of trying to win in the business world.

One may adopt Brute Force. That is the method of the highwayman, when he hits you on the head and takes your wallet.

Or one may seek success simply on the MERIT of his products in an open market. That is the approved method in civilized communities. It wins.

Jobbers, dealers, consumers, everybody responds to considerations of QUALITY, and no Chinese Wall can shut them off.

For years

WADSWORTH WATCH CASES

have been winning on merit. The cases have been sold, and the business developed on the idea of QUALITY, including superior SHAPES, STYLES and ENGRAVINGS. The Cases will continue to be sold and the business will continue to be developed along the same lines.

The Big Stick is no part of our office furniture. Dealers DON'T HAVE TO buy these Cases.

But they WANT TO and will buy them because of their QUALITY, because of the PROFIT there is in them, and because there is always certainty of a SQUARE DEAL and no coercion.

CHICAGO
1203 Heyworth Bldg.

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two million have mesh bags. **We** must supply the other forty-eight million with machine-made mesh bags.

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than used on hand-made bags, and machines harden it still more in working, making wire **stiff and strong,** no **rough joints to catch,** and wear the dress. Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** other **so-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

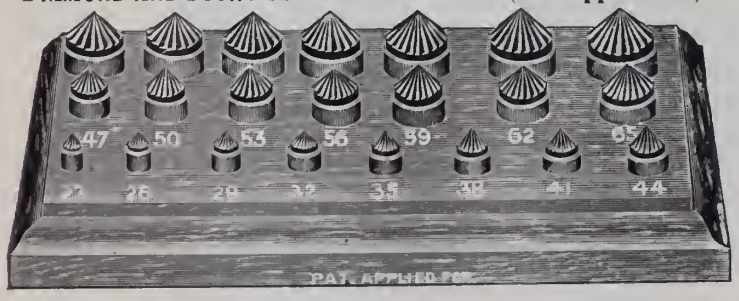
ECHARCO IMPROVED WATCH GLASS CABINET, No. 8

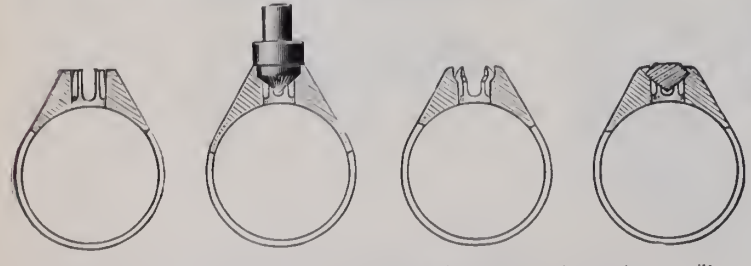
The NEW FEATURES of this Cabinet are the SKELETO DRAWERS, making an accumulation of dust and chips impossibl and the very easily read LABELS of white celluloid on the draw fronts. The Cabinet has nine drawers, giving 1,632 spaces. It 29½" high, 24" wide and 13" deep. The construction of drawer arrangement of partitions to economize space and weight, and t novel method of showing contents on the drawer pulls are all nov and practical ideas and very well carried out. The Cabinet is ma of oak and finely finished, and is the lightest and strongest case the market. Spaces are provided for the small sizes of Lentill and Gencvas, and for Antiques, which no other Cabinet provid for, making it the most complete and convenient Cabinet ever offer to the trade.

Price, $16.00



PEGWOOD SHARPENER, No. 3

A new attachment, designed for use on a watchmaker's la which sharpens pegwood to a hair point without breaking, a the same time gives the point the proper concave shape. The t is held in the lathe by an arbor fitting into a regular wire c k shown in the illustration, being steadied by the rest show T stick of pegwood is rotated by hand while the tool is revolved the lathe, producing a fine, long, flexible point. With this t watchmaker can prepare enough pegwood for a day's or a wee work in a few moments, and have every piece uniformly and eve sharpened.



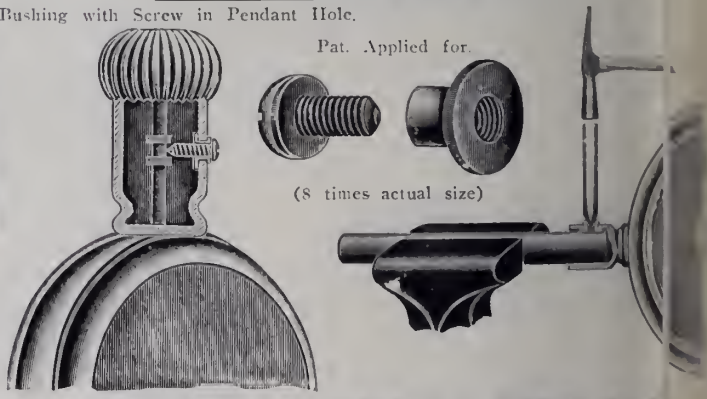
The tool is mechanically perfect, made of the best mate a durable and cannot get out of order. For sharpening the cutte use of a fine Arkansas oil stone slip is necessary. Coarser abra should not be used.

Price, each, $2.00

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, will do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1/16 to 2 carats.



Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 30 and 44.

The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.

Price, Per Set, $5.50

Bushing with Screw in Pendant Hole.

Pat. Applied for.

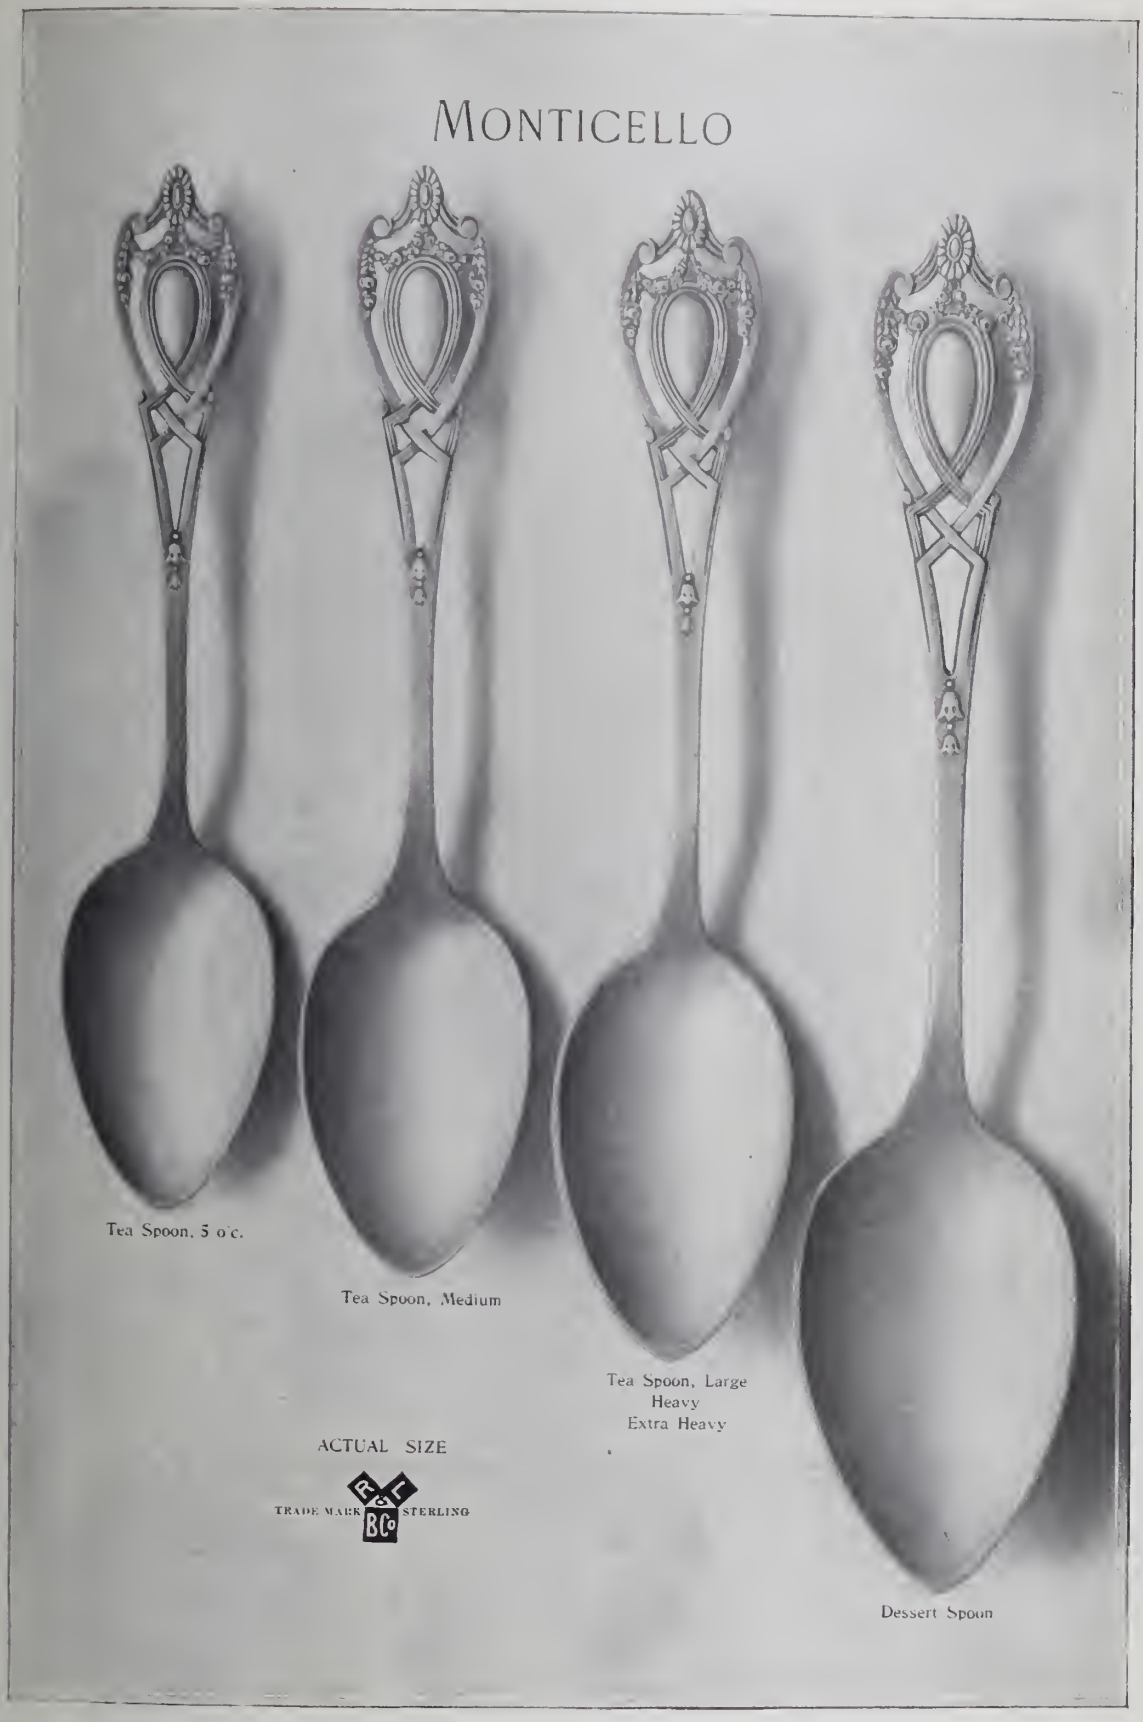
(8 times actual size)

THREADED PENDANT SCREW HOLE BUSHING, No. 3

Made in Brass for 18, 16, 6 and Os Lever Set Cases, and in German Silver 2, 3, 4 and 5 oz. cases

Cut shows watch case pendant with pendant screw hole bus inserted and also screw, and shows repair as it looks when complete

DIRECTIONS. Ream hole to size of bushing, then place pe ant screw bushing in hole and place pendant with bushing on ar as illustrated above, and with a centering punch force over edge of bushing and then put in screw and repair is made



No need of soldering up or plugging up of damaged pend screw holes and damaging the pendant and case as well.

Every watchmaker knows how difficult it is to repair a pend screw hole after the screw is pulled out, due to bending and rust of the screws. This outfit makes a quick and good job.

Put up 1 dozen assorted Bushings and 1 dozen assort Screws to match in a Brass Box..... 5

Why Should You Pay Our Selling Expenses?

There are just two ways to buy silverware—the old way and the new. If you prefer to buy through salesmen you must pay their salaries, railroad and hotel expenses, because these items represent fixed charges which must be met. ¶ We have inaugurated a strictly modern way of selling silverware. We have made Uncle Sam our salesman, and he works without salary and without a "weekly expense account." We are equipped to sell you by mail from the home office and give you more satisfactory service than you have ever received from traveling salesmen. Our selling expenses are almost entirely eliminated. Therefore we are able to quote you prices representing a

TRADE W MARK

15% to 20% Saving

TRADE W MARK

¶ Remember that regardless of this reduction in the cost to you, the quality of our line is unchanged, and we will continue to offer you "Woodside Standard" deposit ware and sterling silver made in the same artistic designs and by the same expert workmen for which we have been noted for years. ¶ Glance at the examples here shown. The Brown Betty Tea Set well represents the distinctiveness of our line of deposit ware. This is our exclusive design. It cannot be obtained elsewhere. The Cheese and Cracker Dish is sterling and comes in a variety of styles. Note the pleasing manner in which beauty is combined with service. ¶ You cannot afford to miss the opportunity of carrying our line at the new attractive prices. Our new Spring catalog will convince you. Write for a copy and judge for yourself.

Gold Chains

We make every conceivable kind of a Gold Chain, incorporating the best material and workmanship.

Economy in manufacture and merchandizing—we have no traveling men—makes it possible to offer the Retailer a good, substantial line of attractive Chains at prices that allow a generous profit.

THE NEW CHAIN

Write for a sample of our new solderless, flexible and indestructible Bead Neck. No stringing or wiring. 15-inch lengths, and 10K. only.

NEW—WATCH REPAIR RECORD—NEW

Three distinct points have been sought in compiling this Watch Repair Record, namely: That it should be COMPLETE, CONCISE and CLEAR.

A Record that eliminates all so-called "Red Tape"—that does not burden one with lengthy writings and descriptions which are so unnecessary, and at the same time affords one an ABSOLUTE COMPLETE Record.

From the following illustration you will readily note how well these points have been fulfilled, showing the superiority of the "Swartchild's Watch Repair Record" over all others.

SWARTCHILD'S WATCH REPAIR RECORD Copyright applied for.

Date	Job No. or Private No.	OWNER'S NAME	Kind of Movement	Number of Movement	Kind of Case	No. of Case	Date D'l'v'd	Charges		Extent of Repairs and Remarks

Book is most substantially made with heavy, best ledger sheets and most durable binding.

No. H932. Swartchild's Watch Repair Record (Indexed) One thousand entries..... $1.00
No. H933. " " " " " " Two " " 1.50
No. H934. " " " " " " Three " " 2.00

THE SPRING COMBINATION

CORAL, SAPPHIRE, FRENCH GREY

PINK is essentially a Spring color—the color of the blossoms. It combines delightfully with grey. Hence the beauty and appropriateness of the new combinations of Coral with French Grey. With the same finish also is combined Sapphire, equally appropriate because its blue is proverbially a cool color for the warmer days approaching. The stone affords a welcome variation from amethyst. The line is comprehensive. The Long Chains are in special favor. One should also see effects in Hat Pins, Sash Pins, Brooches and Neck Pendants.

More Light for Jewelry Displays

TO display your valuable stock to the best possible advantage, to exhibit diamonds and precious stones in all their beautiful scintillations as if the bright sun were shining upon them, use the daylight quality G. E. MAZDA Electric Lamp.

With this lamp replacing the old type electric incandescent, you can flood your store and windows with *three times* their present brilliancy without adding one cent to the cost for current consumption. Your stock *requires* illumination of the best quality. For you this has been made possible by the perfection of the G. E. MAZDA Lamp, which marks the greatest advance in electric lighting since Edison's invention.

Remembering that "Brilliancy brings business" ask your lighting company for this remarkable lamp — insist upon seeing and trying the G. E. MAZDA Lamp.

...able Specimens of Industrial Art at the ...Lanna Sale at Berlin, Germany.

...HERE took place recently, held by the well-known art auctioneer, Rudolph ...e, Berlin, the sale at auction of a por... ...f the extensive industrial art collec...

FIG. 1.—RELIQUARY SOLD FOR $30,000.

...n of Baron Adalbert von Lanna, of ...gue. The attendance at this sale was ...ething extraordinary, and prices were ...lined that are rarely recorded in the ...ern art market. For instance, a beauti... reliquary, of the 12th or 13th century, ... was discovered in Prague (Fig. 1) and ...which at first 30,000 marks ($7,500) was ...red, was bid up to 121,000 marks ($30,-..., at which price it was sold to Mr. ...gman, of Paris. On the front side it ...vs the crucifixion, with the applique ...y of the Crucified One between the ...ns of Mary and Joseph, and is overlaid ... copper plates decorated with colored ...mplevé enamel.

...large Silesian wall plaque, dating from ...middle of the 16th century (Fig. 2), was ...chased by the museum at Breslau for the ...rmous sum of 26,000 marks ($6,500). ...s piece, of which but few specimens are ...wn, also displays the scene of the cruci...n, in the background of which an an... ...ent German city—perhaps the city of Breslau appears. Winged angels receive in a bowl the blood streaming from the wounds. The glaze of the beautiful old dish looks like mosaic, because the outlines of the drawing are incised in the clay.

The Berlin industrial art museum obtained through Director Falke a beautiful octagonal pewter mug (Fig. 3) for 33,000 marks ($8,250). While to a layman this price may appear immense, the connoisseur, who regards with delight the designs (scenes from the lives of the evangelists and other religious figures) engraved in the prism-shaped, 19½-inch-high jug and the broad handle on its perforated support, will not think it too high for this costly specimen of old Silesian industrial art.

The total amount realized at the Lepke auction alone amounted to nearly 1,500,000 marks ($375,000), and the amount of capital invested by Lanna in his collection multiplied itself tenfold in the course of years. It will thus be seen that collecting may prove a good investment for capital, only

everybody cannot do it; it needs to be understood. CHAS. A. BRASSLER.

Massive Silver Automobile Trophy.

A NOTABLE automobile trophy of the year just past, and one of the finest and most massive silver cups that has ever been made on the Pacific Coast is the Dick Ferris trophy for the Santa Monica Road Race, held in Los Angeles, Cal., an illustration of which appears on the front page of this issue. The cup, which is of pure silver, weighs over 400 ounces and cost over $1,000.

A feature of the ornamentation of the trophy is the bird's-eye view of the course over which all the contesting cars were driven; this shows all the most minute details of the course, the grand stand with a seating capacity of 10,000 people, the parking space for the starters, the tapes showing the starting and finishing points, the mile posts, with the different stretches, etc., all of which is etched and engraved.

The letters in the ornamentation around the rim of the cup are very heavy, cut out and applied. The automobile at the bottom of the cup is made, as are all the other parts, and applied to look as nearly natural as possible.

On the reverse is engraved a photograph of the donor, Dick Ferris, showing his head in a wreath in relief. The inside of this cup is finished in 24-karat gold. The handles are exceedingly large and massive.

The trophy is mounted on a very large, handsome ebony base, on which are mounted 15 shields, one for the winner of this cup each year. These shields are very large and heavy and give plenty of room for the engraving, which includes the name of the winning car, the driver's name and the time made by them. This will show each year the advances made by the automobile, and it is believed that every year the time will be reduced over this course.

The cup was designed and supplied by the Whitley Jewelry Co., Los Angeles, who ob-

FIG. 3—PEWTER MUG SOLD FOR $8,250.

tained the contract for it by being the lowest bidder and having the most handsome design.

Burglars recently broke into the store of F. L. Schuster, Texarkana, Tex., but were frightened away before completing plans. In their flight they dropped a sack containing much plunder, which they had gathered together.

NO STOCK IN THIS COUNTRY

is as large and so complete as our big line of Oriental and American Pearl Shirt S
Every pair and every set is well matched in Color—Size—and Shape, and all are Mo
ately Priced, considering the value given.

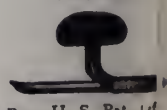
They are securely mounted on pegs by a mechanical process (not cemented or scr
on) and all are equipped with the LARTER AUTOMATIC SHIRT STUD BACK, w
is the only safe and satisfactory device for a valuable stud. This big stock is at the
vice of all reliable Retail Jewelers, when they have a call for Pearl Studs.

ORIENTAL PEARL STUDS

This line consists of both round and button shaped Oriental Pearls, mounted on pegs and in cramp settings, from $6. per set of three up to $225. per set of three. For fine color, Luster and well matched pairs and sets, this line is unequaled at the prices.

AMERICAN PEARL STUDS

No Custom Duties—no Importing E
penses and no European Profits are
tached to this line; hence, they can
sold considerably cheaper than the Ori
tal Pearls. Just the article for your c
tomers who demand large pearls at sm
prices—from $14. to $120. per pair.



Ask our travelers to show you the above lines, or write to our efficient mail o
department.

Reg. U. S. Pat. Of

Specific Gravity and Its Relation to Gem Minerals.

Lecture by C. Roe Gardner, before the Mineralogical Department of the Brooklyn Institute of Arts and Sciences.

subject I shall deal with is the Specific Gravity, or Relative Density erals." The density of a mineral is its most important characters. The ry of specific gravity is attributed to eek Archimedes. It is related that Hiero gave a certain weight of gold o an artificer to make over into a and the king, suspecting a cheat, his friend Archimedes if he could ether base metal had been put in with d; how Archimedes, sorely puzzled, one day into his bath, observed how ter ran over, forgot everything, and g "Eureka! Eureka!" ran home h the streets of Syracuse with no on.

principle Archimedes discovered is body in water displaces a quantity er which is of the same volume as bstance; and the weight of the water ed bears a constant ratio to the of the body; or, in other words, the gravity of a substance is the num- at expresses the ratio which the of a given volume of the substance to the weight of an equal volume of dard substance. The standard sub- usually selected is water at a tem- re of four degrees C.

ry mineral and, in fact, every chemi- stance has a definite specific gravity will in the majority of cases differ it from other substances. This fact icularly valuable to the dealer in pre- stones, precious stones being the gem es of the minerals in our cabinets, ften wishes to determine rapidly be- two stones which to the eye may ap- uite similar, but their specific gravity st cases will be sufficiently different w for the correct determination.

density of a number of specimens of me kind of mineral will often vary narrow limits, and this may be due lusions, different states of molecular gation and variable compositions. We that nearly all minerals have inclu- or along cleavage lines are altered to minerals, and even the coloring mat- minerals is an impurity distributed hout the mass. At this point I have d at the conclusion that absolutely crystals or minerals among the silis are extremely rare; and therefore is no reason why the gravity of the substance should not vary slightly.

re are several causes to which a var- of density in the same species may ributed. One is the isomorphous mix- which are found to exist in a great groups. As examples I shall cite a embers of four important groups of nals; the feldspar, pyroxene, amphibole arnet groups.

Its in the plagioclasic feldspars that the nce of density is most marked. Be- g with the most acidic member of this Albite, which is a silicate of sodium albuminum, to which the formula Si_3O_8 has been assigned, and which has a specific gravity of 2.62, the density gradually increases until it reaches 2.75 for Anorthite, which is the most basic member of the group, with the formula $CaAl_2Si_2O_8$. Here the density increases with the basidity. Between Albite and Anorthite there are a number of intermediate subspecies, which are regarded as isomorphous mixtures of the molecules of these two minerals, and are defined according to the ratio in which their molecules enter into combination. If we assign Ab to the Albite molecule and An to the Anorthite, the intermediate members may be expressed as follows:

Oligoclase, Ab_8An_1 to Ab_3An_1, G 2.64.
Andesite, Ab_3An_1 to Ab_1An_1, G. 2.65.
Labradorite, Ab_1An_1 to Ab_1An_3, G. 2.69.
Bytownite, Ab_1An_3 to Ab_1An_6, G. 2.71.

These values for the densities of the plagioclases are the average values of determinations made independently by Tschermak and Goldschmidt. It can readily be seen from this that the specific gravity increases towards the basic end.

There is another characteristic of these plagioclases which, like the density, varies with the chemical composition. These feldspars, when viewed as a thin section between crossed nicols of a polarizing microscope, exhibit alterna e white and slate gray bands which are due to polysynthetic twinning. The twinning bands referred to here are those according to the Albite law. These white and gray bands in Albite or the acid end of the series are narrow and nearly equal in width, but as you pass through the group the bands gradually broaden and appear widest at the basic or anorthrite end. These bands therefore are indicative of both composition and gravity.

The variation of density in the pyroxene and amphibole groups cannot be followed as systematically as in the preceding series.

In the orthorhombic pyroxenes the gravity increases from 3.10 of the light colored enstatite, with little or no iron, to 3.3 for Bronzite, which contains from 10 to 12 of iron, and in Hyperthene, which has from 12 to 30 iron, the gravity ranges from 3.4 to 3.5.

The monoclinic pyroxenes are divided into two varieties, based upon their chemical compositions: first, those containing little or no aluminum and, second, the aluminous. Of the first variety diopside, to which the formula $CaMg(SiO_3)_2$ has been assigned, and the colors of which are white, different shades of green and nearly black, the gravity has been found to vary from 3.2 to 3.38. Hedenbergite, the calcium iron pyroxene with the formula $CaFe(SiO_3)_2$, and which is usually black in color, has been determined to have a gravity of 3.5 to 3.58.

In the second or aluminous variety, Augite has a very variable composition, which is chiefly $CaMgSi_2O_6$ with (Mg. Fe) (Al. Fe)$_2$ SiO_6 and occasionally some alkalies. The gravity of this variety ranges between 3.35 and 3.45.

The orthorhombic amphiboles, anthophyllite and gedrite, correspond in composition to enstatite and hypersthene in the pyroxene group; but in this section of the amphiboles the range in gravity is from 3.1 to 3.2, the variation here being slightly less than in the corresponding pyroxene.

The monoclinic amphiboles are also subdivided into the non-aluminous and the aluminous. Of the former two principal members are: tremolite, the colors of which are white to dark gray, and with the formula $CaMg(SiO_4)_3$, in which ferrous iron sometimes replaces the magnesium up to 3 per cent. The gravity is from 2.9 to 3.1.

Actinolite is bright green and grayish green, and has the formula $Ca(MgFe)_3(SiO_4)_3$ with the gravity 3.0 to 3.2. The green color of actinolite is attributed to the ferrous iron present, and the color deepens as the percentage of iron increases.

In the second variety the colors range from the white edenite, which is an aluminous magnesium calcium amphibole, through the light to dark green pargasite, to the dark colored or black hornblende, the color growing darker with the increase in the amount of iron. The gravity for the aluminous amphiboles is from 3.05 to 3.47. From these facts it may readily be observed that the density increases with the amount or iron in both the pyroxenes and amphiboles.

The garnets have the general formula $3RO, R_2O_3\ 3SiO_2$. The bivalent element may be ferrous iron, manganese, calcium or magnesium, the trivalent element aluminum, ferric iron or chromium, and sometimes the silicon is replaced by titanium.

This group is sub-divided into three prominent divisions—the aluminous, the iron and the chromium garnets. The first contains grossularite, pyrope, rhodolite, almandite and spessartite, the second andradite and the third uvarovite.

Grossularite, also known as cinnamon stone, essonite or hessonite, is a calcium aluminum garnet with the formula $3CaOAl_2O_3\ 3SiO_2$ and the G. 3.55 to 3.66. The colors of this variety are pale green, colorless to white, honey and amber yellow, wine yellow, brownish yellow, cinnamon brown, rose red and rarely emerald green, due to the presence of chromium. This variety obtained its name from the botanical name for gooseberry, because the original grossularite included the pale green Siberian variety.

Pyrope, or precious garnet, is a magnesium aluminum garnet with the formula $3MgOAl_2O_3\ 3SiO_2$ and the gravity 3.7 to 3.75. The colors range from deep red to nearly black.

The composition of rhodolite indicates that it consists of two molecules of pyrope and one of almandite. It has been assigned the formula $2\ (3MgOAl_2O_3\ 3SiO_2) + 3\ FeOAl_2O_3\ 3SiO_2$, and has a gravity of 3.83. This variety is distinctly an American gem and is found only at Macon County North Carolina. The color of this mineral is a reddish purple and resembles some kinds of rhododendrons and roses, hence the name, from the Greek word rhodon, a rose.

Almandite, or almandine, is an iron-aluminum garnet with the formula $3FeOAl_2O_3\ 3SiO_2$ and the gravity 3.9 to 4.2 The

or is deep red and transparent in pre-
us garnet, brownish red and black.

Spessartite or spessartine is a manga-
se-aluminum garnet with the formula
$MnOAl_2O_3 3SiO_2$ and the gravity 4.0 to

The color is dark hyacinth, red to
ownish red.

Andradite or common garnet is a cal-
m-iron garnet with the formula $3CaOFe_2O_3 3SiO_2$ and the gravity 3.8 to 3.9 The
ors are various shades of yellow, apple-
en to emerald-green, brownish-red,
own and black.

Uvarovite or ouvarovite is a calcium
omium garnet with the formula $3CaOCr_2O_3 3SiO_2$ and the gravity 3.41 to 3.52. The
or is emerald-green.

To summarize the garnet group we have
species represented by the formula
$\overset{II}{R}O\ \overset{III}{R_2}O_3\ 3SiO_2$, and by the replacement of
element for another we obtain gravities
ich vary from 3.41 to 4.3.

Some minerals which have the same com-
sition but do not crystallize in the same
stem have different densities. Calcite,
ich crystallizes in the rhombohedral di-
ion of the hexagonal system, is composed
calcium carbonate, and has a density of
1. Aragonite, which has identically the
ne composition as calcium carbonate, but
ich is orthorhombic in crystallization, has
lensity of 2.93.

Again, minerals of the same chemical
nposition sometimes vary in specific grav-
due to different states of molecular ag-
gation As an illustration of this the
ment carbon, which is the composition of
th graphite and diamond, has in the
rmer a density of 2.1 and in the latter a
nsity of 3.52.

Although this variation in density does
ist in certain species, due to causes which
have illustrated, the specific gravity of a
neral species is a character of funda-
ental importance, and is quite constant for
fferent specimens of the same species, if
re, free from cavities, solid inclusions,
., and if essentially constant in compo-
ion.

An interesting point which I have ob-
rved in minerals. and which is approxi-
ately true. is that as the specific gravity
creases the index of refraction also
creases.

rope	3.75	1.77	Cassiterite	6.84	2.09
eonaste	3.82	1.71			

Of course, there are exceptions; for ex-
nple, diamond with the density of 3.52
d an index of refraction of 2.42.

The phenomenon termed refraction is the
sult of the velocity of a ray of light in
assing from a rare to a denser medium
ing decreased, and there results a change
direction at the bounding surface where
e ray is not normal to this plane of con-
ct.

If increasing density may be attributed to variable chemical composition and an increase in molecular aggregation, it appears safe to attribute increasing index of refraction to the same causes.

One of the interesting conclusions which occurs to me after observing this increase of refractive index with the density is that after having obtained the specific gravity of a mineral you have determined approximately what the relief of that mineral would be in a thin section. Whether, for example, with a density of 4.2 or 4.3 it would have a high relief like Rutile, or with a density of 2.2 a low relief like opal.

There are various methods for determining the specific gravity of a mineral. One method is to obtain by a balance the weight of the mineral in air, then the weight of the mineral immersed in water. The second result is subtracted from the first. By dividing the first weight by this difference we obtain the specific gravity. Here the principle is applied that a mineral immersed in water loses a part of its weight equal to the weight of the displaced water; and the volume of water displaced being equal to the volume of the mineral, the specific gravity is the ratio between the weight of water displaced and the weight of the mineral. As example:

7.04 weight in air
5.04 weight in water

2.00) 7.04

3.52 gravity of diamond.

Another means of finding the specific gravity of a mineral is by the use of heavy solutions. The liquid for use in this method must fulfill a variety of conditions. It must be clear, transparent and colorless, that the movement of the immersed mineral may be observed, and it must not be thick or viscous, to allow of the free movement of the mineral. The gravity must be high, so that its use may be extended to as many of the heavier minerals as possible, and it must mix readily with a second lighter liquid so that its density may be varied.

Methylene iodine, a compound of carbon, hydrogen and iodine, having the formula CH_2I_2, has at ordinary temperatures a specific gravity of 3.3, and fulfills the requirements necessary for use in the application of this method.

To determine the density of a mineral by this method, it is first placed in pure methylene iodine contained in a tall cylindrical vessel. If the mineral sinks we know that it is heavier than the liquid. If it remains suspend in the liquid, neither rising nor falling, we know that its specific gravity is the same as that of the liquid. If the mineral rises to the surface after being pressed down with a glass rod we know that its specific gravity is less than that of the liquid. When this last condition happens bezine is added until a mixture of such a density is arrived at that the mineral remains suspended in the liquid. We know then that the specific gravity of both mineral and mixture are identical. The density of the methylene iodine and benzine may then be determined by means of indicators. For use as indicators small mineral fragments, ranging from low to high densities. may be employed. As opal 2.21, quartz 2.65 and calcite 2.728.

Another solution employed for this method of determination is a double salt of silver and thallium nitrates, with the formula $AgTh(NO_3)_2$, which, although solid at ordinary temperatures, melts at 75° C. = 167° F. to a clear and transparent liquid with a specific gravity of 4.8. This liquid is readily miscible with water, and therefore mixtures of any required density can be obtained by simple dilution. This solution is to be preferred to the methylene iodine because of its being miscible with water.

(A number of mineral specimens loaned by Tiffany & Co., of New York, were exhibited at the lecture by Mr. Gardner.)

The Production of the De Beers Mines.

FRANCIS OATS' speech at the general meeting of De Beers Consolidated Mines, Ltd., held at Kimberley recently, though conservative and cautious in tenor, clearly showed that the great corporation has turned the corner, and that there is considerable promise in the future. Perhaps the most striking fact in his speech (remarks the *Transvaal Leader*) was that the world had taken £3,000,000 worth of diamonds during the past six months, contrasted with £5,000,000 in the preceding two years. . . . The value of diamonds sold was £3,074,911, compared with £6,500,000 in 1907, and included in the former figure is some £250,000 for increase in stock of the precious stones. By the end of the year the company expects to have, inclusive of the share of the profit made by the Diamond Syndicate, £600,000 cash in hand, but Mr. Oats made it clear that the cable rumors of a dividend and bonus were devoid of foundation.

There will be no further dividend on the deferred shares this year, and not until next June should another announcement be expected. The directors do not regard the £600,000 as being available for distribution; and in view of the distinct statement in September that the dividend announcement was in anticipation of the annual meeting, it is a little difficult to see how the report could have arisen.

Mr. Oats dwelt at length on the change of method of accounting for the blue ground asset, which is now taken in at cost of mining and hauling, about 7s. per load, instead of at a nominal charge of 1s. 3d. to 1s. 6d. This altered procedure has, of course, affected the profit. It will be the policy of the company to maintain its financial strength by keeping the combined value of the Consols investment and of blue ground at about £3,250,000. The profits shown will not be augmented by the exhaustion or depletion of the stocks of blue ground on the floors. floors.

A considerable portion of the speech was devoted to the yield of the different mines. Kimberley and De Beers mines are taken together in the report, but, inasmuch as little if anything was washed from De Beers and as the Kimberley mine yield is higher the combined return this year is better. Of the Kimberley mine itself the yield is slightly higher than four or five years ago.

Mr. Oats paid a tribute to the Diamond Syndicate for the manner in which they had stood by the company during the critical period.

Bankruptcy Schedules of Chester Billings & Son, New York, Show Liabilities of $659,433 and Assets of $592,102.

The schedules in bankruptcy of Chester Billings & Son (Inc.), dealers in diamonds and jewelry at 353 Fifth Ave., New York, against whom a petition in involuntary bankruptcy was entered in January, were filed in the United States District Court, Tuesday; they show liabilities of $659,433, of which $160,055 are secured, $464,486 are unsecured and $34,892 accommodation paper. The actual assets are $592,102, of which the stock is $524,809 appraised value ($740,400 book value), and of this $194,137 is in notes deposited with creditors as collateral. The fixtures, valued at $5,300 (book value $6,046), include the store and office fixtures, which are appraised at $5,000 (book value $49,700), factory and repair machinery, tools, etc., $300 (book value $1,697) and improvements (on which a book value of $5,548 is placed). The good accounts $42,858, the notes, $3,404; cash in banks, $2,3[illegible]; cash on hand, $1,405; insurance return $2,036, and claims, $9,355, of which $3,5[illegible] are against the city of New York for damages.

Among the secured creditors are: The Security Trust Co., Newark, N. J., $60,714; H. H. Veith, $27,280 (secured by loose diamond stock); H. L. Hoyt, $19,148 (secured by pearls); P. Sanford Ross, Oppenheimer Bros. & Veith and the Mutual Bank, syndicate loan, $40,237 (secured by loose diamond stock); Oppenheimer Bros. & Veith, $4,1[illegible]; American Exchange National Bank, $3,2[illegible].

The largest of the unsecured creditors is Neresheimer & Co. (London), who have a claim for $149,-[illegible]. It is understood that certain of the acceptances have been discounted by Neresheimer & Co., with, and are now held by, the London County and Westminster Bank, the London City and Midland Bank and the Union and Smiths Bank, all of London, England, and probably other banks, but the particular acceptances so held are unknown to the bankrupt.

Among the other large unsecured creditors are: P. Sanford Ross, $49,699; National Park Bank, $46,122; Jos. Ascher & Co. (Paris), $53,242; Oppenheimer Bros. & Co., $36,114; Stern Bros. & Co., $24,098; Linman Bros., $19,121; David C. Towner & Co., $16,068; Frank T. May Co., $3,-[illegible]; A. Wittnauer Co., $3,075; Allsopp & Allsopp, $2,224; Brassler & Co., $1,703; Bizac & Eckert Co., $1,394; A. J. Hedges & Co., $1,281; Whiteside & Blank, $808; Bippart Griscom & Osborne, $460; Fenwick Frères & Co. (Paris), $6,828; Durand & Co., $6,567; Carrington & Co., $2,603; Sloan & Co., $2,073; William Scheer, $1,906; Osborn Parker Mfg. Co., $1,895; Mertz Bros., $1,[illegible]1; G. H. Henkel & Co., $1,553; Riker Bros., $1,308; Carter, Howe & Co., $1,265; Joseph Frankel's Sons, $1,229; Redlich & Co., $1,209; Roger Williams Silver Co., $1,2[illegible]2; Eckfeldt & Ackerly, $968; Kent & Woodland, $952; David C. Dodd & Co., $9[illegible]; Charles Weller & Co., $883; Fred Kahn, $831; A. F. De Jonge, $820; Martin Meyer, $729; Jones & Woodland, $716; Hazard & Cockshaw, $695; Thomas F. Brogan Co., $693; Low & Florenzie, $614; Schwartz Mfg. Co., $523; L. S. Mayer, $459; J. F. Fradley & Co., $447; Battin & Co., $442; Courtois, Bush & Garrigus, $393; Gorham Co., $386; Patterson & Stark (successors of Rud C. Hahn & Co.), $374; Hendrick & Co., $374; Simons, Bro. & Co., $369; Frank Kursh & Son Co., $368; Archibald Klement & Co., $352; Ferd. Fuchs & Bros., $334; Graff, Washbourne & Dunn, $317; W. Wallace Hurd, $319; Day, Clark & Co., $278; Le Secla, Fried & Co., $248; New York Edison Co., $250.

The following are disputed claims against the bankrupt: Warren & Wetmore, $1,070; Leedy & Moore, $4,127; Geo. W. Smith & Co., $431; Jones & Woodland (trustees' services, Fidelity Loan,); Lindsay, Kalish & Palmer, $2,907; Baker, Smith & Co., $383; Louis Tas, $141; Lamson Consolidated Store Co., $157.

The appraisers of the bankrupt's property were Henry Rudolph, David Kaiser and John R. Keim.

Judge Holt, of the United States District Court, has issued an order under date of Feb. 17 authorizing the receivers in bankruptcy, John C. Van Cleaf, Uzal H. McCarter and August Oppenheimer, to continue the business for a further period of 30 days.

Immediately after the receivers qualified to act they took possession of the assets of the bankrupt corporation, and have continued to conduct it up to the present time. Sales of merchandise in the store at 353 Fifth Ave. are being made by them from time to time. The receivers, it is understood, are endeavoring to secure offers for the sale of the merchandise of the bankrupt estate as a whole, and are informed that some negotiations are in contemplation for a reorganization of the business.

The petition asking that the receivers be allowed to continue the business for a further period of 30 days from Feb. 19, recites that if the business was allowed to be stopped by reorganization or from other causes the sales would be materially interfered with.

Union Watch Co., a Mail-Order Concern, Files Schedules in Bankruptcy Court.

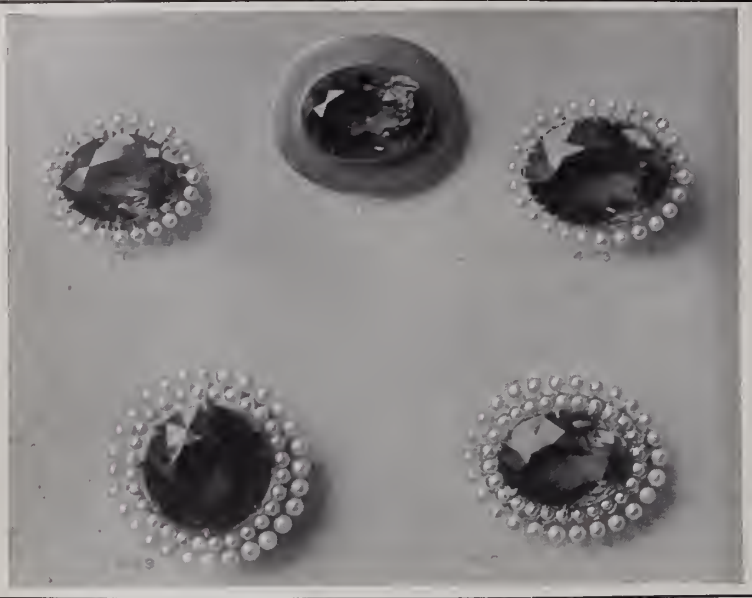
Schedules in bankruptcy of the Union Watch Co., 47 Maiden Lane, New York, a mail-order concern, against which a petition in bankruptcy was filed Jan. 21, were filed in the United States District Court, New York, Feb. 16. They show liabilities of $23,746, of which $9,970 is secured, and nominal assets of $5,033, which include: Stock, $350; fixtures, $200; accounts, $125; cash on hand, $23, and money and checks deposited in banks, $2,832, which has been turned over to the petitioning creditors as trustees.

Alexander Hartfield, the treasurer of the concern, holds 997 shares of preferred stock of the Union Watch Co., at $10 a share, as collateral for a loan.

Among the unsecured creditors are: The American Color Type Co., $1,343; D. Melello, $504; L. Kroll & Son, $401; Woodferd, Bovee & Butcher, $400; New Haven Clock Co., $216; H. D. Folsem Arms Co., $202; J. P. Storm, $195; S. F. Myers Realty Co., $190; Samuel Cupples Co., $144; A. Coppatianca, $111; N. Berger, $110; C. Bruno & Son, $101; Hipp. Didisheim & Bro., $92; *Italian Journal*, $80; *L'Araldo*, $80; *L'Opinione*, $75; E. B. Hirsh & Co., $50; N. Field, $50; Alexander Hartfield, $358; Metropolitan Bank, $3,000; L. Lichenheim, $4,000; Italian-American Trust Co., $1,500.

Officers Foil Thieves' Attempt to Rob Philadelphia Jewelry Store, but Robbers Escape.

PHILADELPHIA, Pa., Feb. 15.—A carefully planned attempt was made early this morning to rob the store of William J. O'Donnell, a dealer in diamonds, watches and jewelry, on the second floor of the Steigerwalt building, 1004 Chestnut St. The thieves were caught practically in the act by Dengler, a policeman, who, with Haines, another policeman, and Haines, a private watchman, chased them over the roofs of the adjoining buildings, but lost them by a ruse perpetrated by the burglars.



In returning from the pursuit Dengler, the officer, slipped and broke his right leg, barely saving himself from falling to the pavement of Chestnut St., fully 80 feet below. It was with the greatest difficulty that his comrades were able to get him down from the roof and carry him to the Jefferson Hospital.

While making his round shortly after one o'clock this morning, Dengler, as is his custom, tried the side door of the Steigerwalt building that leads to the offices and stores on the upper floors. To his surprise it yielded to his touch, and, pushing it in, he heard subdued sounds as of heavy breathing and a sort of scuffling movement upstairs. Slipping quietly away, he found Wilson and came back to the scene.

As the two bluecoats arrived they were joined by Haines and the trio went softly up the stairs. Suddenly there came the sound of retreating footsteps and the three men dashed forward. Though they made the best speed they could, the darkness and unfamiliarity of the way handicapped them and the thieves reached the roof in the lead. Climbing through the scuttle, the officers of law and order thought they saw vague forms disappearing over the adjoining roof of the Schwartz store. Dashing in pursuit, they made their way over the roof to one where they found the trap door open. Concluding that their quarry had gone that way, all three dropped down into the dark interior of the establishment and after groping around for a few minutes came to a clinch with John Wilkinson, the night watchman of the store.

Mutual explanations followed, but a careful search of the place failed to reveal the burglars and the police came to the conclusion that the fleeing thieves had paused long enough to jimmy open the trap door as a means of throwing their pursuers off the track. It was while returning to the roof of the Steigerwalt building, in the hope of picking up a clue to the direction taken by the burglars, that Dengler came so near meeting his death.

Isadore Posner, Fayette City, Pa., has completed arrangements to move his stock to Ford City, Pa., where he will continue business.

AMETHYST JEWELRY

We offer very fine amethyst jewelry in sele amethysts, in combination with pearls and pe and diamonds, at moderate prices.

Interesting Points Involved in Appeal Suit by New York Jewelry House Against Pawnbrokers.

se of much interest to the trade as with the question of a pawnbroker's goods pledged with him was argued on appeal, last week, before the Appellate Division of the New York Supreme Court. A new point is raised by the pawnbrokers, who dispute the right of a criminal to, after a thief has been convicted, to have that the stolen property be turned over to the original owner.

The question arises in the action of Freudenheim Bros. & Levy against Gutter & Son. The former is a large jewelry house in New York and the latter are pawnbrokers in the same city. The action dates back to a time when Freudenheim Bros. & Levy employed a man named Levisohn as a salesman. Levisohn conducted a business of his own in a small way, and also sold goods belonging to the jewelry firm on commission, it being his right to make his own profit provided he did not go below the price charged by the jewelers. The amount received above this price was divided equally between the jewelry house and the salesman. At times the salesman had in his possession as much as $100,000 worth of jewelry.

Levisohn sent some of the jewelry to his brother-in-law, a man named Feinberg, with instructions to pawn the jewelry with certain pawnbrokers. Feinberg pawned a number of articles with Gutter & Son, and Levisohn used the money thus obtained to pay some of his personal bills. When the firm of Freudenheim Bros. & Levy discovered this they had the salesman arrested in Chicago and brought to New York, where he was indicted for grand larceny. He pleaded guilty and was sentenced to Sing Sing.

Freudenheim Bros. & Levy next made a motion before Judge Mulqueen, who sentenced Levisohn, for an order directing Gutter & Son and a number of other pawnbrokers with whom the goods had also been pawned to turn over the property to the jewelry firm. This was opposed by the attorneys for the pawnbrokers, who claimed that their client had a right to a day in court and a jury trial to establish their lien on the money advanced on the diamonds. After consideration Judge Mulqueen so decided.

The case went to the Supreme Court, where Judge Bischoff decided in substance that had the diamonds been pawned by Levisohn directly the pawnbrokers would have had a lien for their advances, but as they were given by Levisohn to his clerk the act was conversion. The clerk had no title to the goods, and therefore the pawnbrokers could not in any way get title from him.

In the case on appeal the executors of Gerhard Gutter undertook to justify their possession of the goods by the defense that Gerhard Gutter was a licensed pawnbroker that the goods in question were pawned to him by a person designing himself as "Levy," who had possession of the goods at the time and had a special property therein. The appellants further contended that Levisohn was not a mere broker or selling agent, but was a "factor." They say he had been lawfully "intrusted by the plaintiff with the possession of the merchandise for the purpose of sale," and was to be deemed the true owner thereof so far as to give validity to his contract with defendants for any money advanced by them upon the faith thereof. This act, they argue, has been repeatedly held to protect the "pledgee," and in the cases in which this lien was not sustained the possession was obtained by trick or device or fraud. The act of Feinberg, who was the ministerial agent of Levisohn in delivery of the goods to the defendants (pawnbrokers) and receiving the advances, was the act of Levisohn, they say. No discretionary power conferred by plaintiffs on Levisohn were to be exercised by Feinberg, but simply ministerial functions. Hence the rule *"delegatus non delegari potest"* has no application. The exceptions to such rule are well recognized. They pointed out that the action is not one between plaintiff and Feinberg or Levisohn, but against innocent defendants who have in due course of their business loaned money on goods in the physical possession of Feinberg without even a suspicion, much less any notice, to put them on inquiry, and that whatever rights they obtained were determined at the time of the loan, and are not affected by any subsequent disposition of the proceeds. It is argued that Levisohn, having the power to pledge, gave specific directions to his ministerial agent where to go and what to do, and that these directions were faithfully carried out. No suggestion is made that Feinberg did anything else. His good character and his lawful possession are not questioned by any evidence. Indeed, his testimony was given as a witness for plaintiff.

The complaint charges felonious possession, but no proof was given to support it. His possession was the possession of Levisohn, whose possession was lawful. As the acts of Levisohn the factor or owner, whichever he may have been, Feinberg's authority was sufficient without any further authority from plaintiffs to do what he did—deliver the goods and receive the money from defendants, they contend.

The attorneys for the jewelers contended that before the passage of the Factor's Act it was clearly settled that a factor or agent for sale had no power to pledge, whether he was in possession either of the goods themselves or of the symbol of the goods. This was in accordance with the general rule that he who deals with one *ex mandato* can obtain from him no better title than his mandate enables him to bestow. In so far as the aforesaid act has not changed the law the former rule, of course, prevails, and the holder of the goods of another, with or without documentary evidence of title, has no greater power to pledge them than it confers. They argued that the defendants are not entitled to protection under the Factor's Act because they made no contract with Levisohn, to whom the plaintiffs had intrusted their merchandise for sale, for the advancement of any moneys thereon, or in reliance upon Levisohn's possession of such merchandise, but made their advances to one Feinberg, who had possession of such merchandise without the consent of the plaintiffs, and whose possession was tortious as against them and whom they believed to be the true owner of such merchandise. The powers delegated by Levisohn to Feinberg were not merely ministerial powers, but involved the exercise of discretion, and it is conceded that discretionary powers cannot be delegated.

The pawnbrokers base their appeal on the claim that the act of the clerk was the act of Levisohn in that he was simply the instrument of Levisohn. There is no claim made that the pawnbrokers are in any way a guilty party.

About $20,000 is involved in all the litigation. The case on trial concerns goods valued at about $4,200. The other pawnbrokers with whom goods have been pawned are awaiting the decision in the present case with much interest.

Abel Crook and Samuel A. Singerman are the attorneys for the pawnbrokers, appellants, and Daniel P. Hayes is the attorney for Freudenheim Bros. & Levy.

Thief Who Robbed Niagara Falls Jeweler Pleads Guilty to Having Stolen Goods.

BUFFALO, N. Y., Feb. 18.—John Miller, formerly of Buffalo, who was caught robbing George Ditmar's jewelry store at Niagara Falls, Ont., Feb. 7, was sentenced yesterday to three years in Kingston, Ont., prison by Magistrate Alexander Fraser, of Niagara Falls. The prisoner pleaded guilty to burglary and to having stolen goods in his possession.

Miller has had something of an adventuresome career. He was born in Buffalo 24 years ago, and in 1891 was taken to Russia by relatives. In 1904 he is said to have been arrested with anarchists, but was released after seven weeks' imprisonment. Then he returned to America. Under the name of Frank Sobiski he was arrested at West Seneca, a suburb of Buffalo, on a charge of grand larceny. He was sent to Elmira Reformatory on Dec. 24, 1907, and released two years later, and soon afterward enlisted in the United States army, deserting last October from Fort Leavenworth. Last December he was arrested in Toronto and served a 30 days' sentence. In Hamilton, Ont., he stole several suits of clothes, it is alleged, but escaped arrest and went to Niagara Falls.

A silver watch, the property of Charles Brown, of 77 Kail St., Buffalo, was found in his possession. When the prisoner pleaded guilty he told the court that his correct name was John Miller, and that he had been in the habit of being known by that name. County Crown Attorney Cowper conducted the prosecution.

The prisoner was not represented. He threw himself upon the mercy of the court, asking that he be dealt with leniently.

Harry A. Niles has bought an interest in the wholesale jewelry business of Lowell & Darrow in Binghamton. Mr. Niles is now on a pleasure trip in the Bermudas.

The Japanese Cultured Pearl

IT IS NOT an artificial pearl.

IT IS A REAL ORIENTAL PEARL produced by the pearl oyster in much the same manner that all the other species of pearls are produced.

It is the product of a long, unceasing process of cultivation, consuming a period of not a day, a week or month—but FULL SEVEN YEARS and over, a process so characteristic of Nature's painstaking, patient, careful work in making her most favored gems.

Only a small part of all the oysters cultivated in the Bay of Ago mature, and of these, but a percentage yield the gem which, however, once produced, is well worth the labor, skill and patience spent.

It is as beautiful as the process is fascinating—although difficult.

You cannot afford not to have this pearl in your line.

Its merits adequately represented—its demand's assured.

Jewer Loses Suit Against Man He Cims Had Him Arrested When He Offered to Return Stolen Property.

suit brought by Harry Sartoris, who cted a jewelry and antique store at St. and Broadway, New York, in 1903. ast George H. Morgan, of 6 E. 40th St., r 0,000 damages for false arrest and im sonment, was decided Thursday by a in the New York Supreme Court, Term Part IV, before Justice Ford. brought in a verdict in favor of the f lant.

Sartoris was arrested after he had t information to Mr. Morgan about ver which had been stolen from the s home. The plaintiff alleged that he n every way to bear out his statement, he was taking steps to restore Mr. n's property and that his subsequent and humiliation were utterly unjusti Mr. Morgan's defense was that Sar was acquainted with the thieves and eeking to pursuade Morgan to com- the felony

day in March, 1903, Sartoris told the a man named Sears came to his store some silverware He asked Sears he had obtained it and Sears said one Peary Peary, Sears admited, had the silverware from a millionaire Morgan." Sartoris said he wanted tain the whole of the loot for the , and so made an arrangement with to have the rest brought on the fol day.

eturn for the silverware he gave Sears ck for $75 drawn in such a way that nk would not honor it. Sears prom o return the next day with the silver

ppears that Sartoris learned that the ware did not belong to J. Pierpont an, but to George H. Morgan. He went to Morgan's home, showed him f the stolen forks and told him to be store the next day with the detec- and the rest of the booty could be re- ed. Instead of doing this, he testified. Morgan reported the matter to the po- nd swore out a warrant for his (Sar-) arrest Magistrate Cornell held Sar but he was released later because there o evidence of wrongful intent on his n anything he had done.

summing up the case the attorney rep- ting Mr. Morgan claimed that the po- and not his client ordered Sartoris' . He claimed that Morgan had done any citizen would have done in giv- e police the information he did, and hat the police had no right to arrest ris on Morgan's behalf and that Cap- O'Connor made the arrest for the e.

question, the attorney pointed out, whether or not Morgan prosecuted the iff up to the time of his arrest. This, id, was not so: the police did it. an, he claimed, was summoned to simply as a witness, and after making idavit dropped the matter except as to stimony, and that the district-attorney uted the case.

Morgan was ill and could not be at ial.

attorney representing Mr. Sartoris argued that Morgan did prosecute the case and was at the police station when Sartoris was brought there, and, reading from testimony, pointed out that Morgan said, "I order his arrest." He dwelt on the point that Magistrate Cornell had not found sufficient cause for holding the plaintiff, and argued that there was a studied attempt to make Sartoris out a criminal. Making a further appeal on behalf of his client, he said that the law could not undo what had been done to Sartoris, his humiliation, etc., being already completed and the publicity given the case by the newspapers having, he said, done him great injustice.

In charging the jury the judge pointed out that the plaintiff claimed damages at the hands of the jury. He showed the jury that they were not trying a criminal case, for that fact was disposed of by the magistrate. He placed the case fully and impartially before the jury, pointing out the different arguments and explaining the law as applying to the case. He charged the jury that if they found for the plaintiff they must decide that the defendant acted without reasonable or probable cause and that he was actuated by malice.

The verdict for the defense followed.

New England Manufacturers Pass Resolutions Against the Federal Corporation Tax Law.

PROVIDENCE, R. I., Feb. 17.—The regular weekly meeting of the advisory council of the New England Manufacturing Jewelers' and Silversmiths' Association held at the rooms of the association at 42 Weybosset St., this afternoon, was attended by one of the largest gatherings since the annual meeting of the association. Two matters of more than usual importance were discussed and considered These were the Federal corporation tax law and the details of arrangements for the annual banquet and reception to President Taft on March 21.

The meeting was presided over by Vice-President Potter, in the absence of President Spencer, who is in the south. The report of the executive committee relative to the annual banquet was received, showing that the demand for tickets was very large. It was announced that several unique features would be introduced.

The board of governors reported that previous to the meeting of the council a meeting was held at which several applications for membership were favorably considered.

The resolutions drawn up as a result of the consideration of the Federal corporation tax law were presented and adopted. A copy of these resolutions with a letter urging support has been sent to the Senators and Representatives from Rhode Island and Massachusetts. The resolutions are as follows:

Whereas, At a meeting of the New England Manufacturing Jewelers' and Silversmiths' Association, representing 412 manufacturing jewelers located in Providence and the Attleboros, Mass., held at Providence, Feb. 3, 1910, the corporation tax law of Aug. 5, 1909, was carefully discussed and considered; and,

Whereas, Said law is inimical, not only to our interests but to the business interests of the country at large, as being at variance with established rights and principles, as infringing upon the domain of the sovereignty of the various States, and as discriminating between individuals operating as individuals and those operating through corporate bodies; and,

Whereas, Section 38 of said law provides that "the returns of corporations shall be filed in the office of the Commissioner of Internal Revenue and shall constitute public records and be open to inspection as such;" and,

Whereas, The act furthermore provides that "said tax shall be computed upon the remainder of said net income of such corporation, joint stock company, association or insurance company, for the year ending Dec. 31, 1909, and for each calendar year thereafter;" and,

Whereas, Ninety-nine per cent. of our corporations are private, their securities never being offered for public sale; and,

Whereas, The publication of the returns of such corporations would supply to their competitors, who are carrying on business in the form of partnerships, information that would be very injurious to their business; and,

Whereas, The publicity feature of the corporation tax is an unjust discrimination against corporations, especially as they exist in the manufacturing jewelry industry; and,

Whereas, Our business has its busy and dull seasons and these seasons vary with different manufacturers, according to, not only the class of goods made, whether gold, silver, plate or brass, but also as to whether said manufacturer sells the wholesale or retail trade; and,

Whereas, The date fixed in the act, viz., Dec 31 of each year, for the taking of the inventory comes in the midst of our busy season, thereby causing great inconvenience, loss of orders, customers, and much money; and,

Whereas, This loss of 10 days or two weeks taking stock gives our competitors who are working as partnerships, unfair advantage over us; therefore, be it

Resolved, That the unqualified indosement of this association be given to the efforts which are being made for the absolute repeal of this act.

Resolved, That awaiting the decision of the Supreme Court as to the constitutionality of the act, Congress should immediately pass an amendment fixing the date for making returns six weeks after the decision of said court, instead of March 1, as in the present law.

Resolved, That pending the repeal of the act as a whole, Congress be requested and urged to immediately abolish the publicity feature of the law, also to pass an amendment providing for the acceptance by the Commissioner of Internal Revenue of the inventory last taken nearest to Dec. 31 of each calendar year; be it further

Resolved, That a copy of the above preamble and resolutions be sent to the President, and to our Senators and Representatives in Congress.

A copy of the resolutions were sent according to the vote of the association to Senators Nelson W. Aldrich and George Peabody Wetmore and Congressman Adin B. Capron and William Paine Sheffield of Rhode Island, and Senators Henry Cabot Lodge and W. Murray Crane and Congressmen George P. Lawrence, Frederick H. Gillett, Charles G. Washburn, Charles Q. Tirrell, Butler Ames, Augustus P. Gardner, Ernest W. Roberts, Samuel W. McCall, John A. Keliher, Joseph F. O'Connell, Andrew J. Peters, John W. Weeks and William S. Greene, of Massachusetts.

Geo. O. Sawyer, Ainsworth, Nebr., Killed While Cranking His Automobile.

AINSWORTH, Nebr., Feb. 16.—George O. Sawyer, a jeweler of this town, was killed a week ago as a result of an accident which occurred near Wood Lake while cranking an automobile.

Mr. Sawyer, who besides being a jeweler, was one of the proprietors of the Ainsworth Auto Co., was taking a number of traveling men from Ainsworth to Wood Lake and had stopped his machine when near that place. When he began to crank his automoble to resume his journey the machine suddenly started, knocking him down, and before it could be stopped passed over his chest.

The injured man lived but half an hour after the accident.

JULIUS GOODMAN, 70 South Main Street, Memphis, Ten

Ill Health and Worry Cause Isaac Friedberg, a Pittsburg Jewelry Salesman, to Commit Suicide.

Pittsburg, Pa., Feb. 17.—Isaac Friedberg, a salesman employed by Loftis Bros. & Co., blew out his brains at his home in Allegheny Tuesday morning, and died almost instantly. Worry over financial matters and ill health are said to have caused him to end his life. Friedberg also was frenzied with grief because of the arrest of his wife a few minutes before he committed the deed, and the fatal shot was fired while the constable from Alderman George R. Hice's office was waiting in Friedberg's home arranging matters of bail. Friedberg had arranged over the telephone to meet the certain jewelry with the constable, which was satisfactory to the alderman. While the constable waited for Friedberg to get the jewelry he was to put up for security the latter went to an attic room and, placing a pistol at his temple, fired a bullet into his brain. The officer and Mrs. Friedberg ran to the room, where Friedberg was found on his knees with blood streaming from his head. A physician was summoned but the man was dead when medical aid reached the house.

That Friedberg had contemplated taking his life was evident from the fact that a letter was found on his person addressed to William T. Sanford, Pittsburg manager for Loftis Bros. & Co., for whom Friedberg worked. The letter was as follows:

2—14—1910, 10 P. M.

Dear Mr. Sanford—At this hour as I am writing to you this will probably be the last communication you will ever receive from me. I have by duty now after receiving such kind treatment at your hands for over three years to explain as near as possible all things that may have some benefit to you. I feel sure that in the end of all you will forgive me and accompany me kindly to its last resting place with a sigh or tear and I trust that you will always believe me in good will and honest intention.

Friedberg's business was confined principally to selling jewelry on the installment plan. He was also a broker in diamonds in a small way. It is said that Mrs. Friedberg had secured from Albert H. Weir, employed by Loftis Bros. & Co., several rings valued at about $300, and that she had not returned them at the proper time. The suit was brought to secure the rings and the warrant for her arrest followed as a result, she being charged with larceny by bailee.

Friedberg is the man who several months ago left a package of diamonds in the seat of a Pennsylvania Railroad train, and which it is said was picked up by a colored porter and later recovered by the police. Friedberg claimed to have left them in the car when he left the train.

The dead jeweler had been in the employ of the house of Loftis Bros. & Co. for some time, and his suicide caused something of a sensation in jewelry circles when the news was announced.

Mrs. Friedberg told the coroner that her husband had been ill for several weeks, and that was probably the cause of his act. The jewelry which Mrs. Friedberg had in her possession was turned over to Mr. Sanford, of Loftis Bros. & Co., and the charges against her dropped. It was not intended to prosecute the woman who, it is said, had clearly intended to return the rings to the firm for whom her husband worked.

Simon Jacobs, After Long Fight, Goes to Jail for Violating Bankruptcy Law.

Boston, Mass., Feb. 16.—Simon Jacobs, for many years a jeweler in Worcester, was Monday sentenced by Judge Dodge in the United States District Court to six months in the Greenfield jail and in addition fined $500, for violation of the bankruptcy law. Jacobs pleaded guilty to concealing assets from a trustee in bankruptcy.

Three years ago Jacobs closed his jewelry shop in Worcester and filed a petition in bankruptcy. His wife, Dora, who had got a divorce from him, appeared as a government witness and told how he had turned over to her watches and other jewelry. He was convicted and his counsel took the case to the United States Circuit Court of Appeals, which granted a new trial on technical grounds. The second trial was slated for the present term, but Jacobs appeared before Judge Dodge to-day and admitted his guilty. Jacobs' light sentence was due to the fact that his health is poor and the creditors had agreed to a punishment of this nature.

Jacobs recently offered his creditors a settlement on the basis of 20 cents on the dollar.

Treasurer of Lima, O., Jewelry Concern Makes an Assignment.

Lima, O., Feb. 16.—Following the troubles between the Hughes & Son Jewelry Co. and William H. Melville, its treasurer, over an accounting, which was mentioned in the last issue of The Jewelers' Circular-Weekly, financial complications began for Mr. Melville, which ended in his assignment Monday night. Mr. Melville conducted a drug store on Main and High Sts.

As previously announced, Thursday last, the Hughes & Son Jewelry Co. began suit against Mr. Melville to recover $9,611.73, which they claimed he had not accounted for as treasurer of the company, against which he alleged he had a counter claim. Monday the City Bank filed a claim of $3,021 against an oil and gas company with which Mr. Melville was associated, and under an order of execution the sheriff took possession of Melville's drug store. Later in the evening Mr. Melville made a general assignment under State laws to W. J. Leets, who immediately took possession and gave a bond of $40,000. This temporarily protects Mr. Melville's assets until the legal complications can be straightened out.

Wellington: 13 cases clocks, $205.

Death of William F. Bissing.

Baltimore, Md., Feb. 16.—In the death of William F. Bissing the local trade loses one of its oldest jewelers and watchmakers. He was 76 years old and died, Thursday, at St. Agnes Hospital. He had been ill for several months, and on Tuesday before his death his condition became so alarming he was immediately removed to the hospital.

Mr. Bissing had gained many good friends by his quiet and unassuming manner. He was born in Burgdorf, Germany, and came to Baltimore in 1860. He was located for many years at the corner of Baltimore St. and McClellan's Alley, but being in the zone of the great fire that destroyed the business center of the city in 1904, he lost nearly everything. After the fire he located at Park Ave. and Saratoga St. He always took a prominent part in the German social circles, and was one of the founders of the Concordia Society. He was for many years a member of the Germania Maennerchor and the Harmonie Singing Society. He is survived by three sons, Gustav, William F., Jr., and Harry Bissing, all of New York, and a nephew, Hans Bissing.

ad Schickerling on Trial on Old haje of Larceny of Diamonds f m Edelhoff Bros. & Co.

ial of Conrad Schickerling, a ac ring jeweler, Newark, N. J., was st Wednesday morning before Cne in the Court of General Ses- New York, on an indictment charg- ceny of $6,000 worth of diamonds rm of Edelhoff Bros. & Co., 571 , back in 1905. When Schicker- first arrested District Attorney sat as a city magistrate in the lice Court, where the case came . C Vandiver. Mr. Whitman's w partner had charge of the n. Because of this fact, the dis- ney, when Schickerling's case m the calendar asked Mr. Van- ct as special prosecutor and take the case Mr. Vandiver ac- d has as an associate counsel C. zie, who has been closely allied vil cases in which Edelhoff Bros. d Shickerling Bros. & Co. have d up. Abram Levy represented ie ants.

nplaint against Schickerling was June, 1906. Gustave A. Edel- unior member of the firm of Edel- & Co., the complainant, swore anuary of that year he obtained n $6,000 worth of diamonds um from Henry E. Oppenheimer Maiden Lane, for Schickerling, ed to compare them with some lready gathered for a lorgnette the wife of the president of a e then accused Schickerling of the diamonds which he, Edelhoff, as obliged to redeem before they returned to their original owner. ot, however, until the following hat Magistrate Whitman held ng for the Grand Jury. Other ts were found against him, but in 09, these were superseded by a lictment charging the larceny of and the pawn tickets alleged to e obtained by that means.

ngled, complicated relations be- affairs of the firms of Edelhoff Co. and Schickerling Bros. & Co. e that these concerns failed have been brought out in civil cases ve arisen between the trustees in y of the estate of Edelhoff Bros. d certain pawn brokers over the of pawned goods. At the time e two concerns were allied in the firm of Edelhoff Bros. & Co. ed at 574 Fifth Ave., and in the ding in a loft above was the firm erling Bros. & Co.

end of the first day of the trial hickerling, Feb. 15, 10 jurors had red. The counsel for the defense talesmen the following question, ved to be an obstacle for quali- many: "Would you feel any against a man in financial diffi- no would pawn goods, either his possession, for the purpose of s bills."

llowing morning was taken up in ion of the two remaining jurors case was opened that afternoon. the testimony relative to the concerns of Edelhoff Bros. & Co. and Schickerling Bros. & Co., proved to be a repetition of what had already been brought out at the civil trials. A number of witnesses have thus far been called for the prosecution to establish the ground that Schickerling pawned the diamonds and used the money to his own advantage without the consent of Edelhoff Bros. & Co., from whom the prosecutor claimed he obtained them without any right to dispose of them.

Gustav A. Edelhoff, who was president of the corporation of Edelhoff Bros. & Co. in 1906, is one of the principal witnesses examined thus far. He was questioned closely relative to the transactions by which Conrad Schickerling obtained the two packages of diamonds which he testified Schickerling afterwards pawned. The story Edelhoff told on the stand was substantially that Schickerling told him that he had a diamond lorgnette partly completed for Mrs. Richards, wife of the president of the State Bank, and that he needed some more particular sized stones in order to complete the piece. Edelhoff Bros. & Co. obtained from Henry E. Oppenheimer & Co. four packages of diamonds on memorandum, which were delivered to the Edelhoff Bros. & Co.'s store on Fifth Ave. The witness testified that he and his brother took the diamonds upstairs to the loft occupied by Schickerling Bros. & Co. and that Conrad Schickerling selected two packages and arranged for the delivery of the goods to him at the Cafe Martin, where he took his lunch, that noon. The witness testified that Schickerling straightway pawned the diamonds. The other two packages were returned to Henry E. Oppenheimer & Co.

Mr. Edelhoff was questioned very closely in regard to this transaction, and it was brought out that there were 39 diamonds all told, which were selected by Schickerling. He testified that Schickerling said to him that he expected to make the sale soon and that there would be a handsome profit for Edelhoff Bros. & Co. The witness stuck closely to the story that the goods were obtained from Henry E. Oppenheimer & Co. by Edelhoff Bros. & Co., and that Schickerling was to sell the goods for Edelhoff Bros. & Co. The diamonds were given Schickerling as the agent of the Edelhoffs.

Henry E. Oppenheimer, from whom the diamonds were obtained, testified to the transaction and identified the book which contained a duplicate of the memorandum bill on which the diamonds were obtained. The 39 diamonds were worth about $6,500, he said, and testified that he had no dealings with Schickerling in regard to diamonds at that time.

Arthur Edelhoff, a brother of Gustave Edelhoff, testified as to the transactions between himself and his brother and Conrad Schickerling over the diamonds, relating the incidents which led up to the delivery of the stones to Schickerling, his testimony being practically the same as that of his brother, although he was hazy on some of the points raised by the attorney.

Mr. and Mrs. Richards were called as witnesses, and both testified that they had no transactions with Schickerling in regard to the purchase of the jewelry. A number of other witnesses were also called, who were more or less closely connected with the delivery of the diamonds to Schickerling.

The prosecution has thus far sought to establish the fact that Schickerling obtained the diamonds from Edelhoff Bros. & Co. by means of false representations at the time; that he then pawned the goods and appropriated the money to other uses; that he used it without the consent or knowledge of Edelhoff Bros. & Co., and that his action was unwarranted and criminal in intent.

The prosecution practically finished its case Saturday, and the defense was opened Monday.

Conrad Schickerling is not interested in any way with the Alfred Schickerling Jewelry Co.

Death of Elliott Bell.

OGDENSBURG, N. Y., Feb. 16.—Elliott Bell, one of the founders of the old jewelry firm of Bell Bros., Ogdensburg, died, Feb. 9, at the home of his daughter, Mrs. Frank Chapman, at the age of 90.

Mr. Bell was born in this city and spent his whole life here. In 1874 he retired from the firm, and since that time had not engaged in active business. His wife, who was Miss Lodemia Hawley, has been dead many years. They had three children; two of them died in childhood, and only Mrs. Chapman survives. Her husband is the president of the Ogdensburg Bank.

Mr. Bell was the last member of his family. For many years and at the time of his death he was the ruling elder of the Presbyterian Church. He was the oldest native born resident of Ogdensburg.

The funeral was held last Friday morning, Rev. W. C. MacIntyre officiating.

Death of John W. Stevenson.

John W. Stevenson, formerly a retail jeweler at 192 Fulton St., Brooklyn, died Sunday of last week at his home, 486 Vanderbilt Ave. The interment was at Johnstown, Pa., Feb. 15.

Mr. Stevenson was born in Johnstown, Pa., 66 years ago, and had lived in Brooklyn 12 years. He was originally in business at Sunbury, Pottsville and Johnstown, Pa., for 20 years. He lost heavily in the flood at the latter place. He continued his store, but was burned out July 3, 1897. He then moved to Brooklyn, succeeding J. W. Day.

Mr. Stevenson suffered a stroke of paralysis last August, and the business was conducted by his daughter up to Oct. 1, when the business was discontinued.

Deceased is survived by one daughter.

H. W. Radder, Watertown, N. Y., who lost about $1,200 worth of diamonds by the act of young Leslie Tooley, who possessed the good will of the Radder family and the freedom of the jeweler's store, has offered a $50 reward for information which will lead to the young man's arrest. Nothing is known as to the boy's whereabouts, but it is believed that he is in New York. Mr. Radder said he regarded young Tooley almost as a son, and that his affection for him had not been changed since Tooley's theft. Mr. Radder says he feels sorry for the young boy.

lers of the Nebraska Retail Jewelers' Association Hold Interesting Sessions at Lincoln and Elect Officers.

, Nebr., Feb. 18.—The fourth vention of the Nebraska Retail Association, which closed last this city with a banquet at the l Club, proved in many ways to st enjoyable and profitable ever e organization. The growth in rship of the association and the timism and good fellowship re- the meeting speaks well for the ess of the jewelers in fostering harmony and good will.

tors were welcomed by Mayor icers for the ensuing year were d much other business of im- the organization transacted. it of optimism which animated convention was reflected by Combs in his closing words. The address is in full as follows:

PRESIDENT COMBS' ADDRESS.

ow Jewelers—It is a true delight to jewelers of Nebraska from the chair e charitable enough to honor me with o. No State in the Union is more facing and assimilating any modern f any magnitude than ours, and none re quickly and effectively to the pur- eficial movements. I claim that the ers' Association idea found immediate nd advocates in Nebraska, and already nd benefit is so well rooted that no how a more loyal membership nor a rtionate one, considering the fact that on has spent no money on organiza- having none to spend), has had no eld work done by the National Asso- nyone else, and that we are almost a luntary product, like many other good h Nebraska air is conducive of.

ce of any complaints from Nebraska or out of the association, or from any companies or jobbers during my term to me the most cheerful thing that any fficer could report, especially under neering conditions when friction or ding is so easy of occurrence. Could an entire year of such commercial y State a few years ago. It is either t I have been a mighty dead president ve had a model bunch to preside over, k the answer is—both. The supple- se is, we've all been too busy trying at the "prosperity talk" of last year erit in it. Some are still doubting the

State association, are entering now od that can and should prove our best —the growing youthful and building e is certainly the best and happiest re four years old now, infants in age, d large for our size and age," and by r's resolution to increase our dues to nsed ourselves to look and act like s" and give our secretary-treasurer ate excuse for furnishing a bond, and ow put into office men who can and some time to field work the funds we to use will enable energetic officers ry worthy jeweler of Nebraska in our ation, and then we can afford to meet and devise ways of universal as well efits. It will not be a difficult task to t of the boys in the association if a atic literary and missionary work is hen it will only be in keeping with ope leading) the other States, for it is *everywhere* to *get together* and *work* d the present administration feels very nd to its successors a real treasury deficit—the legacy of all previous ad- s, and we believe each succeeding year positive growth in membership and use- ur Nebraska association.

strained to call your attention to the ntion of the National Association held in Omaha last August, and I trust you will pardon the personal pride I feel in referring to it. The convention was an honor to our State, and this high honor was reciprocated and reflected back by our State, through the convention, throughout the entire United States, in the positive and proclaimed success of the meeting. It was planned and executed upon a self-supporting basis, without a semblance of begging or coercion, and again Nebraska set an unusual precedent. We gave more entertainment than was promised with the invitation, gave the exhibitors and home jobbers an abundant and unexpected amount of business at the convention, and then to every cash subscriber and every exhibitor who paid us the regular price for exhibit space we gave 25 per cent. of their money back, many of whom in acknowledging their surprise and appreciation said they "never heard of such a thing before." The temporary organization of the Omaha Jewelers' Club, to handle the convention, has become a permanent

T. L. COMBS, RE-ELECTED PRESIDENT.

organization, so that the local jewelers now are *companions as well as competitors* and *friends instead of foes*, and we shall enjoy the praise and pleasure of that splendid accomplishment until some State and city makes a better showing; and even that can never erase the sweet memory of a modestly made contract faithfully performed.

At the national executive committee meeting held in Detroit, Mich., Jan. 14 to 16, and which I had the pleasure to attend, it was decided to hold the next national convention in Detroit July 25, 26, 27 and 28, at the beautiful Cadillac Hotel, and the National Association will this year assume the entire financial responsibility for convention entertainment and exhibition space, in the hope of profiting enough thereby to create a working treasury sufficient to push organization and benefit work in every State. This year's convention will be a most important one, and I trust that our State will, as usual, be strongly represented by a full delegation of men and minds.

The national executive committee adopted an association membership door plate that I hope every Nebraska member will give our State or national secretary an immediate order for it, and never let it be off his store door while he remains in the jewelry business and take his hat off to every new one he sees.

Trade progress is evident everywhere—our most worthy and capable national president, Mr. Archibald, reports good news coming to him from all over the Union. He is in close touch with all the important interests and doings of the trade, and his opinion is being sought and his judgment acted upon by many of the most progressive and dependable concerns of the trade. As the active head of this great national organization his responsibility is intense and his standing with the various branches and organizations of the trade strongly affirms the wisdom of the Omaha convention in re-electing him. The Omaha convention further glorified itself also in discovering and electing to office a "stem winding, full jewel, open faced, 400-day" national secretary from Missouri, and he is making good. Each State's experience is interesting to every other; things occur in Nebraska that help to weave the coat of trade understanding and protection. Let me quote from a letter dated Feb. 8, this year, from one of the very prominent sterling silver makers unsolicited by me and volunteered by them:

> "Our representative, having recently visited Omaha, has just advised us that the jewelers of Omaha had criticised us severely for selling to the department stores of your city. We beg to state to you that our representative was in Omaha at the meeting of the American National Retail Jewelers' Association last Summer, and then and there agreed for us, that we, nor any of our agents would not hereafter sell any of our product to any of the department stores in Omaha, and we have strictly lived up to this agreement, for we, nor none of our agents, have sold any department stores in the State of Nebraska since that time.
>
> "For several years we did a satisfactory business in your city with two department stores, but lately the jewelers commenced to recognize us and our business commenced to grow with them, and as above state, last Summer we were satisfied to turn down the department store trade in your city, as we have done in most all of the large cities of the United States, until, at the present time, for the year 1909, our total sales to the jewelers was 98 per cent. of our product, and only 2 per cent. of our product went to the department stores, general stores, hardware stores, and all others combined. We are further willing to make affidavit to these facts if you desire it."

Here is another interesting case. A large concern, who probably sells to a larger percentage of jewelers all over the United States than any other one concerned in our line, had an exhibit at the last national convention at Omaha, and their representative committed an indiscretion that created deep disappointment, considerable talk and some ill feeling. The offender attempted to right the wrong by apology and explanation then, and once or twice since, on trips to Omaha. But in doubt of the matter being fully righted yet and determined to center the blame onto the bad judgment of the representative, and to thoroughly prove the upright and consistent attitude and action of the house before and since that National Association act, this same representative came to Omaha last week with thousands of letters and refused orders from unworthy and improper sources, and he spent most of the week showing the members of our Omaha Jewelers' Club, and returned this week to be with us at Tuesday night's meeting to take to himself alone the blame for that one little inconsistent act that undid or clouded the reputation and influence produced by our 50 years' adherence to the principles that both they and we advocate.

Can any of us gentlemen squarely compare the commercial buying and selling conditions in the jewelry business of even three years ago and today without a deep sensation of joy over the pleasing conditions of to-day and a blush of shame because the process of evolution was not started years before? The two conditions are almost a contradiction of each other and where lies the responsibility and credit? The lack of an association made easy and permissible the inconsistent price-pruning competitor, while the presence and sentiment of the association for the past four years has produced an awakening * * * making broader and better conditions in all departments of the jewelry interests.

With the evident marked and recognized growth of the association everywhere, why is so much said about "What good will it do?" and "Are you going to accomplish anything by it?" Why, fellow jewelers of Nebraska and visitors, it is not a question of what you can command or force from the manufacturers or jobbers. The good manufacturer and jobber is as anxious to join hands with us as we are to work pleasantly and profitably with them, knowing fully the relationship of our patronage to their prosperity * * * Don't bother about the maker and seller that *won't*: expend your thought and energies on and with the maker and seller that "WILL," and in

Assets and Liabilities of William A. Thompson, Boston, Mass., as Shown by His Schedules.

BOSTON, Mass., Feb. 19.—The schedule in bankruptcy of William A. Thompson, as filed in the United States District Court, give his liabilities as $80,297.06, or about $20,000 more than early estimates given out, and his assets as $4,500.

There are 16 secured creditors, whose claims amount to $12,860, but the unsecured claims aggregate $67,437. The assets embrace stock in trade valued at about $1,000 and machinery and tools worth $500.

In addition to the estimated free assets of $4,500, the receiver, Alfred W. Putnam, reports that there is a considerable quantity of jewels, pledged during the past year or two with various parties for loans, whose value exceeds in many cases the amount of the loans for which they are security. He has taken steps to recover the equity in these transactions.

In his report Mr. Putnam states that the bankrupt borrowed at different times sums of money from the Collateral Loan Co., of Boston, and that certain pawn tickets there for have been transferred to Frank E. Hawkes, whom he has asked the court to restrain from disposing of them until further order.

Receiver Putnam further states that to the best of his belief there are other tickets outstanding, held by Henry Kellogg; also tickets issued in the name of one John Vose, acting as agent for said William A. Thompson.

He therefore petitions that the loan company be restrained from in any way conveying, transferring, selling or disposing of any goods which it now has that were originally possessed by William A. Thompson or by Mr. Thompson in the name of John Vose, in order that the value of the equity may not be lost to the estate.

The list of secured creditors is as follows:

	Security.	Value *of debts.*
Frank E. Hawkes	*.....	$375
Otto Sharp	*.....	150
George Kellogg	*.....	200
H. O. Underwood	$1,500	1,500
Wrenn Bros.	2,100	2,300
Otis Norcross	300	300
Hammond M. Whitney	400	350
Federal Trust Co.	960	500
F. L. Hall	1,600	1,500
D. C. Wyman	400	225
George Rosen	600	400
Beacon Trust Co.	3,500	3,500
L. S. Levi	†.....	.....
Shawmut Commercial Paper Co.	1,800	1,635
C. W. Foss	500	320
	$13,660	$13,055

*Not stated. †Bill of sale.

The unsecured creditors include: Abel Bros. & Co., $6,798; Charles Adler's Sons, $2,452; Bunde & Upmeyer, $3,881; Alex. C. Chase, $2,560; Crossman Co., $630; Crane & Theurer, $200; Cory, Clark & Noon, $3,990; Ciner & Seeleman, $525; Arthur W. Cross, $939; Samuel Carro & Co., $55; W. W. Fulmer & Co., $785; H. H. Hunnewell, $500; I. Guntzburger & Son, $277; C. H. Greenleaf, $150; George H. Homer, $279; Howard & Cockshaw, $515; Himalaya Mining Co., $350; Harris & Lawton, Inc., $4,630; C. Vey Holman, $950; J. B. Humphrey Co., $450; Frank Kursh & Son, $275; J. Edward Kingsland, $5,029; E. Karelsen & Co., $337; Albert Lorsch & Co., $935; John Lamont & Son, $43; Leroy Mfg. Co., $233; David Mayer, $150; F. W. Mead, $25; Medford Ice Co., $45; Ludwig Nissen & Co., $2,485; Oppenheimer & Co., $870; A. Paul & Co., $47; Power & Allen, $4,757; George E. Ricker, $50; Joseph Rosenberg, $100; D. C. Percival & Co., Inc., $1,562; Jacob Rubin, $649; E. P. Reichheilm & Co., $11; Strobell & Crane, $1,262; L. Strasberger's Son & Co., $1,665; Nathan A. Sachs, $124; George H. Stevens, $150; George E. Smith, $110; L. Tannenbaum & Co., $702; John Vose, $85; Ben Wyman, $1,105; A. S. Hirshberg, $1,141; A. H. Pray, $1,000; Whipple & Campbell, $58; Carter, Howe & Co., $129; Ziruth, Kaiser & Co., $68; Conley & Straight, $38; Edison Elec. Ill. Co., $11; Wolfsheim & Sachs, $104; Oppenheim & Strauss, $1,792; Dennison Mfg. Co., $15; Kettell & Blake, $54; H. S. Alsterlund, $23; A. Stowell & Co., $24; National Surety Co., $3,300; J. H. Stetson, $1,000; F. P. Williams, $600; H. E. & J. E. Judd, $900.

Receivers Again Appointed for Welsh & Bro. Co., Baltimore, Md.

BALTIMORE, Md., Feb. 16.—Alfred H. Gill, Carter G. Osburn and Albert E. Donaldson have been appointed receivers under bonds of $100,000 for the Welsh & Bro. Co., retail jewelers, of this city. On June 19, 1908, receivers were appointed for the concern, but were later removed. However, the company failed to comply with the terms of the agreement upon which the receivers were discharged Sept. 30, 1908, when an extension was granted to the concern by its creditors, and the new petition was filed by the Jewelers Board of Trade.

An answer was filed by the concern through Attorney F. L. Klemm, admitting the allegations in the bill and consenting to the receivership.

The bill of complaint recites the appointment of receivers for the company on June 19, 1909, and their discharge, Sept. 30, 1908, under the extension agreement. This agreement provided, the bill states, that the company should continue business under the advice and control of a creditors' committee, and should give its notes for the claims against it. These notes were dated Sept. 30, 1908, and were payable Feb. 15, 1909, with the proviso that if not less than 15 per cent. of the claims were paid by that date the notes would be renewed for the balance until Aug. 15, 1909.

In the same way, if not less than 15 per cent. of the balance of the indebtedness was paid by the last named date, the notes were to be again renewed for the then balance until Feb. 15, 1910, when there was to be another renewal if 15 per cent. had been paid. Any default in the payments provided for in the agreement was to cause the agreement to be void and to give the creditors the right to take immediate action for the collection of their claims.

After reciting the terms of the agreement the bill states that the company made all the payments provided for in it and even anticipated in part the payment of the 15 per cent. of the notes due yesterday, so that only 10 per cent. was due then. A balance of $15,261.63 was due on the notes yesterday, on which 10 per cent. had been paid with interest, or $1,984.01.

JEWELERS' CLUB, PHILADELPHIA

Fifteenth Annual Banquet.

Saturday Evening, February 19, 1910

at the

Bellevue-Stratford Hotel.

PHILADELPHIA, Feb. 19.—Nearly four hundred jewelers and representatives of kindred businesses, together with men prominent in the life of the nation, met to-night at the 15th annual banquet of the Jewelers' Club of Philadelphia in the banquet hall of the Bellevue-Stratford Hotel. The gathering was notable in many ways, not the least of which was the opportunity it afforded of bringing together jewelers from all parts of the country, not to mention all sections of Pennsylvania and New Jersey, as well as New York City.

Set in perhaps the most magnificent dining hall in eastern Pennsylvania, this dinner surpassed any previous attempts of the Club; and be it known that Philadelphia, famed throughout the country for its feasts, considers the banquet of the jewelers the crest of them all. From every standpoint the affair was a splendid success, but particularly from the standpoint of the dinner itself and the service. Celebrating in advance the anniversary of his birthday, the orators paid high tribute to the father of his country and entwined in their eulogies praise for the present day leaders of the nation and condemned the "muck-raking" and "mud-slinging" of a part of the press and the discontented elements. But the reigning spirit of all the speeches was patriotism, which was not only manifested in the orations, but in the decorations of the hall and the songs and selections of the orchestra, which was hidden on the stage behind a great bank of azaleas, roses and ferns. About the walls of cream and gold were draped hundreds of huge American flags, while from the four corners of the hall fluttered the emblems of the nation in the breezes of large electric fans. Framed in a large American flag and all surrounded by a mass of greens was the portrait of Washington.

While the banquet was called for 7 o'clock, it was not until three quarters of an hour later that the feast began, the intervening time being spent by the guests, assembled in the Clover Room, in pleasant conversation and social intercourse. When Louis P. White, president of the club, finally gave the signal the members and guests entered the banquet hall to the strains of music.

When all had found their places the speakers and guests of the evening marched in. Mr. White, who acted as toastmaster, was escorted to the head of the gridiron table by Frank L. Wood, chairman of the

L. P. WHITE,
President of the Philadelphia Jewelers' Club.

reception committee, and the guests and speakers were escorted by the members of the reception committee as follows: N. O. Messinger, escorted by N. G. Eltinge; L. W. Buzby, by Charles E. Berry; Congressman William B. McKinley, by S. B. Kent; Congressman Ernest W. Roberts, by Frederick Keim; Mayor John E. Reyburn, by Benjamin F. Griscom; Prof. Ernest W. Lacey, by William P. Sackett; the Rev. Edwin Heyl Delk, by Fred Bloch; Steele F. Roberts, by H. C. Larter; J. P. Archibald, president of the American National Retail Jewelers' Association, by Robert C. Green; David Kaiser, president of the Jewelers' 24-Karat Club of New York, by Ira D. Garman; Col. John L. Shepherd, by T. J. Mooney, and T. Edgar Willson, editor of THE JEWELERS' CIRCULAR-WEEKLY, by George W. Reed.

A grace having been said by Dr. [illegible] the dinner began, the menu of the [illegible] being as follows:

Grape Fruit.
Puree of Fresh Mushrooms.
Almonds. Celery. Nuts. Relishes
Planked Roe Shad.
Potatoes Parisienne.
Filet of Beef Pique au Mader[illegible]
Green Peas.
Jewelers' Club Punch.
Terrapin.
Philadelphia Squab.
Romaine Salad.
Ices. Cakes.
Camembert. Roquef[illegible]rt
Toasted Crackers.
Coffee.
Amontillado. Pommery Sec. Sautern
Apollinaris.
Cigarettes. Cigars.

Aside from the beautiful set [illegible] cards, song book and list of partic[illegible] guests were given as souvenirs gold punch cups in the shape of a low lovin[illegible]

During the service of the feast a qu[illegible] sang several selections, including the "[illegible] tette from Rigoletto," the "Sextette [illegible] Lucia" and the Scottish ballad, "My [illegible] like a Red, Red Rose." The singers [illegible] Mrs. Clarence Bawden, soprano; Mrs. [illegible] Yocum Joyce, contralto; Dr. Fr[illegible] Freemantell, tenor; G. Russell S[illegible] baritone, and Clarence Bawden, [illegible] panist. The orchestra played popul[illegible] and the jewelers joined in all the c[illegible]

With the serving of the coffee Mr. [illegible] as toastmaster, proposed one toast, "[illegible] President of the United States," whi[illegible] drunk standing.

The toastmaster then in a few wo[illegible] minded the diners that it was just [illegible] ago to-night that the Jewelers' Cl[illegible] their guests had met in the same ha[illegible] at a speechless dinner. "To-night, he[illegible] we are going to hear from some of t[illegible] resentatives throughout the nation," [illegible] Mr. White. "To give a welcome t[illegible] who are strangers, I am going to ca[illegible] His Honor, Mayor John E. Reyburn." Mr. Reyburn in part said:

MAYOR REYBURN'S WELCOME

To those of you who are strangers or o[illegible]

wish to bid you welcome. You have started well
I don't think you will need any license from
authorities to go on.
cities the hospitality of Philadelphia is so
known and you have accepted it with such
artedness that I can only add that in my
